LOCAL OBSERVATIONS.

PART I.

BENGAL ALMANAC.

—●●●—

Moral Observations.

JANUARY.

This is one of the most pleasant months in the year. Its temperature is cool and refreshing, and extremely congenial to all but the victims of gout and rheumatism. The air at mid-day is generally clear and wholesome, but the mornings and evenings are sometimes damp and foggy.

The thermometer ranges in the shade, from 52° in the morning to 65° in the afternoon.

A northerly wind prevails during this month, but seldom blows with much strength: when it does, and is accompanied with rain, the cold is very disagreeable.

In the meat market there is a plentiful supply of beef, mutton, veal, lamb, pork, kid, poultry, &c. of the most superior kinds.

Game also is to be had in great abundance—snipe, duck, teal, &c.

The fish market is well supplied at this season, with beekty, or cockup, (the salmon of the East) moon ee, rooe, cutlah, quoye, sawke, selkah, bholah, orls, soles, and many others of inferior descriptions.

Vegetables of all kinds are now in the highest state of perfection: the markets abound with green peas, cauliflowers, cabbages, turnips, potatoes, asparagus, vains, carrots, spinage, greens, cucumbers, radishes, celery, lettuces, young onions, mol cole, kitchoo, French beans, seem, brinjalls, red and white beet, &c., &c.

Fruit trees, in general, begin to show their buds and blossoms this month; mangoes, peach, pumplinose (shaddock), rose apples, &c.

The fruits in season are Sylhet and China oranges, loquats, plantains, pine apples, long and round plums, large guavas, pumplinose, tipparah and a few others.

N. B.—The following fruits and vegetables, are procurable not only in this month but throughout the whole year, viz.—plantains, sugar canes, cocoanuts, guavas, pine apples, papiahs, custard-apples, jack, country almonds, tamarinds, omrah, barbutty, mant, sage, parsley, onions, radishes, lettuce, &c.

FEBRUARY.

This month is generally cool and comfortable particularly if the Northerly wind prevails, the weather afterwards becomes disagreeable, till a change of season takes place about the end of the month.

When the weather is variable, the wind blows principally from the N. W., veering round occasionally to the N. E. attended with clouds and dazzling rain, this continues till about the 20th, when the Southerly wind sets in. The weather now becomes mild and gentle, the days, however, sometimes rather hot, and the nights cold, with heavy dews.

The Thermometer, in the shade ranges, on a medium, from 54 to 75.

The measles in children, are very prevalent during the whole of this month.

Rheumatism and gout become less troublesome after the southerly winds have set in. Warm clothing becomes rather unpleasant to new comers, but not so to old Indians, whose blood is not so easily heated. Sometimes this month is rather snowery, when it protracts the cold season till the middle of the following month.

Meat continues good and abundant.

The fish market has the addition of the small bilsh, (the Indian mackerel)

The additional vegetables are pumpkin and young cucumbers and the fruits custard apples, mulberries, and small water-melons.

LOCAL OBSERVATIONS.

MARCH.

Water ranges in the shade from 68 in the morning to 82 in the afternoon. Operations of husbandry, generally commence this month, so soon as the season is aided by rain; this, however, sometimes happens at the latter end of the month, when it is occasioned by an unusual quantity of rain.

The fish market continues good.

There is still to be had in abundance, and the market has the addition of the gooteah, a small but well flavored fish.

Green peas and turnips disappear at the end of this month; sallad, cabbages, carrots and celery are on the decline, but asparagus and potatoes continue excellent. Green mangoes and unripe musk-mellons are to be had, also ourrah, greens, and water cresses.

Fruit is also plentiful—large water melons appear about the middle of the month, and continue in perfection till the middle of June.

The North-westers with thunder and lightning, and rain, generally appear towards the end of this month.

APRIL.

The beginning of this month is sometimes pleasant, particularly if the North-westers are frequent, but the middle and latter part are disagreeable in the extreme—it is one of the worst months in the year.

The Thermometer ranges in the shade from 80 in the morning to 90 in the afternoon, but when exposed to the sun, it rises to 110.

The wind blows from the south, and is very strong throughout the month, and when the wind is hot from the absence of rain, it becomes oppressive. This state of the weather is very unfavorable to vegetation.

The North-westers are at times attended with dreadful storms of thunder and lightning, during which rain and hail fall in torrents—these storms sometimes occasion much damage. The North-westers continue at intervals till the beginning, and sometimes till the middle of May.

This is an unfavorable season for meat, which begins to be flabby and poor, the fat spongy and yellow.

The fish market has the addition of the mango fish, so called from its annual visit to all the Bengal rivers, at this (the mango) season, to spawn: it appears as soon as the mango is formed on the tree, and disappears at the close of the season, that is about the middle of July. This fish has, perhaps, the most agreeable flavor of any in the world, and is so much sought after, (by natives as well as Europeans) that although not so large as a middle sized whiting, they are sold at the beginning of the month, at from 2 to 4 rupees per score. Before the end of May, as they become plentiful, they are sold at one rupee per score: and in June, two to three score may be had for a rupee. The fish market has also the addition of the carp and mungoor.

Potatoes, asparagus, onions, cucumbers and a few cabbage sprouts are the only vegetables to be procured.

Water melons and musk melons are in great perfection; but there is not much fruit now to be had in the market. Green mangoes for pickling, and corinda for lark are in great abundance.

MAY.

The weather, during this month is most oppressive, especially the latter half of the month—the wind continues Southerly, and the heat is scarcely bearable. Of all months in the year, the present is the most trying, particularly to those whose avocation compels them to be much out of doors. To be exposed to the sun without a covering, is extremely dangerous at any hour; from 10 to 5 o'clock, it would be ruin to any constitution, except to that of a native, inured to the climate by birth and practice; and even natives sometimes fall a sacrifice to the powerful influence of the sun. The heat in the first half of the month is sometimes relieved by North-westers, accompanied by refreshing showers, vivid lightning and loud thunder at times attend the North-westers.

The thermometer ranges in the shade, on a medium, from 85 in the morning to 94 in the afternoon—if exposed to the full influence of the sunbeams, it will rise to 149 degrees, and sometimes higher.

LOCAL OBSERVATIONS.

Grapes of the largest size, peaches, pine apples, limes, rose apples, lichees, jambrules, wampers, mangoes, jack, water melons, musk-melons, pomegranates, custard-apples, and a great variety of inferior fruits, are in season.

The meat market is very inferior to that of last month.

Fish continues good and abundant, the heekty excepted, which from the difficulty of its reaching the market in a firm state, becomes scarce. Mangoe fish is in great perfection this month.

Asparagus, potatoes, and cabbage sprouts, with indifferent turnips, sweet potatoes, cucumbers and onions are nearly all the vegetables now in the market. Pumpkins and several roots are however procurable.

JUNE.

The periodical rains set in about the middle of this month. Refreshing showers, fall occasionally, which cool the air and encourage vegetation.

The thermometer during the first half of this month, frequently rises to 99, in the shade at noon, but in general the rains, which commence about the 15th, keep the temperature much below this.

The weather throughout the whole of this month, is oppressive, in proportion to the quantity of rain which falls; if the weather be dry the heat is scarcely bearable; it is generally very close, not a breath of air from any quarter.

Meat, as must be expected, is now very indifferent.

The fish market is much the same as during last month.

Mangoes are in great abundance, and perfection. The Maldiv mangoes arrive in Calcutta about the middle or latter end of this month, and they are considered to be the best that can be procured in Bengal. Grapes, peaches, lichees, &c. disappear towards the end of this month. Custard apples, pine apples, and guavas are in great perfection.

Asparagus, potatoes and onions, are the principal vegetables that remain.

JULY.

This month is attended with much rain; the winds are light and variable: the weather frequently gloomy, and sometimes stormy, with heavy falls of rain, whilst at intervals it is fair, and mild.

The thermometer ranges in the shade from 80 in the morning to 89 in the afternoon.

The showery weather of the present and preceding month, is productive of the most beneficial effects to the grain.

Meat continues lean and poor.

The fish market continues good. The moonjee, the rooi, the cutlah, the quoye, the sovie, the mager, the elonga, the mura, and the cheonah are procurable in this month, and indeed all the year round. The hilsa (or sabbie) fish now makes its appearance. This fish is delicious, either boiled, baked, or fried: but it is generally considered very unwholesome. The natives devour it in such quantities, as to occasion great mortality among them. The fish, on being cured with tamarinds, forms a good substitute for herrings. It is then known by the appellation of the tamarind fish.

Mangoes and mangoe fish disappear this month.

Pine apples, custard apples, and guavas continue in season.

The vegetable market is very indifferent—asparagus is in perfection, but potatoes become poor and watery. Young lettuces, cucumbers and sweet potatoes are now procurable; also the cumranga and coinda.

AUGUST.

In the present month also there is abundance of rain,—the weather continues much the same as last. This and the preceding month are remarkable for heavy falls of rain, being the wettest in the whole year.

The thermometer ranges in the shade from 90 in the morning to 90 in the afternoon.

Light and variable winds and cloudy weather, with smart and light rain, prevail at the beginning of the month; the middle is sometimes fair, and tolerably cool, the remainder variable, attended, at times, with strong winds and heavy rain.

From the combined heat and moisture, in this month and the preceding, vegetation springs up and spreads with astonishing rapidity.

The meat and fish markets are much the same as last month.

Pumpkinose (shaddock) appear this month, pine-apples, custard-apples, and guavas continue in perfection.

The vegetables procurable are sallad, asparagus, cucumber, brinjalls, kidney-beans, radishes, turnips, cabbage sprouts, and indifferent potatoes. Indian corn, cucumbers, and apinage, are to be had now and all the year round, but they are tasteless, except at this season, when they become firm, good, and very palatable. The avigato pear is sometimes procurable at this period.

SEPTEMBER.

The rains subside considerably during this month.

The wind continues light and variable, attended with occasional cloudy weather. The days are sometimes fair, mild, and bright,—and the temperature agreeable.

The thermometer ranges from 78 in the morning to 85 in the afternoon.

The meat market is much the same as in last month.

The fish market experiences but slight improvement, for although there is abundance of fish, yet it is not always firm and good, except the brackly, which becomes larger and better flavoured. The following are also in the market —the bholah, desay tangrah, konteh, bhengira, gungtorih, kowell, toontee, pyrah chondah, and crawfish.

Vegetables and potatoes are very indifferent : yams come in season about this time.

In the fruit market, small oranges make their appearance, but they are very acid. Custard-apples, pine-apples, guavas, and pumpkinose continue in season.

OCTOBER.

The first half of this month, generally yields a good supply of rain, and introduces the powerful influence of a second spring season upon all vegetating bodies.

The rainy season breaks up generally between the 10th and 20th of this month; sometimes, however, it continues a little longer, but this is seldom the case, the concluding showers are frequently heavy, continuing from 6 to 24 hours, incessantly, after which the weather becomes fair, calm, and settled.

The thermometer ranges in the shade from 75 in the morning to 80 in the afternoon.

The winds are in general light and variable during this month, veering from south to north west thence to north and north east.

The monsoon changes about the 21st of this month, after which, light breezes set in from the north and north-east.

As soon as the weather sets in fair, the season becomes propitious for preparing the kitchen garden.

The meat markets begin to revive, and the fish market to improve, the brackly becomes firm, and the other fish proportionably good: snails make their appearance.

Vegetables and fruit continue much the same as last month, till the latter end of the present month, when, if the season is favorable, both experience a considerable improvement. Oranges become larger and better flavoured, and custard-apples are in great perfection.

Young potatoes, sometimes, make their appearance this month, but they have very little flavour;—they are small and watery. Pomegranates are procurable, also sour wood-apples.

NOVEMBER.

The weather is clear and settled and the thermometer temperate. Sometimes the days are warm, but the mornings and evenings are cool and agreeable.

If the rains cease early in October and the cold weather follows shortly after, November becomes a beautiful and delightful month. Nothing can be more favorable than this season for the renovation of the health of the valetudinarian, after having experienced the debilitating effects of the hot weather.

Light northerly winds prevail this month.

The thermometer ranges from 70 in the morning to 75 in the afternoon.

The seeds committed to the soil during the last and present month start into life, with a vigour unknown to other climates.

The meat market looks wholesome; beef, mutton, veal, pork and poultry, become firm and good.

Game comes in also this month, in considerable quantities; wild ducks, snipe, teal, &c.

Abundance of fish is procurable, also firm and good, such as beekty, hauspatah, gungtorah, mirgal, carp, and mangoe-fish without roes.

The vegetable market begins afresh this month by the introduction of green peas, new potatoes, lettuces, greens of different kinds, spinach, radishes, and turnips.

In the fruit market may be had oranges, lim-s, lemons, pumplenose, pine-apples, custard-apples, papiah, plantains, cocoanuts, country almonds, pomegranates, sour wood apples, &c.

DECEMBER.

The weather continues fair, cool, and, on the whole, extremely fine, throughout the month, with a light northerly wind.

The days and nights are cold and clear, and the mornings and evenings foggy, particularly at the latter end of the month.

The thermometer ranges from 58 in the morning to 65 in the afternoon.

The meat and fish markets are in great perfection, both as to quantity and quality; game of all kinds in abundance. —

The vegetable market is excellent, yielding green peas, young potatoes, lettuces, young onions, radishes, small sallad, sweet potatoes, French beans, acorn, brinjall, yam, carrot, turnips, greens, young cabbages and cauliflowers.

The fruit market continues much the same as last month—Brazil currants (Hipporahs) make their appearance this month, together with wood apples and other fruit.

GARDENER'S CALENDAR.

JANUARY.

The season is too far advanced to sow the generality of vegetables with much prospect of success; but turnips, carrots, love-apples, vegetable marrow, all sorts of pumpkins, lettuce, endive, radish, mustard and cress, spinage and Nepaul spinage may be sown during all this month; also successive crops of late cabbage and knol khole every fortnight. Turnips are said to succeed best when placed in rows: they should be thinned to a distance of six inches from each other. Carrots rarely succeed well when planted at this season; they should be thinned, but not transplanted, except when required for seed. Love apples, when two or three inches high, should be planted out in beds at five inches apart; afterwards transplant in rows two feet from each other, with a frame work to run upon. Vegetable marrow should be sown in rich light soil: earth up the stems as they increase, and peg down the leading branches at a joint. Lettuce and endive should be planted in boxes or beds, and transplanted at one foot apart from each other; they may also be sown in beds, and thinned to the proper distance—a few days before use they should be blanched by tying the tops of the outer leaves over the rest. Radish, mustard and cress may be sown every week or ten days: the two last throughout the year. Spinage, to be sown in beds and thinned until the plants are one foot apart. Nepaul spinage should be planted in rows, with trellis work to run over. This vegetable continues to flower and bring forth fresh leaves throughout the year, and requires no care. Cabbage and knol khole should be planted in boxes or beds, and transplanted into other beds about three or four inches apart in three weeks or a month. They may be transplanted a second or third time: especially the latter. When transplanted for the last time they should be put in well manured trenches at two feet from each other. Horse manure and ground bones are strongly recommended for all the cabbage tribe. With care common cabbage and knol khole may be procured during every month in the year, but those produced from the end of October to the middle of February, are far superior to any others.

Potatoes may be planted during the first week of this month also; and if the season prove cool they may be expected to arrive at considerable perfection. From the middle of July to the early part of September, is the most favourable time for planting potatoes.

In this month the following vegetables and fruits are procurable in the market, in large quantities and at very cheap prices,—carrots, turnips, cabbage, knol-khole, beet root, Bombay and country onions, beans, country beans, double beans, French bean, white beans, and peas. Pumpkinose, Sylhet oranges, country oranges, pomegranates, guavas, custard apples, limes, plantain, loquats, long plums, tippacah or Brazil goose berries, and several other kinds of common fruits and vegetables.

Peach trees should be slightly pruned during this month, and the small fruit thinned, where too thick.

The sweet flowers are now in bloom, and at the end of the month the collection of flower seeds should commence. Indeed early mignonett and larkspur seeds may be collected in the beginning of the month. Sow early melon and water melon seeds also the last crop of red pumpkins.

FEBRUARY.

The remarks on last month apply generally to this; but there is less chance of success in rearing vegetables, as they seldom acquire much strength before the hot winds set in. Turnips and carrots rarely succeed, but radish, mustard and cress, lettuce, endive, spinage, and some of the cabbage tribe may all be planted in this month and throughout the year. Throughout this month the collection of flower seeds is carried on rapidly.

All the fruits, vegetables, and flowers mentioned as procurable in the market in January, may be had in as great perfection and as cheap or cheaper during this month.

In this month peas are plentiful, and the following may be obtained of good quality,—Jerusalem artichokes, asparagus, duffin beans, French beans, scarlet runners, beet root, brucoli, cabbage, carrots, cauliflower, celery, endive, lettuce, knol khole, onions, parsnips, spinage, turnips, and yams. Also the following fruits,—custard apple, Brazil gooseberries, guavas, lemons, mulberries, pumpkinose, raspberries, straw-berries, peaches, pine-apples, and a few other kinds. Melons and cucumbers should be sown during this month. Gather winter flower seeds. Lay bare, for a fortnight or three weeks, the roots of peach trees, to harden, and preserve them from being destroyed by white ants. Use house-plaster rubbish, as manure, when closing the roots.

MARCH

But few vegetables come to any perfection that are sown in this month; but it is desirable to sow successive crops of cabbage and lettuce which may be planted in beds which are partly protected from the sun, and transplanted into rows as required.

In the market brinjal, carrots and turnips may be procured in considerable quantities and pretty good. Turnips are generally very stringy towards the end of March. Country radish and all kinds of country greens may be had in large quantities, and all the kinds of fruit procurable in February are obtainable with the addition of green mangoes and jakes, a few dates and black-berries. Young plants should be weeded in this month, and encircled with a slight embankment, to retain the water which they must be afforded during the greater part of this and the two succeeding months. Melons and cucumbers, should be sown during this month also as well as grape and apple seeds, Indian-corn and sugar-cane. Still gather winter flower seeds.

APRIL.

The remarks on March apply equally to this month; but as the hot season advances the chances of success in rearing most kinds of vegetables diminish. Late melons and cucumbers may be sown during this month likewise. Sow melons in rich light soil, giving the plants plenty of room to run. When they have thrown out four leaves stop them by pinching off the leading bud. they will then produce two lateral shoots, which stop in a similar manner; and so continue to treat each new formed shoot, stopping it at the second or third joint. When the plants begin to show fruit, stop the fruiting branches two joints before the fruit. Cover the ground with leaves or straw to keep the roots cool and to prevent the fruit from becoming spotted.

In this month plantains, pine-apples, pumplenose, black-berries, ripe mangoes, peaches, lichees and all the other fruits procurable in March are abundant in the market. Carrots, turnips, beans and cabbages are reduced in quantity, and their prices are considerably increased, when good. Brinjal, radish, water pumpkins, and greens in plenty are to be had. Musk-melons, and several other country melons, come into season about the middle of this month.

In the latter part of this month plant all the amaryllis or lily tribe, and in fact all bulbous roots and plants, should be sown or planted. Sow early cucumbers, okra, Indian corn, sugar-cane, grape, apple, and all country fruit seeds, so that the plants may have the advantage of the rain to grow up vigorously. Gather winter flower seeds and commence grafting and budding. Plentifully water young plants.

MAY.

Mangoes, pine-apples, pumplenose, plantains, and all the fruits procurable last month are supplied abundantly. Brinjals, greens, and summer flowers of almost all sorts are to be had plentifully in the market. Melons, water-melons, &c., are plentifully supplied to the market about the end of this month.

Grafting and budding of all kinds, should be performed during this month, which is though the hottest, yet the most favorable for such operations. And the gathering of the seeds of winter flowers, should be finished at its end. Water young plants. Lichees and peaches get scarce at the end of this month, but wampees, wild lichees and melons continue plentiful. Sow long cucumbers and white pumpkin seeds, grape seeds, peach stones and fruit seeds generally.

JUNE.

Asparagus seed should be sown in boxes towards the latter end of the month, and transplanted in November, in rows two feet apart, and the plants one foot from each other. The soil should be mixed with a large portion of rotten horse manure. It is scarcely possible to make the ground too rich for asparagus. Fresh asparagus seed should be sown whenever procurable, and especially between the end of June and the beginning of December.

In this month mangoes, oranges, pine-apples, pumplenoses, plantains, pomegranates, cucumbers, melons, limes, wild-lichees, jake, monkey-jake, and a great variety of berries and other fruits are abundantly supplied at low prices in the market. Carrots, turnips, cabbage, and other European vegetables, are very scarce and dear; but country greens and brinjals, are procurable in small quantities. About the end of the month melons disappear.

Young and tender plants should be carefully watered every evening during this month, and chillies, okra, Indian-corn, pea-sticks, jute, red spinach, China spinach and

the common native greens in general, including pulbul, kurralla, jhingah, hurbutter and chichingab, should be sown. The planting of cuttings of all kinds of fruits and flowers, should be commenced at the end of this month. Sow peach stones and fruit seeds generally. Sow long cucumber seeds at the end of the month.

JULY.

At the end of this month it is desirable to sow seeds for early parsley, beet, knol khol, cabbage, cauliflower, brocoli, asparagus, endive, lettuce, carrots, turnips and other winter vegetables.

Celery.—Sow in boxes in this and the five following months. Remove to beds when about three in height, and into trenches, as required, after being a month in the beds. The trenches should be 2½ feet deep, filled up with a foot of light soil and stable manure, and afterwards gradually, as the plant grows, with light soil, till within about six inches of the top. Water for the first two months with the hand, after which they may be occasionally flooded.

Another way.—Having sown and transplanted as above, remove into trenches four feet apart, and about 18 inches deep, nearly filled with horse manure and rich earth. As the plant grows, bank up into ridges with light soil. By this method the root of the plant, and not the stem, is watered when flooded.

Knol khol, cabbage, cauliflower, and brocoli.—Sow in boxes during this and five following months. Remove to beds when two inches high, and transplant the cabbage and knol khol twice, and cauliflower and brocoli at least three times, allowing the growth of a couple of new leaves between each planting.

Asparagus.—Sow in beds in July, and remove the plants in November, into raised beds of one or two rows. When the berries become red, cut the plants two inches above the ground and top dress, when they will be ready to cut in ten days. By dressing the beds in succession, asparagus may be produced for the table all the year.—stable manure is the best, and the plant should invariably be watered by the hand, and never flooded except in very hot weather. Plants if taken care of will produce for 8 or 10 years. They should, however, be wintered (roots cleared of the earth and exposed for some days) and the ground dressed every second year.

Lettuce and endive.—Sow in boxes or pots surrounded with water, till the plants appear, otherwise the small root will destroy them. Plant out as required, and tie up a few days before you cut for use.

Carrots.—Sow in a light, deep sandy soil.

Turnips.—Sow in a rich soil, well manured.

In the market all Europe vegetables are very scarce and dear this month. Brinjal, greens, and other native vegetables are supplied. Pine apples, and melons are getting out of season. Plantains, pumpkins and cucumbers, are plentiful.

Mangoes continue till towards the end of the month. Pine apples, jakes, monkey-jakes bunch, and guavas are very abundant. Young plants and grafts should all be planted out during this month, and the trees pruned as soon as they have done bearing, as that is the only time when it can be done with benefit to them. Cuttings of all trees and shrubs should be put in this month, as well as slips of artichokes, which, as soon as they have established themselves, should be cut down close to the ground. Standard flower and dahlia seeds should be sown. Balsam seeds should be sown in the beginning of the month and until the end of October.

All grafting and budding should be finished this month, so that the rains of the two succeeding months may cause them to shoot up with vigor when planted out. Wampees, blackberries and wild lichees go out of season during the early part of this month. Sow mangoes, jake, blackberry, date, and all kinds of summer fruit seeds during this month—they will thrive well—likewise sow gooseberries. Expose the roots of young plants from the middle of this month to the middle of September, to harden them, or they may fall sacrifices to white ants. Sow the irregular early crop of potatoes.

AUGUST.

Successive crops of all the vegetables sown in July should be planted at the end of this month, more especially celery and beet, which should be fit to transplant a second time before the monsoon. These two vegetables are less likely to suffer by excessive rain than most others. Artichokes should be sown in beds during this month, three inches between each seed, so as to allow the removal of the plants in November without disturbing the roots. To propagate by suckers, take off the suckers, and prick them

out six inches apart; and when they become well rooted, transplant into deep rich soil, setting them two feet apart. If large, suckers may be planted at once where they are intended to remain.

To prevent artichokes running to leaf, and producing small heads, when the plants are from ten to fifteen inches high, cut them off close to the ground, and cover them over with light dry old manure: when they have advanced a few inches repeat the operation. If the young plants are tied up for a few days before being cut off, they will become blanched and may be eaten as salad.

French beans and scarlet runners may be sown during this month, and until February. They should be planted in rows two feet apart North and South, and be well supported with sticks, or with an arched bamboo trellis, which is very ornamental. Sow also early radish, turnip, cabbage, cauliflower, parsley, celery, onions, tobacco, and early flower and vegetable seeds, generally at the end of this month. Sow the first regular crop of potatoes.

Mangoes, are very scarce. Plantains pine-apples and guava's continue in abundance, and custard apples, kumrunghs, punnillas and avigato-pears, corrodas, come into season.

Insects are excessively numerous and destructive. The orange tribe should be budded and inarched, and propagated by seeds. Continue grafting mangoes. Transplant cotton. Propagate carnations and plinks by layers. Finish cutting peach and lichee grafts. About the end of this month sow dahlia balsam and early niglolsett, sunflower, cox-comb, polianthus, hybiscus, holyhock, lark spur, lupin, poppy, sweet-sultan, onion, cabbage, aulsofy, cauliflower, lettuce, and all the other seeds sown last month.

SEPTEMBER.

Continue to sow all the vegetables mentioned for August. Transplant early cabbage, cauliflower, brocoli, beet, celery, endive, and lettuce. Two or three crops of peas may be sown during this month, if the weather is favourable, but not with much prospect of success unless sown at the latter end.

Peas should be planted in trenches, in double rows, about two feet apart. They should be watered by hand for the first fortnight and afterwards flooded until they are two or three feet high, by which time the winter dews will be sufficient to separate them. Peas require no manure, but should be planted in good soil. Sun-flower seeds for the winter should be planted now; but this flower grows all the year round. Coxcomb, larkspur and mignonett seeds might be sown.

Avigato pears still continue, and early loquats, and sour oranges begin to make their appearance about the end of this month. A species of hard, tasteless musk melon is procurable in abundance. Sow avigato pear stones. Young potatoes in season. The American cotton sown early in full fruit. Plant Cape bulbs, either in the ground, or in very deep pots well drained. The turnips and cabbages are much infested by a small dark caterpillar which may be destroyed by sprinkling the plants with powdered lime. The rice begins to flower. Put down cuttings of geraniums, roses, violets, heart's-ease, &c. Flowers in great perfection. As most of the peach trees will have lost their leaves, the roots should be opened and exposed for 14 days, and then strongly manured. Potatoes should be sown during this month. The whole of the grafts should be cut this month, if possible so that they might still benefit by the showers of rain that fall at this time.

OCTOBER.

The remarks on last month apply equally to this. Continue to sow all kinds of vegetable seeds in boxes; transplant from the boxes into beds; and immediately after the first heavy fall of rain remove into beds, rows and trenches, more particularly celery, beet, cabbage, knol khol, cauliflower, and brocoli. Care should be taken in finally transplanting all the cabbage tribe this month, to provide against heavy falls of rain, by making trenches to carry off the water. Crops of peas should be sown every week or ten days from the beginning of this month until the end of December—peas sown after that time seldom pod.

Onions and leeks should be sown during this month also, in light rich earth, carefully covering the seed. When leeks are a few inches high, plant them in drills, eighteen inches apart, and nine inches plant from plant. As they increase in size draw up the earth to their stems, in order to blanch them, as leeks are much improved by blanching.

Sow parsnips in rich deep soil. Trench the ground two feet deep, sow the seeds in drills one foot apart, and thin the plants so as to leave eight inches from each other,

The main beds for strawberries should be planted. Oranges begin to get palatable this month, and the cutting of the sugar-cane commences. Brinjals and native-greens become plentiful, and the last crop of Indian-corn is gathered. The last of the grafts should positively be cut, and suckers transplanted. Plant larkspur, marigold, sweet-sultan, mignonett, pinks, carnation, asters, and all annual plants during this month. Propagate geraniums by slips and sow all kinds of vegetable and flower seeds every six or eight days, throughout the month.

NOVEMBER.

This is the month for activity in the vegetable gardens, as but few things arrive at much perfection which are not planted before the end of this month. The principal crops of peas should be sown during the first week; and continued every six days during the month; also French beans, scarlet runners, broad beans, and Windsor beans. Sow beet, knol-khole, cabbage, brocoll, and cauliflowers, in beds, and remove from beds into rows. Transplant celery and remove into trenches. Plant out artichokes and asparagus.

The middle crop of potatoes should be sown about the middle of this month. They should be planted in light soil, in which no horse dung is mixed. The potatoes should be cut according to the number of eyes, taking care that each piece is of sufficient size to nourish the eye, until it roots. Twice the size, of a man's thumb nail of fall, round the eye, will do well. When planted, not more than one inch, or one and a half inch, of soil should be placed over it; and it should not be watered or sterner than once in four days, even during the hottest weather. As it grows up, the soil should be benked up to the stalk. Great care should be taken not to give too much water, and not to put too much soil upon the potatoes when first planted.

This is the last month in which the generality of vegetables can be sown with advantage. Sow winter fruit seeds of all kinds, except oranges. Oranges, guavas and plantains and all Europe and Cape vegetables are abundant.

DECEMBER.

In the beginning of the month sow French beans, scarlet-runners, broad and Windsor beans. Peas sown in this month produce scantily: Plant out late celery from boxes to beds, and remove from beds to trenches. Sow late cabbages and knol-khole; and transplant as above. Vegetable-marrow may be sown in the early part of this month in light rich soil. Earth up the stems of the plants as they increase ingrowth, and peg the leading branches down at a joint, and they will strike root.

Potatoes may be planted until the end of this month; but those sown during the first fortnight are most likely to succeed. When potatoes are planted whole, the produce is finer than when they are divided into two or three pieces; but the same number of potatoes yield a far larger crop by the latter than by the former method. Potatoes should be planted in beds fully exposed to the sun. In rather shady places the crop is small; and when altogether excluded from the direct rays of the sun, they produce nothing.

Europe and native vegetables are plentiful during this month; and also all sorts of brinjals, sweet-potatoes, yams. Fruits are scarce, except plantains, plums, gooseberries, guavas and oranges. Flowers of all kinds are abundant.

A good month for sowing early musk-melons and dwarf-cucumber seeds, as well as peas, radish, and spinach; but very few other vegetable seeds. Most of the exotic plants will also now be flowering.

Straw berries come in at the middle of this month, and last through all the next.

Memoranda

FOR THE

CONCLUSION OF THE YEAR.

Calculations of the Almanac.

The times given in this Almanac are the civil or common reckoning of time, from Midnight to Midnight. The column of the Sun's Meridian passage is calculated to the nearest second of time for every day of the year, with the same accuracy as it is in the Nautical Almanac, a watch ought to point exactly to the hour indicated for that day, when the Sun dial marks twelve. There is no need now to refer to a table of Equation of time, should however this Equation be required, it may be had as readily: it is the time beyond 12A or the time wanting to 12A, given in this column for each day of the year. The Moon will serve as well to set or compare a watch by the same Sun dial: let the shadow of the gnomon fall on 12A, a watch ought to show at the same moment the time indicated in the column "Moon on Meridian" answering to the day the observation is made, which time is calculated to the nearest tenth of a minute; should the shadow fall on any other hour, as 3, 4 or 5, add to the time indicated in that same column, about 62 minutes for every hour after twelve, but should the dial show 6A, 8A, or 11A, as many minutes must be deducted for every hour before 12.

The present mode of denoting the times of the Moon's Phases and those of High Water, After Noon and After Midnight, has been substituted for Morning, After Noon, Evening, Night;

When the symbol (\oslash) denoting opposition, occurs, such as on the 2d May, we are to understand that the Moon does not pass the Meridian of Calcutta, on that (civil) day. This is the case once, some times twice in a Lunar month and arises from the circumstance of the Lunar day being longer than the mean Solar day. In the present instance the excess is 63 minutes or the Lunar day is equal 25A. The Moon passes the Meridian on the 1st in the Evening at 11A 0 m., 5, viz. 60 m. before Midnight and does not return to the same Meridian until Midnight of the following day, which time, agreeable to civil reckoning, is the 3d May at Midnight.

And because the Moon does not pass the Meridian in every civil day, but is wanting to do so, once at least in every civil month, and as one Meridian passage of the Moon produces only two High Water tides, there are in every Lunar month not less than two High Water tides wanting; therefore on two days every month, falling some times after Midnight sometimes after Noon, there is but one High Water given. The march of the tide-wave over the surface of the ocean is of immense rapidity, the crest of the wave travelling round the globe in every Lunar day.

In a place like Calcutta, so far removed from the Sea, the tides are strongly affected by the Monsoons, occasional winds, the freshes, and various local causes, so that it will always remain an imperfectly solved problem to give the times of the High Water with accuracy; It will always, however, be found that, for any period there will be only twice the Number of High Water tides, as the Moon passes the Meridian.

The calculations for this year, for the times of High Water, have been made agreeably to La Place's Theory on Tides. From a comparison with the times of High Water actually observed and recorded in Books kept for that purpose at Kyll's Dockyard it appears that the times given in this column, were much nearer the truth than those given before, differing generally in a few minutes only, whilst in former years the difference amounted frequently to 2 and even 3 or more hours.

It should be recollected that the time of High Water is not that when the ships in the river turn round, but that when the water is actually highest, which always happens about half an hour before the current is changing its direction.

True or apparent time is that deduced from an observation of the Sun on the Meridian, and this time being a variable quantity, requires the addition or subtraction of the equation of time to change it into mean solar time, as shewn by a well regulated Clock, which is an uniform measure of time, the length of any portion of it, is equal to the average of all the apparent similar portions in one year.

The two columns of the Sun's rising and setting include the refraction, which causes the Sun and all the heavenly bodies to rise on the eastern horizon about two minutes earlier, and to set on the west, about two minutes later than they would rise or set were the Earth not surrounded by an Atmosphere. Refraction is not exactly of the same duration throughout the whole year, the duration is in proportion of the obliquity of the Sun's rising or setting.

At the head of each month, will be seen whether Saturn, Jupiter, Mars or Venus are visible in the Morning or Evening, and on which days of the month these Planets will be in conjunction (\odot) with the Moon, or with each other.

A column has been added this year for the 5th time, viz. the Sun's Declination at Noon for every day in the year, which being calculated with second differences, is as correct as that given in the Nautical Almanac.

Again, at the head of each Month the observations of the Highest and Lowest Pressure and Temperature have been added; they are the average of the twelve preceding years, the Least Temperature is that at Sun rise, the Greatest Press. at 9A. 50m. A. M. the Greatest Temp at 2A. 50m. A. M. and the Least Pressure at 4A. A. M. The observations of the Barometer are recorded in inches and hundredth parts of an inch.

The temperature registered is that of the air in the shade; but besides this, the power of the Sun's rays at the time of Greatest Temperature, is also given.

ECLIPSES OF THE SUN AND MOON.

In the year 1 there will be five Eclipses of which three of the Sun and two of the Moon, the two last only are partly visible at Calcutta.

- I. A total Eclipse of the Moon, June the 1st partly visible at Calcutta See Diagram

M. Middle of the Eclipse, (ditto)	4	43 6
E. Last Contact with shadow is invisible		

If the Moon's Diameter be taken as 1 then the Magnitude of the Eclipse is 1, 33

- II. A partial Eclipse of the Sun, June 16th 6^h Morning visible in the South Pacific Ocean only.

- III. A Partial Eclipse of the Sun, November 10th... .. 8 44 After Noon
Visible in a small portion of the Great Southern Ocean.

- IV. A total Eclipse of the Moon November 25th. Partly visible at Calcutta
See Diagram.

**THE
COMPANION TO THE ALMANAC.**

The Companion to the Almanac.

THE CALENDAR, AND ITS SUCCESSIVE REFORMS.

The divisions of time, such as they are presented in the Calendar, are composed of days, weeks, months, and years. The modes of determining these divisions, have been various amongst the nations of antiquity, and there are still variations in these modes in the modern world.

The manner of reckoning the days by the ancient Jews, and which subsists amongst that people at the present time, is, to commence the day at a certain hour of the evening, and to finish it on the next evening at the same hour. Thus their sabbath begins on the afternoon of Friday, and is completed on the afternoon of Saturday. The Roman Catholic church also commences its festivals in the evening; and this custom is retained amongst ourselves in some of our popular observances, such as the eve of St. John, and Christmas eve.

The civil day now commences at 12 o'clock at midnight, and lasts till the same hour of the following night. The civil day is distinguished from the astronomical day, which begins at noon, and is counted up to 24 hours, terminating at the succeeding noon. This mode of reckoning the day, is that used in the Nautical Almanac, and it sometimes leads to mistakes with persons not familiar with this manner of computation: a little consideration will obviate the difficulty. Thus, January 10, fifteen hours in astronomical time, is January 11, 3 in the morning, civil time. In France, and in most of the states of Europe, as with us, the hours are counted up to 12, from midnight till noon, and from noon till midnight. In parts of Italy, and of Germany, the day is held to commence about sun-set. The hours are counted on till the next sun-set. This mode is very inconvenient to travellers, as the noon of the "Italian hours" at the summer solstice is 16 o'clock, and 19 o'clock at the winter solstice.

The English names of the days of the week are derived from the Saxons; and they partly adopted these names from the more civilized nations of antiquity; The following ingenious origin of the ancient names has been suggested in connexion with astronomical science. The planetary arrangement of Ptolemy was thus 1, Saturn; 2, Jupiter; 3, Mars; 4, the Sun; 5, Venus; 6, Mercury; 7 the Moon. Each of these planets was supposed to preside, successively, over each hour of the 24 of each day, in the order above given. In this way Saturn would preside over the first hour of the first day; Jupiter over the second hour; Mars over the third; the Sun over the fourth, and so on. Thus the Sun presiding over the fourth, eleventh, and eighteenth hours of the first day, would preside over the first hour of the second day, and carrying on the series, the Moon would preside over the first hour of the third day, Mars over the first hour of the fourth day, Mercury over the first hour of the fifth day, Jupiter over the first hour of the sixth day, and Venus over the first hour of the seventh day. Hence, the names of the days yet used in the learned professions throughout Europe. The present English names are derived from the Saxon:—

Latin.	English.	Saxon.
Dies Saturni	Saturday	Saterne's day.
Dies Solis	Sunday	Sun's day.
Dies Lunæ	Monday	Moon's day.
Dies Martis	Tuesday	Tiw's day.
Dies Mercurii	Wednesday	Woden's day.
Dies Jovis	Thursday	Thor's day.
Dies Veneris	Friday	Frija's day.

Tiw, Woden, Thor, and Frija were deities of the Pagan Saxons. Thor was the god of thunder, as well as the ancient Jere; and Frija was a goddess, the wife of Woden.

Almost all nations have regulated their months, in a great degree, by the evolution of the moon. Some have endeavoured to unite this division with the annual course of the sun, by an augmentation of days at the end of each year, or by adding a thirteenth month at the end of every third year. The Jews and the Athenians followed this latter method; the Macedonians, and some nations of Asia, assigned their months 30 and 31 days; the Turks and the Arabs have 29 and 30 days; the months of the Anglo-Saxons were governed by the revolutions of the moon. Their common year consisted of twelve lunar months, three months being appropriated to each of the four seasons; but every third year contained an additional lunar month, which was given to the summer season. The names of their lunar months, either had reference to their religious ceremonies, or to the natural appearances of the year.

A considerable variation prevailed, generally, amongst the nations of antiquity and still partially prevails, with regard to the commencement of the year. The Jews dated the beginning of the sacred year in the month of March; the Athenians in the month of June, the Macedonians on the 24th September; the Christians of Egypt and Ethiopia on the 29th or 30th of August, and the Persians and Armenians on the 11th of August. The Jewish civil year begins on the first day of the Month *Tisri*, which year, corresponds with our 9th of September; the Mahomedan's begins of the first of the month *Moharem*, which year, corresponds with our 14th of July. Nearly all the nations of the Christian world now, commence the year on the 1st of January; but as recently as 1752, even in England, the year did not legally and generally commence till the 25th of March. In Scotland, at that period, the year began on the first of January. The difference caused great practical inconveniences, and January and February, and part of March, sometimes bore two dates, as we often find in old records, as 1711-12. This practice often leads to chronological mistakes; for instance, we popularly say, "The Revolution of 1688," that great event happening in February of the year 1688, according to the then mode of computation; but if the year were held to begin, as it does now, on the 1st of January, it would be "The Revolution of 1689". In the anniversaries given in the *British Almanac*, the alterations of style, made in 1752, have not been followed, as any correction of date would have embarrassed the reader in historical and biographical references.

The year, properly so called, is the solar year or the period of time, in which the sun passes through the twelve signs of the Zodiac. The period comprises 365 days, 5 hours, and 48 minutes, 51 seconds, 6 decimals, and is called the astronomical year.

The CALENDAR is a table of the days of the year, arranged to assist the distribution of time, and to indicate remarkable days connected with devotion, or business. If every nation had adopted the same division of time, and a uniform calendar had been general throughout civilized states, history would present much fewer difficulties and contradictions. The progress of astronomical science has necessarily produced great changes in the manner of dividing time; and thus, whilst some nations have been ready to give their calendar every possible advantage of a scientific construction, the prejudices of others have rendered them unwilling to depart from their accustomed mode, however inaccurate. It may be cautious and instructive to trace, very briefly, the changes of the calendar, ordinarily called, the changes of style.

The Romans called the first days of each month, *Calends*, from a word which signified called; because the Pontiffs, on those days, called the people together, to apprise them of the days of festival in that month. Hence we derive the name of CALENDAR.

The Roman Calendar, which has, in great part, been adopted by almost all nations, is stated to have been introduced by Romulus, the founder of this city. He divided the year into ten months only; Mars, Aprilus, Maius, Junius, Quintilis, (afterwards called Julius,) Sextilis, (afterwards called Augustus,) September, October, November, December. Mar, Maine, Quintilis, and October, contained 31 days, and each of the six other months 30 days; so that the ten months comprised 304 days. The year of Romulus was, therefore, of 50 days' less duration than the lunar year, and of 61 days less than the solar year; and its commencement of course did not correspond with any fixed season. Numa Pompilius corrected this calendar, by adding two months, Januarius, and Februarius, which he placed before Mars. Julius Cæsar, being desirous to render the calendar

still more correct, consulted the astronomers of his time, who fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another. The six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added, was called intercalary, and was added to the month of February, by doubling the 21st of that month, or according to their way of reckoning, the *sixth* of the Calends of March. Hence the year was called *bissextile*. This almost perfect arrangement, which was denominated the Julian style, prevailed generally throughout the Christian world, till the time Pope Gregory XIII. The Calendar of Julius Cæsar was defective in this particular; that the solar year, consisting of 365 days, 5 hours, and 49 minutes, and not of 365 days, 6 hours, as was supposed in the time of Julius Cæsar; there was a difference between the apparent year and the real year, of eleven minutes. This difference at the time of Gregory XIII., had amounted to ten entire days, the vernal equinox falling on the 11th, instead of the 21st of March, at which period it fell correctly at the time of the Council of Nice, in the year 325. To obviate this inconvenience, Gregory ordained, in 1582, that the 15th October should be counted instead of the 5th, for the future; and to prevent the recurrence of this error, it was further determined that the year beginning a century, should not be bissextile, with the exception of the beginning of each fourth century. Thus, 700 and 1800 have not been bissextile, nor will 1900 be so; but the year 2000 will be bissextile. In this manner, three days are retrenched in four hundred years; because the lapse of the eleven minutes makes three days in about that period. The year of the calendar is thus made, as nearly as possible, to correspond with the true solar year; and future errors of chronology are avoided.

The adoption of this change, which is called the Gregorian, or New Style, (the Julian being called the Old Style,) was for some time resisted by states not under the authority of the See of Rome. The change of the style in England, was established by an Act of Parliament passed in 1752. It was then enacted, that the year should commence on the 1st of January, instead of March 25th; and that in the year 1752, the days should be numbered as usual until September 24, when the day following should be accounted the 14th of September, omitting 11 days. The Gregorian principle of dropping one day in every hundredth year, except the fourth hundredth, was also enacted. The alteration was, for a long time, opposed by the prejudices of individuals; and even now, with some persons the Old Style is so pertinaciously adhered to, that rents are made payable on the old quarter days, instead of the new. For this reason, and not in difference to the prejudice, the old festivals are mentioned in the *British Almanac*. The Russians still retain the Old Style, thus creating an inconvenience in their public and commercial intercourse with other nations, which, we trust, that the growing intelligence of the people will eventually correct.

During the period in which France was a Republic, the authorities introduced an entire change in the calendar, which was in existence more than twelve years; and is important to be noticed, as all the public acts of the France nation were dated according to this altered style. The National Convention, by a decree of the 5th October, 1793, established a new Era, which was called, in the place of the Christian era, the era of the French. The commencement of each year, of the first "Vendémiaire," was fixed at the midnight commencing the day, on which the autumnal equinox fell, as determined at the observatory at Paris. This era commenced on the 22nd of September, 1792, of being the epoch of the foundation of the Republic; but its establishment was not decreed till the 4th "Frimaire" of the year II. (4th November, 1793). Two days afterwards the public acts were thus dated. This calendar existed till the 10th "Nivose," year XIV. (the 31st December, 1805,) when the Gregorian mode of computation was restored.

EXPLANATORY NOTES FOR THE YEAR.

1. **DOMINICAL LETTERS.**—The seven days, of the week, reckoned as beginning on the 1st of January, are designated by the first seven letters of the alphabet, A, B, C, D, E, F, G; and the one of these, which denotes Sunday, is the *dominical letter*. Thus, if the year begin on Sunday, A is the dominical letter; if it begin on Monday, that letter is G; if on Tuesday, it is F; and so on generally. To find the dominical letter, call New Year's Day A.. the next day B. and so on till you come to the first Sunday, and the letter that answers to it, is the dominical letter. If there were 365 days, or exactly 52 weeks in the year, the dominical letter would be always the same; but the year contains $365\frac{1}{4}$ days; an excess of $\frac{1}{4}$ day over 52 weeks. The day is taken into the account every year, and the one fourth makes a day in every four years; so that the dominical letter, falls backward *one letter* for each of the three years, in which the date or number of the year cannot be divided, without remainder, by 4, and, *two letters* every fourth year, when the date can be so divided; as in the year 1828, it is divisible by 4, and, therefore, February will contain 29 days. The year began on Tuesday; count forward Tuesdays to Sunday, inclusive, is six days; and the sixth letter from A inclusive is F. Therefore at first, F is the dominical letter; but the 29th of February, which is added, or *intercalated*, throws the 1st day of March a day later in the week than it would otherwise have been; and, therefore, the Sunday letter for March and all the remaining months will be E. The years which have the 29 days in February, and the two dominical letters are called *bissextiles*, for the reason already given or *leap years*; because the day of the month, after February, *leaps* over a day of the week. In law, the 28th and 29th of February are accounted *one day*.

2. **THE GOLDEN NUMBER.** At the end of every nineteen years the new and full moons happen at very nearly the same times of the year. The ancients discovered this, and reckoned the nineteen years, or "cycle of the moon" as it is called, so that it terminated the year before the Christian era. This cycle was marked by the Greeks with letters of gold. Therefore, to find the golden number or number of the year in this cycle, add 1 to the date; divide by 19: the quotient in the number of cycles of the moon since the birth of Christ, and *remainder is the golden number*; as the present year is 1828, add 1, is 1829; divide by 19, is 96 cycles, and there remains 5, the *golden number*.

3. **THE CYCLE OF THE SUN** is the number of years that elapse before the Sundays throughout the year, happen on the same days of the month. If there were 366 days in the year, that would happen every year; if 365, it would happen every seventh year; but because the one-fourth of a day makes an alteration of a day every fourth year, the cycle must extend to 28 years. Nine years of this cycle had elapsed before the birth of Christ. Therefore, to find the cycle of the sun, add 9 to the date divide by 28; the quotient is the number of cycles since the birth of Christ, and the remainder is the cycle of the sun; as, for the year 1828, add 9, is 1837, divide by 28, the quotient is 65 cycles, and the remainder is 17, the cycle of the sun.

4. **THE EPOCH** is the moon's age for the first day of January, or the *equation* between the beginning of the solar and the lunar year. The time from one new moon to another is about 29 $\frac{1}{2}$ days. Thus there are, in a year, twelve revolutions of the moon, and 11 days over, therefore, the twelfth new moon will take place 11 days earlier each year than it did the year before. In the lunar cycle of 19 years, there are 12 new moons in each, of 12, and 13 in each of 7: because the 11 days of yearly difference in three years, exceed a lunar month by $\frac{3}{4}$ days. If it were not for the odd minutes and seconds, the age of the moon, on the 1st of January, could always be found, by multiplying the golden number by 11, and dividing by 30; then the remainder would be the *epoch* or age of the moon on the 1st of January. The following method will answer for the day of the moon's age on the 1st of January, till the end of the present century. Take 1 from the golden number, multiply what is left by 11, divide by 30; the remainder is the *epoch*, or moon's age on the 1st of January: as for 1828, the golden number is 5; take away 1, leaves 4; multiply by 11, is 44; divide by 30, remains 14, the *epoch*, or moon's age on the 1st January.

5. **THE NUMBER OR DIRECTION** is the number of days after the 23d of March, including both days, upon which Easter Sunday takes place. For instance, the number of Direction for 1828 is 16. Easter Sunday is April 6, being 16 days inclusive from March, 23.

6. **EASTER** is directed to be celebrated on the first Sunday after the full moon that happens next after the 21st of March; which being the fourteenth day of the first Jewish month, corresponds to their first day of the week after the Pass-over, the anniversary of the resurrection of Christ. The time at which this day must happen, varies with the year; but the limits within which it must fall, are the 22d of March, and the 25th of April, inclusive, making a period of 35 days.

In order to find Easter, the first thing to be done is to find *Easter limit*, that is, the number of days after the first of March, on which the full moon, preceding Easter, shall happen. To do this add 6 to the *epact*, and subtract the sum, if less than 0, or the remainder, when 30 is taken away; if more, from 50; the remainder is the day after the first of March, on which the full moon, preceding Easter, happens. Thus, for 1828 the *epact* is 14, add 6 is 20, subtract this from 50; leaves 30 days after the 1st of March, when the full moon preceding Easter takes place, which is the 31st, or last day of March, when the following Sunday is Easter-day. To find the day itself, add 4 to the number of the dominical letter; subtract the sum from the limit, and the remainder from the next number of 7a, that is greater than itself; this last remainder, added to the limit, will give the number of days from the first of March to Easter-day, including both: if less than 31, it will show on what day of March Easter falls; and if greater, take 31 from it, and the remainder will show upon what day of April. Thus, for 1828, the dominical letter is E., the number of which is 5. Add 4 to 5 is 9; take this from 30 (the limit) leaves 21; take this from 28, (the number of 7a. next greater,) there remains 7; add this to 30, (the limit,) gives 37 days from the first of March to Easter, both included; take 31, (the days in March, from 37, leaves 6; therefore Easter-day must fall on the 6th of April.

On what day will it fall in 1829.

The Dominical letter for that year will be D.

The Golden number: $1830 \div 19$ leaves 6; then $6 - 1 = 5$; $5 + 11 = 16$; $16 - 30$ leaves 25, the *epact*.

Then for *Easter limit*.

$25 + 6 = 31$, take away 30 leaves 1; and $50 - 1 = 49$ days after the first of March to the Easter full moon Again:

Dis 4, add 4 = 8 and $49 - 8 = 41$, $41 - 42 = 1$, and $49 + 1 = 50$ days from March 1st to Easter, including both. Take away 31 for March, leave 19, the day of April on which Easter will happen in 1829

The reasons of some of the calculation here are omitted, as they would have swelled the article to too great a bulk, but they will be given at length in a future Companion.

7. **THE ROMAN INDICTION.** The cycle of indiction has no connection with the motions of the Sun and Moon, further than its consisting of 15 years. It was established by the Emperor Constantine, in the year 312, to regulate certain payments by the subjects of the empire; therefore, to find it for any year, subtract 312 from the date, divide by 15, and the remainder is the Indiction; as from 1828, subtract 312, leaves 1516; divide by 15 leaves 1, the Roman Indiction.

8. **SEPTUAGESIMA SUNDAY** is the ninth Sunday before Easter.

9. **SHROVE SUNDAY** is the seventh before Easter.

10. **WHIT SUNDAY** is the seventh after Easter.

11. **TRINITY SUNDAY** is the eighth after Easter.

12. **ADVENT SUNDAY** is the Sunday nearest the 30th of November, whether before or after.

When Easter is known, any of the days that depend on it can be easily found; as, for 1828 Easter is April 6, Whitsunday is 7 weeks, or 49 days, after; then 6 from 30 (days in April leaves 24; 24 from 49 leaves 25; therefore, Whitsunday, 1828, is the 25th of May.

THE DAYS OF THE CALENDAR.

JANUARY.

1. **New Year's Day.**—The ancient popular customs connected with New Year's Day, Shrove-tide, May day Christmas, and other festivals, will be illustrated in a future "Companion to the Almanac."

1. *Circumcision*.—This festival was originally called the Octave of Christmas; and the first mention found of it is in the year 487. It was instituted by the Church, to commemorate the ceremony under the Jewish law, to which Christ submitted, on the eighth day of the nativity; and was introduced into the Liturgy of the Church of England in 530.

6. *Epiphany*.—The word Epiphany signifies *appearance* or *apparition*. This festival is kept in commemoration of the "Manifestation" of the Saviour of mankind to the Gentiles, and appears to have been first observed as a separate feast in the year 813. The primitive Christians celebrated the Feast of the Nativity for twelve days, observing the first and last with the greatest solemnity. From the circumstance of this festival being twelve days after Christmas, it is vulgarly called "Twelfth days."

8. *Plough Monday* is the first Monday after the Epiphany, and received this appellation from its having been fixed upon by our forefathers, as the period when they returned to the duties of agriculture, after the festivities of Christmas.

30. *King Charles the First's Martyrdom*.—The death of Charles I., is celebrated as a fast of the Church.

FEBRUARY.

3. *Purification*.—This day is kept in the reformed Church, as a solemn festival, in memory of the Purification of the Virgin Mary, who submitted to the injunction of the law, under which she lived, and presented the infant Jesus in the Temple. The festival was celebrated in the Christian Churches with an abundance of light, and was originally called "Candlemas Day," as well as the Day of Purification. The practice of lighting the Churches has been discontinued in this country since the second year of Edward the VI. In the Romish Church, the original name and all its attendant ceremonies, are still retained.

4. *Septuagesima Sunday*.—Septuagesima Sunday, is a Sunday dependent upon Lent as that season is upon Easter. It is to be considered as the preparation for the fast of Lent. Its observation was instituted by Pope Gregory the Great. The name of the first Sunday in Lent having been distinguished by the appellation of Quadragesima, and the three weeks preceding, having been appropriated to the gradual introduction of the Lent Fast, the three Sundays of these weeks were called by names significant of their situation: and reckoning by *Decades* (tenths), the Sunday preceding Quadragesima, received its present title of Quinquagesima, the second Sexagesima, and the third Septuagesima.

14. *St. Valentine*.—The practice of "choosing a Valentine," as it is called on this day, is too well known to need explanation. The origin of this custom has been much controverted; it is indisputably of very ancient date. Valentine was a presbyter of the Church, who suffered martyrdom under Claudius II. at Rome, A. D. 271.

18. *Shrove Tuesday*.—After the people had made the confession required at this season, by the discipline of the ancient Church, they were permitted to indulge in festive amusements, although not allowed to partake of any repast beyond the usual substitutes for flesh; and hence arose the custom, yet preserved, of eating pancakes and fritters at Shrovetide. On these days of authorized indulgence, the most wanton recreations were tolerated, provided a due regard was paid to the abstinence commanded by the Church; and from this origin sprang the Popish Carnival. From the loose pastimes of the age in which the Carnival originated, are also to be traced the nearly exploded diversions of cock-fighting, and cock-throwing.

21. *Ash Wednesday*.—The primitive Christians did not commence their Lent, until the Sunday now called the first in Lent. Pope Felix III, in the year 487, first added the four days preceding the old Lent Sunday, to complete the number of fasting days to forty. Gregory the Great introduced the sprinkling of ashes on the first of the four additional days, which give it the name of *Dies Cinerum*, or Ash Wednesday. At the Reformation, this practice was abolished, "as being a mere shadow, or vain show."

26. *Quadragesima, or first Sunday in Lent*.—Kreombert, King of Kent, first appointed the fast of Lent in this country, in the year 681; and succeeding generations marked the distinctions between the various foods. We find flesh to have been early prohibited during Lent, though Henry VIII, published a proclamation in 1543, allowing the use of *white meats*, with continued in force until, by proclamation

wations of James I, in 1619 and 1625, and by Charles I, in 1627 and 1631, flesh was again wholly forbidden.

26. *Mid-lent Sunday*.—This day received its appellation, because it is the middle Sunday between Quadragesima and Easter Sunday. It is by some called the *Mothering Sunday*, a term expressive of the ancient usage of visiting the Mother, or Cathedral Churches of the several dioceses, when voluntary offerings were made, which are now called Easter Offerings.

MARCH.

17. *St. Patrick*.—St. Patrick, from the eminent services he rendered the Irish, in converting them from idolatry is called the Apostle and Father of the Hibernian Church, and is the Patron or tutelary saint of that island.

25. *Annunciation or Lady Day*.—The reformed Church celebrates this day as a joyful festival from the connexion between the circumstance commemorated, and the incarnation. "Our Lady" is the ancient and popular name of the Virgin Mary.

31. *Palm Sunday*.—Palm Sunday is the Sunday preceding Easter, or the last Sunday in Lent. In the ancient Church Palm Sunday, with the whole of the week, which it commences was held in strict devotion, as deserved with greater rigour as to fasting and humiliation than any other part of the Lent season. The festival commemorates our Saviour's triumphal entry into Jerusalem, when branches of palm were spread before him.

APRIL.

5. *Good Friday*.—From the earliest records of Christianity, this day has been held as a solemn fast, in remembrance of the Crucifixion. Its appellation of *Good*, appears to be peculiar to the Church of England. Our Saxon forefathers denominated it *Long Friday*, from the length of the offices and fastings on that day.

7. *Easter Sunday* is a moveable festival, held in commemoration of the Resurrection, and being the most important and most ancient in observance: governs the whole of the other moveable feasts throughout the year.

15. *Maunday Thursday*.—Edward III in the year 1363, appears to have been the first English monarch, who introduced into this country, the practice of feeding, clothing, and distributing money to indigent persons on Maunday Thursday. The Custom has continued without intermission to the present period; and yearly, on this day, the Lord Almoner, or in his absence, the sub-almoner, attends for that purpose, in Whitehall Chapel.

23. *Saint George*.—Edward III, at the battle of Calais, in the year 1349 joined to, England's then supposed principal guardian, St. Edward the Confessor, the name of St. George, both of whom he earnestly invoked to aid his arms. The next year, the Order of the Garter was established, dedicated to St. George; and the Saint himself has, from that period, been considered as protector of England.

25. *St. Mark the Evangelist*.—On this day the reformed Church holds a festival in commemoration of the benefits the Christian religion has received from the exertions of this Evangelist.

MAY.

1. *St. Philip and St. James, Apostles*.—The Church, on this day, commemorates the sufferings of St. Philip; and also of St. James the Less, the first Bishop of Jerusalem.

12. *Rogation Sunday*.—Rogation Sunday received and retains its title from the Monday, Tuesday, and Wednesday immediately following it which are called *Rogation Days*, derived from the Latin *Rogare*, to beseech. The earliest Christians appropriated extraordinary prayers and supplications for those three days; a preparation for the devout observance of our Saviour's Ascension, on the day next succeeding to them, denominated Holy Thursday, or Ascension Day. The whole week, in which these days happen, is styled *Rogation Week*; and in some parts it is still known by the other names of *Crop-Week*, *Grass-Week*, and *Gung or Procession-Week*. The perambulations of parishes are made in this week.

16. *Ascension-Day or Holy Thursday*, is the day on which the Church celebrates the Ascension of our Saviour, the fortieth day after his resurrection from the dead.

26. *Whitsunday*.—On this day is celebrated the descent of the Holy Ghost upon the Apostles, in the visible appearance of fiery cloven tongues, and in those miraculous powers, which were then conferred upon them. Whitsuntide is seven weeks after Easter.

JUNE.

2. *Trinity Sunday*.—Trinity Sunday is a festival observed by the Latin and Protestant Churches on the Sunday next following Pentecost, or Whitsuntide, of which, originally, it was merely an Octave.

24. *St. John the Baptist*.—The reformed Church holds a festival on this day, in commemoration of the "Nativity of St. John the Baptist."

29. *St. Peter the Apostle*.—The Feast of St. Peter was instituted in the year 613, perhaps to celebrate the martyrdom of the Apostle, who suffered at Rome about 64.

JULY.

3. *Dog-days begin*.—The Canicular, or Dog-days, commence on the 3rd of July, and end on the 11th of August. Common opinion has been accustomed to regard the rising and setting with the Sun, or Sirius, or the Dog-star, as the cause of excessive heat, and consequent calamities, instead of viewing it as the sign when such effects might be expected. Of this notion, Dr. Hutton says, "the star not only varies in its rising, in every one year as the latitude varies; but is always later and later every year, in all latitudes; so that in time the star may, by the same rule, come to be charged with bringing frost and snow."

25. *St. James*.—This Apostle is called James the Great, to distinguish him from the other Apostle, who is called the Less.

AUGUST.

1. *Lammas Day*.—Lammas is one of the four Cross Quarter-days of the year, as they are now denominated. Whitsuntide was formerly the first of these quarters, Lammas the second, Martinmas the next, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Lady-day Mid-summer, Michaelmas, and Christmas. Some rents are yet payable at these ancient quarterly days in England, and they continue general in Scotland.

24. *St. Bartholomew the Apostle*.—The proper name of this Apostle was Nathaniel, by which, and not by that of Bartholomew, he is mentioned by St. John. The festival of St. Bartholomew was instituted A. D. 1130.

SEPTEMBER.

21. *St. Matthew*.—This Evangelist's festival is of great antiquity.

29. *St. Michael*.—This festival was, in the year 487, established in honour of Michael, the reputed Guardian of the Church, under the title of "St. Michael and All Angels."

OCTOBER.

10. *St. Luke's Evangelist*.—The festival held in commemoration of this Evangelist, was first instituted by the Christian Church in the year 1130.

28. *St. Simon and St. Jude Apostles*.—The two Apostles, St. Simon and St. Jude, are jointly commemorated by the Church on this day, as appears to have been the usage from the year 1091, when their feast was first instituted.

NOVEMBER.

1. *All Saints*.—All Saints, or All Hallows, in the Protestant Church, is a day of general commemoration of all those saints and martyrs, in honour of whom, individually, no particular day has been expressly assigned.

4. *King William landed*.—"On the 3rd of November," says Burnet, who was in the fleet, "we passed between Dover and Calais and before night, saw the Isle of Wight. The next day, the 4th, being the day on which the Prince was both born and married, he fancied, if he could land that day, it would look suspicious to the army, and animate the soldiers; but others, who considered

the day following was Gunpowder Treason day, though our landing that day might have a good effect on the minds of the English nation. And Divine Providence so ordered it, that after all hopes of our landing at Torbay were given up, and Russell bid me go to my prayers for all was lost the wind suddenly shifted, and carried us into the desired haven. Here the Prince, Marshal Schomberg, and the foot soldiers, landed on November the 5th." The Almanac is thus at variance with the historian.

5. This day is commonly called *Gunpowder Treason*, and has been kept as an anniversary in commemoration of the great plot of 1605.

9. *Lord Mayor's Day*.—Our Almanac style this, the "Lord Mayor's Day," in allusion to its being the period when the chief magistrate elect of the city of London annually enters upon his high and important office. Until the 9th of May, 1214, the office of chief magistrate of London was held for life.

11. *St. Martin*.—This anniversary is still one of the four Cross Quarter Days,
DECEMBER.

1. *Advent Sunday*.—Advent in the Calendar properly signifies the approach of the Feast of the Nativity. It includes four Sundays; the first of which is always the nearest Sunday to Saint Andrew, whether before or after Advent was instituted by the Council of Tours, in the sixth century.

25. *Christmas Day*.—Christmas Day is a festival of the Church, universally observed on the 25th December, in memory of the Nativity of our Saviour; and it has been denominated *Christ Mass* from the appellation, Christ, having been added to the name of Jesus, to express that he was the Messiah, or the Anointed.

26. *St. Stephen*.—He was the first martyr to the Christian faith. Lardner and Doddridge think his death was rather the effect of popular fury than the result of a legal sentence.

27. *St. John the Evangelist*.—This festival is kept to commemorate the slaughter of the Jewish children by Herod. This is also called *Childermas Day* (from *Child* and *Masse*,) on account of the *Masses* said in the Romish Church for the souls of innocents.

THE CELESTIAL PHENOMENA OF THE YEAR.

It is impossible for any one, learned, or unlearned, to live through the year; or even through the months, or the day, without noticing the influence which the changing positions of the heavenly bodies, have upon his own comfort, and upon the state of all things around him. This is the book of wonder, which, at the first dawning of reason, both individuals and nations, attempt to read. It is always open; no perception is so dull as not to be able to trace its greater lines; and, from the magnitude of these, and the unerring certainty of their recurrence at their regular times, and the changes which they produce upon every thing that grows or lives, it is difficult to imagine the existence of a mind, so incurious as not to form to itself some theory of their nature and causes.

In a country like England, where the changes are so frequent, and the contrast so striking, the subject is constantly before every body; and be it in city or in common, in hall or in hut, the season, the day, and the weather, are among the very first topics of conversation. If even, in the centre of a crowded city, where nature is, as it were, excluded, and man and art rule supreme,—if there, amid all the displays of manufacture, all the bustle and occurrences of society, and all the news of nations, the phenomena of the day and the year can claim the attention,—how much more must they do, this, to the people who are scattered over the country, and spend most of their time in the open air? To all these, that volume, of which the Almanac is the index, is a daily book to man; and especially to those who have not had the advantages of education, it is the only book.

A subject, the appearance of which force themselves upon the notice of all, but of which the philosophy lies in the depths of science, must be the means either of great good or of great evil; for, upon any subject that interests the mind powerfully, if knowledge be not planted superstition is sure to spring; and of

its own accord. That he who knows nothing may be made to believe any thing, is found to be a maxim of but too general truth; and upon no subject has its truth been more frequently verified than upon the one under consideration. In the early ages of the world, and before revelation had substituted a moral and intellectual system for an idol and superstitions one the phenomena of the year and more especially the luminaries that are attendant upon and produce these phenomena were acknowledged and worshipped as gods—substituted in the place of Him whose instruments they are and who implanted in them those properties and assigned them those motions, in consequence of which they produce these effects. In moulding them for this purpose, there is no doubt that the artful portion of society employed all their cunning, in order to enslave the minds of the multitude, and enable themselves to profit by the darkness which they occasioned. But if the subject itself had not been the best adopted for superstition, the very cunning which made use of it would have necessarily chosen that which answered its purpose better. So far, however, as research can be made into the early history of mankind the sun the moon, and such stars as have any thing remarkable in their appearance, have been the first objects of adoration; and that adoration has always been the more marked, in proportion as the appearance of the luminaries have been the more varied. We find it much more in the Laplander and the inhabitant of Greenland who have their months of summer's day and winter's night, than we do in those tropical countries, where the day is always of nearly the same length and where flooding rain and burning drought are the chief phenomena that vary the year.

But the superstitious adoration of the celestial appearance is not confined to the early and barbarous state of nations. When this superstition was expelled from religion and the luminaries were deprived of their godship, they did not at once lose the whole of their consequence; but held their place as the agents and arbiters of human destiny. Upon this arose a system of superstition, which left not a thing in nature, a member of the human body or an event of human life upon which it did not lay hold. The individual bodies had each their special virtues, their good or their bad influence; these were modified by the grouping of the stars into constellations and from the positions of the sun, moon, and planets among these there arose other compound influences till the system became as complicated as it was ridiculous. So firmly was this believed at one time, that nothing could be done or undertaken without a previous consultation of stars, to find out whether it was their pleasure that the issue should be prosperous; and the aspect of the stars at a man's birth was admitted to have ten times as much influence upon his success in life, as his talents, his education, and his conduct. Indeed it had much more; for if it was not the pleasure of the stars—and the revealing of that was committed entirely to the astrologer—the man could not act, or be educated or even born. If one wished to know whether any substance would answer any purpose, he did not try it, he consulted the moon; and if any thing was lost search was not made for it the moon was questioned through the medium of the astrologer, who always contrived, by his confederates to be in possession of many lost things as kept up the credit of the craft.

By this most absurd system of superstition the reason and common sense of the people were rendered completely useless; and which was far worse the foundation of morality was completely taken away,—because, if the success or the failure the good or the bad of human actions, did not depend upon men themselves, but upon an unerring destiny, to be read in the aspect of the stars there was an end of all virtue and attempting to do rightly; because, as the destiny was fixed, no effort on the part of the man could alter it—indeed he could make no effort, unless that was also set down in the aspect of the heavens at his nativity.

When superstition had thus destroyed both the intellect and the morals of mankind, the absurdities into which it led them were endless; and as any subject in order to be wondered at, requires only to be incomprehensible, the delusion became very general. Nor is it yet eradicated. Language contributes a little to this; even the well informed talk about "stars" and "destinies," and those who have little information believe that these words have a literal signification. The disposition which all people have to pry into the future also tends to perpetuate this superstition. The proper key to the future is induction from the past; but the proper use of that suppose habits of observing and reasoning which cannot yet be regarded as general among the people of any country; so, they who cannot anticipate the future, by connecting it with the present and the past, still follow after the delu-

tion not only of astrologers—moon-and-star men,—but fortune-telling impostors of all sorts; and the delusion is helped to be perpetuated by those publications in which the nonsense of astrology is still retailed to the public.

These circumstances render it necessary that the phenomena of the year should be explained in the most simple and philosophic manner that the real causes of those phenomena should be made palpable to the most ordinary capacity; and that it should be plain to every one, that there is no mystery in the matter,—that the revolutions of the heavenly bodies produce the appearances of the seasons, and nothing more. The motives of these have, in fact, no more influence upon the conduct and the destinies of mankind than the motion of a river towards the sea, or the fall of a stone to the ground, when it is not borne up by some thing that can support its weight; and it would be just as rational to calculate the nativity of a man from the motion of the Thames towards the sea as from the motion of the moon or the planets. Nay, the revolution of a coach-wheel upon the road had just as much to do with human destiny as the motion of the heavenly bodies; and when, in its revolution upon the dial, the minute hand of a clock passes over the hour-hand, that has just as much influence upon the fate of nations or individuals as an eclipse of the sun or the moon.

With the exception of the light and heat produced by the sun, and the light of the moon, and still fainter illumination of the stars, there is no reason to infer that the celestial bodies exert any influence, other than that of gravitation, upon the earth itself; and as their influence is wholly of a physical nature, it can have no effect whatever upon the minds or conduct of men, any more than can be produced by the natural or artificial motion of any other substances. So far as the luminaries make men more or less comfortable at the time they have an influence—as the genial temperature of the day raises the spirits in the same way, and to the same extent that they are raised by a similar temperature of a common fire, or the light of the moon enables a man to find his way at night, just in the same way as he would find it by the same degree of lamp light; but beyond these physical effects, there is, and there can be, nothing. If the luminary is at the same distance, shines for the same length of time at the same height above the horizon, it matters not in what sign of the zodiac or in what part of the heavens it may make its appearance, any more than it signifies whether the fire by which one is warmed, or the lamp by which one is lighted, is one of the east or the west of St. Paul's; and it would be just as philosophical to calculate the future destiny of a man from the "house" in which he happened to be born, as from the "house" of the planets at the time of his birth. Indeed it would be much more so; for if *intelligence and good sense* happen to be lords of the ascendant in the house of the parent, they are very rational grounds for predicting the future welfare of the child; and so, also ignorance dissipation, and vice in the parent are far more malignant respects for the infant that has the misfortune to be born under them, than any configuration which either the stars, or any thing else out of any family can assume.

There was a time when not the people merely but the titled and the learned, were thrown into the greatest consternation by an eclipse of the sun or moon, or the appearance of a comet or the aurora borealis. And why? Because they are of comparatively rare occurrences and when mankind do not know the rational cause of any thing, they always turn to themselves a superstitious one. A candle is to the inmates of a room at night what the sun is to the inhabitants of the earth during the day; it gives them light, and, if the flame be large enough it gives them heat. If, too, there be a mirror upon the wall and the candle be so placed as that the light reflected by the mirror is thrown into a room which the candle does not illuminate, the mirror will give a sort of moonlight to any one who happens to be there. Now, if one of the family were to stand between another of the family and the candle, the candle—their sun for the time—would be just as much eclipsed to the one from whose sight it were hidden, as the sun of the world is when the moon comes between it and the earth; and so also if any one placed himself in such manner, as that his shadow fell upon the mirror, that mirror—the temporary moon of those in the dark chamber—would be just as much eclipsed, as the moon of the world is when the earth comes between it and the sun, deprives it of the light of that luminary, and prevents it from reflecting that light to the earth. Well is there any person in his senses that would say, that because one of a family had come between another and the candle, or between the candle and the looking glass, that some direful calamity would befall the family, or that they would

inevitably have a brawl or a law-suit with the folks at the next cottage; and yet the consequences just mentioned are precisely of the same nature with the eclipses of the sun and moon; and from their nearness they have much more effect on the inhabitants of the cottage than the celestial ones can have upon the inhabitants of the earth. A temporary want of light is the whole effect in both cases; and as that of the celestial eclipse is never so complete, as in the case of the candle and the mirror, it is, except as a matter of curiosity, or as fixing a point of time, of much less consequence than the other.

With regard, again, to a comet, it is much the same as if one were to come into the room with a burning torch or taper and then go out again; an occurrence which could do no harm, unless the bearer of the torch were to run against somebody or set fire to the house. So also, if the comet be a solid substance, and if the light which it emits be of the burning kind, (for comets are so distant, and continue so short a time, that we are unable to be certain about their nature,) it might if it came in contact with the earth, shatter it as a cannon ball shatters a house, or burn it as a red-hot shot or a shell does; but as long as we are out of its way, we are just as safe from harm as we would be if we stood on a high cliff and saw rockets let off ten miles at sea. A rocket let off in Vauxhall Gardens has just as much influence on the fate of nations and individuals, as all the comets that ever appeared; and if the stick of the rocket happened to fall upon any body, it would have a good deal more.

There was a time when the "Jack-o'-the-lantern"—inflammable air over a fen, a piece of rotten wood, or a putrid fish—both of which, in a certain state of rotteness, give out a gas which becomes luminous, was accounted as something alarming; but as every bungler in chemistry can now produce the same appearances whenever he pleases, they have ceased to be regarded with any degree of apprehension.

All these follies, with which people wasted their time, disturbed their imaginations, and made themselves uneasy, resulted from the want of a little—a very little—sober and independent thinking. Effects must be similar to their causes; and every subject which is matter cannot affect the mind in any other way than by affecting the body. The arsenic which lies buried a mile under ground, or that which is contained in the stores of the Apothecaries' Company, is just as deadly in its nature as that which has, by accident, crime, or madness, got into the human stomach. But while it remains there it poisons nobody; and though, by continually alarming himself about it, a man of weak mind might, in time, bring himself to believe that it would; and though this should injure his health, or even frighten him to death the arsenic would be quite innocent of the matter. What would even the most ignorant man now living think, if he were told, that it is a pinch of gunpowder were to be stolen from the stores of the Grand Signior, brought to London, and burned according to the rules of art, it would instantly blow up all the magazines in Turkey? Well, there was a time when the belief of such an influence in powder was far more prevalent than that of the influence of the appearances of the year upon human life and fortune is now.

The sun, and moon and the planets and stars, are merely masses of matter—innanimate, and, of course, without any power of thinking and acting as wholes—though they may have different classes of growing and living beings upon them, in the same way that the earth has; and it may be, that while we are frightening ourselves with the changing phases of the moon, the people on that luminary are in the same alarm at our planet. But bodies placed at so great a distance from each other, as the planets and stars are, can have no influence upon each other, saving that of gravitation, and light and heat, which will, of course, change with every change of position and distance. As, if the moon be far north in the sky, it will be longer "up," or above the horizon, to us in these northern latitudes; if it be near to the sun, on the eastern side, it will shine in the early part of the night; if it be near, on the western side, it will shine in the latter part of the night; if it be directly opposite to the sun, it will, if just as far north in the sky, rise at sunset and set at sunrise; if it be farther north, it will rise before the sun sets, and set after the sun rises;—if south of the sun, it will rise after sunset, and set before sunrise;—and if it be in the same part of the sky with respect to east and west, as the sun, it will rise and set at the same time with that luminary, and not be seen, unless it be also in the same part of the sky with regard to north and south; and in that case it will come, in whole or in part, between the earth and

the sun, according as their places are exactly or only nearly the same, and occasion a total or a partial eclipse of the sun. All the changes of the moon, with regard to shape and time of appearance, take place in every lunar month, from one new moon to another. All the variations, of appearances, eclipses and other phenomena, recur in a period of about nineteen years; and any of them may be fore told by one who has a knowledge of astronomy.

There are some other particulars in the moon's appearance, upon which superstition is still apt to lay hold, and predict, if not something as to human life, at least something about the weather which is a fertile subject for imposture. One of them is the position of the cusps, or points of the new moon when first seen. There are always both at equal distances from the sun, and, of course, their standing straight, or leaning backwards, or forwards, depends upon the distance that the moon is north or south of the sun. Any one can see this by a very simple experiment. Take an orange or an apple, or any thing round, and hold it in your left hand between you and the candle, only as far to the left as that the light will alight on a part of it in the shape of a new moon. This moon may be much narrower or broader, according as you hold it nearer or further from the line between you and the candle. If you hold it just as high as the candle, the line of the points will be upright; if you move it higher the candle, the line will lean backwards, more and more as it is raised; and if you move it down lower than the candle, the line will lean forward, more and more as it is lowered.

Two other peculiarities of the moon, that occasion a good deal of speculation among those who are ignorant of the causes &c. "the harvest moon," in September, and "the hunter's moon," in March; the former of which, when near the full, rises for several nights at nearly the same hour, and the latter, at the same age, is equally remarkable for the difference between the times of its rising. The moon moves nearly to the same distance from the sun every day, but it moves in a path, the one-half of which is much nearer the north than the other; and this is the case also with the apparent annual path of the sun; that luminary appearing much nearer to the north in summer than in winter. Thus, when the moon is moving northward at the most rapid rate, it escapes from the horizon northward, and rises earlier; and when it moves southward at the most rapid rate, it approaches to the horizon, and sets earlier. The full moon can be in the former position only in September or October, and in the latter in March or April; and thus the harvest and hunter's moons are occasioned.

Such are the principal changes in the moon's appearance; they are all to be explained upon the simple facts of the motions of the moon and the earth; and, therefore, they neither have, nor can have, any of those influences which superstition, the child of ignorance, ascribes to them.

The planets being all much more remote from the earth than the moon is, and having little difference in their appearances, saving what arises from their own motions and that of the earth round the sun, have little about them that claims attention, as connected with the appearances of the year. Influence upon the earth, upon the changes of the seasons, or upon any thing that in any way affects the comfort or the ordinary pursuits of mankind, they have none whatever; and therefore, the explanations of their appearances and motions may very properly be left to the study of astronomy.

Thus, the only thing that remains in order to complete this simple notice of the phenomena of the year, is some account of the annual appearances of the sun—that grand source of light, and life, and enjoyment, to all the animal and vegetable tribes.

In order that the whole may be clearly understood by those who have not much knowledge of geography and astronomy it may not be improper to begin with the apparent revolution of the heavens, every day, as arising from the real rotation of the earth. When a round body, such as an orange, or a billiard ball, is made to whirl round in the same place upon the table, by spinning it, although there may be no mark upon it, one can easily perceive that there is one point, in the middle of the upper part of it, round which all the rest turns, just as a wheel turns upon an axle; and if one could see it from below, there would be found a similar point in the middle of the under part, round which the whole would be seen to turn. These two fixed points would be the poles of the ball or orange; and if we imagine a line drawn from the one, through the centre to the other, that line would be the axis of rotation. The earth turns round from west to east every

twenty-four hours, in the very same manner: only, instead of being supported upon any thing like the ball for the orange, it is kept in its place by the mutual attraction between it and the sun. If we make a little mark any where upon the ball, and imagine ourselves to be lying there, the candle which stands still upon the table would appear to move in the contrary direction to that of the ball. If the candle be held just as high as the middle of the ball, the mark, wherever we place it, (say in the upper part, half way to the centre or pole,) will pass once-half of its revolution through the light of the candle, and the other half not. If

the mark being still in the same place) the candle be raised higher up than the centre of the ball or (which will have just the same effect) if the ball is put lower down than the candle, the mark will pass through the light for a longer time of each rotation than it is in the dark; and if the candle be held further down than the centre of the ball, or the ball raised higher than the centre of the candle, the mark will pass through the light for a shorter time than it does through the darkness on the other side. Also, the increase of light in the former case, and the decrease in the latter, will be the greater, the farther the centre of the ball is below or above the candle, and the nearer the mark is to the pole or point round which the upper part of the ball seems to turn. If we call the upper pole of the ball the *north pole* the mark (rather more than a third of the upper half from that pole) any place in the British islands; and suppose the ball to be the earth, and the candle the sun, we have before us the whole principles of the motions that produce the changes of the seasons.

We have only to imagine a level plane, or even flat surface, to pass through the centre of the sun; that the axis upon which the earth turns round is always upright to that place; that the *orbit*, or path, which the earth moves in during the year, lies, one-half of it above the plane, and the other below; and that this orbit has an inclination, or makes an angle of about twenty-three degrees and a half with the plane each way, then if we further imagine, that the north pole of the earth is uppermost and that the earth, in moving round the orbit from west to east, performs as many rotations as there are days in a year, we shall have the whole means of explaining the changes of the seasons.

If we imagine that the point at which the earth is highest above the level plane passing through the centre of the sun, is immediately before us and nearest to us; then the point at which it meets the level plane, in descending, will be the one farthest to the right of the sun; that where the earth is farthest below the level plane will be the one at the greatest distance, and right before us; and that at which the earth meets the level plane in ascending towards us, will be the one most remote from the sun on our left hand.

The first of these points will be the shortest day to those in the northern hemisphere; and for the quarter of a year from that to the second point, the day here, will always be less than twelve hours, and the night more.

The second point will be the vernal equinox,—equal day and night in the spring; and in the quarter from thence to the third point, the days in the northern hemisphere will always be more than twelve hours, and the nights less.

The third point will be the midsummer, or longest day, in the northern hemisphere; and in the quarter from that to the fourth point, the day will be again more than twelve hours, and the night less.

The fourth point will be the autumnal equinox.—equal day and night in autumn; and in the quarter from thence to the point at which we supposed the earth to set out, the day will be, as in the quarter first noticed, less than twelve hours, and the night more.

It is evident, that on the half of the surface which is round the other, or south pole, the appearances of the seasons will be quite reversed.

Thus, in the whole of the half that lies above the level plane, the day will be shorter than the night; it will decrease during the first part of that half, and lengthen again, at the same rate, during the second. Also, in the whole half below the plane, the day will be longer than the night. It will lengthen during the first part, and shorten at the same rate during the second.

On the earth, the motion which causes the lengthening and shortening of the day is not seen, except by all the stars that are round the heavens coming to the south in succession at midnight; and the sun being farther north at rising and

setting, and higher at mid-day when the day lengthens,—and the reverse when it shortens.

The lengthening and shortening are not at the same rate at all times of the year; for it is not the absolute distance of the earth from the level plane, but the change of distance between one day and another that makes the difference of their lengths. Now, if any one take two rings or hoops of any kind, and put the one across the centre of the other, a little obliquely, he will see that they recede from each other most rapidly at the two points where they cross and that, mid way between these points there is a considerable space where they are nearly at the same distance. Therefore, the days must lengthen and shorten most rapidly at the equinoxes, and be for some little time of nearly equal lengths at mid summer and mid winter.*

The different duration of the day, and the different height of the sun, are the causes of those variations of natural heat which so beautifully diversify the year.

THE TIDES.

1. CAUSES AND GENERAL APPEARANCES.

Those swellings and subsidings of the waters of the ocean, by which a portion of the shore is alternately flooded and left dry, and to which we give the name of *tides*, are to the inhabitants of coasts the most interesting, to sea-faring, people the most useful, and to the ignorant the most inexplicable, of all the every-day occurrences of nature. The appeal which Canute made to the certain and irresistible flow of the sea, when he meant to rebuke his flattering courtiers, is proof that, at a very early period of English history, the tides had drawn attention; and as nobody can notice the tides for any length of time without perceiving that, on the same days of the moon's age, they happen, at the same place, at very nearly the same hours of the day, a connexion between them and the moon could not fail to be traced. But as the cause of that connexion does not appear from the connexion itself, the unformed have regarded it as part of that superstitious influence, which the celestial bodies have over the earth and its inhabitants.

Instead, however of there being any thing mysterious in the matter, it is the most simple that can be; and depends upon that universal law of gravitation, in consequence of which a stone falls to the ground, or water runs down a slope.

The general conditions of the law of gravitation are these. Every body or piece of matter gravitates towards any other piece, directly as the quantity of matter in that piece, and inversely, as the square of its distance, the distance being estimated, in the case of spherical bodies, from the centre of the one to that of the other.

Thus, for instance, a weight of 4 pounds at the surface of the earth, which is about 4000 miles distance from the centre, gravitates towards the earth, that is presses upon that which supports it, counterpoises an equal weight in a balance, or falls if it has no support, with a force of four pounds.

But if the same weight were raised to a height of 4000 miles, or placed at twice the distance from the centre, its weight would be diminished inversely as the square of the distance, or would be to 4 pounds as the square of 1 to the square of 2,—that is, it would be *one-fourth* of what it formerly was, or one pound. This decrease would not, however, be pointed out by a common scale beam, because the weights in both scales would be diminished at the same rate; and thus, if they balance each other at the surface of the earth, they would do the same at any weight whatever. It might, however, be measured by the flexure of a spring.

From this diminution, which takes place in the action of gravitation as the distance becomes greater, it is quite evident that, in large masses of matter, such as the earth, the sun, and the moon the gravitation towards each other will at

* The book which one is reading affords a very simple illustration of this. Let it be opened as much or as little as one pleases, the *edges* of the leaves are every where at the same distance, while the *ends* are more and more distant the farther they are from the joining.

† Professor Leslie, in the Notes to his *Treatise on Heat*, gives an ingenious definition of the word "tide." "From motion seem derived our ideas of time and space, which are often interchangeable terms. The German word *zeit*, denoting time, was at first expressive only of *measures*; but in Swedish it has passed into *tid*: the same with the English *tide*. The primitive source of tide may be gathered from its compound, *noontide*, *betide* *tideings*, &c."

the points where they are nearest, be greater than the average, or that at their centres. As for instance, a quantity of water placed on that point of the earth's surface, to which the moon is directly over head, will gravitate more toward the moon than an equal quantity placed 90 degrees from the former, or at a point where the moon is in the horizon. But water is retained upon the surface of the earth by its weight or gravitation towards the mass of the earth, and the perfect freedom with which water moves, allows it always to form itself in perfect accordance with the law of gravitation. Now, the gravitation toward the moon, or the sun, acts in the opposite direction to the weight; and, therefore, by whatever portion that gravitation is increased above the average, the weight must be diminished and the water must rise up there till the excess of height balance the loss of weight, and an equilibrium be every where established, in those parts that are covered with water, and have a free communication with each other.

Toward every celestial body the variation must be the same in kind; but the sun, in consequence of its great mass of matter, and the moon, in consequence of its nearness to the earth, are the only ones of which the effects are perceptible.

The whole gravitation toward the sun is much greater than that toward the moon; but the mean distance of the sun is about 2,000 times the half diameter of the earth, while that of the moon is only 60 times; and is the disturbing force as to the whole gravitations inversely as the cubes of those numbers, (they entering the proportion *three times as factors*,) the disturbing force of the moon, that is, the force by which the water becomes lighter when the moon is over head, is about $2\frac{1}{2}$ times that of the sun.

It would be out of place here to insert the calculations, which are long, though simple. But the result, stated in round numbers, is, that if the earth were all covered by the same depth of water, a tide of *two feet* would be raised at the point where the sun is directly over head, and a tide of *five feet* where the moon is so,—that is the water at each of those points would be higher by two feet in the case of the sun, and five feet in the case of the moon, than at the circumference of the hemispheres, of which those points were respectively the centres.

The tide that happens at the point nearest to any of the luminaries, or where that luminary is above the horizon is called the *upper tids*, and the opposite one is called the, *under tide*. The under tide is produced in the same manner as the upper, except that is the diminution, and not the increase of the moon's action which causes it.

If the earth were wholly covered with water, if the sun and moon were always at the same distances from it, and if the three bodies remained in the same places without motion, the two high waters of each luminary would remain at the same points, and the low water of each would be the circumference dividing the two hemispheres, of which the point nearest the luminary and the point most remote from it were the centres; and as the gravitation towards the earth would be the same at every point, there would be no means of discovering the difference of elevation. Not one of these circumstances holds, however; and therefore the want of each of them gives a different modification to the tides.

1. The real motion of the earth from west to east every 24 hours causes the high and low water of the solar tide to perform a complete revolution from east to west in twenty-four hours also.

2. The same motions of the earth, with the moon's motion round the earth from west to east also, in about 29 $\frac{1}{2}$ days, causes a complete revolution of the lunar tides from east to west in one solar day and two fifty-ninths, or in about 24 hours 48 $\frac{1}{2}$ minutes.

As the action of the luminary takes some time to produce its effect the high water at any point does not take place till an hour or two after the luminary has been vertical.

3. When the sun and moon are on the same points of the compass, or on opposite points, than if they be so situated with regard to north and south as that a straight line passing through both their centres would pass through the centre of the earth, the high waters will fall on the same points, and the low waters on the same circumference, midway between these points.

In these cases, the high water will be the sum of the elevations, and the low water the sum of the depressions. These are called *spring tides*. It is evident that they must happen at every new moon, by the coincidence of both upper and under tides; at every full moon, by the coincidence of the upper tide of each luminary with the under tide of the other, and that they can happen at no other times.

The same cause which makes the high water of each luminary take place later than the time that luminary is vertical, makes the highest spring tide to happen a little after the new or full moon.

4. As time is reckoned by the apparent motion of the sun, the solar high water always happens at the same hour at the same place, but as the lunar high water, which is the greater, and gives a character to the whole, happens about 48½ minutes later every day, it must separate eastward from the solar high water at that rate, and gradually become lower and lower till at the end of the first and third quarters of the moon, it fell on the same place with the low water of the solar tide. Then the elevation of the high water, and the depression of the low, will be both, only the difference of the solar and lunar tides and the tides will be *neap*.

During the first and third quarters of the moon, the tides will *fall off* from the spring to the neap, and during the second and fourth quarters they will *grow* from the neap to the spring.

5. The obliquity of the earth's annual path round the sun causes the sun, in summer, to appear over our latitudes, nearly 47 degrees farther north than in winter: and the obliquity of the moon's monthly path may make the new moon about 5 degrees more either north or south of the sun; and also vary the full moon to the same number of degrees from the point opposite to the sun. Those changes produce what may be called the *seasonal variations* of the tides. They take place thus:—

a. About the *equinoxes*, in March and September, the sun is near the Equator, and the moon, at the time of the spring tides, cannot be many degrees from it: therefore, the tides are then highest and most uniform in both hemispheres; highest, of course, at the Equator, where the points of high water of both luminaries are, and gradually diminishing toward the poles, where, if the earth were uniformly covered with water, there would be continual low water at those seasons.

b. About midsummer, in the northern hemisphere, the sun is vertical about 23 degrees north of the Equator; and the new moon is, on the average, the same; but the full moon is on the average, as far on the south side of the Equator. Therefore about mid summer, the spring tides at new moon, will be highest in the northern hemisphere; and those at full moon in the southern.

c. About mid-winter, the circumstances mentioned in the last article will be reversed.

6. The paths, or orbits, of the earth and moon are not circles, but ellipses or ovals: and, therefore, the sun and moon must be both nearer to the earth at some times than at others. The point where the earth is nearest to the sun is called its *perihelion* and the point where the moon is nearest to the earth is called its *perigee*. The earth being in its perihelion, causes an increase of the solar tide and the moon being in its perigee, causes an increase of the lunar; because the disturbing force increases inversely as the cube of the distance.

The perihelion takes place in a revolution of 365½ days, and the perigee in one of 29½ days; therefore, they sometimes coincide, and sometimes not; and when they do coincide it may be at any time of the moon's age. The *anomaly*, from the *inequalities* of motion and distance, especially of the moon is intricate; but the result is, that when they coincide at a spring tide, they may augment it about one-seventh; while, when the luminaries are at their greatest distance at a spring tide, it may be diminished about one-seventh.

7. It is only on wide oceans that the regular motion of the tides from east to west can take place; for the shores of the land throw them into so many irregularities, that at some places there are no tides at others they rise to a great height: sometimes there are double tides; and sometimes only one in twenty four hours. So that the time of high-water spring tides at any place must be

found by observation; and in rivers and narrow seas, floods and storms may vary much after both the time and height of the tide. The average from high water to high water, or low water to low water, is about twelve hours, twenty-four minutes; and that from high to low, or low to high, six hours, twelve minutes; but when a current either of the sea or a river, sets one way with the tide, the way that it sets is always of the longest duration.

It must be borne in mind that, leaving the obstructions of the land out of the account, the high waters, both of the sun and the moon, are points, and that the low water of each is a circumference of the earth. From this it is evident that, if both luminaries are over the Equator, the high waters of both will be on the Equator, whatever may be there distance eastward or westward (as arising from the moon's age, or distance from the sun), and that the low waters of both will pass through the poles, at which there will, of course be no tides. At those times there will be an extreme, or top of high water only at the Equator; and thus the two luminaries, acting directly together at spring tides, and directly opposite at neap tides, will cause the former to be higher and the latter lower than at times when one or both of the luminaries have declination from the Equator. When either of the luminaries has declination either north or south of the Equator, the upper high water of that luminary must decline as many degrees to the same side of the Equator, and the under high water the same number of degrees to the other side. In these cases there will be two latitudes on opposite sides of the Equator each distant from that by the declination and distant from each other by twice the declination round which the top of high water will revolve. At those times too, the low water of each luminary will fall as many degrees as the declination beyond the pole toward which the luminary declines, and fall the same number of degrees short of the other pole. By these means the whole tide will be lower when the luminaries have different declinations, because each will diminish the high water of the other in the direction of north and south; and the upper tides will be highest at new moon, and the under tides at full. These differences will increase, both with the declination and the latitude. At mid-summer and mid-winter they will have arrived at their maximum, and at the distance from the poles equal to the mean declination of the sun and moon, there will be only one high water in a lunar day, that is, the high waters will be about 24 hours 49½ minutes as under.

The motion of the tide is not accompanied by an actual transfer of the whole water; for that would produce, at the Equator, a current of about one thousand miles an hour. The wave of tide is sometimes moved in one direction, while the great mass of the water is moved in the other by an under current: just as one may often see the ripple which the wind causes, blown against the current of a river.

2. COMMON RULES FOR FINDING THE TIME OF HIGH-WATER.

To determine this time, these elements are necessary:—

1. The time of high-water at full or change, is found by observation: and to be accurate, it must be the mean of many observations made at different times of the year, and in different states of the weather.

2. The moon's age on the proposed day.

3. The time after noon when the moon shall arrive at the south.

The moon's age is found, by adding the *epoch* for the year, (the moon's age on the 1st of January,) to the *epoch* for the month (the age of the moon on the first of the month if it had been new moon on the 1st of January,) and the day of the month. If the sum be less than a lunar month it is the moon's age; but if greater, take a lunar-month from it, and the remainder is the moon's age.

The *epoch* for the months are these: January 0, Feb. 2, March 1, April 2, May 3, June 4, July 5, Aug. 6, Sep. 7, Oct. 8, Nov. 9, Dec. 10,

28 days,

The moon, when new, is south at the same time with the sun, and eight-tenths of an our nearly later for every day of her age. Therefore, multiply the moon's age by 8, take away the unita figures and multiply it by 6, for minutes; the other figures are hours after noon. If they exceed twelve, the excess is the hour of southing on the following morning.

As, if the moon's age were .8 days, $.8 \times 8 = 22$. 4, or 22 hours, 24 minutes; that is, 24 minutes after ten the following morning.

The high water is found, by adding the time of the moon's southing to the time of spring tide in the table. As, to find the high water at Bristol for 10th June, 1828.

Bristol to be..... 6 h. 36m.

Add moon's southing..... 10 24m.

Remains 5 o'clock.

From the variations already mentioned, as well as from local causes, these rules are not perfectly accurate; but they may serve to explain and exemplify the principles.

TERRESTRIAL LATITUDES AND LONGITUDES.

The following preliminary definitions will be found useful by those who have not studied the principles of mathematical phrenology.

1. The earth is very nearly a globe, having its mean diameter, or measure through the centre, 7,912 miles, very nearly; and its mean circumference, or the measure round it, 24,979 miles or in round numbers 25,000 miles. A degree is the 360th part of a circumference; thus, a degree of the earth's circumference is 69½ miles very nearly. A degree is understood to be divided into 60 minutes which in the earth's circumference are called *nautical* or *geographical* miles; and the minute is divided into 60 seconds. For common purposes, a degree may be called 70 English miles, and then a minute will be 2,053½ yards and a second 34½ yards. Half a circumference or a *semicircle*, is, of course, 180 degrees, and a quarter, or quadrant, 90. All circles, whether large or small, are divided into the same number of degrees, minutes, and seconds.

2. The earth turns round the same diameter, at a uniform rate of motion every 24 hours, 46 minutes, nearly. The extremities of this diameter, (which though a mere imaginary line, is called the axis of rotation,) are called the poles, from a Greek word signifying to turn. The daily rotation of the earth from west to east causes an apparent motion of the heavenly bodies from east to west and they all appear to revolve round the poles of the heavens; that is, the points to which the axis of the earth is directed.

3. At whatever part of the sea or the land one may be a heavy weight suspended by a string as that it touches nothing stretches the string so, that the weight end points very nearly to the centre of the earth, and the other, or upper end to the middle of the sky over us.

4. The horizon is the circle which if we be upon perfectly level ground, divides the upper half (or hemisphere) of the sky which we see from the under half, which we do not see. The Zenith to which the upper end of the string points, is in the centre of the first; and the Nadir, to which the weight end of the string points, is in the centre of the second.

5. From the zenith to the horizon is 90 degrees; the measure across the zenith from horizon to horizon is 180 degrees; and the measure from any point in the horizon to the opposite point is the same.

6. If one stand upon one pole of the earth, that pole of the heavens will be in the zenith and the other one in the nadir. If we stand at any number of degrees distance from a pole of the earth, that pole of the heavens will be as many degrees from the zenith.

If one stand midway between the poles of the earth, the north pole of the heavens will be in the north point of the horizon, and the south pole of the heavens in the south point—A circumference of the earth passing through all the points that are equally distant from both poles is called the Equator of the earth; and the circumference of the heavens directly over it is called the celestial

Equator. The first of these divides the earth into two equal *hemispheres*, (a *north* and a *south*;) and the last divides the heavens in the same way. The corresponding pole is in the centre of the hemisphere, whether of the earth or the heavens.

7. If one stands at any number of degrees distance from the Equator, the nearest pole will be that number of degrees above the horizon, and the other pole the same number below. Hence every change of place, northward or southward, will cause an alteration in the *elevation* of the pole, with regard to the horizon; but no alteration will be made by a change eastward or westward at the same distance from the pole (or Equator) be preserved.

8. A line drawn directly north and south is called a *meridian line*, because it points to the place of the sun at 12 at noon, or mid-day. If such a line were supposed to be continued northward and southward to the poles, it would be a half circumference of the earth; the Equator would divide it in the middle, and all the points through which it passed would be directly north and south of each other. If a line were supposed to be drawn, in the heavens, directly over all the points of a meridian, that would be the corresponding *celestial meridian*, and would pass through the poles of the heavens. If the meridian on earth and the celestial meridian were both continued completely round, they would be circles; and the former would divide the earth, and the latter the heavens, into an eastern and a western hemisphere.

9. As the meridians of all places pass through the poles, and as the poles are points, all meridians must meet one another in these. Lines and circles that meet one another are said to form an *angle*. That angle is the measure of the *inclination* of the one to the other. Thus, the angle which any two meridians make with each other is measured by that part of the equator that lies between them, and counted in degrees, minutes, &c.

10. As the whole heavens appear to revolve round the poles in 24 hours nearly, a twenty-fourth part must pass any point, as for instance, the south point, in one hour. But the twenty-fourth part of 360 is 15; therefore, 15 degrees of the heavens must apparently pass the south, or meridian every hour nearly.

When we cannot see one place from another, or measure the distance between them by a rod or line, we can determine them by knowing the positions of both on the earth's surface. As, for instance, a man living in London wishes to know how far it is to Jerusalem or Mexico, and in what directions those places lie from London; or a sailor, in the middle of the Atlantic, wishes to know how he can find his way to the Land's End in Cornwall, or to Kingston in the Island of Jamaica. In either case, he can neither see the direction nor measure the distance directly; and thus, if he had not some means of ascertaining them, travelling and sailing would be at an end.

When, as in these cases, we cannot point out the direction, or measure the distance directly we find how far the one place is north or south of the other, and also how far it is east or west; and when we have once found these, we can calculate the others. The distance north or south is found, first finding how far each place is north or south of the Equator, and then taking the sum, if they are on opposite sides, or the difference, if they are on the same side; and the distance east or west is found, by first finding the angle that is made at the pole by the meridians of two places, or, which is the same thing, by finding what portion of the Equator lies between their meridians.

The *latitude* of any place is its distance from the Equator; and is *north*, when it is nearest the north pole, and *south* when it is nearest the south pole. No place can have more than 90 degrees of latitude; neither can two places lie more than 180 degrees asunder.

The latitude is easily found by observing the height of the sun, the moon or any other celestial body, when it is on the meridian.

The height of the pole above the horizon is equal to the latitude of the place. This may be ascertained by observing the greatest and least elevations above the horizon of the pole star, at any other star which never sets. Half the sum of these elevations is equal to the height of the pole, or the latitude.

When we take our measurement of the latitude of any celestial body, (which is effected by means of an instrument which measures angles,) we must

previously know how far that celestial body is from the celestial Equator. The distance of any celestial body from the celestial Equator, is called its *declination* and is north or south, according to the situation of the body. If the declination be of the same kind with the latitude, we must subtract it from the height of the body when on the meridian; and if it be of the opposite kind, we must add it; the difference between the result and 90 degrees, is the latitude. In every method, when our observation requires to be accurate, we must make other corrections; as, we must allow for the dip or height we are above the mean surface of the earth; for the *half diameter* of the body, if we take the outside or limb of it instead of the centre; for the *refraction*, or bending of the light on passing through the atmosphere; and for the *parallax*, or difference of position in the body as seen from the surface of the earth, and from the centre. All these matters are, however, inserted and explained in the tables that are used by seamen and others, who have occasion accurately to find the latitude.

For common purposes, all degrees of latitude may be considered as of the same length; but as in reality, the earth is a little flattened toward the poles, it takes a passage over rather a larger space there, to make the same angular distance.

The longitude of a place is much more difficult to find than the latitude, because here we have no point fixed by nature from which to begin. We are, therefore, obliged to take the meridian of some particular place as a first meridian; find the longitudes of other places by observation, and count them from that. It is indifferent what place we take, and, therefore, British geographers and sailors take the meridian of the Royal Observatory, at Greenwich. Most other nations reckon from their chief city; but it would be much more convenient if the first meridian were the same with all, at least it would save the trouble of adding or subtracting the difference. Thus, in reducing French longitudes, which are reckoned from Paris, to English, $2^{\circ} 20' 43''$ must be added, if they are east, and the same must be subtracted if they are west.

The general method of finding the *difference of longitude* is, to find the *difference of time* between the two places. The sun, by the motion of which time is usually measured, apparently comes from the east. Consequently, it must be noon, or any other hour at the easternmost place, before it is at the westernmost. The difference, as has been stated, is 15 degrees for an hour, four minutes of time for a degree, fifteen minutes of longitude to a minute of time, or, under the Equator, about 510 yards for a second of time. These numbers are near enough for purposes of explanation, but for all purposes of computation, they require to correspond with the accurate period of the revolution of the earth upon its axis.

When the celestial bodies are visible, it is always easy to find the exact time at the place of observation, whether that place be on land or at sea; and, therefore, if it were possible to convey the exact time at the first meridian over the world, the longitude would be easily found.

A watch, or chronometer, as it is called, that goes at a perfectly uniform rate, may so far answer the purpose, but there is no absolute check upon it. If there be two or three, the average of them is a little more to be depended on, but even that gives no absolute certainty.

There are several other methods:—the eclipses of the sun, the eclipses of the satellites of Jupiter, the distance of the sun and moon and the distance of the moon from certain known stars. These can all be computed beforehand; and they are inserted in the nautical almanac, for the benefit of seamen. But eclipses of the sun happen very seldom, the eclipses of the satellites of Jupiter cannot be observed at sea, in consequence of the motion of the ship; the method mostly resorted to is derived from observing the distance of the moon from a star. Those distances are marked in the nautical almanac, with the times at Greenwich when they take place, and by making the proper corrections for *refraction*, *parallax*, and the other circumstances mentioned the longitude may be found by the difference between the time at which they are observed, and that stated at the first meridian. Thus if any position of the moon and a star be stated in the nautical almanac to take place at Greenwich at 12 at night, and if, after all corrections, the same be found to take place at 4 in the morning, the place of observation will be in 60 degrees east longitude nearly. Such are the principles, but the details are too minute for being noticed here.

The degrees of longitude are not all of the same length. The meridians meet at the pole, and are at the greatest distance, as under, at the Equator; therefore, as the latitude increases the longitude, becomes less and less, and consequently, an error in the longitude becomes a smaller number of miles. At latitude 60 the degree of longitude is half of what it is at the Equator,—where upon the supposition that the earth is a perfect globe, it is equal to a degree of latitude. The decrease is most rapid toward the poles, and at the pole itself the degree of longitude has no length whatever.

The principles of mathematical geography, are more fully detailed in the treatise on that subject published by the Society for the Diffusion of Useful Knowledge; and to that treatise we refer our readers for the explanation of many points that could here only be slightly noticed.

The following is a Table of the Longitudes and Latitudes of remarkable places:—

VENTILATION & HOUSEHOLD CLEANLINESS.

We are all thoroughly aware of the necessity of breathing; and the agreeable freshness and reviving influence of the pure morning air must convince us, that the breathing a pure atmosphere is conducive to health; yet we have carefully exclude the air from our houses as if its approach were noxious. Intending to shut out the inclemencies of the weather only, in our care to guard ourselves from the external air, we hinder that renewal of the atmosphere which is necessary to prevent its becoming stagnant and unfit to support animal life.

Few persons are aware how very necessary a thorough ventilation is to the preservation of health. We preserve life without food for a considerable time, but keep us without air for a very few minutes and we cease to exist. It is not enough that we have *air*, we must have *fresh air*; for the principle by which life is supported is taken from the air during the act of breathing. One-fourth only of the atmosphere is capable of supporting life; the remainder serves to dilute the pure vital air, and render it more fit to be respired. A full grown man takes into his lungs nearly a pint of air each time he breathes; and when at rest, he makes about twenty inspirations in a minute. In the lungs, by an appropriate apparatus the air is exposed to the action of the blood which changes its purer part, the vital air (oxygen gas), into fixed air, (carbonic acid gas,) which is not only unfit to support animal life, but is absolutely destructive of it. An admirable provision of the Great Author of nature is here visible, to prevent this exhausted and now poisonous air from being breathed a second time; while in the lungs the air receives so much heat as makes it specifically lighter than the pure atmosphere; it consequently rises above our heads during the short pause between throwing out the breath and drawing it in again and thus serves to us a pure draught. By the care we take to shut out the external air from our houses, we prevent the escape of the deteriorated air, and condemn ourselves to breathe the again and again the same contaminated and suffocating atmosphere.

Who that has ever felt the refreshing effects of the morning air can wonder at the lassitude and disuse that follow the continued breathing of the pestiferous atmosphere of crowded or ill-ventilated apartment? It is only necessary to observe the countenances of those who inhabit close rooms and houses, the squalid hue of their skins, their sunken eyes, and their languid movements, to be sensible of the bad effects of shutting out the external air.

Besides the continuation of the air from being breathed, there are other matters which tend to depreciate its purity; these are the effluvia constantly passing off from the surface of animal bodies, and the combustion of candles and other burning substances. On going into a bed room in a morning, soon after the occupant has left his bed, though he be in perfect health, and habitually cleanly in his person, the sense of smelling never fails to be offended with the odour of animal effluvia with which the atmosphere is charged. There is another cause, perhaps, still more striking when a person, fresh from the morning air enters a coach, in which several persons have been close-stowed during a long night. He who has once made the experiment will never voluntarily repeat it. The simple expedient of keeping down both windows but a single half inch would prevent many of the colds, and even fevers, which this injurious mode, of travelling often produces. Outside passengers, though they may suffer a little more from cold and wet, generally escape these every-day complaints of those who pay double their fare. It under where the windows are immovable and the door is never opened but while some one is passing through it! On entering such a den of filth, the nose is saluted by a stench so horrible, as to make any person, unused to it, recoil and pause before he venture in; but the wretched inhabitant has his sense of smelling so blunted, that he does not perceive that which every breath he takes, he inhales a poison, which is sapping the vigour of his body and destroying the energies of his mind.

Can we wonder that, with such absolute neglect, all the diseases of persons so situated should be of a dangerous character? or that the mind should be dispirited, and that the man should fly to dreams for relief from the burthen which he finds to be weighing him down?

It may be taken as a wholesome general rule, that whatever produces a disagreeable impression on the sense of smelling, is unfavorable to health. That sense was doubtless intended to guard us against the dangers to which we are liable from vitiation of the atmosphere. If we have, by the same means, a high sense of gratification from other subjects, it ought to excite our admiration

of the beneficence of the Deity, in thus making our senses serve the double purpose of affording us pleasure and security; for the latter end might just as effectually have been answered by our being only susceptible of painful impressions.

To keep the atmosphere of our houses free from contamination, it is not sufficient that we secure a frequent renewal of the air—all matters which can injure its purity must be carefully removed. The linen of beds should not be allowed to remain unchanged till it has lost all appearance of ever having been white, or of ever having had any acquaintance with the washing tub. The contents of chamber vessels should not be left in the house an instant, if it be possible, and certainly not in the room of sick person; every moment they remain they fill the air with a filthy odour, which is little less than poisonous to all who breathe it.

Those who have but one apartment in which they must of necessity perform all the domestic duties, should be careful to remove all matters that are offensive in smell; as cabbage water, dirty soap-suds, &c.; they should indeed, if possible, avoid washing in the room they live in. For the same reason, drying clothes indoors should be avoided.

Flowers, in water, and living plants, in pots, greatly injure the purity of the air during the night, by giving out large quantities of an air, (carbonate acid,) similar to that which is separated from the lungs by breathing, which, as before stated, is highly noxious. On this account they should never be kept in bed rooms; there are instances of persons, who have incautiously gone to sleep in a close room, in which there has been a large growing plant, having been found dead in the morning; as effectually suffocated as if there had been a charcoal stove in the room.

A constant renewal of the air is absolutely necessary to its purity: for in all situations it is suffering, either by its vital part being absorbed, or by impure vapours being disengaged and dispersed through it. *Ventilation, therefore, resolves, itself into the securing a constant supply of fresh air.*

In the construction of houses especially in those built for the poor, this great object has been too generally overlooked, when, by a little contrivance, in the arrangement of windows and doors, a current of air might, at any time be made to pervade every room of a house of any dimensions. Rooms cannot be well ventilated that have no outlets for the air; for this reason there should be a chimney to every apartment. The windows should be capable of being opened, and they should, if possible, be situated on the side of the room opposite to, and furthest from the fire place, that the air may traverse the whole space of the apartment in its way to the chimney.

Fire places in bed rooms should not be stopped up with chimney boards. The windows should be thrown open for some hours every day, to carry off the animal effluvia which are necessarily separating from the bed clothes, and which should be assisted in their escape by the bed being shaken up, and the clothes spread abroad, in which state they should remain as long as possible; this is the reverse of the usual practice of making the bed, as it is called, in the morning and tucking in up close, as if with the determination of preventing any purification from taking place. Attention to this direction, with regard to airing the bed clothes and bed after being slept in, is of the greatest importance to persons of weak health. Instances have been known in which restlessness and an inability to find refreshment from sleep would come on in such individuals when the linen of their beds had been unchanged for eight or ten days. In one case of a gentleman, of a very irritable habit, who suffered from excessive perspiration during the night and who had taken much medicine without relief, he observed that, for two or three nights after he had fresh sheets put upon his bed, he had no sweating; and that, after that time he never awoke, but that he was literally swimming, and that the sweats seemed to increase with the length of time he slept in the same sheets. By not permitting him to sleep in the same sheets or nightclothes more than twice without their being washed, he instantly lost this debilitating affection.

Various means are had recourse to at times, with the intention of correcting disagreeable smells, and of purifying the air of sick rooms. Diffusing the vapour of vinegar through the air, by plunging a hot poker into a vessel containing it; burning aromatic vegetables, smoking tobacco, and exploding gunpowder, are the means usually employed. All these are useless. The explosion of gunpowder may, indeed, do something, by displacing the air within the reach

of its influence; but then, unfortunately, an air is produced by its combustion, that is as offensive, and equally unfit to support life as any air it can be used to remove. These expedients only serve to disguise the really offensive condition of the atmosphere. The only certain means of purifying the air of a chamber, which is actually occupied by a sick person, is by changing it in such a manner that the patient shall not be directly exposed to the draughts or currents.

Chemistry has furnished the means of purifying the air of chambers in which persons have been confined with contagious diseases, so as to destroy the noxious power of the miasm generated in such situations, and thus of preventing the disease from extending. This will be accomplished by attending carefully to the following directions:—

Close up the windows and doors of the room intended to be purified, except the one by which you propose to retreat, and make up the aperture of the chimney or fire-place, except for about an inch or two at the bottom. Having put three table spoonful of common salt, (*muriate of soda*), rubbed fine, into a shallow dish, place it upon the floor of the apartment,—if such a few hot cinders beneath it, the better; and then pour, at once, upon the salt, a quarter of a pint of strong oil of vitriol (*sulphuric acid*); retire, and close the room for forty-eight hours. Immediately the acid is poured upon the salt a pungent vapour, (*chlorine*), is given out freely, which is extremely unpleasant to breathe, and very destructive to most metallic surfaces. It is on this account that the operator should leave the apartment quickly, and that all the iron and brass furniture should be previously removed. This vapour continues forming for many hours, and diffusing itself completely through all parts of the room, effectually destroys the matter on which infection depends at the expiration of about forty-eight hours, the room may be entered, the doors and windows thrown open, and a fire made in the chimney, in order that the apartment may be perfectly ventilated. It may then be safely occupied. The above quantity of salt, &c. is quite sufficient for a chamber of the usual size; for a much larger room, double the quantity, divided into two vessels, should be used. The merely offensive odour of sick rooms, or of any other apartment, may be readily corrected, by placing in them plates containing the *chlorosodic solution of Labarraque*, which is now well known in this country.

But no fumigation will be of any avail in purifying stagnant air, or air that has been breathed till it has been deprived of its vital part; such air must be driven out, when its place should be immediately supplied by the fresh, pure atmosphere. The readiest means of changing the air of an apartment is by lighting a fire in it, and then throwing open the door and windows; this will set the air in motion, by establishing a current up the chimney. The air which has been altered by being breathed is essential to vegetable life; and plants, aided by the rays of the sun, have the power to absorb it, while, they themselves, at the same time give out pure vital air. The process, going on by day, the reverse of that described before, as taking place during the night, is continually in operation, so that the purification of the atmosphere can only be prevented by its being preserved in a stagnant state.

In the country, there are other circumstances which require to be attended to besides cleanliness in the house, and the free admission of the air into it at all times. Care ought to be taken that nothing be allowed to exist very near the house that can injure the purity of, or produce humidity in, the atmosphere; heaps of putrifying vegetables, dunghills, pools and ditches of stagnant water, privies and open drains, furnish a constant supply of the exhalations which produce fever. In hot seasons, especially, every breeze in such neighbourhoods must carry poison with it. These things are much too common before the doors of cottages, and even of large houses. Those who build houses for the poor would do well to choose situations sufficiently elevated to allow the waters to be drained off with facility; without this, they must stagnate and putrify to the danger of the health of the inhabitants.

NATURE AND USE OF CHRONOLOGY.

The term **CHRONOLOGY** is made up of two Greek words, *Chronos*, "time," and *Logos*, literally "word," or "description;" so that the simplest definition of its meaning is, **THE STORY OF TIME**,—or the narrative of the succession of recorded events, in their proper order, noticing the portions of time that elapse between them.

As the past is our only safe guide for the present, and our only useful key to the future the story of time, or the consideration of events, in the order in which they happen, becomes a matter of the utmost importance. Even to our merely historical knowledge, that is, our knowledge of the events themselves, and without any reference to the comparison of them together, chronology is important; because, without that, our knowledge is not correct. But when we wish to turn our historical knowledge to a practical use, by reflecting upon the causes and results of human actions, chronology becomes indispensable. The great practical use of past events is the efforts that the antecedent event has upon the consequent; and if we mistake the order of succession, (and where we have no information we are more likely to be wrong than right,) we are in a worse condition than if we had no information whatever,—we are in a similar condition to a man travelling along the road from London to Dover, in order to arrive at Liverpool, farther from the object we wish to arrive at, than if we had not moved at all.

Now, men seldom take the first step in any art or science, until they are goaded on by necessity; and as the use of chronology is philosophical, and thus does not appear till men begin to compare the former events with the latter, and draw conclusions, it cannot be known among very illiterate nations, and could not be known in the early ages of the world. The memories of inhabitants of the South Sea Islands do not extend backwards above an age or two; and even then they are vague, not agreed about the events themselves or informed as to the intervals between them. Of the recorded events of the early ages, of the world, the information is so very uncertain, that the most acute and laborious inquirers into the subject are at variance.

Before the story of time can be known, we must know something of time itself; we must know how to compare two portions or periods of it, so as to be able to say either, that they are of equal length, or that the one is longer than the other, and how much longer it is. In order to do this, we must fix upon some standard of which the length is known; and as we cannot keep a portion of time by us to apply to other portions as we do a standard pound for weight, or a standard bushel for dry measure, we must have recourse to some event which we have reason for believing does not take up a longer period at one time than at another,—such as the rotation of the earth upon its axis, the revolution of the moon round the earth, or that of the earth round the sun. Of the absolute equality of any two portions of time, whatever may be the event by which they are measured, we never can be certain, because we cannot be in possession of two of them at once so as to compare them together. If we can find no other difference between the events, we have no reason to believe that the times in which they happen are of different lengths; and this negative proof is all that we can get. In using the measures of time we observe the same method as with other measures. If the period be less than a day, we mention the number of hours, or parts of an hour, that are in it; if it be of moderate length, such as the life of a man, we count it in years; and if it be long, we count it in centuries, or hundreds of years.

Though to all nations, the various lengths of the day, as arising from the rotation of the earth; of the month, as arising from the revolution of the moon; and of the year, as arising from the revolution of the earth, be each dependent upon the same cause; and though, as the other circumstances of those causes—the spaces over which those bodies pass, do not vary much the same day, or month, or year, still they must be of the same length to the people of all nations, and there cannot be much difference between one and another, yet different nations have had different modes of reckoning them. Some of these differences are pointed out in Art. I. “On the Calendar.”

When a nation came to such a degree of information and importance, as that it felt a desire of recording the events of its own history, it generally began with some great event, as a fixed point or epoch, for which it counted the years or succession of portions of time, all presumed to be equal, and each equal to that which the nation happened to take for standard. The day being the portion with which people are most familiar, and also the one of which the appearance is the most striking—light and darkness being the greatest of all contrast—most nations made the day the absolute measure; but as the day is rather short for measuring long intervals, they generally had periods of so many days, and of so many times these again, corresponding with, or rather having some resemblance to, our weeks, months and years.

As an exact number of times of the rotation of the earth is not contained in the revolution of the moon, and as an exact number of times of either this rotation or this revolution is not contained in the revolution of the earth; *eras* which are reckoned in terms of either of these fixed periods, do not agree with each other. In other words, as days, lunar months, and year, are not even parts or multiples of each other, two *eras* which are counted, one in so many times of one of these, and the other in so many times of another, cannot be made to agree, so as to point out the time at which any event happens, without making correction for the fractional differences. The period of time in which those fractional differences amount to an unit of the shorter measure, is called a cycle. —See Art. II.

Those nations among whom the Christian religion has been disseminated, have, ever since its introduction, abandoned all *eras*, save that which began at the birth of our Saviour. This is called the CHRISTIAN ERA, and when the date or number of the year is spoken of in a solemn or formal manner, the words *Anno Domini*, or the contraction A. D., meaning "the year of the Lord" are prefixed to the number, to distinguish it from other *eras*. When we count from the birth of our Saviour backwards, we either put B. C., "before Christ," or *Anno ante Christum*, A. A. C., which is the same. Events are sometimes dated from the creation of the world; and the term *Anno Mundi*, A. M., that is, "year of the world," prefixed to the date; but as opinion is divided as to the precise date of the creation, in terms of the Christian era, the commencement of that era is considered as the preferable epoch.

To find the distance of any event—if it be before the birth of our Saviour, add the date of it to the date of the year; if after, subtract; the sum in the first case, or the difference in the second, is the time from the present date, or the distance of the event.

As the *eras* of the nations of antiquity have become obsolete, and as the principal events in their histories have been reduced to the respective years of the Christian era, either before or after the birth of our Saviour, those *eras* are needed only by those who read the writings of antiquity; and, therefore, it is not necessary, in the present case, to detail them. There is, however, one era which is used by a very large portion of the moderns, the *Hejira*, or era commences at the epoch of the flight of Mahomet from the city of Mecca to that of Medun, which took place in the 622d year of the Christian era. The Moslem year is regulated by this event.

PRINCIPAL ERAS.

Creation of world.—There have been as many as one hundred and forty opinions on the distance of time between this event and the birth of our Saviour.* Some make it as small as 3616 years, and some as great as 6424. The chronology which is usually given with the authorized version of the Bible, places the event in the 4004th year before the commencement of the common era.

The Olympiads.—The first year of the first Olympiad begins in the summer of the 776th year before the common era; the first year of the second Olympiad, in the summer of the 772d year, and so on.

The foundation of Rome.—The 753d year before the commencement of the common era according to the calculation usually adopted.

The Birth of Christ.—This is probably to be dated in the 4th year before the commencement of the common era.

The Hejira—Commencing on the 16th of July, in the 922d year after the common era.

The letters for the first, second, and third years after every bissextile, are the three single letters placed under the double letters, in the same column with the bissextile they immediately follow. For example, as the Dominical Letters for 1600 were A B, so the Dominical Letter for 1601 was c, for 1602 e, and for 1603 f. So for 1796 the Dominical will be C B, consequently, 1797, 1798, and 1799, must have A, G, and F: and the letter for 1800, (which is to be accounted a common year,) will be E; therefore 1801, 1802, and 1803, must have the subsequent letters D, C, and B, and then 1804, being bissextile will come under the letters A G: and from thence every fourth year will be leap-year.

N. B.—In every Leap Year there are two Sunday Letters; one serves for January and February, and the other for the remainder of the Year.

Under the word years, find the year; above which is the Dominical letter for that year; then against the months find the same letter, over which are placed the days of the month; every Sunday in the month. In leap year, for January and February, use the letter above the blank space before the year; for all the rest of the months, use the letter for the year.

To find out when it is Leap Year, divide the year by 4: if there is no remainder, it is Leap Year, and if any remainder, it is 1, 2, or 3 years after Leap Year.

TO REDUCE BAZAR WEIGHT INTO FACTORY WEIGHT.

Add 1-10th; and, *vice versa*, deduct 1-11th.

Thus · 3,000 Bazar Maunds.

Add 1-10th 300

3,300 Factory Maunds.

To reduce Bazar weight into Cwt.; add 1-10th and deduct 1-3rd of that sum, the remainder will be Cwt.

Thus 3,000 Bazar Maunds.

Add 1-10th 300

3,300

Deduct 1-3rd 1,100

Remainder 2,200 Cwt.

To reduce Factory Maunds into Tons; divide by 30 and the quotient will be the answer.

Thus, Factory Maunds $3,000 \div 30 = 100$ Tons.

COMPARATIVE TABLE FOR THE VALUATION OF INDIGO.

* That is, deducting more than 14 per cent. from the Factory maund, to meet all charges and contingencies. The Factory maund, 74 lbs. 62-100 is thus taken at 64 lbs.

The use of this Table is obvious. If Indigo sells in Calcutta at 200 Rs per maund, and Bills on London at 2s. per 1 R.—what price must be expected in London to render the purchase of Indigo or bills indifferent? by column 2d—

Rs. D. Rs S d.
10 3 75 :: 200 : 6 3 the answer.

The third column will give the same result.

If the London price of Indigo be assumed as 7 shillings per lb. and bills on London sell here at 2s. 3d.—how much can a buyer give for a maund of Indigo without fear of loss?

From column 3d—

Sh. Rs. Sh Rs.
1 : 33 39 :: 7 : 233½ Ans.

The same result is obtainable from column 2d.

ANOTHER METHOD FOR VALUATION.

To find the price per lb. in London, at which Indigo ought to be sold to yield an equivalent exchange, after the Freight, Insurance, and every charge, both in Calcutta and London have been deducted.

Rule.—Divide the cost price per Factory Maund by 30, and the quotient will be the amount, per lb., in shillings and parts of a shilling at the Exchange of 2s. 1d. per Rupee.

Example.—Indigo costing Rs. 200 per Factory Maund divided by 30 will give 6s. 8d. as the price per lb. at which it ought to be sold to yield the above exchange of 2s. 1d. per Rupee.

To find the equivalent sale price at any other rate of Exchange, add or deduct 1 per cent. or every farthing above or below 2s. 1d.

SHORT METHOD TO FIND THE SIMPLE INTEREST OF ANY SUM,

FOR ANY NUMBER OF DAYS, AT ANY RATE PER CENT. PER ANNUM.

Formula.

Let p denote the principal.

d the number of days.

r the rate per cent.

and i the interest.

$$\text{Assume } 100,000 \left(2 p d r + \frac{1}{4} 2 p d r + \frac{1}{100} 2 p d r + \frac{1}{100} 2 p d r \right) = a$$

$$\text{Then } a = 10,000 = i \text{ very nearly.}$$

Rule.

Multiply the principal by the number of days, and that product by double the rate per Cent. Then divide the amount by 3, 30, and 300, add these quotients to it, and, subtracting the 10,000th part of the sum, the remainder divided by 100,000 will be the interest required.

Example.

Required the interest of Rs. 100,000 for 146 days at 9 per Cent. per annum? Answer Rs. 6,450.

$$\text{Principal } 100,000 \times 146 \text{ days.}$$

$$\begin{array}{r} 100000 \\ 720000 \\ 180000 \end{array}$$

$$\text{Product.... } 26200000 \times 18 \text{ (double the rate per cent.)}$$

$$\begin{array}{r} 210240000 \\ 26200000 \end{array}$$

$$\begin{array}{r} \text{Amount... } 473040000 \\ \text{Add 1-3rd part... } 157680000 \\ \text{1-30th do.... } 15768000 \\ \text{1-300th do.... } 1576800 \end{array}$$

$$\text{Sum..... } 648064800$$

$$\text{Deduct 1-10,000th part } 64806 \text{ (rejecting fractions).}$$

Remainder... 648000000 divided by 100,000. (by inserting the decimal point before the fifth figure to the right hand) shows that the interest is Rs. 6,480.

Time Table.

No. 1 — Shows the number of days from any given day in one month to the same day of any other month. It must be observed, that in Leap Year, if the end of the month of February be included in the time, one day must be added. If it be desired to find the number of days from a given day in one month to a different day in another, the difference between the dates must be added to, or subtracted from (as the case may be) the amount. For Example: — To find the number of days between the 5th of January, and 12th of November—

From 5th of January to 5th of November, 304 Days.
From 5th to 12th of November, 7

311
If it be Leap Year, add 1

Answer, 312

No. 2 — Shows the decimal parts for each and all the days in the twelfth part of a year, consisting of 365½ days.

THE USE OF THE FOREGOING TABLE.

I. To find the number of days from the end of the year to any day in any month of the year following.—*Rule* Opposite the given day in the margin look under the given month, which will show the number of days required. Thus, from 31st December till 15th August following is 230 days, and to 30th October 803 days.

II. To find the number of days from any particular day, to the end of the year.—Suppose 27th July.

From 365, the days in a year,
Take the number answering to 27th July, viz. 204

Remainder 57 days required

III. To find the number of days from any day in one month to any day in another month—suppose from 5th April to 18th November.—*Rule*: Take the difference between the numbers corresponding to those days.

18th November 332

5th April..... 59

Answer..... 277

IV. To find the number of days between any day in one year to any day in the year following.—Suppose from 1st August, 1822, to 27th May, 1823.—(See Rules I and 2.)

From 365 Days in a Year,
Take the number of 21st August 234

277 days in 1822

Add the number of 27th May 147

Total..... 379 days required.

Examples What will 1 Rupee amount to, put out to Compound Interest for 230 year at 7 per Cent per Annum?

Answer. To about 5,24,388 Rupees; out at Compound Interest for 5 years, 153 days—200 years being 19 times the period of doubling, and 5 years, 153 days, over it.

TO FIND THE LEAP YEAR.

Divide the given year by 4, and if there be no remainder, it is Leap Year, but if 1, 2, or 3 remain, they shew it so many years after leap year.

TO FIND THE EPOCH.

Divide the given year by 19, multiply the remainder by 11, and the product will be the Epoch, if it does not exceed 29, but if it does, then divide the product by 30, and the last remainder will be the Epoch.

TO FIND THE MOON'S AGE.

To the Epoch of the year, add the number for the month, and the day of the month the sum, if it does not exceed 30, is the Moon's Age; but if it does, subtract 30 from it, and the remainder will be the Moon's Age.

N. B.—This Table shows the actual time of high water at, and corresponding to, the number of days after the full and change of the Moon, when not influenced by local causes, after which time, the water begins to fall, although the tide of flood continues to run for about an hour; in the same manner the water is at its lowest, nearly two hours before the ebb tide is done, and begins to flow the last hour of the ebb, subject however to some variations according to the seasons, and from local causes.

THE TIDES AT MADRAS.

On the 31st of May 1821, a tide gauge was fixed to the northeast angle of Fort St. George, and the tides were observed. Until the 29th of July the observations were frequently interrupted; but after that date, they were made daily, at every tide in every twenty-four hours, until the 10th of October, and the result of all these observations is shown in the following tables:—

THE TIDES AT JAVA, IN 1815.

The east monsoon is the dry season, and the west monsoon is the wet season. July and August are the driest months, and in January and February the heaviest rains fall. The barometer ranges only from 29.5 to 29.9.

At full and new moon the tide flows and ebbs but once in the twenty-four hours, but at the first quarter and last quarter of the moon, the tide flows and ebbs twice in the twenty four hours. The highest tides occur in the dry season, and the lowest in the rainy season.

At Batavia, at full and change, in the month of December, it is high water at noon, and low water at midnight; in the month of March it is high water at about half-past six o'clock in the morning, and low water at six o'clock in the evening; in the month of June it is high water at midnight, and low water at noon; in September high water at nine in the evening, and low water at nine in the forenoon. The sea rises and falls about three feet at most, and in the neaps only half as much as in spring tides.

At Samaran, at full and change, in December it is high water at about half-past two o'clock in the morning, and low water in the afternoon; in March it is high at about half-past five in the morning, and low at six o'clock in the evening; in June, high in the forenoon, and low in the afternoon. Sometimes the flood lasts the whole day. From July to the end of September it is high water in the afternoon, and low water in the forenoon. The difference of the rise and fall is seldom more than from two feet to two feet and-a-half. The tides being very irregular, but little dependence can be placed on these observations.

AFGHANISTAN.

DOST MAHOMMED KHAN, one of the Brothers of FUTTER KHAN, the celebrated Vizier of MAHMOOD, and chief of the *Baricksye* Clan, the most powerful in Afghanistan had for some years ruled this country previous to the *Restoration of SHAH SOOJAH OOL MOOLK* in 1838. On the death of this Prince, DOST MAHOMED again assumed the reins of Government which he still holds.

On the base and cruel murder of FUTTER KHAN by MAHMOOD at the instigation of PRINCE KAMRAN, his brothers revolted from their allegiance under the guidance of AZEEM KHAN, the Governor of Cashmere, and drove MAHMOOD and his son from Cabul. AZEEM KHAN in the first instance offered the vacant throne to SHAH SOOJAH, (considered the legitimate King by the British Government,) but offended by some personal slight, withdrew his support, and placed in his room, EYOON, a Brother of SHOOJA, who was content to take the trappings without the power of royalty. On AZEEM KHAN's death, his Brothers dissatisfied with their position conspired against his son, HUSEEN OOLLAH KHAN, and seizing his person, by threats of blowing him from a Gun, induced his mother to deliver up the residue of AZEEM KHAN's immense wealth. EYOON's son was killed in these disputes and he himself alarmed by these scenes of violence fled to Lahore. DOST MAHOMMED the most talented of the Brothers, then took possession of the throne, and became *de facto* King of CABUL. SHERE DIL KHAN accompanied by four Brothers carried off about half a million sterling of AZEEM KHAN's money, and seated himself in CANDAHAR, as an independent Chieftain. He and one of his Brothers are dead; and CANDAHAR was until lately ruled by COMUN DIL KHAN, assisted by his two surviving Brothers, RUSHEEN DIL and MEER DIL.

At the period of the flight of EYOON from Cabul, Peshawar was governed by a Brother of DOST MAHOMMED who with another Brother were both killed in battle and were succeeded by MAHOMMED KHAN, who is a tributary of the King of the SEIKHS. He is on bad terms with his brother DOST MAHOMMED; but out of the revenues of PESHAWAR supports his younger Brother PIER and SAKED MAHOMMED and the families of his two predecessors.

KINGDOM OF THE SEIKHS.

His Highness, MAH RAJA DULKEEP SINGH, is declared King of the Seikhs.

His dominions comprise the Punjab, Cashmere, Peshawar, Moultan, part of SIND, &c. he is an adopted son of RUNJEET SINGH and is about 18 years of age.

The Government of the Seikhs had been formerly divided among a number of petty independent chieftains under the *Khaled* or commonwealth, "to the established rules and laws of which, as fixed by GURU GOVIND, it was their moral and religious duty to conform." The ancestors of RUNJEET SINGH had been in possession of but a few villages, until his father, by feudatory depredations, and the conquest of Lahore, laid the foundation of the present considerable power which has subdued almost all the petty Seikh chiefs.

KINGDOM OF OUDE.

The family of the princes of Oude are descended from MEER MAHOMMED AMEEN, of a noble family in Persia, who came to India in the reign of BEHADOUR SHAH, and was received into the Imperial service, under the name of SAADUT KHAN. He was appointed to the Government of Oude in 1719 on the accession of MEHAMED SHAH to the throne of Delhi. He had no son, and was, therefore, succeeded by his nephew and son-in-law. MANSOOR ALLY KHAN, who took the title of SUPDER JUNG. He was succeeded by SUFA-OOL DOWLA, who was again succeeded by ASAF-U-DOWLA. On the death of ASAF-U-DOWLA without any male issue, his spurious son, VIZIER ALLY, assumed the reins of government, but his illegitimacy being discovered, he was,

after a reign of four months deposed, and **SAHAY SHAN KHAM**, the younger brother, ascended the throne on the 21st of January, 1798. He died in 1816 and was succeeded by his son **CHASI OU DIEN HYDER**, who relinquished the title of Nephew, in 1819 and assumed that of King; he died in 1827 and was succeeded by his son **SHAN ZEHAN**, who assumed the title of "His Majesty **ABNO NUSRAH KOTIB-DOD-DEEN SOHMAN FAR SULTAN**, **ABDUL NURAHMAN ZEHAN NUSRAH-DOD-DEEN, HYDER SHAHMAN BAHWA CHAGAR, KHODOL-DOLA MUDUK A-HOO SULTAN DUT A-HOO**." This prince died in 1837 and was succeeded by his uncle, **NUSRAH DOD-DEEN**, who assumed the title of "His Majesty **ABNO-PUTTY MOJEN-OD-DEEN SULTANA ZAHAN MUHAMMAD ALLY SHAN BADAHA-A-ORDA**" and is the present reigning Sovereign of Oude.

KINGDOM OF AVA OR BURMAH.

The family name of the present King of Burmah, or that given to him by his Grandfather, is Maung Khaung, but it is not considered respectful to mention this name. Having obtained an appanage, and held until he assumed the throne, the rich District of Tharawadi, which contains the principal teak forests in the country, he was always styled Tharawadi Mon; thu, or Prince of Tharawadi. He was born on Wednesday the 8th of September 1736, and he is therefore now (1st January 1814) in his 54th year. His father was the heir apparent to the throne when Colonel Syme visited Amarapura, and whom that officer calls King Teekien, more properly, Ain-ye-thakhen, or Ain-ye-Meng, "Lord or Prince of the Eastern House." His Grand father was Colonel Syme's Minderagee, more properly, Meng dara-gyee, the Great King of Richtenness, one of the titles borne by the Kings of Burmah, but his subjects now refer to him as Pho dau-gyee, the great royal Grand father, or Badiun Thakhu, the Lord of Badoun, the town which he had held before he came to the throne. He died on the 6th June 1819 and was succeeded by the present King's Elder Brother once known as Tsa ein-meng thu, Prince of Tanguin, with the family name of Maung Tsen, the same who engaged in war with the British Government, and who was dethroned by the present monarch in the month of April 1817.

In June 1837 the present King deserted his Brother's Capital of Ava, which has now become a ruin, and proceeded sixty miles to the northward, with the ostensible object of building a new city there, but in reality for the purpose of escaping from the British resident, for on the withdrawal of that officer, the King returned, and established himself in his Grand-father's city of Amarapura, which is now again the Capital of the country.

By his principal Queen he has a grown up son and daughter, the former now styled Faung-dweng-gyauug Mungtha, Prince of Faung-dweng-gyauug, and the latter highly skilled in Burmese science, particularly astrology. By his numerous inferior Queens he has several other children, the principal of whom is a boy, spirited character, formerly named Tait-teng-gyee, but since his father's accession to the throne styled, from the town the revenues of which he enjoys, Pye Meng-tha or Prince of Promé. Besides him, and the King's Uncle, the Philosopher Prince of Mekkhara, the Lieutenant or grand council of the kingdom now consists of four Woungyees, two of whom are, Maung Shwe-sha, who was Governor of Rangoon during Major Omping's mission in 1811-12 and Maung Daak-hyee, who held the same office when Colonel Benson was deputed to the Court of Ava in 1838.

Shortly after the present king seized the throne, he put to death the late Monarch's only son the Tasya Meng, his principal Queen, her Brother Meng-tha-gyee, or the great Prince, and most of the ministers and Chief officers of the late Government. The life of the late Monarch, however, has been spared and he is not ill treated excepting to being kept in a small prison. The country is stated to be in a very unsettled state and there is now no maritime effect of superior rank and authority to the southward of the Capital. Every town and almost village has its own petty governor independent of all interference excepting from the Court near. Commercial speculations also are hazardous, particularly as the present King has endeavoured to destroy his principal Sea port town Rangoon, where British subjects are now not safe of pro-

tection and freedom from official exactions and molestation; and it is very important that it should be generally known, that the Government of India declined to interfere when a complaint was submitted to it by a British Commander of Illusage at Rangoon. Although the relations of the British Government with the present King continue in an unsatisfactory state, and no British Officer resides in Hurmah, there is no ground for supposing that he entertains the smallest idea of risking a war with us. On the contrary, strong hopes may now be entertained, as two of the most violent of the war party, the King's Son Tait-teng-bhya, and the Mya-wadi Woongye, have been recently carried off by Cholera, that the convenience and advantage of re-establishing amicable relations with the British Government will be acknowledged by the King of Burmah.

The following may be considered as a fair translation of the state and title of the King of Burmah:—"His most glorious and excellent Majesty the Lord of the Tahadian, King of Elephants, Master of many White Elephants, and Proprietor of Mines of Gold, Silver, Rubies, Amber and the Noble Serpentine, Sovereign of the Empires of Thunsperranta and Toumpatpa and other great Empires and Countries, and of all the Umbrella wearing Chiefs, the Supporter of Religion, the Sun-descended Monarch, Arbitrator of Life, and great King of Righteousness, who bears the honorary name (in Pali) of the Illustrious in the three worlds, the King of Kings, possessor of boundless dominion and supreme wisdom, and great King of Righteousness."

His dominions consist of Burmah Proper, the old kingdoms of Toung-ngu and Pegu, and the Shan States and Districts of Kale, Thauinghut, Khamti, Mogau, Bamo, Monhyen, Nomast, Main Loup, Taung-bain, Thant, Kalgmah, Main Main, Main Leng-ryih, Kyalu Yaung-gyin, Kyalinoun, Kyau Khyaling, Thibo, Thoun-ay, Monch, Kyalin-toung, Kyalin-kham, Nyaung yar, Laga, Nauk-mo, Mohe, Main Pyn, Main Pan, Main Pan, Main Kang, Nuang-mur, Thirit, Tabot, Youk-souk, Main Tsat, Enle, &c., all of which States and districts however are differently named, more or less, by the Shans themselves.

KINGDOM OF SIAM.

The King's usual titles are, "The God Buddha who dwells over every head, the Lord of life and master of the Palace". His dominions consist of Siam Proper, of the Shan States of Ch'hiung Nai, Lamp-hun, Lak-hou, Meuang Nan, Meuang Fang, Lan-ch'hang, Luang Phubang, Ch'hiung Sen, Ch'hiung Nai, and others, of part of the old kingdom of Cambodia, and of the Malayan States of Quena and Patani.

The present King is the same person whom Mr. Crawford saw as Prince Krom Chint at Bangkok in the year 1822. He was the eldest son by an inferior wife of the late King, whom he succeeded on the 31st July 1824, with the general consent of the Country, and he is now about 50 years of age. His successor, it is supposed will be his brother *Chao Fa*, "Lord of Heaven," the eldest son of the late King by his principal Queen. The other Members of the Royal family of Siam are said to amount to nearly three thousand.

KINGDOM OF NEPAUL.

Maharaja RAJ RAJENDRA VIKRAM SAH, King of Nepal, succeeded his father at the early age of two years; he is the son of GHYAN JODHA VIKRAM SAH, the son of PRITHWI PAL SAH, the successor of RUN RAJAPUR (the son of JING PRATAP, the son of PUNTH NARRAIN, the Goorkh conqueror of Nepal), who subdued it in 1768.

The spirit of the present Rajah's father is one of those, which Princes whose caprice is the law, have met with. GHYAN JODHA VIKRAM SAH having caused a pagoda, like that at Jaggernath, to be erected, ordered similar obedience to be paid to it. This excited abhorrence amongst his people; and one of his brothers took advantage of this opportunity of protesting the death of another brother, who had been put to death by the eradication of his image, by order of the Rajah: He accordingly went to the Court, and pretending to lamentate with him on the injustice of his late order, struck him with his sabre. He was, however, immo-

dately killed by the Cossy Shimson, who was present, and the infant prince was placed on the *Musnud*. On the night of the same day, three hundred persons, of whom any suspicion was, it is supposed, put to death by the Cossy's order. Nepal is tributary to China from the year 1792.

NIZAM OF HYDRABAD.

His Highness Nawab Asoph Jan MOOSUFFIAH-UL-MUHAMMAD NIZAM FATEHMAH ALI KHAN BANARAS FATEH JUNG, Nizam of Hyderabad, ascended the *Musnud* on the 24th of May, 1830; is the son and successor of SECUNDER JAN the eldest of the eight sons of NIZAM ALI KHAN, the younger brother of SALABUT JUNG, the uncle and successor of MOOSUFFIAH JUNG, the nephew and successor of NAZIR JUNG, the second son of NIZAM-UL-MUHAMMAD, who obtained the Soubdary of the Deccan in 1717, in the reign of Muffee-ul-Dirjet.

Before the formation of a treaty of perpetual alliance with the English, on the 19th October, 1800, the subdary of the Deccan had suffered continual disturbances. When Asoph Jah Nizam-ul-moolk returned from Delhi, in 1746, he fought in 1741, his son NASTA JUNG who had rebelled against him. Nizam-ul-moolk died in 1746, from which time, to the year 1763, a period of 15 years, three princes had ascended the *Musnud*, and were successively assassinated. Muxaffer Jung was grandson to Nizam-ul-moolk by his younger daughter's side Nizam-ul Moolk removed his capital from Aurungabad to Hyderabad.

RAJAH OF GWALIOR.

His Highness, Maharajah Ali Jah Syajee Rao Scindia, the adopted son of, JANKO RAO Scindia, succeeded to the Government on the 4th February 1818, on the death of his predecessor, JANKO RAO who was elected by Baiza Bai, the widow of DOWLEY RAO Scindia; the nephew of MADHAI RAO Scindia, the son of RANOO RAO Scindia.

The family of Scindia are Sudras, of the tribe of Kumbhee, or cultivators. Ranojee was employed by Peshwa Bajrow, as the bearer of his slippers, from which situation he rose to eminence; and when Bajrow having succeeded his father, Birsamath Row, in the office of Peshwa, in May, 1720, came into Malwa in 1731, Ranojee was a Marhatta chieftain of high rank; so that the Sovereign authority of the Scindia family cannot have existed much more than one hundred years.

RAJAH OF BHURTPORE.

His Highness, Maharajah BALWANT SINGH, Rajah of Bhurtpore, succeeded his father in August, 1824; was displaced by one of his cousins, DURGEE SAI, in March, 1825, but reinstated by the British Government, on the 19th of January, 1826; is yet a minor in age: the son of BULDER SINGH, the second brother of RAHADRAH SINGH, the eldest of the four sons of BHOWAT SINGH, the son of KAIAT SINGH, the brother of MUTTUN SINGH, the brother of JAWAHAR SINGH, the son of SOONAI MULL, the founder of the principality, killed in 1703.

The settlement of the Jats, (of which tribe the Rajah of Bhurtpore is,) in the Doab of the Ganges and Jumna, is dated in 1700, when they migrated from the banks of the Indus. During Aurungzebe's last march towards the Doob, CAULAHUW, the Jat, pillaged the baggage of the Army, and with part of the spoil erected the fortress of Bhurtpore. The present prince, like many of his predecessors, is not legitimately descended being the son of a female slave of the name of Seebah Begum. When a Rajah has no son, he purchases females, and the boy begotten on any of them, is adopted by the Rajah and the *Fant-Rango*.

RAJAH OF KOTAH.

His Highness, Maharaja BANGA SINGH, Rajah of Kotah. The son of KANOO RAO, he son of MATA RAO QUIN SINGH.

RAJAH OF INDOOR.

His Highness, Maharaja HIRSHY RAO Holkar the cousin and successor of MOULHAN RAO the third the adopted son and successor of JESWONT RAO Holkar, the brother of CASI RAO, the eldest of the four sons of TEKAJEE Holkar, a chief who was elected to the Government of the Holkar state by AMILYA BAI, on the death of her son MALLER ROW.

The Holkar family are of the Dhoongur or shepherd tribe. The derivation of the name Holkar, or, more properly, Halkar, is from Hull a village, and Kur, an inhabitant. MOULHAN RAO, I was the first prince of the Holkar family; and the time when he obtained any local authority was in 1724, the district of Indore was assigned to him in 1738. He had only one son, KUNDJI ROW, who died in 1754, many years previous to his father's death, and left an only son MALLER ROW. He also died after a reign of nine months after the death of MOULHAN, ROW. The original family being thus extinct, AMILYA BAI elected TEKAJEE HOLKAR to the principality. He had four sons, CASI ROW and MOULHAN ROW by his wife, and JESWONT ROW and ETOJEE by his mistress.

RAJAH OF JOYNAGAR OR JYPEER.

His Highness, the infant son of Maharaja SEWAI SINGH, Rajah of Joynagar, or Jyepoor, who is the son of JAQAT SINGH, the son of PRATAP SINGH, the son of MADHO SINGH, the son of RAM SINGH, the son of SEWAI JYOSH, who lived in the time of MEMAHED SHAH. The young prince is of tender age and RAJUL BAHU SAGH is the regent during his minority, appointed by the British government.

RAJAH OF JOYDIPPOOR OR MARWAR.

His Highness, Maharaja MAUN SINGH, is Rajah of Joudipoor or Marwar. He is of the tribe of Rhatore Rajpoots.

The earliest Rajah of this country on record was Maharaja JESWONT SINGH, who having died near Cabul, in 1551, Aurungzebe, one of whose best generals the Maharaja was, gave orders friendly to convert his children. The family were thus compelled to take refuge in the hills and woods, and on the death of Aurungzebe, regained their former possession. AJIT SINGH, the grand son of JESWONT SINGH, having rebelled

RAJAH OF BOCHELKUND.

His Highness Maharaja BISWANATH SINGH, Rajah of Bozhelkund which is perhaps the most ancient Hindu dynasty now existing in India.

RAJAH OF BHOONDER.

His Highness Rao Rajah RAM SINGH, Rajah of Bhoonder, is of the Bata tribe. "During the retreat of Colonel Monson in 1804, the Bhoonder Rajah greatly assisted him in his distress and his conduct has been uniformly friendly to the English; yet, at the peace of 1805, he was abandoned by the Government to the vengeance of the Marathas." *Hamilton, page 173.*

RAJAH OF OUDYPORE.

His Highness, Rai RANA JAWAN SINGH, the son of RANA BHIM SINGH, Rajah of Oudypore. The family of the princes of Oudypore, belong to the Soodya tribe of Rajpoots, which is considered the most noble of all the tribes. The family is also regarded highly by the Muhammedans, in consequence of a tradition, that he is descended, in the female line, from the celebrated Naushirvan, who was King of Persia at the birth of Mohamed, and thus to have in fact a common origin with the descendants of Hussein, the son of Ali.

RAJAH OF RIKANERE.

His Highness, Maharaj RATTEN SINGH, Rajah of Rikanere, the son of SUKAT SINGH. The country of Rikanere is possessed by the Rhatore Rajpoots, but the cultivators are mostly Jains.

THE BENGAL ALMANAC

Part V.

Coins, Weights, Measures, &c.

Coins, Weights, Measures, Exchange, &c.

CALCUTTA IN BENGAL.

COINS.--Accounts are kept here in Rupees, with their subdivisions, Annas and Pie; 12 Pie make 1 Anna; 16 Annas 1 Rupee.

The standard of the Bengal money has ever been silver. Gold is occasionally coined, but the great bulk of the currency is silver.

There are various kinds of Rupees to be met with in Bengal, whose fineness and weight are different, though their denominations are the same. From this, and from the natives frequently punching holes in the Rupees, and filling up the vacancy with base metal, and their wilfully diminishing the weight of the coin after coming from the mint, the currencies of Rupees from the different provinces are of different values. This defect has introduced a custom of employing shroffs or money-changers, whose business is to set a value upon these different currencies, according to every circumstance, either in their favour, or their prejudice. When a sum of Rupees is brought to one of these shroffs, he examines them piece by piece, and arranges them according to their fineness; then by their weight; he then allows for the different legal battas upon Company's Rupees, Siccas and Sonauts; and this done, the values in gross by the Rupees current what the whole are worth; so that the Rupee current is the only thing fixed, by which coin is valued.

A Lac of Rupees is 1,00,000; and a Crore, 100 Lacs or 1,00,00,000 Rupees; and in accounts, sums are distinguished into Crores, Lacs, and single Rupees, by marks or divisions, as in the foregoing examples.

Cowries, small, white, glossy shells, are made use of for small payments in the Bazar, and are generally thus reckoned.

COINAGE.

FORT WILLIAM, FINANCIAL DEPARTMENT.

11th November 1840. *Proclamation*.—The Governor General in Council is pleased to notify, that from and after the 11th day of November 1840, in respect to the Mint of Calcutta, and from and after the 1st day of April 1841, in respect to the Mints of Fort Saint George and Bombay, those parts of Act No. XVII. of 1835, which were suspended by Act No. XXXIX. of 1837, directing that certain Silver Coins issued from the Mints within the Territories of the East India Company shall bear on the Obverse the Head of the Reigning Sovereign of the United Kingdom of Great Britain and Ireland, will be again in force; and that the Device of the Silver Coins which shall be coined from and after the said dates respectively in the Mints of India, in conformity with Acts XVII. of 1835 and XXI. of 1838, will be as Act No. XVII. of 1835 requires, viz.

On the Obverse—the Head of Her Majesty Victoria, with the words

VICTORIA QUEEN.

On the Reverse—The denomination of the Coin in English and Persian in the Centre, encircled by a Wreath, and around the margin the words.

EAST INDIA COMPANY, 1840.

The Coin will be milled on the edge, with a serrated or upright milling like the Rupee now Current bearing the Head of His late Majesty William IV.

The Weight, Standard, Fineness and Value of the Company's Rupee, as defined in the Act, are here repeated.

Weight.—180 grains Troy, or one Tola.

Standard Quality.—Eleven-twelfths Silver, one twelfth alloy.

Value.—The same as the Company's Rupee of 1835, the Madras, Bombay, Furruckabad, and Sonat Rupee, and equal to fifteen-sixteenths of the late Sicca Rupee.

The other Silver Coins authorized to be issued from the Government Mints by Act No. XVI. of 1835 and Act No. XXII. of 1836, viz. double, half, and quarter rupees, and two anna pieces, will bear in all respects a due proportion to this Rupee.

The Governor General in Council hereby directs that all Magistrates, Collectors, and other Public Officers, will promulgate this Proclamation throughout their respective Districts; and that a translation of it be affixed in a conspicuous place, at every Public Treasury.

Money Changers, Shroffs, Podars and others, should be required to take notice of the Provision in Act No. XVII. of 1835, against clipping, filing, punching, or otherwise detaching the legal Coin. The Silver Coins issued from the Mints of Government, under Act XVII. of 1835, if not cut, clipped, marked, or otherwise wilfully impaired, are legal tender for their full value, until by gradual wear, they have lost two per cent. of their original weight.

Published by order of the Right Hon'ble the Governor General of India in Council,

G. A. BUSHBY,

Secy. to the Govt. of India.

MONETARY SYSTEM.

Small shells, called cowries, are also still partially made use of for fractional payments, and are reckoned as follows: but their value is subject to considerable fluctuation, and they are now nearly superseded by the copper currency.

EXCHANGES.

For the conversion of the rupee into the equivalent currency of other nations, it is necessary to take into consideration the fluctuating relative value of the precious metals *inter se*, from the circumstance of gold being in some, and silver in others, the legal medium of circulation.

It is also necessary to take account of the mint charge for coining at each place, which adds a fictitious value to the local coin. The *par of exchange* is, for these reasons, a somewhat ambiguous term, requiring to be distinguished under two more definite denominations. 1st, the *intrinsic par*, which represents that case in which the pure metal contained in the parallel denominations of coins is equal. 2nd, the *commercial par*, or that case in which the current value of the coin at each place (after deducting the seignorage leviable for coinage) is equal: or in other words, 'two sums of money of different countries are *commercially* at par, while they can purchase an equal quantity of the same kind of pure metal.'[†]

Thus if silver be taken from India to England, it must be sold to a bullion merchant at the market price, the proprietor receiving payment in gold (or notes convertible into it). The London mint is closed against the importer of silver; which metal has not therefore a minimum value in the English market fixed by the mint price: although it has so in Calcutta, where it may always be converted into coin at a charge of 2 per cent. On the other hand, if a remittance in gold be made from this country to England, its out-turn there is known and fixed: each new Calcutta *gold mohur* being convertible into 1.66 or $1\frac{1}{3}$ sovereign nearly; but the price of the *gold mohur* fluctuates as considerably in India as that of silver does in England, the natural tendency of commerce being to bring to an equilibrium the operations of exchange in the two metals.

The Exchange between England and India, has therefore a two-fold expression; for silver, the price of the *sikka* rupee in shillings and pence:—for gold, the price of the sovereign in rupees. To calculate the out-turn of a bullion remittance in either metal, recourse may be had to the following.

Table of English and Indian Exchanges.

The data for the calculation of these tables are:

1st. One *man*, (or 100 lbs. troy) of silver ($\frac{1}{16}$ ths alloy is coined into 9200 Company's rupees, of which 64 and 60 respectively are taken as mint duty, being at the rate of two per cent.

2nd. 100 lbs. troy of English standard silver ($\frac{1}{16}$ ths alloy) is coined into 6800 shillings, of which 400 are taken as seignorage or mint duty, being 4s per lb. or nearly 6 per cent.; but the mint is not open to the holders of silver bullion, which is only purchased through the bank when required for coinage.

3rd. The sovereign ($\frac{1}{16}$ ths alloy,) weighs 123.25 grains troy, and no duty is charged on its coinage. 100 lbs. of pure gold yield 5,098.3 sovereigns,—3,009.5 new *gold mohurs*,=3041.4 old *gold mohurs*,=3490.9 Madras and Bombay *mohurs*.

The par of exchange with other countries may be estimated from the intrinsic and mint produce of their coins, thus,—assuming the Spanish dollar to weigh 416 grains troy, and to be 5 dwts. worse in assay, we have for

[†] KELLY'S Cambist, iii. 13.

Spain and America

100 DOL- =231. 111 tolas in weight,
LARS. =225. 858 Fd. rupees. } or deducting duty } 221. 341 Fd. Rs.
=211. 743 Sa. rupees. } of 2 per cent. } 207. 508 Sa. Rs.

The Spanish dollar forms also the currency of the Straits of Malacca and of Manilla; and it is extensively known in the colonies of England, Ceylon, the Cape, Australia, &c.

For the British colonial possessions, however, an order of Council was promulgated on the 23rd March, 1825, extending to them the circulation of British silver and copper money, and directing all public accounts to be kept therein. Where the dollar was, either by law, fact, or practice still a legal tender, it was to be accounted equivalent to 4s. 4d. and *vice versa*. For the Cape of Good Hope, where the circulation consisted of paper rix-dollars;—and Ceylon, where it consisted of silver and paper rix-dollars, as well as variety of other coins;—it was provided that a tender and payment of 1s 6d. in British silver money should be equivalent to the rix-dollar. The Company's rupee is allowed circulation at 1s. 11d and the 5 franc-piece at 4s. These regulations are still in force in Ceylon, Australia, Van Diemen's Land, the Cape, Mauritius, and St. Helena.

France.

The French *kilogramme* of standard silver ($\frac{1}{10}$ th alloy) is coined into 200 francs and the *kilogramme* weighs 85,744 tolas; therefore

100 FRANCS { =42. 872 tolas in weight,
=42. 092 Co's rs, } or deducting duty } 41. 250 Fd. Rs.
=39. 462 Sicca rs, } of 2 per cent. } 38. 073 Sicca Rs

The coinage duty on silver at Paris is $\frac{1}{2}$ per cent., or $\frac{1}{4}$ per cent less than in India; hence it will be found that

100 Sa. Rs. realize almost precisely 250 francs at the Paris mint.

Minted gold in France is worth $15\frac{1}{2}$ its weight of minted silver, or the *kilogramme* is coined into 155 *Napoleons* or 20 franc-pieces: the seignorage on gold is only $\frac{1}{2}$ per cent.

1 *kilogramme* of pure gold yields 81,457 gold mohurs, or (deducting 2 per cent. mint duty) 79,328 ditto, therefore

100 NAPO { =55. 319 tolas in weight,
LEONS. { =17. 315 old gold mohurs. } or deduct } 46. 369 old gold mr.
=17. 757 new ditto. } ing duty } 48. 802 new ditto
=51. 313 Madras and } of 2 per } 53. 227 Madras &
Bombay gold rupee, } cent. } Bombay gold Rs.

NOTE.—In a coin we consider the weight and standard. By standard is meant the proportion of pure gold or silver which it contains; the rest is alloy. Thus, if we suppose a coin to contain a thousand parts of metal, of which 917 are pure gold or silver, the 83 remaining parts being alloy, the 917 represent the standard or relative purity of the coin.

Suppose we wish to know what is the value, in English money, of the Russian Imperial of 10 rubles: the weight is 13,073 gram., the standard at 917; deducting the alloy, that is, 108 gram., there remain, in pure gold, 11,988 grammes.

The English Sovereign weighs 7,9808 gram, the standard is at 917, the alloy consequently 0.602 gram., and the weight of pure gold contained in it 7,3184 gram.

Now, by the rule of three, the question will thus be resolved:

7,318 gram.: 11,988 gram.: : 20 shillings: =£1 12s 9d.

By this method, we can ascertain the relative value of all coins : but sometimes the value thus ascertained will not exactly agree with the sum allowed in exchange. This difference arises from political causes and commercial vicissitudes. Thus, for instance, the value at par of the sovereign in French money, is 25 fr. 26 c, yet it rose to 25 fr. 50 c. in the month of August last, after the change of the French Ministry. This fall and rise, in the relative value of money, principally takes place whenever there is a paper currency.

CHINESE MONEY, WEIGHTS, AND MEASURES.

China Weights and Money.

10 hwañ	make a <i>ze</i> †
10 <i>ze</i>	— a <i>haou</i>
10 <i>haou</i>	— a <i>le</i> or cash.
10 <i>le</i> [*]	— a <i>fun</i> or <i>candareen</i> ‡
10 <i>fun</i>	— a <i>tséñ</i> or <i>mae</i> .
10 <i>tséñ</i>	— a <i>leang</i> or <i>tael</i> .
16 <i>leang</i>	— a <i>kin</i> or <i>catty</i> = 1½ lb. avoirdupois;
100 <i>kin</i>	— a <i>tan</i> or <i>perul</i> = 133½ lbs.
7 <i>mae</i> 2 <i>can</i>	— a Spanish Dollar§

As the Chinese have no gold or silver coins, but make payments in those metals by weight, this table applies equally to money and to weights of all kinds, excepting that, in money reckonings, nothing higher than the *leang* or *tael* is employed. The only coined money the Chinese have is the *le* or cash. It is made of a very base alloy of copper, is round, about the size of an English farthing, and has a square hole in the middle, by which a hundred or more are usually strung together; on one side are Chinese characters, denoting the reign under which the cash was cast; and on the other side, in those of the present dynasty, are either Chinese or Manthchou characters, designating the place of coinage. Under preceding dynasties, (tw), five, and ten cash pieces have been in use, as well as other coins of various descriptions; but the single cash is the only coin now current throughout the Empire. It is cast also in Japan, Corea, and Cochin-China; and is clandestinely imported from the last named place, to a large amount.

* There are pieces of five, ten, and twenty *faidahs*.

† These terms are also applied to designate the parts of a dollar: *haou* is a tenth, and *ze* a hundredth part.

‡ In money, the value of the *candareen* varies from 10 to 13 or 14 copper cash, and hence the *mae* varies from 100 to 140, and the dollar from 720 to 1000 cash; but in weight whether of silver or of any other article, the *le* or cash always contains the same integral part of a *candareen*.

§ This is the general estimate, made by the Government, and the bazar *eh-ze* for dollars to small amount, 7 *mae* 2 *candareen* being the full weight of a good and uncut dollar; but in consequence of the system, adopted by all Chinese merchants and shopkeepers, stamping every dollar they pay out, the weight very speedily diminishes, until the Dollar, is eventually broken into pieces, in which state it is melted into *syce*.

Weights.

In China, almost every thing is sold by weight, not excepting even liquids and live stock. The only weights are those already given above; the principal of which are the pecul, catty, and tael divided thus:—

16 taels make a catty.

100 catties — a pecul.

At Macao, the pecul is distinguished by the portuguese into three kinds, viz.

The pecul balance of 100 catties = 133½ lbs. avoirdupois;

The pecul seda of 111-16 do. = 148 1 5/16 lbs; and

The pecul chapu of 150 do. = 200 lbs.

90 Catties seda = a Canton pecul or pecul balance.

By the first, are sold cotton and valuable articles; by the second, alum, pepper, and coarse goods, and by the third; rice.

In transactions between one Chinese and another, goods are weighed by the Chinese doctellin or balance; which is about 3 per cent. less than the English weights; the latter are always used in transactions with foreigners.

Note. At the money standard of 120 oz. 16 dwts: English troy weight for 100 taels, the pecul, which contains 1000 taels, should weigh avoirdupois lbs. 132 535. The actual standard of the pecul being 133½ lbs., a slight discrepancy thus appears between the *money* tael and the *commercial* tael, at the standards assigned to each. But no such difference is recognized by the Chinese. This is noticed to account for what will otherwise appear erroneous in some of the following tables.

Measures.—I. Long Measure.

10 fun	or parts make a tsun	or punt.
10 tsun or punts	— a chih	or covid = 14½ inches.
10 chih or covids	— a chang	= 4 yds. nearly.
10 chang	— a yin	

The above are employed in the measurement of all kinds of piece-goods, &c. as well as of every description of workmanship. The following are employed in measuring distances.

5 chih or covids make a poo or pace = 5½ ft. nearly.*

360 poo or paces — a le or Chinese mile = 950½ yards.

250 le or miles — a too or degree on the Equator.

The Chih, covid, or foot is of several varying lengths; according to Milburne, that of the mathematical academy is about 13½ English inches; that of the tribunal of Public works 12.7 inches; and that employed by tailors and tradesmen. 13½ inches. None however, of these three, is the same as the ordinary covid of Canton, used both in the measurement of vessels, and by tradesmen, which is about 14½ inches. The le or mile, is likewise a very uncertain measure of length, varying in almost every part of the country. It also, like the European geographical mile, forms an integral part of a degree, whether of latitude or longitude. But the scientific division of the degree, derived from the European Missionaries, is into 60 fun, or minutes, the fun being divided into 60 menou or seconds.

* This, being according to the measure of the mathematical academy, differs from the preceding statement.

II. Land Measures.

5 chih or covids	make a poo	or kung;
240 poo or kung	— a mow	or acre.
100 mow or acres	— a king	

This is the present established land measure, which varies considerably from that formerly in use. In scientific calculations, he now is divided into ten fun, and the fun into 24 le, and so on, through the several fractional terms which have been already given, at the commencement of the table of weights. The poo or pace, also, is divided decimally the same terms, fun, le, &c., being employed.

III. Measure of Contents.

8 shih	make a kwei	.
10 kwei	— a chao	.
10 chao	— a tsuy	.
10 tsuy	— a cho	.
10 cho	— a ho	.
10 ho	— a shing	= 31½ cubic pints.
10 shing	— a tow	= 316 " "
5 tow	— a hwo	= 1580 " "
2 hwo	— a shih	= 3160 " "

This is the scientific division, established by the reigning dynasty.

The common measures are,

2 sh	make a l8
10 l8	— a shing, or pint.
10 shing	— a tow.
10 tow	— a hwo.

This table is employed almost exclusively in the measurement of grain; all other articles and even liquids being sold by weight. In dealings with foreigners, however, and probably, also, in large dealings among themselves, the Chinese sell rice and other grain by the catt and pecul weight, instead of the shing, tow, &c. In the sale of paddy, two thirds are allowed for the trouble and diminution in weight, which accompany the taking off the husk, or, which is the same thing, paddy is sold at one-third the price of the same weight of rice.

Numbers.

Though not properly included among the subjects now treated of, may be, not inappropriately, here given. The ten unites are the following:

At full length.	Common form	Contracted	Canton.	Fokien.
1, Yih		yat.	yit,*	chit.
2, Uih		ee.	je.	no.
3, San		sam.	sam.	sna.
4, Sze		se.	soo.	se
5, Woo		ing.	ngoe.	goe.
6, Lew		luk	leuk.	luk.
7, Tseih		tsat.	chit	chit
8, Pa		pat.	pat.	payh
9, Kew		kw.	kew	haou.
10, Shih		shap.	sh.	chapp.

The Chinese term for expressing 100 is pih; 1000, tseén; 10,000 wan; 1,000,000, pih wan, 'a hundred myriads'; 100,000,000, yih, &c.,—progressing decimally through the terms chao, king, hae, to

* In the Fokien provincial dialect, characters have two pronunciations, the reading and the spoken or colloquial. The pronunciations here printed in italics are the colloquial.

jang kon, keen, ching, and tsae. To express 12, 13, &c. the words are figures 10 and 2, 10 and 3 are put together; thus shih-urh, 12; shih-san, 13, &c. Also urh-shih-yih, 'two tens and one,' denotes 21. &c.

In China almost every trade has a distinct system of secret numbers, that is, instead of using the proper characters for designating prices, they adopt other characters, by which they arbitrarily express their meaning, so as to be understood only by persons of the same trade.

The Chinese method of computing is by a kind of abacus, which they call a Swan-pwan, 'counting board.'

ENGLISH WEIGHTS AND MEASURES,

Agreeably to the Act of Uniformity, which took effect 1st Jan. 1826.

The term Measure is the most comprehensive of the two, and it is distinguishable into six kinds, viz. :—

- | | | |
|---------------------------|------------|---|
| 1. Length. | } Meas. of | 4. Force or Gravity, or what is commonly called Weight. |
| 2. Surface. | | 5. Angles. |
| 3. Solidity, or Capacity. | | 6. Time. |

The several denominations of these Measures have reference to certain standards, which are entirely arbitrary, and consequently vary among different nations.—In England,

The standard of	{	Length	is	a Yard
		Surface	"	a Square Yard, the $\frac{1}{484}$ of an Acre
		Solidity	"	a Cubic Yard
		Capacity	"	a Gallon
		Weight	"	a Pound

The standards of Angular Measure, and of Time, are the same in all European, and most other countries.

1. MEASURE OF LENGTH.

12 Inches = 1 Foot		8 Furlongs = 1 Mile
3 Feet = 1 Yard		60 $\frac{1}{6}$ Miles = 1 Degree of a Great Circle of the Earth.
5 $\frac{1}{2}$ Yards = 1 Rod, or Pole		
40 Poles = 1 Furlong		

An Inch is the smallest lineal measure to which a name is given, but subdivisions are used for many purposes. Among mechanics the inch is commonly divided into *eighths*. By the officers of the revenue, and by scientific persons, it is divided into *tenth*, *hundredths*, &c. Formerly it was made to consist of 12 parts, called *lines*, but these have properly fallen into disuse.

Particular Measures of Length.

A Nail = 2 $\frac{1}{4}$ Inches	} used for measuring cloth of all kinds.
Quarter = 4 Nails	
Yard = 4 Quarters	
Ell = 5 Quarters	
Hand = 4 Inches, used for the height of horses.	} used in Land Measure, to facilitate computation of the content 10 square chains being equal to an Acre.
Fathom = 6 Feet, used in measuring depths.	
Link = 7 Inches, 92 hundredths.	
100 Links.	

MEASURE OF SURFACE.

144 Sqr Inches = 1 Sqr Foot	40 Perches = 1 Rood
9 Sqr Feet = 1 Sqr Yard	4 Roods, or 160 Perches = 1 Acre
30½ Sqr Yards = 1 Perch or Rod	1640 Acres = 1 Sqr Mile

3. MEASURES OF SOLIDITY AND CAPACITY.

DIVISION I.—SOLIDITY.

1728 Cubic Inches = 1 Cubic Foot | 27 Cubic Feet = 1 Cubic Yard

DIVISION II.

Imperial Measure of CAPACITY for all liquids, and for all dry goods, except such as are comprised in the third Division.

4 Gills = 1 Pint	= 34½ cubic inches, nearly
2 Pints = 1 Quart	= 69½ ————
4 Quarts = 1 Gallon	= 277½ ————
2 Gallons = 1 Peck	= 554½ ————
8 Gallons = 1 Bushel	= 2218 l. 5 sh. ————
8 Bushels = 1 Quarter	= 16½ cubic feet, nearly
5 Quarters = 1 Load	= 51½ ————

The four last denominations are used for dry goods only. For liquids several denominations have been heretofore adopted, viz.:—For Beer, the Firkin of 9 Gallons, the Kilderkin of 18, the Barrel of 36, the Hogshead of 54, and the Butt of 108 gallons. These will probably continue to be used in practice. For Wine and Spirits, there are, the Anker, Runlet, Tierce, Hogshead, Puncheon, Pipe, Butt, and Tun; but these may be considered rather as the names of the casks in which such commodities are imported, than as expressing any definite number of gallons. It is the practice to gauge all such vessels, and to charge them according to their actual content.

Flour is sold, nominally, by measure, but actually by weight, reckoned at 7lb. Avoirdupois to a Gallon.

DIVISION III.

Imperial Measure of CAPACITY, for coals, culm, lime, fish, potatoes, fruit, and other goods, commonly sold by *heaped measure*:—

2 Gallons = 1 Peck	= 724 cubic inches, nearly
8 Gallons = 1 Bushel	= 2815½ ————
3 Bushels = 1 Sack	= 489 lbs cubic feet, nearly
12 Sacks = 1 Chaldron	= 58½ ————

The goods are to be heaped up in the form of a cone, to a height above the rim of the measure of at least ¼ of its depth. The outside diameter of Measures used for heaped goods are to be at least double the depth, consequently not less than the following dimensions:—

Bushel	19½ inches	Gallon,	9½ inches
Half-Bushel	15½ —	Half Gallon,	7½ —
Peck,	12½ —		

The Imperial Measures, described in the second and third Divisions, were established by Act 5 Geo. iv. c. 71. Before that time there were four different measures of capacity used in England.—1. For wine, spirits, cider, oils, milks, &c.; this was one-sixth less than the Imperial Measure.—2. For malt liquor, this was one-fifty-ninth part greater than the Imperial Measure.—3. For corn, and all other dry goods not heaped, this was one-third-third-part less than the Imperial Measure.—4. For coals, which did not differ sensibly from the Imperial Measure.

The Imperial Gallon contains exactly 10lbs. Avoirdupois of pure water; consequently the pint will hold 1½lb., and the bushel 80½lb.

WEIGHTS AND MEASURES.

4. MEASURE OF WEIGHT.

DIVISION I.—AVOIRDUPOIS WEIGHT.

27½ Grains	= 1 Dram	= 27½ Grains
16 Dr. ms	= 1 Ounce	=
16 Ounces	= 1 Pound (lb.)	= 437½ —
28 Pounds	= 1 Quarter (qr.)	= 7000 —
4 Quarters	= 1 Hundred Weight (cwt.)	=
20 Hundred Weight	= 1 Ton.	=

This weight is used in almost all commercial transactions, and in the common dealings of life.

Particular weights belonging to this Division :—

8 Pounds	= 1 Stone	cwt. qr. lb.	used for Meat.
14 Pounds	= 1 Stone	= 0 0 14	} Used in the Wool Trade.
2 Stones	= 1 Tod	= 0 1 0	
6½ Tod	= 1 Wey	= 1 2 14	
2 Weys	= 1 Sack	= 3 1 0	
12 Sacks	= 1 Last	= 39 0 0	

DIVISION II.—TROY WEIGHT.

24 Grains	= 1 Pennyweight	= 24 grains
20 Pennyweights	= 1 Ounce	= 480 —
12 Ounces	= 1 Pound	= 5760 —

These are the denominations of Troy Weight when used for weighing gold, silver, and precious stones, (except diamonds). But Troy weight is also used by apothecaries in compounding medicines, and by them the ounce is divided into 8 drams, and the dram into 3 scruples, so that the latter is equal to 20 grains.

For scientific purposes the grain only is used; and sets of weights are constructed in decimal progression, from 10,000 grains downwards to 1-100 lbs of a grain.

By comparing the number of grains in the Avoirdupois and Troy pound and ounce respectively, it appears that the Troy pound is less than the Avoirdupois in the proportions of 11 to 17 nearly; but the Troy ounce is greater than the Avoirdupois, in the proportion of 79 to 72 nearly.

The *carat*, used for weighing diamonds, is 3 1 6th grains. The term, however, when used to express the fineness of gold, has a relative meaning only. Every mass of alloyed gold is supposed to be divided into 24 equal parts; thus the standard for coin is 22 carats fine; that is, it consists of 22 parts of pure gold, and 2 parts of alloy. What is called the *new standard*, used for watchcases, &c., is 18 carats fine.

5. ANGULAR MEASURES;
OR, DIVISIONS OF THE CIRCLE.

60 Seconds	= 1 Minute	90 Degrees	= 1 Quadrant
60 Minutes	= 1 Degree	360 Degrees, or	= 1 Circumference
30 Degrees	= 1 Sign	12 Signs	= 1 Circle

Formerly, the subdivisions were carried on by sixties; thus, the second was divided into 60-thirds, the third into 60-fourths, &c. At present, the second is more generally divided decimally into 10ths, 100ths, &c. The degree is frequently so divided.

6. MEASURE OF TIME.

60 second = 1 minute	28 2930 or 31 days = 1 calendar month
60 minutes = 1 hour	12 calendar months = 1 year
24 hours = 1 day	365 days = 1 common year
7 days = 1 week	366 days = 1 leap year
28 days = 1 lunar month	

In 400 years, 97 are leap-years, and 303 common. The second of time is subdivided like that of angular measure.—We shall now give a table of itinerary measures of different countries, exhibiting the number of each answering to 100 English miles; also the length of a single measure of each sort in English yards:

BRITISH-INDIAN WEIGHTS AND MEASURES.

The unit of the British Indian ponderary system* is called the *tola*. It weighs 180 grains English Troy Weight. From it upwards, are derived the heavy weights, viz: *Chitak*, *Seer*, and *Mau* (or Maund);—and by its subdivision the small or jeweller's weights, called *masikas*, *ruttees*, and *dhamis*.

* The advantages of this system are

1. That the maund formed from the modified weight would be precisely equal to 100 English troy pounds: and
2. That thirty-five seers would also be precisely equal to seventy-two pounds avoirdupois:—thus establishing a simple connection, void of fractions, between the two English metrical scales and that of India.

† For particulars of Madras and Bombay. Weights and Measures, vide respective directories.

The following scheme comprehends both of these in one series:

The *Mun* (or that weight to which it closely accords in value, and to which it is legally equivalent in the new scale) has been hitherto better known among Europeans by the name of *Bazar Maund*, but upon its general adoption, under Regulation VII. 1833, for all transactions of the British Government, it should be denominated the *BRITISH MAUND*, (in Hindce, *Ungrfzee Maun*.) to distinguish it at once from all other weights in use throughout the country*.

The *Pusseree* is, as its name denotes, a five-seer weight, and therefore should not form an integrant point of the scale; but as its use is very general, it has been introduced for the convenience of reference.

The *Seer* being the commonest weight in use in the retail business of the Bazaars in India, and being liable, according to the pernicious system hitherto prevalent, to vary in weight for every article sold as well as for every market, is generally referred to the common unit in native mercantile dealings, as, "the seer of so many *tolas*," (or *sicca*, *barrees*, *takas*, &c.) The standard or *bazar seer* being always 80 *tolas*.

The *Chitak* is the lowest denomination of the gross weights, and is commonly divided into halves and quarters, (called in Bengalee, *kacha*;) thus marking the line between the two series, which are otherwise connected by the relation of the seer, &c. to the tola.

The *Tola* is chiefly used in the weighing of the precious metals and coin; all bullion at the mints is received in this denomi-

* In the same way the Madras, Bombay, and Furukhabad, rupee (when the sicca rup is abolished, and an English metric system,) may be called "the *BRITISH RUPEE*," and in the native languages *Ungrfzee Rupee*.

nation, and the tables of bullion produce (*as seen in the foregoing pages*) are calculated per 100 tolas. It is also usual at the mints to make the subdivisions of the tola into annas (sixteenths) and pie, in lieu of mashas and ruttees.

Mashas, ruttees, and dhans, are used chiefly by native goldsmiths and jewellers. They are also employed in the native evaluation by assay of the precious metals; thus 10 mashas fine, signifies 10-12ths pure, and corresponds to "10-oz. touch" of the English assay report or silver. There is a closer accordance with the English gold assay scale, inasmuch as the 96 ruttees in a tola exactly represent the 96 carat grains in the gold assay pound, and the *dhan*, the quarter grain.

Comparison with Troy Weights.

For the conversion of English troy weights into those of India, the following scale will suffice, since the simplicity of their relation renders a more detailed table unnecessary.

Lib. Troy	Ounce.	Pennyweight.	Gram.	Tolas and Decimals.
1	12	240	5760	= 32.000
	1	20	480	= 2.6666 &c.

			1	= 0.005 &c.

The accordance of the *min* weight with the 100 lbs. troy of England, affords a ready means of ascertaining its relative value in the Standards of other countries employed in weighing the precious metals, since tables of the latter are generally expressed in lbs. troy. The following are a few of those valuations for the principal weights of Europe, &c. extracted from *Kelly's Cambist*, page 222. The weights in troy grains have been converted into tolas by dividing them by 180.

Required the equivalent of 57353 muns 35 seers 6 chitaks, in avoirdupois pounds.

Taking the numbers opposite to 57, 35, and 30 respectively, and removing the decimal point,—in the first, three places to the right hand;—in the second, one place to the right;—and in the third, one place to the left, we have

$$\begin{array}{rcl}
 57000 \text{ muns} & = & 4690286. \\
 350 & = & 38800. \\
 3 & = & 246 857 \\
 37 \text{ seers} & = & 76 114 \\
 6 \text{ chit.} & = & .771
 \end{array}$$

lbs. 47,9409.742=12 ounces nearly.

Since 35 seers are exactly equal to 72 pounds avoirdupois, the following simple and accurate rules for their mutual conversions will be found equally convenient with the table.

RULE 1.—To convert Indian weight into avoirdupois weight.

1. Multiply the weight in seers by 72, and divide by 35: the result will be the weight in lbs. av.

2. * Or, multiply the weight in *muns* by 36, and divide by 49 : the result will be the weight in *cwt.* *av.*

RULE II.—To convert *avoirdupois* weight into *Indian* weight.

1. Multiply the weight in *lbs. av.* by 35, and divide by 72 : the result will be the weight in *seers*.

2. Or multiply the weight in *cwt.* by 49, and divide by 36 : the result will be the weight in *muns*, or *maunds*.*

One ton=27,222 *muns*, or 27½ *mun* nearly.

One *mun*=82½ *lbs.* *avoir*, exactly.

* For facility of recollection, this rule may be expressed in *arithmetical* poetry thus

The word *mun*, of Arabic or Hebrew origin,* is used throughout Persia and Northern India; but, as might be expected, it represents very different values in different places: thus the *mun* of Tabriz is only 6½ lbs. avoird. while that of Palode, in Ahmednuggur, is 163½ lbs.

It is probable that the *seer* or *sér*, a Hindn weight (*sétak*), was more uniform than the maund, since it was founded upon the *tola* (*tolaka*), which, with its subdivision, the *wassa*, must in very ancient times have been extensively known throughout commercial Asia: there can be little doubt that the *tale* and *mace* of the Chinese are identical in origin.

It may be generally assumed that the maund system follows the common scale, viz.

$$16 \text{ chitak} = 1 \text{ seer}$$

$$40 \text{ seer} = 1 \text{ maund.}$$

$$20 \text{ maund} = 1 \text{ candy or maunee.}$$

The use of a five-seer weight also universally prevails under the name of *pursree*, *dhuree*, or *vis*. The *dhuree*, from its name, however, seems to be properly a measure, and accordingly, while in Malwa it is equal to 5 seers, in other places it is found at 4, 4½, 5½, 10, 11, and 12 seers. The terms *adhola* *adhelee*, (half,) *pao*, *powah*, (quarter,) *adhpaao*, (half-quarter,) frequently occur: they explain themselves.

* The Hebrew *maneh* was equal to 13, 110 grs. tr. or 72, 83 tolas. The Greek *poina* to 6, 241 grs. or 34.87 tolas.

NOTICE.

The publishers believing that it would be a convenience to the Mercantile Community of Bengal and Azra, to have correct return of the varying systems of weights and measures prevailing in the interior districts, have obtained through the kindness of the authorities the following detailed returns. Much additional matter and several corrections are given in the present edition.

The subdivisions of the ponderary systems, throughout the whole of British India, generally agree in name, though they differ in value. Thus in every case.

The linear measures of India generally are based on the following system:—

5 Unguities or finger's breadth = 1 moonshika or palm.
6 Moonshika = 1 hasty, or hath, or cubit.

WEIGHTS AND MEASURES.

67

ALSO.

14 Jussoos, or lengths of the first joint of the thumb	= 1 hath or cubit.
20 Jussoos	= 1 guj or clothier's yard.
24 Jussoos	= 1 guj or a tailor's yard.
42 Ungooloes	= 1 Mahomedan guj or yard.

From the very careful investigations of Major Jervis, as given in his work on Indian Metrology, it appears that:

1 Cubit or hath of 14 Jussoos = 15.5489 inches.

1 Guj of 20 Jussoos = 27.9271 "

1 Guj of 24 Jussoos = 33.5125 "

1 Guj of 42 Ungooloes = 34.2406 "

The standard or Ilahce guj used in the land settlement of the North Western Provinces has been fixed at 33 inches, whence

33 inches = 1 Ilahce guj.

3 Gujes = 1 Bāns or measuring rod.

20 × 20 = 100 Sq. Bāns = 1 Beegah = 3025 Sq. yards.

In Bengal the hath or cubit has been assumed to be 18 inches in length, and thus generally

4 Square Hathas = 1 Square Cowrie or Kurra.

4 " Cowries = 1 " Gunda.

20 " Gundas = 1 " Kutta.

20 " Kuttas = 1 Beegah = 1600 Square yards.

These are the beegahs most in use, and are the only values referrible to fixed standards. The hath may be said to vary between 15 and 30 inches, and the beegah between 1500 and 3000 square yards. The data at present before us are not sufficiently precise and we have consequently not affected an accuracy which in truth we could not attain.

One precedes, and when he has gone the whole length of the rope he places a stick in the ground, as a mark which the other removes as he comes up to it. The mechanical impossibility of pulling the rope straight, renders this mode of measuring incorrect, and the error is roughly compensated by a deduction of 2 cubits in each rope, or 4 cubits in each beegah; this is termed, 'Hattah' and 'Kandah.'

*BIERMAH.**Measures of Distance.*

The Burmese make use of two measures of distance; one they call 'the poor man's measure,' and the other, the 'chief, or great man's measure.' This last is the Royal or standard measure, but the other is in most common use, except in matters where the Government is concerned.

100 Tas	= 1 Daing			5 1 7 200 0 0
7000 Toungs				2 nearly.

The equivalents given above are for 'the poor man's measure.' Theet Maik, Twa, Toung, Ta and Daing are the Measures in most frequent use. The Royal cubic, Thantoung, which is the Government standard upon being carefully compared was found to measure exactly 19½ English inches. According to this, the finger-breadth (Theet) which is that of the fore-finger taken at the middle point is $\frac{30}{100}$ of an inch; the fathom (Tan.) 76½ inches; the D bamboo (Ta) 133½; and the Daing 2 miles, 193 yards 2 feet 8 inches.

In the Ternasserim Provinces, however, the English foot measure is coming into use, and will soon supersede those above given.

CONVERSION OF BRITISH EUROPEAN WEIGHTS INTO BRITISH INDIAN WEIGHTS, AND VICE VERSA.

By Regulation VII. 1833, a new British Indian system of weights has been ordered; but the change not being enforced by any penal enactment, the new weight has been adopted by a very few European houses, while it is the only one in use at the several Government offices of Calcutta,—the Custom house, the Mint, the Treasury, the Bank, and the Police.

The difference however between the new and the old system is extremely small; viz. the *loot* or *tolah* was the old Moorshedabad rule, and weighed 179.666 Troy grains. By the said Regulation the *tolah* is of 180 grains Troy, and therefore exceeds the old one by *one-third* of a grain, which difference makes the new *bazar* or *Indian* maund heavier than the old one by about one chittak and a quarter, or 2.22 ounces Troy.

The following tables have been calculated on the old elements of Indian weights, as being still of a more general use. If it was necessary to convert old *bazar* maunds into new ones, the operation would consist simply in the following rule:—

λ (The old Weight): χ (The new Weight):: 179.666: 180,000.

A Toxicological chart, exhibiting the Symptoms, Treatment and Tests for the various Poisons, Mineral, Vegetable, and Animal, including those commonly used in India: to which is added Directions for the Treatment of Suspended Animation.

ARSENIC.

Arsenious Acid or White Arsenic (sulfurid sambul) Sulphurits:—Orpiment or Yellow Arsenic (Hartal),—Realyar or Red Arsenic (Lal Sambul.) King's Yellow or Scheele's Green, or Arsenite of Copper.

Symptoms --- Metallic taste, fetid breath, contraction of the wind-pipe and passage leading to the stomach, vomiting of bloody matter, stools black and offensive, pulse small and irregular, great thirst and burning heat, breathing difficult, urine scanty, red and bloody. delerium, convulsions and death.

Treatment---Excite vomiting by giving 20 grains of Sulphate of Zinc, and repeat it if necessary. Inflammatory symptoms (Gastritis) will be relieved by bleeding from the arm, and leeches over the stomach, fomentations and emollient clysters.

If death does not ensue, the diet must be fluid, farinaceous and demulcent for a considerable time afterwards.

The hyd oxyd of iron may be given with great advantage, and the stomach pump may be used, but only by a Professional man.

Tests—Precipitated yellow by sulphuretted hydrogen gas by hydro-sulphurets of ammonia, and by ammoniacal nitrate of silver. Precipitated green by ammoniacal sulphate of copper, reduced to the metallic state by Marsh's process: but in order that arsenic may not be confounded with the ammoniacal preparations, the reader had better consult Professor O'Shaughnessy's pamphlet on the Poisons of India.

ANTIMONY—(Surma.)

Tartarized Antimony or Emetic Tartar—Muriate of Antimony or Butter of Antimony. —Vitrified Antimony or Glass of Antimony.

Symptoms.—Painful and obstinate vomitings; copious stools; constriction of the throat; cramps; symptoms of intoxication; prostration of strength, often terminating in death.

Treatment.—Vomiting to be excited by tickling the throat with a feather, or allayed by opium. The best antidotes are decoctions of astringent vegetables, such as cinchona, willow bark, gall-nuts, strong tea, which may be given freely to excite vomiting, and at the same time to decompose the poison.

Tests.—Tartarized antimony is precipitated orange yellow, by sulphuretted hydrogen gas, and the hydro-sulphurets,—the precipitate being reduced to the metallic state, by exposure to a stream of hydrogen gas, while heated in a glass tube. Infusion of galls give a yellowish white precipitate; sulphuric acid, lime and baryta give white precipitates, reduced to metallic state by Marsh's apparatus (vide Arsenical preparations.)

BISMUTH.

Nitrate Oxyd.—Tartrate or Pearl Powder.

Symptoms.—Similar to those produced by arsenic, with a violent pain in the chest, and very difficult breathing.

Treatment.—No specific antidote known. Milk and mild mucilaginous drinks to be given freely, to facilitate vomiting, and purgatives ought to be given.

Tests.—Precipitated black by hydro-sulphurets when in the state of supernitrate chromati of potash gives a yellow precipitate.

POISONS.

COPPER—(Tamba.)

Sulphate or Blue Copperas (Tutiya).—Blue Verditer.—Mineral Green.—Sub Acetate or Verdigris.—Food cooked in foul copper vessels, and Pickles made Green by Copper.

Symptoms.—Taste acid and metallic; tongue dry and parched; constrictions of the throat, and coppery eructations; severe vomiting, or fruitless attempt to vomit; dragging at the stomach; dreadful colic; black bloody stools, abdomen distended; pulse small, hard and quick; syncope; great thirst, anxiety, cold sweats; scanty urine; cramps, convulsions and death.

Treatment.—Large draughts of milk and water to encourage vomiting; whites of eggs stirred up with water, and taken freely; inflammatory symptoms to be reduced on general principles, and the nervous symptoms by anodynes and anti-spasmodics; sugar is not a specific antidote as Orfila, once promulgated; but it may be given with advantage, dissolved in copper. The ferro-cyanate of potash is an antidote next to albumen in efficacy.

Tests—Liquor ammonia produces a green precipitate, which is re-dissolved by excess of ammonia producing a beautiful deep blue-coloured solution. Ferro-cyanate of potash gives a brown precipitate. Oxide of arsenic a grass-green precipitate. Polish steel reduces it to the metallic state, coating the article immersed with a bright film of copper.

SILVER—(Chandee)

Nitrate, or Lunar Caustic.

Symptoms—Similar to those occasioned by corrosive poisons.

Treatment.—A table-spoonful of common salt, dissolved in a pint of water, and a wine-glassful to be taken every three minutes, to decompose the poison; after which mucilagenous drinks may be given, or purgatives administered.

Tests.—Nitrate of silver is precipitated white by common salt, which turns black on exposure to the sun's rays. Phosphate and chromate of soda give yellow precipitates, reduced to the metallic state by calcining in a powerful furnace, with charcoal and potash.

LEAD—(Sisa)

Super-Acetate or sugar of Lead—(Sisa Ku Chinese).—Litharge (Murdar Sang)—Red Oxide, or Red Lead (Sindur).—Carbonate or White Lead (Safila)—Wine-sweetened by Lead.

Symptoms.—When taken in large quantities, it produces a sugary astringent metallic taste; constriction of the throat; pain in the region of the stomach; painful, and often bloody vomitings; hiccup, convulsions, and death. When taken in small, long-continued doses, it produces, what is called, painter's colic and paralytic symptoms.

haracament—The same as that recommended for the salts of barytes (The Akrine Births), in addition to which, bleeding must be used, if symptoms require it. Castor oil, either with or without opium, to clear the bowels, assisted by frequent emollient clysters. The warm bath should not be omitted.

Tests.—All the preparations of lead are easily reduced to the metallic state by calcination with charcoal. The super-acetate, dissolved in water, is precipitated white by sulphuric acid, of a canary yellow by chromate of potash and chromic acid, these precipitates being easily reduced by calcination. The alkaline sulphurets precipitate the super-acetate of lead of a blackish colour, and so does sulphuretted hydrogen

gas. A piece of zinc, suspended in a solution of lead, abstracts the lead from the solvent, and it then becomes deposited on the zinc in the form of a metallic tree of crystallization.

MERCURY—(Para.)

Oxy-Muriate or Sublimate (Raskarpur).—Calomel.—Nitric Oxid, or Red Precipitate.—Bi-Sulphuret or Vermillion (Durdur).

Symptoms.—Acid metallic taste; immediate constriction and burning in the throat with anxiety, and tearing pains in the stomach and bowels; nausea and vomiting of various coloured fluids, sometimes bloody; profuse diarrhoea, and sometimes a great difficulty in passing urine (Dysuria); pulse quick, small and hard; fainting, difficult breathing, cramps, and cold sweats; great debility and death.

Treatment.—Whites of eggs to be mixed with water, and one given every two or three minutes, to promote vomiting, and by decomposing, to lessen the virulence of the poison. Milk in large quantities, gum water or linseed tea, sugar and water, or water itself, at about 80° Fahrenheit. Glutinous it exists to wheat flour decomposes sublimate, and should be given mixed with water. Inflammatory consequences should be anticipated and subdued by the usual remedies.

Tests.—Mercurial preparations heated to redness in a glass tube with potash, are decomposed, the quick-silver being volatilized and condensed in small metallic globules in the upper part of the tube, if kept cold. The oxy-muriate is precipitated white by ammonia, yellow by potash, and of an orange colour by lime water; brown by nitrate of tin, and white by albumen mixed with cold water. A few drops of solution of sublimate, placed on a bit of gold, form a silvery amalgam on it, if touched with an iron pin. The hydriodate of potash produces a beautiful vermilion precipitate with corrosive sublimate.

TIN—(Qalbi)

Muriate used by Dyers—Oxyd or Putty Powder.

Symptoms.—Taste austere, metallic; constriction of the throat; vomiting, with pain over the whole abdomen; copious stools; pulse small, hard and frequent convulsive movements of the extremities and face; sometimes paralysis, and mostly death.

Treatment.—Milk to be given first in large quantities, to distend the stomach, and produce vomiting, and afterwards to decompose any remaining poison. Inflammatory or nervous symptoms to be subdued by bleeding, warm baths, opium, &c. &c.

Tests.—The muriate precipitates gold of a purple colour, and it is itself precipitated of a bright yellow colour by strong tea, or an alcoholic infusion of galls. Albumen or gelatin occasions a copious flocculent precipitate. The oxyd is volatilized by heat, is soluble in nitric acid, and is easily reduced by calcination.

ZINC—(DUSTA)

Sulphate or White Vitriol—Oxyd (Safaid Tutliya).

Symptoms.—An acid taste; a sensation of choking nausea and vomiting; pain in the stomach; frequent stools; difficult breathing; quick pulse; pale face; cold extremities, but seldom death (unless taken in very large quantities) owing to the emetic properties of the poison.

Treatment.—Vomiting, which is the usual consequence of doses of sulphate of zinc, to be rendered easy by copious draughts of warm water, and particular symptoms to be met with appropriate remedies. Milk and albumen may be given as in poisoning with copper.

Tests.—The sulphate is precipitated white by ammonia, the precipitate being re-dissolved by excess of ammonia. Precipitated white by caustic potash, yellowish white by the alkaline hy-dro-sulphurets, and of an orange colour by chromates of lead; easily reduced by calcination with charcoal and nitre, presents a phosphorescent appearance before the blow-pipe.

ACIDS.

Sulphuric or Oil of Vitriol. (Ganduk ka Attar).—Nitric or Aqua-fortis, (Shora ka tezal).—Muriatic or Spirits of Salts (Nemuk ka tezal).—Oxalic or Acid of Sugar.—Phosphoric.—Fluoric.—Tartaric.—Prussic or Hydrocyanic.

Symptoms.—Acid burning taste; acute pain in the throat, stomach and bowels; frequent vomiting of bloody matter, which effervesces with chalk or alkaline carbonates, and reddens litmus paper; mouth and lips excoriated, shrivelled white or yellow; hiccup; copious stools, more or less bloody; tenderness of the abdomen; difficult breathing; irregular pulse; excessive thirst; drink increasing the pain, and seldom retained on the stomach; frequent, but vain efforts at micturition; cold sweats; all red countenance; convulsions and death. If prussic acid be taken in large quantities death is the immediate result; in smaller quantities it produces stupor, nausea, giddiness with loss of sight, and sometimes salivation, difficult breathing, dilated pupils, and faintness, which if not soon relieved, terminates in death. When applied to sores, or the surface of the body, in autumn, the same effects are produced; all the salts formed with this acid are more or less poisonous. The essential oil of the bitter almond is a deadly poison, and smelling a bottle containing anhydrous prussic acid, proves instantaneously fatal.

Treatment.—Mix an ounce of calcined magnesia with a quart of water, and give a wine glassful every two minutes; soap, or chalk and water may be used until the magnesia can be procured; carbonated alkalies must not be used. Vomiting to be excited by tickling the throat with a feather. Diluents to be taken after the poison is got rid of for some time. Inflammatory consequences to be met by the usual remedies.

If sulphuric acid has been taken, water alone should not be given, nor should calcined magnesia, but the common carbonate of magnesia may be given freely, mixed with water: there is too much heat generated in the stomach, if the above cautions be not attended to. Chalk and water should be given if oxalic acid has been taken; prussic acid has been taken, use emetic, or the stomach pump; dash the body well with cold water; make the patient inhale ammonia or chlorine, or any other stimulants, and rouse the system in every possible way.

Tests.—Sulphuric acid is known by its great weight, evolving heat when mixed with water, Barytes throws down a sulphate, insoluble in nitric acid or water.

Nitric acid emits orange colored fumes on the addition of copper, and is changed blue by it; potash throws down a nitrate which disintegrates when thrown in the fire. It tinges the skin yellow.

Muriatic acid emits pungent fumes; a plate of silver throws down a white precipitate, soluble in ammonia, but not in nitric acid.

Oxalic acid is precipitated by lime water, the precipitate being soluble in nitric acid, but no excess of oxalic acid.

Phosphoric acid precipitates barytes and lime water; the precipitate soluble in nitric acid, decomposed by charcoal at a high temperature, evolving phosphoric acid gas, and phosphorus is sublimed.

Fluoric acid gives out white vapours; heat is evolved with a hissing noise, when water is added to it; it dissolves glass.

Tartaric acid gives a precipitate with lime water, soluble in excess of acid, and in nitric acid also.

Prussic acid smells like bitter almond or peach, which is insoluble in cold nitric acid and leaves, it precipitates nitrate of silver white when dried, and heated gives out cyanogen gas, which burns a rich rose coloured flame.

ALKALIS.

Caustic, or Carbonated Potash—Soda—Ammonia (Phar ka Neemuk Saji.)

Symptoms—Taste acid, urinous, and caustic; great heat in the throat; nausea and vomiting of bloody matter, which changes syrup of violet to green, and effervesces with acid; if the carbonated form of the alkali has been taken, copious stools, acute pain in the stomach, colic, convulsions, derangement, and death.

Treatment.—Vinegar and other vegetable acids to be given largely, to neutralize the poison there; dilute freely with demulcents, and treat inflammatory symptoms with the usual remedies. Almond or olive oil may be given largely, for it not only makes vomiting easy, but converts the alkali into a soap.

Tests.—Alkalies have many properties in common, their solutions feel soapy to the touch, change the vegetable reds and blues to green, and yellows to brown, remain transparent, when carbonic acid is added to them, which distinguishes them from the alkaline earths, barytes, strontian and lime. Nitrate of silver is precipitated by them, in form of a dark-coloured oxyd, soluble in nitric acid. Potash and soda may be distinguished from each other by evaporating their solutions to dryness; potash will become moist by exposure to the air, while soda will remain dry. Ammonia is known by its pungent smell, and precipitates the salts of copper blue.

ALKALINE EARTHS.

Lime (Chunam)—Baryta Carbinate Muriate.

Symptoms.—Violent vomitings; convulsions; palsy of the limbs; distressing pains in the abdomen; hiccup; alteration of the countenance, and very early death, when baryta, or any of its combinations, which are very energetic poisons have been taken, lime sometimes produces death.

Treatment.—If lime water has been taken, vinegar and other vegetable acids are the best antidotes.

If baryta has been taken, a weak solution of Epsom salts should be drunk plentifully, to produce vomiting, and at the same time to decompose the poison, which it renders inert by forming the insoluble sulphate.

If Epsom salt be not at hand, large draughts of water, acidulated by sulphuric acid should be given.

Tests.—Solution of lime change vegetable blues to green, and is precipitated white, by carbonic and oxalic acid, while no change is produced on it by sulphuric acid; its salts are decomposed by the fixed alkalies, which precipitate the lime, but not the ammonia. Pure

laryta undergoes changes similar to lime, when water is added to it, and acts like it on vegetable colours; it does not effervesce with acids. Carbonate of laryta is insoluble in water, but dissolves in nitric or muriatic acid. Muriate of laryta in solution is not changed by sulphuretted hydrogen, or pure ammonia, but its carbonate throws down a white precipitate, which is carbonate of laryta.

Nitre or Sulphetre, or Sal Prunella—(Shora or Kalmi.)

Symptoms.—Pain in the stomachs; nausea; painful vomiting; purging, convulsions, faintings; pulse feeble; cold extremities, with tearing pains in the stomach and bowels; difficult respiration; and death.

Treatment.—Similar to that of arsenic.

Tests.—If nitre be thrown on a fire, it deflagrates; if powdered and sulphuric acid be poured on it, it gives out nitrous fumes; it is decomposed at a high temperature, giving out oxygen gas.

Muriate of Ammonia or Sal Ammoniac—(Naukada.)

Symptoms.—Excessive vomiting, with convulsions and general stiffness of the muscles; great pain in the bowels; early alteration of features, and death.

Treatment.—Large draughts of warm sugared water, to excite vomiting, and the throat tickled with a feather.

Tests.—Muriate of ammonia is soon volatilized if placed on hot coals; if rubbed up with quick lime, it gives out the fumes of ammonia, a solution of it in water is precipitated white by nitrate of silver.

Iodine, Hydriodate of Potash and Soda.

Symptoms.—Burning sensation and constriction of the throat; bilious vomiting, heartburn, salivation, pain in the eyeballs, obscured vision, palpitation, tremor, paralysis and death.

Treatments.—Mucilaginous drinks to be given plentifully, and large emollient clysters to be thrown up the rectum.

Tests.—Iodine exists in scales of a greyish black colour, and becomes a violet colored gas at 120° ; it is sparingly dissolved in water, which tinges raw starch of a fine purple, it stains the skin brown, which soon vanishes; it destroys vegetable colours, and has the odour of chlorine. Hydriodate of potash precipitates corrosive sublimate of a carmine colour.

PHOSPHORUS.

Symptoms.—Similar effects to the mineral acids, with a hot taste of garlic.

Treatment.—No specific antidote known; but vomiting should be excited by large draughts of water, mixed with magnesia, and all oily and fatty substances avoided.

Tests.—If phosphorus, or the rejected contents of the stomach, after it has been taken, be boiled in a retort, (with its beak under water,) with a solution of caustic potash, phosphorated hydrogen gas is formed, which explodes, with a green flame, as soon as it reaches the surface of the water.

ALCOHOL—(Shrab Mokuter.)

Brandy, Wines, and all Spirituous Liquors.

Symptoms.—Intoxication, and when taken very freely, completely insensibility. Apoplexy, paralysis on one side, countenance swollen, and dark red colour; breathing difficult, often stertorous with a peculiar puffing out of the lips, ending very frequently in delirium tremens, and sometimes death.

By smelling the breath, you may readily distinguish the symptoms from those of spontaneous apoplexy.

Treatment.—Twenty grains of sulphate of zinc should be got into the stomach as soon as possible, and if the person has lost the power of swallowing, a flexible tube should be the means of conveying it there; vomiting should be induced, by all possible means, such as large draughts of warm water, clysters of salt and water, should be thrown up the rectum. The patient should be placed erect, and if the countenance does not improve, the jugular vein should be opened, cold wet cloths applied to the head, particularly if the body is hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.

If vomiting cannot be excited, the stomach pump may be had recourse to.

N. B.—[Phosphorus and Alcohol are plac'd under this division of the chart, for convenience of arrangement.]

VEGETABLE POISONS.

NARCOTIC POISONS.

Cocculus Indicus (Cachmarra)—*Datura Stramonium (Datura)*.—*Hemp (Gunja)*.—*Hemlock (water)*.—*Hemlock (common)*.—*Hemlock (Drupwort)*.—*Hyoscyamus or Henbane*.—*Nux Vomica bark and its preparations (Kuchalee)*.—*Opium, (Afim)*.—*Tobacco (Tambacco)*.

Symptoms.—The narcotic vegetable poisons, if taken into the stomach, or applied to a wound occasion the following effects. Stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication; stupid air; pupil of the eye dilated; furious or lively delirium; sometimes pain, convulsions of different parts of the body, or palsy of the limbs; pulse variable; breathing quick; great anxiety and dejection, and if not speedily removed, terminates in death.

When *nux vomica* is the poison taken, its symptoms are very similar to tetanus in its worst form; the slightest thing throwing the patient into horrible convulsions.

Datura ammonium produces blindness, and a peculiar creeping of the muscles belonging to the extremities.

Treatment.—An active emetic should be given and repeated every quarter of an hour, until it has effect; but in case of bad symptoms presenting themselves, it would be advisable to have recourse to the stomach pump. Large and strong clysters of salt and water should be thrown up, to assist in getting rid of the poison, and after vomiting ceases, strong purgatives may be given. If the drowsiness, which is sometimes in the extreme, and the insensibility bordering on apoplexy be not remedied by these means, lose no time in applying blisters over the neck, chest, and legs. In absence of blisters mustard poultices may be applied. The warm bath should be had recourse to, and if all fail, open the jugular vein. If the natural temperature of body sink, friction should be perseveringly used. After the poison has been completely evacuated, a tumbler of vinegar may be given as a drink; but on no account must the vegetable acids be given, until you feel satisfied that the poison is got rid of. Rouse the patient by every means in your power.

Tests.—Acetate of lead precipitates an impure mercurate of lead, from a watery solution of opium, which precipitates should be suspended.

ed in 10 or 12 parts of water, and subjected to a stream of sulphureted hydrogen gas, filter and evaporate at the temperature of 180°. Fabron-heit and beautiful crystals of meconic acid are procured, which if dissolved in water, form a deep red solution with permuriate of iron.

Morphia and its salts form a deep greenish blue solution with permuriate of iron, and turn brown on adding a drop or two of iodic acid.

Narcotine, if pure, is not affected by permuriate of iron; but if nitric acid be poured on the crystallized narcotine, it turns it of a beautiful yellow.

A mixture of ammonia and alcohol will produce a crystalline precipitate of morphia from laudanum in a few hours, which if twice dissolved in acetic acid, and twice precipitated by ammonia, yield colourless crystals.

Nux vomica is of a dirty, grey colour; inflames on charcoal; an intensely bitter taste; and an odour like liquorice powder. Acquires a red orange colour, when treated with nitric acid, which is destroyed by the addition of chloride of tin. It precipitates greyish with tincture of galls.

IRRITATING POISONS.

Aconite—*Croton Oil or Seeds* (*Jamel gotu.*)—*Euphorbium*, (*Monsah.*)—*Elaterium*—*Hellebore, black*, (*Kuthe.*)—*Hellebore white*, (*Kuthe sufid.*)—*Plumbago*, (*Lall chitra*).

Symptoms.—The general effects of this class of poisons are an acrid pungent taste, with more or less of bitterness; excessive heat; great dryness of the mouth and throat; violent vomitings, the effect being continued after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and irregular; breathing difficult; appearance of intoxication; pupil of the eye dilated; insensibility, resembling death; pulse gradually dies away, and death closes the scene.

If applied externally, many of them produce violent inflammation, with eruptions of pustules.

Plants, whose flowers have fine stamens, one pistil, one petal, and whose fruit is of the berry kind, may at once be pronounced poisonous. The umbelliferous plants which grow in water are mostly poisonous.

N. B.—For explanation of the above terms, see *Bengal Dispensatory*, page 98.

Treatment.—If the poison causes vomiting, it may be rendered easy by large draughts of warm water; but if insensibility comes on, without vomiting, 20 grains of sulphate of zinc should be given, and repeated every quarter of an hour, until it has effect; and when the stomach is well emptied, a brisk purgative should be given. After the poison is got rid of, a strong infusion of coffee, or vinegar diluted with water may be given. Camphor, mixed with either, may be given, and if insensibility be considerable, apply blisters and friction, as recommended in the treatment of narcotic poisons. Inflammation to be treated on general principles.

Tests.—If *Lall Chitra* be the suspected poison, the matter should be treated with sulphuric ether, and shaken well in a long tube, sealed at one end, the ethereal solution decanted, and any alkali thrown in as a test, when, if *Lall Chitra* be present, the solution will turn to a deep red rosy colour.

The other vegetable poisons cannot be detected by chemical analysis.

POISONS.

ANIMAL POISONS.

Poisonous Fish.

Symptoms—In an hour or two, or often in a much shorter time after a fish has been eaten, a weight at the stomach is felt, with slight giddiness and pain in the head, and a sense of heat about the head and eyes; considerable thirst; often an eruption of the skin (urticaria), and in many cases death has followed.

Treatment—An emetic should be given immediately, and repeated until vomiting takes place freely; after which active purgatives should be given. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. If spasms ensue after purging, 100 drops of laudanum may be given to an adult patient, and if inflammation sets in, reduce it on general principles.

VERMINOUS INSECTS.

Scorpion—Hornet—Wasp (Bolta) Bee (Mowmarkee)—Mosquito (Mou hu)

Symptoms—In general the sting of these insects causes only a slight degree of swelling; but the sting from the scorpion invariably produces violent inflammation, followed by sickness and fever, with excruciating pain in the part affected.

Treatment.—Hart-horn and oil may be rubbed on the affected part; or a little sugar placed over the wound; or a rag moistened with salt and water may be applied till the pain is removed, five or six drops of ammonia may be given internally, mixed with half a wine glassful of water, or a little wine may be given. The pain may in general be removed by strong pressure over the part affected with the barrel of a small watch key.

Cantharides or the Blistering fly, (Polarophis).

Symptoms.—Nauseous odour at the breath; neural basis; burning heat in the throat, stomach and belly; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; pain and heat in the bladder; at augury or retention of urine; frightful convulsions, and death.

Treatment.—Vomiting to be relieved by drinking warm water in which 5 ii Ipecacuanha Powder has been mixed. Should the viscera should be administered, and if symptoms of inflammation of the stomach, kidney or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the abdomen, and on the thighs, and the warm bath may be had recourse to.

POISONOUS SERPENTS.

Symptoms.—A severe pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pain, then reddish, livid and gangrenous in appearance; faintings, vomiting, convulsions, and sometimes jaundice; pulse small, frequent and irregular; breathing difficult; cold sweats, the sight fails, and intellectual faculties become deranged. Inflammation, and often extensive suppuration and gangrene (mortification) followed by death.

Treatment—Apply a ligature above the wound; enlarge the wound, and apply a sucking glass. Give the patient 50 drops of laudanum to an adult, and repeat it every half hour for 3 doses, taking care that the patient is kept walking about, and does not lie down to sleep. If cold and clammy, give ten grains of the carbonate of ammonia in a wine glassful of camphor and repeat every half hour; or some warm brandy and water.

Observations.—Poisonous snakes have conical tubular fangs, but only one row of teeth on each side of the upper jaw, while the innocent tribe have two. In the former the scales decrease in size as they approach the head, while the reverse is the case in the latter.

SALIVA OF THE RABID DOG.

Symptoms.—At an uncertain interval after the bite, generally, however, between the twentieth day, and three months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased. Violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruding; the tongue swells, and often hangs out, and viscid saliva flows from the mouth. There is pain in the stomach, with bilious vomitings; a horror of fluids, and an impossibility of swallowing them; all these symptoms are aggravated till the sufferer is relieved by death.

Treatments.—Hydrophobia is more easily prevented than cured; indeed it is extremely doubtful if it ever has been cured. Mercury, arsenic, opium, musk, hemp, camphor, acids, wine, vegetable and mineral alkali, various herbs, and many other remedies have been tried, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost all other remedial agents have been tried without success. The bitten part should be completely cut out, even though it has healed—if the symptoms have not yet come on, the part should then be immersed in warm water, or washed with it as long as it will bleed; the cupping glasses may be applied, and after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

ASPHYXIA OR SUSPENDED ANIMATION.

Treatment of Drowned Persons.

Remove the body on a plank or hurdle, with the head elevated, to the nearest dwelling house; or if it be very far, to some other place; first strip it of the wet clothes, rub it dry, and put on the spare clothes of bye-standers. This is to prevent evaporation, and consequent reduction of heat. Place it between warm blankets, and keep up the temperature by application of dry heat in every possible way. Water extinguishes life, as it does fire by *keeping off the air*—therefore restoring air to the lungs by inflation, is the means most to be relied upon; and should be commenced without a moment's delay, and continued perseveringly during several hours. This is best accomplished by pressing the tongue downwards and forwards, and passing a small curved tube into the gullet (larynx), and attaching a pair of bellows to it, (the Bengallee goldsmith or tin-smith's bellows will do), or in the absence of bellows an assistant must blow into it—to distend the lungs, which must be emptied by pressure with the head on the chest or

belly—these expedients should be done alternately so as to imitate natural breathing. If oxygen gas could be used instead of atmospheric air, it would be preferable.

Friction with warm flannels should be going on all the while, and ammonia applied to the nose. Warm clysters, with salt and mustard, or of brandy and water, may be thrown up, and warm spiced wine got into the stomach, by means of a flexible catheter and syringe—not to be attempted without such instruments, till the patient can swallow. Bleeding must not be had recourse to, unless the face be very dark, and the limbs warm and flexible. Tobacco in any form is useless, and very dangerous. Opening of the windpipe, (Laryngotomy) may be had recourse to, if all other means fail to distend the lungs. Electricity, or galvanic electricity may be used, passing the shocks *through* the heart.

The body should be insulated from the earth, by placing it on a plank of wood, supported by quart bottles perfectly dry, on the outside. If recovery happens, small quantities of light nutritious food may be given, and perspiration kept up by warmth, and tepid drinks.

Treatment of Persons Hanged.

Remove the ligature as soon as possible, and act as for drowned, with the exception of opening the jugular vein, and removing, if possible, six or eight ounces of blood. Death is caused rather by suffocation than apoplexy, therefore the lungs should be supplied with air without delay.

Treatment of persons supposed to be dead by Carbonic Acid Gas, and other poisonous exhalations.

If the body retains its heat, expose it to the air, and dash cold water over the head, neck and breast. The lungs should be inflated, the nostrils stimulated, and if the veins of the neck appear full, some blood may be removed from them. If the temperature of the body be below the natural standard, heat must be applied instead of cold, and friction may be useful.

Treatment of still born Children.

The lungs must be perseveringly inflated, by means of a quill, or small female catheter, the heat kept up by warm flannels, or immersion in warm water. Stimulants may be applied to the nose, and pit of the stomach, and gentle friction should be used.

Treatment of Persons Struck by Lightning.

Inflate the lungs as early as possible; apply stimulants, more particularly *gentle* electrical shocks, passed through the chest, and along the spine. Keep up the temperature by external heat, and get warm cordials into the stomach, by means of the flexible tube and syringe.

Treatment of Persons who have been exposed to Intense Cold.

First use gentle friction with iced water, but in case this is not at hand, use the cold bath, and whilst the person remains in it, small quantities of warm water must be added at intervals, so as to raise the temperature gradually, the friction being continued. The lungs to be inflated; warm wine, or any other warm fluid to be given, very cautiously at first, and solid food to be withheld, for some hours after recovery.

The ryots, or peasantry, who, though often grievously oppressed, were, after the Sovereign the real owners of the soil, of which they could not be dispossessed, while they paid the assessments levied upon it were declared the tenants of the Zemindars. The effects of this financial measure were disastrous. The Zemindars, obliged to go through the legal formalities to collect their rents from the ryots were unable to pay their taxes to the Government, whose proceedings were summary. Their lands were gradually sold for arrears of taxes, and passed into the hands of absentee landlords; in a few years almost all the Zemindars disappeared. No improvement took place among the ryots, who were perhaps more oppressed by the middlemen immediately above them than they had been by the Zemindars.

* Certificate of survey to be given by the surveyor on board of every vessel.

XV. And in order to enable the collector and controller of his majesty's customs to grant a certificate, truly and accurately describing every ship or vessel to be registered in pursuance of this act, and also to enable all other officers of his majesty's customs on due examination, to discover whether any such ship or vessel is the same with that for which a certificate is alleged to have been granted; be it enacted, that, previous to the registering or granting of any certificate of registry as aforesaid, some one or more person or persons, appointed by the commissioners of his majesty's customs (taking to him or their assistance, if he or they shall judge it necessary, one or more person or persons skilled in the building and measurement of ships,) shall go on board of every such ship or vessel as to all and every particular contained in the form of the certificate hereinbefore directed, in the presence of the master, or of any other person who shall be appointed for that purpose, on the part of the owner or owners, or in his or their absence, by the said master; and shall deliver a true and just account in writing, of all such particulars of the build, description, and measurement of every such ship or vessel, as are specified in the form of the certificate aforesaid, to the collector and controller authorized as aforesaid to make such registry and grant such certificate as registry; and the said master, or other person attending on the part of the owner or owners, is hereby required to sign his name also to the certificate of the surveying or examining officer, in testimony of the truth thereof, provided such master or other person, shall come it and agree to the several particulars set forth and described therein.

Mode of measurement to be taken.

XVI. And be it further enacted, that for the purpose of ascertaining the tonnage of ships or vessels, the rule for measurement shall be as follows: (that is to say,) the length shall be taken on a straight line along the rib of the keel, from the back of the main stern-post to a perpendicular line from the fore part of the main stem under the bowsprit, from which, subtracting three-fifths of the breadth, the remainder shall be entered the just length of the keel to find the tonnage; and the breadth shall be taken from the outside plank in the broadest part of the ship, whether that shall be above or below the main wales, exclusive of all manner of doubling planks that may be wrought upon the sides of the ship; then multiplying the length of the keel by the breadth so taken, and that product by half the breadth, and dividing the whole by ninety-four, the quotient shall be deemed the true contents of the tonnage.

Mode of surveying, tonnage when vessels are afloat.

XVII. And whereas it would in some cases endanger ships or vessels to cause them to be laid on shore, be it therefore enacted, that in case, where it may be necessary to ascertain the tonnage of any ship or vessel when afloat, according to the foregoing rule, the following method shall be observed; (that is to say,) drop a plumb line over the stern of the ship, and measure the distance between such line and the after part of the stern-post at the load watermark, then measure from the top of the plumb line, in a parallel direction with the water, to a perpendicular point immediately over the load watermark at the fore part of the main stem, subtracting from such measurement the above distance the remainder will be the ship's extreme length, from which is to be deducted three-fifths for every foot of the load draught

of water, for the rake abaft, also three fifths of the ships breadth for the rake forward, the remainder shall be esteemed the just length for the keel to find the tonnage; and the breadth shall be taken from outside to outside of the plank in the broadest part of the ship, whether that shall be above or below the main wales, exclusive of all manner of sheathing or doubling that may be wrought on the side of the ship; then multiplying the length of the keel for tonnage by the breadth, so taken, and that product by half the breadth, and dividing by ninety-four, the quotient shall be deemed the true contents of the tonnage.

XVIII. Provided always, and be it further enacted, that in each of the several rules herein-before prescribed, then used for the purpose of ascertaining the tonnage of any ship or vessel propelled by steam, the length of the engine-room shall be deducted from the whole length of such ship or vessel, and the remainder shall, for such purpose, be deemed the whole length of the same.

Engine room in steam vessels to be deducted.

XIX. And be it further enacted, that whenever the tonnage of any ship or vessel shall have been ascertained according to the rule herein prescribed (except in the case of ships or vessels which have been admeasured abroad), such account of tonnage shall, ever after, be deemed the tonnage of such ship or vessel, and shall be repeated in every subsequent registry of such ship or vessel unless it shall happen that any alteration has been made in the form and burthen of such ship or vessel, or it shall be discovered that the tonnage of such ship or vessel had been erroneously taken and computed.

Tonnage when ascertained to be ever after deemed the tonnage.

XX. And be it further enacted, that at the time of the obtaining of the certificate of registry, as aforesaid, sufficient security by bond shall be given to his majesty, his heirs and successors, by the master and such of the owners, as shall personally attend, as is herein-before required, such security to be approved of and taken by the person or persons herein-before authorized to make such registry and grant such certificate of registry at the port or place in which such certificate shall be granted, in the penalties following; (that is to say) if such ship or vessel shall be a decked vessel, on board above the burthen of fifteen tons and not exceeding fifty tons, then in the penalty of one hundred pounds; if exceeding the burthen of fifty tons and not exceeding one hundred tons, then in the penalty of three hundred pounds; if exceeding the burthen of one hundred tons and not exceeding two hundred tons, then in the penalty of five hundred pounds; if exceeding the burthen of two hundred tons and not exceeding three hundred tons, then in the penalty of eight hundred pounds; and if exceeding the burthen of three hundred tons, then in the penalty of one thousand pounds; and the condition of every such bond shall be, that such certificate shall not be sold, lent, or otherwise disposed of to any person or persons whatever, and that the same shall be solely made use of for the service of the ship or vessel for which it is granted; and that in case such ship or vessel shall be lost, or taken by the enemy, burnt, or broken up, or otherwise prevented from returning to the port to which she belongs, or shall on any account have lost and forfeited the privileges of a British ship, or shall have been seized and legally condemned for illicit trading, or shall have been taken in execution for debt and sold by due process of law, or shall have been sold to the crown, or shall, under any circumstances, have been registered or now, the certificate, if preserved, shall be delivered up, within one month after the arrival

XXXVI. And be it further enacted, that when and after the particulars of any bill of sale or other instrument by which any ship or vessel, or any share or share thereof, shall be transferred, shall have been so entered in the book of registry as aforesaid, the collector and controller shall not enter in the book of registry the particulars of any other bill of sale or instrument purporting to be a transfer by the same vender or mortgager or vendors or mortgagers of the same ship or vessel, share or shares thereof, to any other person or persons, unless thirty days shall elapse from the day on which the particulars of the former bill of sale or other instrument were entered in the book of registry; or in case the ship or vessel was absent from the port to which she belonged at the time when the particulars of such former bill of sale or other instrument were entered in the book of registry, then unless thirty days shall have elapsed from the day on which the ship or vessel arrived at the port to which the same belonged; and in case the particulars of two or more such bills of sale or other instruments as aforesaid, shall at any time have been entered in the book of registry of the

said ship or vessel, the collector and controller shall not enter in the book of registry the particulars of any other bill of sale or other instrument as aforesaid, unless thirty days shall in like manner have elapsed from the day on which the particulars of the last of such bill of sale or other instrument were entered in the book of registry, or from the day on which the ship or vessel arrived at the port to which she belonged, in case of her absence as aforesaid; and in every case where there shall at any time happen to be two or more transfers by the same owner or owners of the same property in any ship or vessel entered in the book of registry as aforesaid, the collector and controller are hereby required to indorse upon the certificate of registry such ship or vessel the particulars of that bill of sale or other instrument under which the person or persons claim or claims property, who shall produce the certificate of registry for that purpose within thirty days next after the entry of his said bill of sale or other instrument in the book of registry as aforesaid, or within thirty days next after the return of the said ship or vessel to the port to which she belongs, in case of her absence at the time of such entry as aforesaid; and in case no person or persons shall produce the certificate of registry within either of the said spaces of thirty days, then it shall be lawful for the collector and controller, and they are hereby required, to indorse upon the certificate of registry the particulars of the bill of sale or other instruments, to such person or persons as shall first produce the certificate of registry for that purpose, it being the true intent and meaning of this act, that the several purchasers and mortgagees of such ship or vessel, share or shares thereof, when more than one appear to claim the same property or to claim security on the same property, in the same rank and degree, shall have priority one over the other, not according to the respective times when the particulars of the bill of sale or other instrument by which such property was transferred to them were entered in the book of registry as aforesaid, but according to the time when the indorsement is made upon the certificate of registry as aforesaid; provided always, that if the certificate of registry shall be lost or mislaid, or shall be detained by any person whatever, so that the indorsement cannot in due time be made thereon, and proof thereof shall be made by the purchaser or mortgagee, or his known agent, to the satisfaction of the commissioners of his majesty's customs, it shall be lawful for the said commissioners to grant such further time as to them shall appear necessary, for the recovery of the certificate of registry, or for the registry *de novo* of the said ship or vessel under the provisions of this act, and thereupon the collector and controller shall make a memorandum in the book of registers of the further time so granted, and during such time no other bill of sale shall be enacted for the transfer of the same ship or vessel or the same share or shares thereof, or for giving the same security thereon.

Nature of the priority intended in this act.

Provision in case certificate be mislaid

XXXVII. And be it further enacted, that if the certificate of registry of such ship or vessel shall be produced to the collector and controller of any port where she may then be, after any bill of sale shall have been recorded at the port to which she belongs, together with such bill of sale, containing a notification of such records, signed by the collector and controller of such port as before directed, it shall be lawful for the collector and controller of such other port, to indorse on such certificate of registry (being required so to do) the transfer mentioned in such bill of sale, and such collector and controller shall give notice thereof to the collector and controller of the port to which such

Bills of sale may be produced after 30th or other 20th than those which remain long, and transfer to new port certificate of

ship or vessel belong, who shall record the same in like manner as if they had made such indorsement themselves, but inserting the name of the port at which such indorsement was made: provided always, that the collector and controller of such other port shall first give notice to the collector and controller of the port to which such ship or vessel belongs, of such requisition made to them to indorse the certificate of registry, and the collector or and controller of the port to which such ship or vessel belongs, shall thereupon send information to the collector and controller of such other port, whether any and what other bill or bills of sale have been recorded in the book of the registry of such ship or vessel: and the collector and controller of such other port, having such information, shall proceed in manner directed by this act in all respects, to the indorsing of the certificate of registry as they would do if such port were the port to which such vessel belonged.

Previous notice to be given to officers at the port of registry

If upon registry *de novo* any bill of sale shall not have been recorded, the same shall then be produced.

Bill of sale previous to registry may be recorded after registry

Upon charge of priority registry *de novo* may be granted if desired although not required by law.

Copies of declarations &c. and of extracts from books of registry, admitted in evidence

XXXVIII. And be it further enacted, that if it shall become necessary to register any ship or vessel *de novo*, and any share or shares of such ship or vessel shall have been sold since she was last registered, and the transfer of such share or shares shall not have been recorded and indorsed in manner herein-before directed, the bill of sale thereof shall be produced to the collector and controller of his majesty's customs, who are to make registry of such ship or vessel, otherwise such sale shall not be noticed in such registry *de novo*, except as hereinafter exempted: provided always, that upon the future production of such bill of sale, and of the existing certificate of registry, such transfer shall and may be recorded and indorsed as well after such registry *de novo*, as before.

XXXIX. And be it further enacted, that if any change of property in any ship or vessel, the owner or owners shall desire to have the same registered *de novo*, although not required by this act, and the owner or proper number of owners shall attend at the custom house at the port to which such ship or vessel belongs for that purpose, it shall be lawful for the collector, and controller of his majesty's customs at such port, to make registry *de novo* of such ship or vessel at the same port, and to grant a certificate thereof, the several requisites herein-before in this act mentioned and directed, being first duly observed and complied with.

XL. And whereas great inconvenience hath arisen from the registering officers being served with subpoenas, requiring them to bring with them and produce, on trials in courts of law, relative to the ownership of vessels, or otherwise, the oaths or declarations required to be taken by the owners thereof prior to the registering thereof, and the books of registry, or copies or extracts therefrom: and whereas it would tend much to the dispatch of business if the attendance of such registering officers with the same upon such trials were dispensed with; be it therefore enacted, that the collector and controller of his majesty's customs, at any port or place, and the person or persons acting for them respectively, shall, upon every reasonable request by any person or persons whomsoever, produce and exhibit, for his, her, or their inspection and examination, any oath or declaration, sworn or made by any such owner or owners, proprietor or proprietors, and also any register or entry in any book or books of registry required by this act to be made or kept, relative to any ship or vessel, and shall, upon every reasonable request by any person or persons whomsoever, permit him, her,

or them, to take a copy or copies, or an extract or extracts thereof respectively; and that the copy and copies of any such oath or declaration, register or entry, shall, upon being proved to be a true copy or copies thereof respectively, be allowed and received as evidence upon every trial at law, without the production of the original or originals, and without the testimony or attendance of any collector or controller, or other person or persons acting for them respectively, in all cases, as fully and to all intents and purposes such original or originals, if produced by any collector or collectors, and controller or controllers, or other person or persons acting for them, could or might legally be admitted or received in evidence.

XLII. And be it further enacted, if the ship or vessel, or the share or shares of any owner thereof, who may be out of the kingdom, shall be sold in his absence by his known agent or correspondent, under his directions, either expressed or implied, and acting for his interest in that behalf, and such agent or correspondent, who shall have executed a bill of sale to the purchaser of the whole of such ship or vessel, or of any share or shares thereof, shall not have received a legal power to execute the same, it shall be lawful for the commissioners of his majesty's customs, upon application made to them, and proof to their satisfaction of the fair dealings of the parties, to permit such transfer to be registered, if registry *de novo* be necessary, or to be recorded and indorsed, as the case may be in manner directed by this act, as if such legal power had been produced; and also it shall happen that any bill of sale cannot be produced, or if, by reason of distance of time, or the absence or death of parties concerned, it cannot be proved that a bill of sale or for any share or shares in any ship or vessel had been executed, and registry *de novo* of such ship or vessel shall have become necessary, it shall be lawful for the commissioners of his majesty's customs, upon proof to their satisfaction, of the fair dealing of the parties, to permit such ship or vessel to be registered *de novo*, in like manner as if a bill of sale for the transfer of such share or shares had been produced; provided always, that in any of the cases herein mentioned, good and sufficient security shall be given to produce a legal power or bill of sale within a reasonable time, or to abide the future claims of the absent owner, his heirs and successors, as the case may be; and at the future request of the party whose property has been so transferred, without the production of a bill of sale from him or from his lawful attorney, such bond shall be available for the protection of his interest, in addition to any powers or rights which he may have in law or equity against the ship or vessel, or against the parties concerned, until he shall have received full indemnity for any loss or injury sustained by him.

XLIII. And be it further enacted, that when any transfer of any ship or vessel, or of any share or shares thereof, shall be made only as a security for the payment of a debt or debts, either by way of mortgage, or of assignment to a trustee or trustees, for the purpose of selling the same for the payment of any debt or debts, then and in very such case the collector and controller, and controller of the port where the ship or vessel is registered shall, in the entry in the book of registry, and also in the indorsement on the certificate of registry, in manner herein-before directed, state and express that such transfer was made only as a security for the payment of debt or debts, or by way of mortgage, &c. to that effect; and the person or persons to whom such trans-

Agent, or shares sold in the absence of owners without formal powers

Commissioners may permit record of such sales of registry *de novo* as the case may require; and in other cases where bills of sale may not be produced

Security being given to produce legal powers or bills of sale future claims

for shall be made, or any other person or persons claiming under him, or them as a mortgagee or mortgagees, or a trustee or trustees ~~only~~, shall not, by reason thereof, be deemed to be the owner or owners of such ship or vessel, share or shares thereof, nor shall the person or persons making such transfer be deemed, by reason thereof, to have ceased to be an owner or owners of such ship or vessel, any more than if no such transfer had been made, except so far as may be necessary for the purpose of rendering the ship or vessel, share or shares so transferred, available, by sale or otherwise, for the payment of the debt or debts for securing the payment of which such transfer shall have been made.

Transfers of ships for security of debts being registered, rights of mortgagee not affected by any act of mortgager, &c.

XLIII. And be it further enacted, that when any transfer of any ship or vessel, or of any share or shares thereof, shall have been made as a security for the payment of any debt or debts, either by way of mortgage or of assignment as aforesaid, and such transfer shall have been duly registered according to the provisions of this act, the right of interest of the mortgage or other assignees as aforesaid, shall not be in any manner affected by any act or acts of bankruptcy, committed by such mortgager or assigner, mortgagers or assigners, after the time when such mortgage or assignment shall have been registered as aforesaid, notwithstanding such mortgager or assigner, mortgagers or assigners, at the time he or they shall so become bankrupt as aforesaid, shall have in his or their possession, order and disposition, and shall be the reputed owner or owners of the said ship or vessel, or the share or shares thereof, so by him or them mortgaged or assigned as aforesaid, but that such mortgage or assignment shall take place of and be preferred to any right, claim, or interest which may belong to the assignee or assignees of such bankrupt or bankrupts in such ship or vessel, share or shares thereof, any law or statute to the contrary thereof notwithstanding.

Governor of colony, &c. may cause proceedings in suits to be stayed

XLIV. And be it further enacted, that it shall and may be lawful for any governor, lieutenant-governor, or commander-in-chief of any of his majesty's colonies, plantations, islands, or territories, and they are hereby respectively authorised and required, if any suit, information, libel, or other prosecution or proceeding of any nature or kind whatever, shall have been commenced or shall hereafter be commenced in any court whatever, in any of the said colonies, plantations, islands, or territories respectively, touching the force and effect of any register granted to any ship or vessel, upon a representation made to any such governor, lieutenant-governor or commander-in-chief, to cause all proceedings therein to be stayed, if he shall see just cause so to do, until his majesty's pleasure shall be known and certifiad to him by his majesty, by and with the advice of his majesty's privy council; and such governor, lieutenant-governor, or commander-in-chief, is hereby required to transmit to one of his majesty's principal secretaries of state, to be laid before his majesty in council, an authenticated copy of the proceedings in every such case, together with his reasons for causing the same to be stayed, and such documents (properly verified) as he may judge necessary for the information of his majesty.

Penalty of 500*l.* on persons making false declaration, or falsifying any document.

XLV. And be it further enacted, that if any person or persons shall falsely make declaration to any of the matters hereinbefore required to be verified by declaration, or if any person or persons shall counterfeit, erase, alter, or falsify any certificate or other instrument in writing required or directed to be obtained

ed, granted, or produced by this act, or shall knowingly or wilfully make use of any certificate or other instrument so counterfeited, erased, altered, or falsified, or shall wilfully grant such certificate or other instrument in writing, knowing it to be false, such person or persons shall, for every such offence, forfeit the sum of five hundred pounds.

XLVI. And be it further enacted, that all the penalties and forfeitures inflicted and incurred by this act, shall and may be sued for, prosecuted, recovered, and disposed of in such manner, and by such way, means, and methods, as any penalties or forfeitures indicted, or which may be incurred for any offences committed against any law relating to the customs may now legally be sued for, prosecuted, recovered, and disposed of; and that the officer or officers concerned in seizures or prosecutions under this act, shall be entitled to and receive the same share of the produce arising from such seizures, as in the case of seizures for unlawful importation, and to such share of the produce arising from any pecuniary fine or penalty for any offence against this Act, as any officer or officers is or are now, by any law or regulation, entitled to upon prosecutions for pecuniary penalties.

TONNAGE ACT.

ANNO QUINTO AND SEXTO.

5 & 6 GULIELMI IV. REGIS. CAP. LVI.

An Act to Regulate the Admeasurement of the Tonnage and Burthen of the Merchant Shipping of the United Kingdom.

[6th September, 1835.

Whereas by an Act passed in the third and fourth years of the Reign of his present Majesty, for the registering of British vessels, certain rules are established for ascertaining the tonnage of ships as well on shore as afloat, and of vessels propelled by steam; and the account of such tonnage, whenever the same shall have been ascertained according to the rules therein prescribed (except in the case of ships admeasured afloat,) it is thereby enacted shall be deemed the tonnage of such ships, and shall be repeated at every subsequent registry of such ships, unless any alteration shall have been made in their form and burthen, or unless it be discovered that the tonnage had been erroneously computed. And whereas it is considered that the capacity of a ship is the fairest standard by which to regulate its tonnage, that internal measurements will afford the most accurate, and convenient method of ascertaining that capacity, and that the adoption of such a mode of admeasurement, will tend to the interest of the ship builder and the owner, as well as to the proper collection of the dues which by law are payable on tonnage; and it is expedient to alter and amend the law in this respect; be it therefore enacted, by the King's most excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, that from and after the commencement of this Act, so much of the said re-

Rules established by recited Act for ascertaining tonnage repealed.

cited Act as establishes rules for ascertaining the tonnage of ships shall be, and the same is hereby repealed, so far as respects the merchant shipping of the United Kingdom to be thereafter registered.

The rule by which tonnage of vessels is to be ascertained.

II. And be it further enacted, that from and after the commencement of this Act, the tonnage of every ship or vessel required by law to be registered shall, previous to her being registered, be measured and ascertained, while her hold is clear, and according to the following rule; (that is to say,) divide the length of the upper deck between the afterpart of the stem and the forepart of the sternpost into six equal parts depths. At the foremost, the middle, and the aftermost of those points of division, measure in feet and decimal parts of a foot the depths from the under side of the upper deck to the ceiling at the timber-strake. In the case of a break in the upper deck, the depths are to be measured from a line stretched in a continuation of the deck. Breadths. Divide each of those three depths into five equal parts, and measure the inside breadths at the following points; *viz.* at one-fifth and at four-fifths from the upper deck of the foremost and after most depths, and at two-fifths and four-fifths from the upper deck of the midship depth. Length. At half the midship depth measure the length of the vessel from the afterpart of the stem to the forepart of the sternpost; then to twice the midship depth add the foremost and the aftermost depths for the sum of the depths; add together the upper and lower breadths at the foremost division, three times the upper breadth, and the lower breadth at the midship division, and the upper breadth, and the lower breadth at the midship division, and the upper and twice the lower breadth at the after division, for the sum of the breadths; then multiply the sum of the depths by the sum of the breadths; and this product by the length, and divide the final product by three thousand five hundred, which will give the number of tons for register. If the vessel have a poop or half deck, or a break in the upper deck, measure the inside measure length, breadth, and height of such part thereof as may be included within the bulk-head; multiply these three measurements together, and dividing the product by 82.4, the quotient will be the number of tons to be added to the result as above found. In order to ascertain the tonnage of open vessels, the depths are to be measured from the upper edge of the upper strake.

Tonnage when ascertained, to be entered on register.

III. And be it further enacted, that the tonnage or burthen of every ship belonging to the United Kingdom, ascertained in the manner hereinbefore directed, shall, in respect of any such ship which shall be registered after the commencement of this Act, (except as hereinafter excepted) be inserted in the certificate of the registry thereof, and be taken and deemed to be the tonnage or burthen thereof for all the purposes of the said recited Act.

Mode of ascertaining tonnage of steam vessels.

IV. Provided always, and be it further enacted, that in each of the several rules hereinbefore prescribed, when applied for the purpose of ascertaining the tonnage of any ship or vessel propelled by steam, the tonnage due to the cubical contents of the engine room shall be deducted from the total tonnage of the vessel as determined by either of the rules aforesaid, and the remainder shall be deemed the true register tonnage of the said ship or vessel. The tonnage due to the cubical contents of the engine room, shall be determined in the following manner, that is to say, measure the inside length of the engine room in feet and decimal parts of a foot from the foremost to the aftermost bulk-head, then multiply the said length by the depth of the ship or vessel at the midship division as aforesaid, and

the product by the inside breadth, at the same division at two-fifths of the depth from the deck taken as aforesaid, and divide the last product by 92.4, and the quotient shall be deemed the tonnage due to the cubical contents of the engine-room.

V. Provided always, and be it further enacted, that the tonnage due to the cubical contents of the engine-room and also the length of the engine-room, shall be set forth in the certificate of registry as part of the description of the ship or vessel, and that any alteration of such tonnage due to the cubical contents of the engine-room or of such length of the engine-room, after registry, shall be deemed to be an alteration requiring registry *de novo* within the meaning of the said Act for the registering of ships or vessels.

Length and cubical contents of engine-room to be set forth in the description of steam vessel

VI. And be it further enacted, that for the purpose of ascertaining the tonnage of all such ships, whether belonging to the United Kingdom or otherwise, as there shall be occasion to measure while their cargoes are on board, the following rule shall be observed and is hereby established: (that is to say,) measure first, the length on the upper deck between the afterpart of the stem and the forepart of the stern post; secondly, the inside breadth on the underside of the upper deck at the middle point of the length; and, thirdly, the depth from the underside of the upper deck down the pump-well to the keel: multiply these three dimensions together, and divide the product by one hundred and thirty, and the quotient will be the amount of the register tonnage of such ships.

Measurement of length

VII. And be it further enacted, that the true amount of the register tonnage of every merchant ship or vessel belonging to the United Kingdom, to be ascertained according to the rule by this Act established, in respect of such ships, shall be deeply carved or cut in figures of at least three inches in length, on the main beam of every such ship or vessel, prior to her being registered.

Amount of register tonnage to be carved on main beam

VIII. Provided always, and be it further enacted, that nothing herein contained shall extend to alter the present measure of tonnage of any ship or vessel which shall have been registered prior to the commencement of this Act, unless in cases where the owners of any such ship or shall require to have their tonnage established according to the rule herein before provided, or unless there shall be occasion to have any such ship admeasured again on account of any alteration which shall have been made in the form or burthen of the same, in which cases only such ship shall be re-admeasured according to the said rule, and their tonnage registered accordingly.

Not to alter tonnage of vessels already registered.

IX. And be it further enacted, that this Act shall commence and take effect upon and from the first day of January one thousand eight hundred and thirty-six.

Commencement of Act

X. And be it further enacted, that this Act may be altered, amended, or repealed, by any Act or Acts to be passed in the present session of Parliament.

Act may be altered this session.

provide for the Relief of Insolvent Debtors in the East Indies, certain provisions were enacted, as to a commission of bankruptcy issuing against any such Insolvent Debtor as therein mentioned, and as to the proceedings consequent thereon; and amongst other things, it was enacted, that a certificate obtained under such commission as therein provided, shall have the same force and effect in all places without the limits of the East India Company's Charter, as if the same had been duly signed in the usual way, after such bankrupt had duly surrendered and passed his last examination; and it was also by the said act amongst other things provided and enacted, that whenever it shall be made to appear to the satisfaction of any Court for the Relief of insolvent debtors, upon the application of any insolvent, his assignee, or of his or assignee, or her creditors, that the estate of such insolvent debtor, which shall have come to the hands of the assignee or assignees, shall have produced sufficient to pay and discharge three-fourths of the amount of the debts which shall have been established in such Court, or that creditors to the amount of more than one-half in number and value of the debts which shall have been so established, shall signify their consent in writing thereto, it shall be lawful for such Court to inquire into the conduct of the said insolvent; and if it shall appear to such Court that the said insolvent has acted fairly and honestly towards his or her creditors, such Court shall be fully authorized and empowered thereupon to order, that the said insolvent shall be so ever discharged from all liability whatsoever for or in respect of such debts so established as aforesaid, and such Court shall, in the order to be drawn up, specify and set forth the names of such creditors; and after any such order shall have been so made, no further proceedings shall be had in the matter or the petition before the Court, unless upon appeal made to the Supreme Court of Judicature of the presidency where such Court for the relief of insolvent debtors shall be holden as thereby authorized; and it was by the said recited act also provided, that no such order as last aforesaid, shall prevent any creditor, who shall not have been resident within the limits of the charter of the said United Company, at any time between the filing of such petition and the making of such order as last mentioned, and who shall not have taken part in any of the proceedings under the said petition, from the bringing any suit or action in the East Indies, for the purpose of obtaining execution against the goods, estate, or effects of such insolvent, for any unsatisfied claims of such creditor, nor from bringing any suit or action for such claim in any Court of the United Kingdom of Great Britain and Ireland, or elsewhere, without the limits of the said United Company's Charter, against such insolvent, in the same manner and with the like consequences and effects as if such order as last mentioned had not been made; and, whereas, it is expedient to extend and add to the provisions of the said acts, so as to give to insolvent debtors, being traders, who shall have acted fairly and honestly towards their creditors, an additional and more complete discharge, and also to render more effectual the means of obtaining such discharge, and at the same time to preserve to such insolvent debtors such relief as is already afforded by the said recited acts; and, whereas, under the provisions of the acts passed in the first and second years of his present Majesty, King William the Fourth, intituled an act to establish a Court in Bankruptcy, a Statute is issued in bankruptcy, in lieu of a commission of bankruptcy; in every case where the Lord Chancellor, by virtue of any former act, had therefore power to issue a commission of bankruptcy; be it therefore enacted, by the

Any insolvent within the meaning of the act of 9 G. 4 may petition the court for his discharge after three months.

b G 4, c 10.

b G 4, c 73

But on the order for discharge being proved to the Commissioner. And on his signing the bankrupt's certificate, such certificate is to be a general discharge from all debts.

III. Provided, nevertheless, and be it further enacted, that if such last mentioned case, upon any application made to the Commissioner acting in such fiat as aforesaid, to sign the certificate of such insolvent, and after the same shall have been signed by the requisite number of creditors under the provisions of the said act, intituled an act to provide for the *Relief of Insolvent Debtors in the East Indies*, or any other act passed or hereafter to be passed respecting Insolvent Debtors in the East Indies, then if it shall be made to appear to such commissioner that such order for a discharge has been made by the court in the East Indies as aforesaid, and if such Commissioners shall sign such certificate, he shall also certify in writing upon such certificate that such insolvent has obtained such order for discharge in the East Indies, as aforesaid, and thereupon such certificate shall have the same force and effect, as well within as without the limits aforesaid, as a certificate duly obtained under the said act of the sixth year of the reign of his Majesty King George the Fourth, intituled an act to amend the laws relating to bankrupts, or in any other act passed or to be hereafter passed respecting bankrupts.

without exacting any fee, and such officer shall be hereby indemnified for so doing; and any such insolvent trader who shall be a bankrupt under the provisions of the said last mentioned act, and who shall be arrested within the limits of the Charter of the said Company, shall be so discharged and may so plead, and shall have otherwise such relief, within the said limits, as heretofore mentioned; and if he shall also obtain such certificate as heretofore provided, he may be at liberty to avail himself either of such certificate, or of such order of discharge as aforesaid, for the purposes of his discharge within the limits aforesaid.

If there be a bankruptcy, discharge may be granted to such trader.

If certificate obtained it may be pleaded in India.

V. And be it further enacted, that in case any fiat in bankruptcy (other than a fiat under the provisions of the said act, intituled an act to provide for the Relief of Insolvent Debtors in the East Indies, or in any other act relating to the Insolvent Debtors in the East Indies) be issued against any such insolvent trader within the period of eight calendar months from the time of such petition for relief being filed, or of such adjudication of insolvency being made, as the case may be, and such insolvent trader shall be duly adjudged a bankrupt under such fiat, then and in such case, such court as aforesaid, shall not be authorized and empowered to make any such order for discharge as aforesaid.

The honorable the president in council having considered the terms of sections 1. and 11. of the above act, and also of paragraph 3. of a dispatch from the honorable Court of Directors, is of opinion that the exemption ground by that act, from the provision of the Act 33d, George III, which prohibited the payment of any salary to servants of the honorable company after the date of their departure from the presidency to which they might be attached, may be granted to servants of either presidency, the Members of Government excepted, who may have quitted or who may quit the same, in consequence of sickness under the rules established by the Governor-General in Council, with the sanction of the Hon'ble Court, or who may proceed to another presidency not more distant than their own, for the purpose of embarking for Europe. But no new rules on the subject can be established hereafter, to take effect before their approval by the Honorable Court.

The president in council deeming it necessary, therefore, to declare the rules that have been passed under such sanction and are still in force, and the modifications made therein by the application to them of the act in question, direct the following rules to be published together with the Act I. Victoria, cap. 47, for general information.

CIVIL SERVANTS.

1. Civil Servants proceeding to the Cape of Good Hope, Mauritius or the Island of St. Helena, or to any place within the limits of the East India Company's charter, with leave granted by the Governments to which they are respectively attached, under medical certificates, countersigned by a Member of the Medical Board at the presidency, shall, from the date of the pilot leaving the vessel in which they embark to that of their return, provided the period of absence do not exceed two years, draw the allowances of their respective offices, subject to the following deductions.

If the salary exceeds 2,000 rupees per mensem, one-sixth for one year, and for the second year one-fourth.

If the salary do not exceed 2,400 rupees per mensem, one-eighth for first year, and one-sixth for the second year.

If the salary of office be not more than 500 rupees per mensem, no deduction shall be made for the first year; and if it be only so much more, that the prescribed deduction at the rate one-eighth would reduce the allowance drawn to less than 500 rupees per mensem, only so much shall be deducted as will reduce the salary drawn to 500 rupees per mensem. After the first year, a deduction of one-eighth shall be made from the salary of the officers referred to in this rule.

2. After the close of the second year, when the salary of office ceases, civil servants who may obtain an extension of leave, will draw the subsistence allowance of their rank only, but no such servant, absent on leave, on account of sickness, shall draw a less allowance as a civil servant out of employ, than that of a junior merchant, viz. 8a. Rs. 224 per mensem.

3. The maximum period of which any civil servant shall be allowed to draw the salary of office, or any part thereof, is five years from the date of embarkation, and the offices of servants who may not return within that period, will be vacant and liable to be filled by fresh appointment. Civil servants who may so overstay the period of two years, provided they obtain an extension of leave, and account to the satisfactions of the Government to which they are attached, for the delay of their return, shall, as above provided, receive the subsistence allowance of a servant of their rank, subject to the exception above-specified in favor of junior servants; but if they continue absent in disobedience of an order to return, or without sufficient cause shown, that allowance also will be forfeited.

4. Civil Servants absent on leave, on account of sickness duly certified, if they proceed to England without returning to their presidency, may, as heretofore, apply to be admitted to furlough by the Honorable the Court of Directors, and the furlough will, in such cases, take effect from the date of leaving their presidency, consequently the allowances of office that may have been drawn by themselves or their agents, after their departure, must, in that case, be re-adjusted, and the difference refunded.

5. Civil Servants desiring to avail themselves of the benefit of the act above referred to, and to draw their allowances while absent on account of sickness under the above rules, will be required to give security in such amount as may be required by the Government for the re-fund of any excess that may be drawn, either by agents at the presidency or by themselves, in case of their proceeding to Europe on Furlough, or otherwise coming under retrenchment.

6. No second leave will be granted to any Civil Servant who has been absent beyond sea for two years, until three years after the date of return from sea; but if a Civil Servant is compelled by sickness to proceed to sea again within this period, after having been absent less than two years, he will be allowed to complete that period, drawing the proportion of salary allowed for the remaining time, as if the leave had been continuous.

MILITARY OFFICERS HOLDING CIVIL SITUATIONS.

7. Military officers employed in the civil department and drawing a civil allowance, are entitled, in common with officers holding staff situations in the military department, to draw the military pay and allowances of their rank while absent at sea, on

leave under medical certificate, and likewise one-half of the difference between such allowances and the civil or staff pay of the offices to which they stand appointed.

8. The above allowances are to be drawn for a total period not exceeding two years from the date when the vessel in which such officers embark may leave the presidency or other port of departure; and the civil situation held by any officer who shall not return within that period, shall be considered vacant.

9. The rules for furnishing medical certificates and for regulating the forms and manner of drawing military allowances during absence on leave, have been laid down in General Orders in the Military Department.

10. The Civil Auditor will pass the bills of officers on leave beyond sea, under medical certificate, for the portion of their civil salary which they are permitted to draw by those rules, in like manner, as is provided for Civil Servants proceeding to sea on medical certificate. But it is hereby provided, that civil allowances shall not be drawn by a military officer under this rule, after the date of departure beyond sea, unless security shall have been previously given in such amount as may be fixed by Government.

ECCLIESIASTICAL DEPARTMENT.

11. Chaplain proceeding to any place beyond sea for the benefit of their health, under the rules prescribed for officers of the Ecclesiastical department, shall, in respect to the proportion of allowances to be drawn during the period of absence, as also in respect to the conditions and period for which such allowances are to be drawn, and likewise in respect to the allowances to be drawn in case of their not returning within two years, be subject to the same precise rules as Civil Servants proceeding to any place beyond sea on sick leave.

PILOTS.

12. The following rules have been established for members of the Pilot Service, under the sanction of the Honorable Court of Directors:—

3. Members of the pilot service, whose state of health may require a voyage to sea or who may on that account desire to leave the presidency, shall submit application for the same through the Master Attendant to the Marine Board, forwarding with the application a certificate from the Marine Surgeon, or Assistant Surgeon, the Marine Board may grant leave for any period not exceeding three months, and the party availing himself of it, may draw, while absent on such leave, his entire pay and allowances without deduction. ANNO TERTIO & QUARTO.
VICTORIÆ REGINÆ, CAP. LXI,

An Act further to regulate the trade of Ships built and trading within the limits of the East India Company's Charter.

[7th August, 1840.]

W^{hereas} by an act passed in the fifty-fifth year of the reign of his late majesty King George the Third, intituled an act, to make further regulations for the registry of ships built in India, it was enacted, that nothing in that or in the therein-registered act or in any other act contained should subject any ship or vessel built or to be built within the limits of the charter of the East India Company, which should not be of the burden of three hundred and fifty tons, or any ship or vessel built within the limits of the charter of the said company, than the property

of any of His said Majesty's subjects within the limits aforesaid, and employed in trade as therefore solely within the said limits including the *Cape of Good Hope*, or any ship or vessel which then was, or at any time before the first day of *January* in the year one thousand eight hundred and sixteen should be building within the limits aforesaid, on account of any of His said Majesty's subjects within the said limits, and should be employed in trade solely within the said limits, including the *Cape of Good Hope*, to any penalty, forfeiture, disability, or impediment, by reason of such ship or vessel not being registered, and not being *British* built, or to affect the property or any transfer of property in any such ship or vessel as aforesaid which should not be registered; and whereas by an act passed in the fourth year of his late majesty king *George* the Fourth, intitled an act for the registering of vessels, and by another act passed in the same session, intitled an act to consolidate and amend the several laws now in force with respect to trade from and to places within the limits of the charter of the *East India* company, and to make further provisions with respect to such trade; and to amend an act of the present session of parliament, for the registry of vessels, so far as it relates to vessels registered in India, the said recited act of the fifty-fifth year of king *George* the Third was repealed; and whereas by an act passed in the session held in the third and fourth years of the reign of king *William* the Fourth, intitled an act to regulate the trade of the *British* possessions abroad, it was among other things enacted, that all ships built at any place within the limits of the *East India* company's charter prior to the first of *January* one thousand eight hundred and sixteen, and which then were and had continued ever since to be solely the property of his majesty's subjects, should be deemed to be *British* ships for all the purposes of trade within the said limit, including the *Cape of Good Hope*; and where as, under and by virtue of an act passed in the same session, intitled an act for the registering of *British* vessels, ships or vessels built in any ports in the territories under the government of the said company, being owned by *British* subjects, and being registered in manner therein provided for, are entitled to all the privileges and advantages of a *British* registered ship; but it is expedient further to regulate the trade of ships built and trading within the limits of the *East India* company's charter, including the *Cape of Good Hope* and the territories and dependencies thereof, and in the meantime to restore to the ships or vessels so described as aforesaid in the said recited act of the fifty-fifth year of king *George* the Third the enjoyment of the privileges to which they were thereby entitled; and it is fit that indemnity should be afforded in respect of the consequences of the repeal of such privileges by the said acts of the fourth year of king *George* the Fourth, or either of them: be it therefore enacted by the queen's most excellent majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, that in the meantime and until such declaration by proclamation shall be made by the governor general in council as herein-after is authorized, as well all ships mentioned in the said enactment contained in the said first recited act of king *William* the Fourth, as also all other ships or vessels as aforesaid described in the said act of the fifty-fifth year of the reign of king *George* the Third, shall have and enjoy the same privileges as were thereby given to such ships or vessels.

And Proclamation, all vessels to be entitled to privileges given by 56 G. 3. c. 118.

6 G. 4 41
4. C. 1.

II. And be it enacted, that for all purposes of indemnity and discharge from all actions, suits, prosecutions, penalties, forfeitures, disabilities, or impediments, and for all purposes of confirming and giving validity to all sales, assignments, mortgages, contracts, engagements, bonds, policies of assurance, gifts, bequests, rights, titles, interests, matters, and things whatsoever, which but for the said recited repeal of the said privileges would have been valid and effectual in law, and for all other beneficial purposes whatever, this act shall have the same force and effect as if the said act of the fifty-fifth year of the reign of king George the Third had never been repealed.

III. And be it enacted, that it shall be lawful for the governor general of India in council, by proclamation to declare that all ships or vessels built or to be built within the limits of the charter of the *East India* company, being owned by her majesty's subjects for whom the said governor general in council has power to legislate, and belonging, under the regulations herein-after provided for, to any ports in the territories under the government of the said company, shall be deemed to be *British* ships for all the purposes of trade within the said limits, including the *Cape of Good Hope* and the territories and dependencies thereof; provided that upon such declaration being made the said governor general in council shall, and the said governor general in council is hereby accordingly empowered to make regulations, to be enforced by suitable penalties, concerning the register, tonnage, licensing, and ascertaining the measurement of the tonnage and burden, and generally for the trading within the limits aforesaid of such ships or vessels, any thing in any act to the contrary notwithstanding; which regulations shall be of equal force and effect with any laws and regulations which the said governor general in council is authorized to make, but shall be subject to disallowance and repeal, and shall in the same manner be transmitted to *England*, and be laid before both houses of Parliament, as in the case of any other laws or regulations which the said governor general in council is now by law empowered to make.

IV. And whereas it may be expedient to admit to similar privileges and advantages any ships or vessels belonging to native princes or states in subordinate alliance with or having subsidiary treaties with the *East India* company, or owned by subjects of any such princes or states; be it therefore enacted, that the governor general of India in council may by such regulations as aforesaid, such regulations being subject as aforesaid, admit to the privileges and advantages of *British* ships, for the purposes of trade within the limits of the charter of the said company, including the *Cape of Good Hope* and the territories and dependencies thereof, or to any of such privileges and advantages, any ships or vessels belonging to such princes or states or any of them, or owned by subjects of any such princes or states; but any such regulations shall provide for the granting to such ships or vessels fit and convenient licences or passes, and generally for the trading within the limits aforesaid of such ships or vessels.

V. And whereas vessels exceeding the burden of three hundred and fifty tons, built in ports within the limits of the *East India* company's charter since the first day of January one thousand eight hundred and sixteen, and owned by *British* subjects, and vessels built in ports within the limits aforesaid, owned by native princes or states in subordinate alliance with or having subsidiary treaties with the *East India* company, or by the sub-

jects of such princes or states, may have heretofore engaged and may be now engaged in trade within such limits, under some licence, authority, or sanction of the respective governments of the several Presidencies in India; and it is expedient that full legal validity and effect should be given to all acts of the said government respectively in reference to any trading; be it therefore enacted, that all acts and documents whatever, done, given, or issued by any of the said governments in reference to the trading of the two classes of vessels last herein-before mentioned, shall be deemed and construed to have had for all purposes full legal validity and effect from the respective times when such acts and documents may have been done, given, or issued respectively, and shall for all purposes continue to have such validity and effect until the governor general of India in council shall make other provisions in respect of the trading of such classes of vessels respectively under the authority of this act.

RECKONING OF TIME PASSED IN COLLEGE.

The East India Company having established a college in England, for the appropriate education of young men designed for their civil service in India, it will therefore be expedient that, under certain circumstances, the time spent by such young men in the said college after they shall have attained the age of 17 years, entitles them to the same privileges as they would have been entitled to, if they had been resident such time in India, and it has been enacted that all time not exceeding two years, as shall be *bona fide* spent in the college, in the regular course of such education, by any person, after they shall respectively have attained the age of 17 years, provided they shall *bona fide* spend, either before or after 17 years of age, two years at least, in the said college regular course of such education, and shall afterwards go to India, in the civil service of the said company, shall be accounted as to the offices, places, and appointments, which such persons are entitled to be appointed to, and to hold, as so much time actually spent in India.

Extract from a Public General Letter from the Hon. the Court of Directors, dated the 12th June, 1816.

Para. 21. We perceive by the abstract of the Act of the 53d of the present majesty, chap. 135, annexed to your list of civil servants, dated 31st May, 1814, that according to your construction of that act, a civil servant may now, upon his arrival in India, receive £500 a year, but this is most assuredly a mistake, the act above mentioned has shortened the period two years, which it was required previously to the passing of that act, for a servant to have resided in India to enable him to receive more than 1,500, 3,000 or 4,000 pounds a year; but it has not shortened the period which it was required previously thereto, for a servant to have resided as above-mentioned, to enable him to receive more than £500 a year; consequently that remains the same as it was before the act of the 53d was passed, namely three years. Allowing, with respect to the servants educated at Hertford college, the time not exceeding two years, passed in that institution after they were seventeen, to be considered as time passed in India, and this will be your guide in future.

And whereas, by virtue of an act passed in the forty-seventh year of the reign of his said late Majesty, all such time as shall be *bona fide* spent in the college established in England by the East India Company, for the education of their civil servants by any person after they shall respectively have attained the age of seventeen years, be accounted as to certain offices, places and employments, which such persons are entitled to hold in India, as so much time actually spent in India, provided that such persons shall, either before or after seventeen years of age, spend two years at least in the said college; and whereas it is expedient, that the privilege so granted, should, under certain circumstances, be extended to young men, who may have spent less time than two years in regular course of education at the said college; be it therefore enacted, that all such time not exceeding two years, as shall have been or will be *bona fide* spent in the said college in the regular course of such education as aforesaid, by any person after they shall respectively have attained the age of seventeen years, who shall have proceeded or shall hereafter proceed to India in the civil service of the said company, shall be accounted as to all offices, places and employments to which such persons are entitled to be appointed, and to hold the salary, perquisites and emoluments whereof shall not exceed the sum of one thousand five hundred pounds.

In adjusting the original rank of the writers of 1806-9, and subsequent years, I have made it to commence from the 30th April, of the years they severally stand appointed to, finding it very difficult to adjust it, according to the old established rule, or form, the date of the arrival to this country of the first officers of each nation, several gentlemen of one or more having of late years arrived at this presidency before any of the writers nominated to a preceding

season, which according to the old rule, would make the arrival of a writer of a subsequent season establish the original rank of all the writers of a preceding season. These difficulties will be obviated by the present arrangement, without creating any inconvenience.

PURCHASE OR SALE OF APPOINTMENTS FORBIDDEN.

Any person who shall be nominated to a situation in the service of the East India company, and who shall have obtained such nomination in consequence of purchase or any corrupt practice whatever, either direct or indirect, by himself or by any other person, with or without his privity, shall be rejected from the service of the company, and ordered back to England, if he shall have proceeded to India before a discovery of such corrupt practice be made; and if such situation shall have been so corruptly procured by himself, or with his privity, he shall be rendered incapable of holding that or any other situation whatever in the company's service, provided always, that if a fair disclosure of any corrupt transaction or practice of the nature before described, wherein any director has been concerned, shall be voluntarily made by the party or parties engaged in the same with such director, the appointment hereby procured shall be confirmed by the Court.

VACANCIES HOW TO BE FILLED UP.

A strict adherence to the prohibitions contained in an act made in the thirty-third year of the late reign, in respect to the filling up and supplying vacancies in the civil service of the E. I. company, has been found impracticable, without detriment to the public service, or injury to the just claims and Meritorious exertions of individuals, and a modification of the said Act having been in part adopted in the Act of the forty-seventh of the same reign, relative to the Scholar's education at *Hertford College*; it has been enacted that any office, place or employment, the salary and perquisites whereof shall exceed the sum of fifteen hundred pounds, may be granted to and conferred upon any civil servant who shall have been actually resident in India in the company's service, for the space of four years antecedent to such vacancies; and if the salary, perquisites, and emoluments, shall exceed the sum of three thousand pounds per annum, such office may be conferred upon any of the said servants who have been actually resident in India seven years, at least, in the whole; and if the salary perquisites, and emoluments of any office, place or employment, shall exceed four thousand pounds per annum such office, including that of the Council, may be granted to or conferred upon any of the said servants, who shall have been actually resident in India in the company's service, for the space of ten years, at least, in the whole.

LIMITATION OF SALARIES, &c. OF CIVIL SERVANTS.

(4) An officer of the N. W. P. Government arrived at Calcutta from England, and before he could quit for his own province division of the Presidency, was obliged by illness to return to Europe under Medical Certificate. He requested leave of absence from the Government at Calcutta till the sailing of the ship in which he was about to embark, in sending him to defer the salary that might become due to him in that point. It was informed in reply that unless circumstances were shown for authorizing the salary of the Government of his own division of the Presidency were shown for authorizing the salary of the Government of his own division of the Presidency, his request could not be complied with. He explained that his illness was such as to require him to take command of the ship in which he had taken his passage, and advised that he could receive an answer to any application he might make to the N. W. P. On this his leave was granted in anticipation of the sanction of the local Government.

CHAPTER II.

RULES FOR SICK LEAVE.

Sec. V. When an application for leave of absence is made on the ground of ill health it must be accompanied by a certificate, from the Medical Officer by whom the applicant has been attended, distinctly stating from the personal observation the nature of the Disease, the symptoms by which it is manifested, the period during which it has existed, as far as the knowledge of the Medical Officer extends and the necessity for temporary removal to some other place, either within the Territories subject to the Government of the East India Company or beyond them, but within the limits laid down in Sec. 4th, as the case may be, and such certificate must be submitted to the consideration of Medical Board, and if satisfactory shall be countersigned by one of its members. An application for an extension of leave must, if the applicant be in India, be accompanied by a certificate from the Medical Officer by whom the applicant is attended, shewing sufficient reason for the extension solicited, and such certificate, like the former, must be examined and countersigned by a member of the Medical Board. (6) If the applicant shall have proceeded beyond the territories under the government of the East India company, he must furnish a certificate to the required effect from a surgeon or physician at the place of his temporary residence, by whom he has been attended, such attendance and the period of it to be stated, and the certificate to be countersigned by the principal medical authority of the colony or country. When any of the required particulars are neglected leave will be refused (7)

TRANSGRESSING INDIAN LIMITS.

(1) An officer of the Civil Service at Madras obtained leave for six months to visit Egypt on private affairs, with permission to embark at Bombay. The home authorities observe (1) from the Morning Gazette that he sailed thence for Suez on the 1st November, and from the newspapers that he was at *Moritz* in the month of January.

The home authorities rule (2) that although it might not have been the officer's intention to go to *Moritz* when he applied for leave of absence, it was prescribed by law (V Sec 37-33 Gen. III, C. 42 and 4 and 1 M. P. C. 35 Sec 7 and 1 Vic. Cap 47) that such a step as that here referred to involved the forfeiture of salary and allowances from the date of the officer's quitting his own presidency, and that accordingly the penalty detailed must be inflicted in his and in all similar cases. It was, and will be, indicated accordingly.

EXPLANATION OF SEC. V.

(3) In explanation of Sect. V of the Rules, respecting absence from Civil Appointment on account of ill health, published under d. to the 30th of January last and in modification of the said Section—the Quartermaster General in Council is pleased to resolve that in cases of extreme emergency, which, owing to the distance of the residence of the Medical Board, preclude the previous reference to that authority, the Certificate of the M. O. at Applicant required from Applicants for leave of absence on account of ill health, shall be submitted by them for the consideration and countersignature of the Superintendent Surgeon of the Division, or of the nearest Division, which Officer in these cases will be responsible for the prescribed regularity of the Certificate, instead of the Medical Board.

MEDICAL CERTIFICATE—HOW TO BE SIGNED.

(7) All Medical certificates granted to Civil officers employed in the provinces, under which they propose to proceed to the hills without visiting the Presidency (in which instance the necessity of the case will be certified by a member of the Medical Board), must be countersigned by the Superintending Surgeon of the Division. It will rest with the Government to submit of exception to the strict observance of this rule in cases of great emergency, or when attendance upon the Superintending Surgeon would be hazardous and extremely inconvenient to an officer in a very delicate or precarious state of health.

second. But if the salary of office be not more than Rs. 500 per mensem no deduction shall be made for the first year, and if it be only so much more than the prescribed deduction of one-eighth would reduce the allowance below Rs. 500 per mensem, only the excess beyond rupees 500 shall be deducted. For the second year the absentee shall become liable to the deduction of one-eighth and absent servant shall in no case retain any office or employment, nor be permitted to draw any portion of official salary for a longer period than (8) two years, but a civil servant who may on account of sickness duly certified, obtain an extension of leave beyond two years will if below the rank of a senior merchant, be allowed to draw the subsistence allowance of a junior merchant, and if a senior merchant, the subsistence allowance of his rank; but if he continue absent in disobedience of an order to return or without sufficient cause shown, that allowance also will be forfeited, the period of a absence shall be computed from the date at which the absentee shall quit the limits of the territories subject to the presidency to which he may belong, to the date of his return within such limits, or if he shall proceed beyond sea from the date of his embarking at any place or port in India which is not more distant from his station than the ports of his own presidency; but if the place to which he shall proceed shall be within the territories subject to such presidency his period of absence shall be computed from the date of his quitting his station to the date of his return thereto. NOTE.—This rule applies to all descriptions of leave on account of health excepting those granted under Section XII.

Thus a second leave within the Presidency not less than a se-

COND. VIII. No second leave will be granted to any civil or military servant (10) holding a civil appointment who has been absent under the above rules for two years, until three years at the least shall have passed after the date of such servant's

EXCESS OF LEAVE.

(8) Mr A. B. a Civil servant, in 1835 took fifteen months leave to the Cape. In 1836 he again applied for nine months leave, i.e. the balance of the two years. This was granted. In 1837 after an absence of 2 months and 10 days he reported his return, and embarked at the same time that the transgression was wholly inadmissible on his part, because at no vessel left the Cape for Calcutta during several weeks before he took his passage by the "Helen" the first vessel which arrived on our station. Fully aware he took his passage by the "Helen" several days before the expiry of his leave, a period (he argued) within which it was quite reasonable to expect that he would reach Calcutta. Fully aware too, that he was not absolutely obliged to except that he would reach Calcutta. Fully aware too, that he was not absolutely obliged both at the Cape and at sea in a manner not to be expected or controlled, and if he had taken his passage in vessels that sailed subsequently and reached Calcutta before the "Helen" he would have succeeded in his leave. The Government in the General Board, in consideration of the circumstances that had delayed him and by which his leave had been exceeded, with reference also to the fact that his appointment had not been lost, he was liable to be under the rules) filed up on the expiry of the nine months, determined to transfer the representation in question to the officer's own Department, (the Revenue) in order that the expediency of retaining him to office from the date of his return might be submitted in that Department. The Revenue Department did submit him to office but with a forfeiture of salary for the 10 days by which he exceeded his leave.

(9) Mr A. B. in the latter end of 1836, received one year's leave of absence to visit the hills on medical certificate and remaining at Simla till near the expiry of leave, when health being in no way restored, Mr A. B. was ordered by medical officers to visit the Cape of Good Hope. He furnished the necessary certificate and received permission to proceed to sea for two years, and embarked on the 10th January, 1837, which left the Good Hope on the 27th January, 1838.

The leave was to commence from the date on which the ship should have the ship at sea, and Mr A. B. supposed that consequently the cutting of a sixth from the first year and of a fourth from the second year's pay, was to commence from that date also.

The Civil Auditor, however, on the ground that the two years' leave then obtained, did not commence on that date but was merely a continuation of old Hill leave, cut one fourth for the first year instead of sixth, thereby causing a loss of the difference between one sixth and one fourth, Mr A. B. was informed that under all the circumstances of his case and referring to the extended period of three years leave which was granted to him by the Government of the N. W. Provinces, the Right Honble the Governor of Bengal did not feel that he could with propriety add to the indulgence received by allowing more to him his terms with respect to the deductions from salary than had been admitted by the Civil Auditor.

CIVIL MILITARY—HOW TO APPLY.

(10) Military officers employed on Civil Duties before applying through the Adjutant General's office for leave to proceed to Sea or on Furlough, are to apprise the Government under which they are civilly employed, of their intention of doing so—General. And the latter will

and time to sea will be computed as forming part of the period of two years if taken before three years have elapsed since return from the first leave and the deductions will be made upon computation of the accumulated period of absence under all such leaves taken without the intervention of three years of consecutive service.

Sec. IX. Military officers employed in the civil department and drawing a civil allowance may obtain leave under medical certificate on precisely the same conditions as civil servants, except as to allowances: such officers, in common with those holding staff situations in the military department, will draw the military pay and allowances of their rank while absent on leave under medical certificate, in the form and manner prescribed in general orders in the military department, and likewise one-half of the difference between such allowances and the civil pay of the offices to which they stand appointed.

Sec. X. Civil or military servants holding civil appointments who may desire to avail themselves of the benefit of the Act I. Vol. Cap. 47 and to draw their allowances (1) with a receipt on account of sickness under the above rules, will be required to give security in such amount and form as may be fixed by the government for the refund of any excess that may be drawn, either by the agents at the residence or by themselves in case of their proceeding to Europe on furlough or otherwise coming under retrenchment. (2)

Sec. XI. The government of each presidency may grant to civil or military servants holding civil appointments leave of absence for one month in each year without deduction from the salaries and emoluments drawn by such servant. Such leave however will only be granted when the government is satisfied that no inconvenience will arise from the departure of the officer seeking it. No second leave can be granted under this rule until the completion of eleven months from the expiration of the last leave, but servants not availing themselves of the indulgence in any one year may obtain, under the like conditions, leave of absence for two successive months to commence at or after the expiration of 23 months from the termination of their former leave, and if two years elapse without enjoyment of the privilege leave for three months may in like manner be granted at the expiration of 33 months from the termination of the last preceding leave. But no leave shall be granted under this rule for any period exceeding three months. If an officer shall not return at the expiration of the period of leave granted him under this rule, he shall, if absent on private affairs, be subjected to the deduction of one-third of his salary and allowances for the entire term of absence, and if he shall continue absent for more than one month beyond the term granted, his office shall become

PASSAGE MONEY.

(1) Messrs A. B. and C. having under this Act sought to draw passage money on behalf of a Civil employed officer that in the Case of Civil Servants on such certificate, were informed that they were mistaken in supposing any party to be payable to such officers, under such circumstances.

SECURITY. &c.

(2) The form of security should be after this wise:—We (or I, hereby guarantee that if we (or I, are (or am) persecuted by the Government to draw the salary or allowances due to (or the civil service (or in civil employ) as the case may be) during his authorized absence on leave, we (or I) will return, or make good the whole or any part of the sum drawn in excess or otherwise ruled by government, to be liable to be refunded by us (or me).

Mr A. B. a Civilian of the N. W. P. arrived at Calcutta about to embark thence to the Cape on such certificate—and giving as the security required by this Sec. X. that of a brother Civilian in the N. W. P. Prospected the Government of Bengal to make his salary payable under that security to the Secretary to the Agra Bank. He was in reply referred to his own Government for the payment of his salary, at its Head Quarters.

To enable the salaries of the Civil service of the N. W. P. being made payable in Calcutta to Agra, there it is necessary that the Government Secretariat at Calcutta be furnished with a certificate of the last payments made and due, from the office of account and Audit at Agra, through the applicant himself—This is important and often overlooked,

only so much of the salary and allowances of any Civil Office to which he may stand appointed as added to the Military pay and allowances which he may be entitled to draw shall equal one-half of the emoluments of such Civil Office. After an absence of three months exclusive of any period which may be granted under Sec. XII any Office held by the absentee shall become vacant. No second rule leave under this, can be granted until after expiration of five years from the termination of the former leave, and the Government is specially to report each case with all the attendant circumstances to the Court.

CHAPTER III.

RULES FOR LEAVE PREPARATORY TO EMBARKATION AND FOR JOINING STATION.

SEC. XIII. (10) For embarkation to Europe on furlough or with leave under medical certificate or preparatory to retirement from the service a civil or military servant holding a civil appointment may take leave under such of the preceding rules as may apply to his case. If any officer desirous of retiring or about to proceed to Europe on furlough, shall not under the previous rules be entitled to any leave of absence, special leave may be granted him for one month if the distance of his station from the presidency or the port at which he shall intend to embark shall not exceed 300 miles, for 2 months if the distance be more than 300 and less than 600 miles, or for three months if it shall exceed 600 miles, but such leave can only be granted under medical certificate—and the absentee, if a civil servant, shall be subjected to the deduction of one-third of his salary and allowance if not more than 2,000 rupees per month, and of one-half if they exceed that sum. At the expiration of such special leave it may be renewed for one month, on foot to the same deduction on satisfactory evidence being produced that the servant has been prevented leaving India, either by severity of illness or by the difficulty of procuring a passage; but no further leave can under any circumstances be granted. A military officer holding civil employment who may obtain special leave under this rule, shall draw only so much of the salary of his civil office as added to his military pay and allowance will equal one-half of his civil emoluments. If a civil or military servant holding civil office who may have obtained leave with the intention of embarking for Europe on furlough, or retiring from the service, shall subsequently abandon the intention and return to his station, his absence will be regulated under such of the rules in chapters II and III as may be applicable.

Note—This rule is only applicable to civil servants. Military Officers appointed to civil office will draw salary only from the date of joining as heretofore, the rule in force in respect to staff situations being applicable to them.

SEC. XIV. There shall be allowed to officer appointed to any New Office the periods of one month, two months, or three months for joining accordingly as the distance may not exceed 300 or 600 miles, or be in excess of the last mentioned distance. Officers not joining their stations within the said period respectively shall forfeit their salary for the time delayed in excess of the above periods, and if such excess shall exceed one month, the Office shall be vacated unless otherwise specially ordered by government.

SEC. XV. Upon the first appointment of any civil servant who shall be reported qualified for the public service by the examiners appointed by the government, to any civil station, there shall be allowed for travelling expenses to the station, an allowance at the rate of 8 annas per mile for the direct post road.

DRAWING OF PAY UNDER SECTION XIII.

(16) It being a source of inconvenience to public officers attached to the Civil Department who on the eve of embarking for Europe or on leave are desirous of receiving their allowances up to the latest period with a view to clear their accounts before their final departure from this presidency, the Civil Auditor may exercise a discretion in passing such allowances as may be quantumly payable to the amount of arrears so accumulated up to the latest period of their departure from this presidency, in lieu of any sum payable from the Treasury on their reaching at the Civil Auditor's office certificates of non payment at their proper station and in other respects on the Civil Auditor being satisfied that the permission of the Government has been previously obtained for leave to proceed to Europe, or to any other place. A deduction of a premium of one per cent. is made in complying with applications as above from officers of the Civil Department in the Lower Provinces.

The Rules so far held applicable to deceased officers, whenever their administrators or executors may be desirous of receiving an final payment of arrears of allowances due to them from the General Treasury, at the presidency.

according to the poly metrical tables of the post Office, the Bill for which allowance will be passed by the civil auditor after the officer shall have joined the station; if required in advance, an order of the government shall be necessary.

SUC. XVI. The salary of officer will be payable from the date only of the officer joining, but in the case of junior civil servants, the salary (17) of assistant will be payable from the date of their being reported qualified for the public service, unless forfeited under the preceding rule through delay in joining the station to which they may be appointed.

NOTE.—This rule also is only applicable to civil servants Military servants tracing as in the case of staff situations no civil salary from the date of leaving one Office till the date of joining the other.

SUC. XVII. In case of a change of office when an officer is appointed to a higher situation, he shall not draw the higher salary until he joins. For the period occupied in travelling, the rule No XIV. regulating the time and distance for joining station shall be applicable, and the officer will, for the periods allow'd in that rule respectively, draw out of the salary of the office he is about to join a sum equal to that of his previous situation.

CHAPTER IV.

RULES FOR DEPUTATION (18) ALLOWANCES.

SUC. XVIII. The sum of Company's Rupees 53,200 per annum, having been fixed under the Orders of the Court of Directors as the Maximum salary of Civil Office for the Offices of Government under the situation of Member of Council Civil and Military servants holding Office in the Political Department, who may draw larger allowances than this annual sum as a consolidated personal and sumptuary allowance in consideration of the necessary expenses of

SUC. XIX Deputation allowances shall be granted to civil servants temporarily performing the duties of an Office according to the following scales, and subject to the limitations and conditions hereinafter laid down.

NOTE—Military persons acting for other Military persons holding civil Office will, as in the case of staff, draw half the difference between the incumbent Military allowances, and the consolidated civil salary as at present, that is will draw the amount retrenched from the absence but when acting for a civil servant they will draw at the rates of this table and under the same rule as civil servants.

A civil servant acting (19) for another will have no claim to commission or fees, where any such sources of emolument exist. These will be regarded as forming part of the income of the officer to be relieved by the occupant subject to the prescribed deductions. The Grant of special allowances—of allowances to commissioners, and other officers for travelling expenses, and to Officers of Districts or Assistants or when employed on settlement or special Police Duties will be regulated by a supplemental set of Rules. (20)

Sec. XX. No civil servant temporarily officiating for another shall draw an amount larger than the entire emoluments of the Office in which he is officiating, and if the amount of the Deputation allowance according to the prescribed scale added to the permanent emoluments of the officiating servants, would exceed the emoluments of the office in which he is temporarily acting, the excess shall not be drawn. But this provision shall not apply to the case of any officer deputed for special reasons to act in an office of inferior emolument to his own. In cases where an officer holding two appointments on being deputed to officiate for another shall be relieved only from one, he shall receive no deputation allowance unless the emoluments of the office in which he is deputed to act exceed the united emoluments of his permanent appointment, and in that case the deputation allowance shall be limited to the difference.

Sec. XXI. No (21) subordinate officer acting for his principal or for any other person holding a superior appointment in the same office of Establishment at the same station, shall be entitled to any deputation allowance until after the expiration of 3 months, and then the allowance is not to be drawn in

APPLICATIONS FOR OFFICE.

(16) All applications for appointments substantive or acting should be made to the head of the Government through the Governor General's private Staff, and not through an Official Department, the cognisance of such subjects in the first instance appertaining to the private patronage of the authority indicated. In cases of emergency a superior Board or Commissioner or other superior may appoint a person to the temporary charge of an office without such application pending a knowledge of the pleasure of the Head of the Government.

SPECIAL CASES

(20) Doubt having arisen as the rate of deputation allowance to be granted to officers nominated to act in temporary charge of the current duties of the office of Civil and Session Judge the Hon'ble the Vice President in Council has pleased to declare that officers nominated so to act are entitled only to a moiety of the Established deputation allowance granted to persons officiating in charge of the entire duties of the office.

(21) An Assistant Secretary to Government in the Military Department was acting as Deputy whilst the Deputy was acting as principal in Calcutta during the absence of the Secretary at Simla. And during the absence subsequently of the Deputy at Simla the assistant acted as Secretary and Deputy at Calcutta and claimed two distinct deputation allowances. This was disallowed by the Civil Auditor, and it was ruled that the deputation allowance granted to an assistant to the Office of a Secretary for doing the duty of Deputy be considered to merge in the larger allowance allotted by Government to the same assistant when placed in charge of the Office of Secretary.

arrear. But a servant previously (22) out of employment, or who may be deputed to act from a different station, shall be entitled to deputation allowance from the date at which he may enter upon the discharge of the duties to which he has been temporarily appointed.

Sec. XXII. A civil servant out of employment, if deputed to act at a distance, and civil servants having permanent employment, who may be so deputed and who may be restricted by any provision in these rules to the allowance of their own office, shall be permitted to draw travelling allowances at the rate as allowed in the case of a first Appointment. When the entire sum received as deputation allowance may fall short of that which, according to the distance would be allowed for travelling expenses the deference may be drawn. In all cases of absence under medical certificate, and in cases of absence on private affairs, when the absent officer shall not be subject to deduction, such payments shall be made at the charge of the government.

Since the above was in press, the Hon'ble Court issued the following orders:

PUBLIC DEPARTMENT.

No 30 of 1840.

OUR GOVERNOR OF THE PRESIDENCY OF PORT WILLIAM IN BENGAL.

Para —I. We have to acquaint you that we have adopted the following regulations with respect to the grant of extensions of leave to members of the India civil establishments repatriating to this country under the absentee regulations or on special leave of absence, viz :

That civil servants coming to England under the absentee regulations or on special leave, shall immediately on their arrival, report themselves with their address, by letter to our secretary forwarding at the same time the certificates which they received in India.

That in all cases of leave, civil servants be required to join the establishment to which they belong at the expiration of the term, for which leave may have been granted, unless they shall have obtained an extension of it from us, six months before the expiration of the said leave.

That extension of leave will not in future be granted by us except in cases of sickness certified to our satisfaction or in cases in which it shall be proved that a further residence in Europe is indispensably necessary.

That when under any such circumstances a civil servant shall have obtained an extension of leave to a given period ; he must at the expiration thereof, apply for, and obtain, our permission either to return to his duty or to reside a further time in Europe, failing in which he shall be liable to be struck off the list of civil servants.

That the act of the 33d Geo. 3d. cap. 52. Sec. 71, as it respects civil servants applies only to cases of sickness, infirmity, or inevitable accident, and that no civil servant be hereafter considered eligible to return to the service after five years absence under that enactment who has failed to obtain from us a certificate to the foregoing regulations, an extension of leave under the circumstances referred to in the act.

We desire that the foregoing regulations be published for general information and that each civil servant returning to this country under the absentee regulations or on special leave be furnished with a copy of his guidance.

Wm^{ts} arr, &c.

London, 2d Sept. 1840.

(22) A Civil Servant of the N. W. Provinces, having returned from furlough on his arrival at Calcutta desired to the Government of Bengal by the General Department that he had applied to his own Government for employment there and desired to stipulate temporarily in any of the Civil or Criminal Courts at the Presidency pending the receipt of instructions from there. He was informed in reply that the rule of practice in the service was that Civil servants attached to the N. W. P. at the time of their departure for furlough should be re-attached to that same division of territory whence the Civil servant desired a chance and the head of the respective Government there to avail the further orders of the local Government ; and further that all applications for re-employment should be addressed to the private Secretaries of the Heads of Governments—and that the one Government under such circumstances as those under review would make the services of an officer belonging to the other Government without previous consultation and arrangement.

SUBSISTENCE ALLOWANCE.

Subsistence allowance to civil servants is granted with reference to the respective periods of their standing in the service; such as, 'senior merchant,' 'junior merchant,' 'factor or writer,' reckoned by the 12th, 9th, 6th, and 3rd years from the first dating of their actual residence. That allowance is granted to civil servants 'out of employ' or not holding a permanent office so long as they may not be suspended or dismissed from the service. It has only apparently been maintained by a bye-law of the hon'ble company but its rights appear to be held on nearly the same principle as the principal pay proper of military rank.

The rates of subsistence are as follow:

To senior Merchant....	£ 400 per Annum	=	Rs. 240 3 7	per men.
" Junior Ditto.....	£ 300 Ditto.	=	" 235 2 9	Ditto.
" Factor or Writer.....	£ 200 Ditto.	=	" 170 1 9	Ditto.

These Allowances have usually been denominated as the 'reduced subsistence to civil servants out of employ,' that term ('reduced') apparently bearing allusion to certain compensations, the company allowed at the earlier period of their commerce, as may be gleaned from the old records about the year 1780-91. They were then regulated at the same rate of exchange, as was assigned for the salary of the governor general, which exchange, had reference to the specific value in silver of the current rupee expressed in English money—Hence one current rupee was valued at one shilling, nine pence and parts of a farthing, and the sterling amount of all legalized income was converted at the same rate into the current and sicca rupers. Since the new coinage an addition of a rupee 8 annas per cent. is made on sicca value for the company's rupee.

Subsistence allowance is chargeable only so long as the officer may remain within India limits by express or implied permission of the governor of his own presidency, and without any official employment. It ceases whenever those limits are passed; nor is it regained or resumed until return to India in the actual service of the E. I. company.

TRAVELLING ALLOWANCES.*

By an order of government, general department, dated 2nd October 1828, travelling allowance was restricted to cases of joining a first appointment and the same rule was extended to chaplains, medical and other officers. That rule has exceptions however in special cases under authority from an order of government.

Junior officers having once drawn the allowance for a year station on the first trip, have been considered entitled to a further allowance on removal, when not at their own wish, but by express order of government, thence to a remote station. But if Mr. A. B. draws travelling allowance for Madnapore and not liking that station after reaching it requests to be sent on the Cuttack he will not receive any travelling allowance for the distance between Madnapore and Cuttack.

By a resolution dated 1st June 1830, the civil Auditor was directed to fix the rates of travelling allowances with reference to the rates in use at the post office. They were signified at 8 annas per mile with exception to the Delhi and Oude districts where the charge was 1 anna, and in the Junpore division one rupee.

These rates generally governed the grant of travelling allowance, and were calculated by a table of distances printed by the post master general which also gave the additional charges made for certain routes direct from Calcutta. The cross distances also were ascertained by special application to the same authority. Since the publication of captain Taylor's Tables, however the distance, exhibited therein, have been adopted.

The time for travelling from one to another station had also been regulated by allowing one day for every ten miles of such distances, and a week (or 7 days) over and above such computed time. A delay beyond which involved forfeiture of salary.

By the more recent rules of 20th January last, other periods are assigned of one, two and three months for 500, 600, &c. miles on exceeding which the loss of salary and by a month more that of office takes place.

By these rules 8 annas per mile by Taylor's geometrical distances is the general allowance made when due under their specific provisions. This advan-

leave has been extended to civil servants out of employ, when deputed to act at a distance, and they are allowed a charge at the same rate as that sanctioned in the case of a first appointment. The charge however is now to be made after the performance of the journey.

Covenanted officers and others employed in the interior of their own districts on settlement and post a duties draw a travelling allowance at the rate of Rs. 5 per diem from the commutation of commissioners of districts and the superintendent of the police, provided their other allowance do not exceed 25,000 Rs. per annum. *Rule V.*

Commissioners and officiating commissioners of Division and superintendent of Police—draw a specific allowance of 250 Rs. on the same account for the circuit of their own jurisdictions whilst they hold respective charge.

The superintendent of police draws 500 Rs. per month travelling allowance: (23)

NOTE— *Whereas the Salary and other allowances of an officer, amount in the aggregate in less than the rate of Rupees 25,000 a year, he shall receive Rupees 5 a day as travelling allowance, whilst actually employed on duty intents at a distance from his usual station, or so much within that allowance as shall make his total receipts amount to that rate.*

The Right Honorable the Governor of Bengal has been pleased to direct that the annexed rule, which was published in the Calcutta Gazette of the 25th April last, shall be held applicable also to Military Officers employed in civil duties in the non-regulations provinces or elsewhere.

FURLOUGHS AFTER TEN YEARS' SERVICE.

Are granted under Paras. 21-23-24-25-26, of the despatch of the Hon'ble Court, dated 8th December, 1824.

That after an actual residence in India, in the civil service, of the ten years or upwards, a covenanted civil servant of the company, upon either of the establishments of Bengal, Madras, or Bombay, (24) shall be entitled, whether on account of ill health, or from any other cause, and without reference to his private fortune to come once to Europe on leave for three years, and to receive for that period, from the company's cash, an allowance of £500 per annum, provided that in no case shall a greater number of servants come home under this regulation annually, than seventeen from Bengal, nine from Madras, and six from Bombay; nor shall a larger number of servants who may have come home under this regulation, be absent in the whole at one time, than fifty, out from Bengal, twenty-seven, from Madras, and eighteen from Bombay; and that the preference shall be given, first to servants producing medical certificates upon oath, that a visit to Europe is indispensably necessary for the restoration of health, and then to servants in their order of seniority according to the rank assigned to them by the court of directors in the graduation list of the service.

23. The servants coming, in the first instance to the Cape of Good Hope for the benefit of their health, and being compelled from the same cause to come from thence to Europe, without previously returning to India, shall be considered as entitled to the benefit of the foregoing regulations.

24. That in all cases, as well in those of servants coming in the first instance to the Cape, as well as of those coming direct from India, the said allowances be considered as commencing from the date of leaving India and terminating at the expiration of three years from that date, or at the time of arrival in India, whichever may first happen.

SPECIAL CASES.

(25) Sir W. Norrie, Recorder of Prince of Wales Island, proceeded to the place of his destination not from any part of the United Kingdom but from the Island of Ceylon. Though it was ruled that he could not claim any thing as a right under the Act 1820 (13 Cap 25, Sec 10, still in consideration of the arduous expense attending his removal, he was allowed the sum of £500 Rs for passage money.

(26) Mr A. B. a Chinese servant having withdrawn his acceptance of the retiring pension offered to Chinese servants, consequent on the new charter was admitted to a furlough of three years commencing on the 7th of January, 1835, (the date of his departure from China) with an Attentive Allowance of £150 per annum; but as he had previously enjoyed a furlough while on the Chinese Establishment, it was decided that he was not again to be allowed attentive furlough allowance in any case.

25. That the same be paid half-yearly in Europe, that on no account or plea whatsoever, the allowances in question be extended beyond the period of three years.

29. That any servant being in the receipt of absence allowance from a civil fund, shall not be entitled to receive during the same period of absence, the allowances prescribed by these regulations, beyond such amount as may bring the total of the annual receipts from both sources, to the sum hereby limited.

(25) FURLONGHS.

First. A furlough granted to a civil servant, (20) whether under a sick certificate or otherwise, in conformity with the rules of the honorable court's despatch, dated 8th November 1824, shall be considered to have lapsed on the occurrence of any of the following events.

1st. On the death of the party in the course of 3 years from the date of his leaving the Presidency.

2d. On the retirement from the service by acceptance of an annuity, granted under the rules of the Bengal annuity fund institution.

3rd. On return to India before the expiration of three years.

4th. On the expiration of three years from the date when the ship sailed in which the party proceeded to Europe.

Second. Civil servants will be entitled to proceed to Europe on furlough on sick certificate at any time of the year, provided there shall not be at the period of their applying for the certificate, fifty-one individuals in the enjoyment of the furlough.

Third. On the 1st November and on every succeeding 1st November, the number of furlough to be tendered to civil servants of ten year's standing and not claiming the indulgence on the ground of ill health, shall be calculated as follows;

Form of calculating available furloughs.	Complement of 51 furloughs as on the 1st November 1827.

RULE PRECLUDING RETURN TO DUTY AFTER ABSENCE OF FIVE YEARS

(26) No person, who shall have held any station whatever in India in the service of the East India Company, being under the rank of degree of a Member in Council, and who having departed from India by leave of the Governor General in Council shall not return to India, within the space of five years next after such departure, shall be entitled to any rank or restoration of office or be capable of again serving in India in the civil line of the Company's service, unless it shall be proved to the satisfaction of the Court of Directors that such absence was occasioned by sickness or infirmity, or unless such person be permitted to return with his rank to India by a vote or resolution passed by way of ballot, by three parts in four of the proprietors assembled in a General Court especially convened for that purpose, when eight days' previous notice of the time and purpose of such meeting shall be given in the London Gazette, 31, Geo III Cap 52 Sec 78.

FURLOUGH IN INDIA.

(27) On a reference as to whether a civil servant could draw his furlough allowance in India, and take his furlough without proceeding to Europe it was ruled that a civil servant could not take furlough and remain in India so as to save his residence; because firstly the Hon'ble Court of Directors granted the furlough indulgence for reasons which would not hold if the servants remained in India, secondly because an officer by taking furlough and remaining would deprive another of the privilege; and lastly, because a civil servant remaining in India out of employ has the special subsistence allowance of his rank and therefore cannot need the special separate allowance assigned to servants absent on furlough. The Hon'ble Court have however, allowed their servants to take their furlough at the Cape of Good Hope, when for special reasons they have desired to remain there instead of going on to England, and doubtless this precedent will apply to all places within the limits laid down in the present leave of absence Rules.

Fourth. If the applications received by Government before the 1st November, of any year, should not equal in number, the available furloughs calculated as above, the same may be taken by servants either on sick certificates or otherwise at any time of the year following, until the number shall be complete. When it may be so, further certificates on account of lapsing furloughs shall not be granted, except on the applications being accompanied by sick certificates; the lapses in the course of the year being reserved to meet the demands of the service according to the principle laid down by the Honorable Court of Directors that is with the due preference to cases of sickness and seniority.

Adverting (27) to the inconvenience likely to arise both to the Government and to the Members of the civil service, from the withdrawing of applications for furlough after they have been granted, the Governor General in Council has been pleased to determine, that, henceforward, any civil servant who shall withdraw his application for furlough after the same has been granted, shall be considered to have employed one year of the term allowed for that indulgence; unless the Government, on any case submitted to it, shall be satisfied that strong and sufficient reasons, which could not be foreseen when the application for furlough was made, have prevented its being carried into effect.

Individuals desirous of proceeding on furlough are hereby apprised, that applications for furlough only are in the first instance to be addressed to the Secretary to Government in the General Department; and then an affirmative answer having been received, the usual forms with regard to relief from the charge of office, and (28) certificates from the officers of account, which are

EXCEPTION TO RULE.

(27) This rule though always liable to be enforced, is not always enforced. But each case is decided on its own merits. Another case which may arise with regard to the rule under review is illustrated in the following correspondence.

To the Secretary of the Government General N. W. P. Simla. Sir, with reference to the 'Rule' for regulating the grant of furlough, copy of which was transmitted to me with your letter of the 11th October last No 262, I shall be much obliged if you will inform me as to the following point, viz. whether my application for furlough submitted last year was deemed to have effect with the expiration of the present season or otherwise, and in the latter case, whether I am at liberty still to withdraw it, without incurring the forfeiture specified in the rules for not compliance of furlough when granted.

Ans. Because in the event of my being considered an applicant for the ensuing season, but with the option of withdrawing my application without prejudice to me forthwith at a future time, I beg leave to withdraw my application for furlough accordingly, but I would not wish to do so at the eventual sacrifice of one year of the usual term.

Qd. My reason for soliciting the above favor at the present time is, that I have heard it said that my former application for furlough will be considered in favor for the ensuing season, and that I am not at liberty to withdraw the same, but with the loss of one year to my term of furlough hereafter. Such construction of the rules I had never heard of before, and I cannot help thinking it a mistaken one, but as the subject is of some importance to me, I trust I shall be excused in soliciting to be put right in regard to it.

I have, &c.

The answer was that there is a penalty fixed for requesting furloughs after one has been appointed, but not for withdrawing an application before the date (1st November) from the appropriation takes place, no other servant being injured or put to inconvenience by such a withdrawal, there can be no reason to enforce any penalty.

Mr A's name will accordingly be struck out of the list of persons whose applications are to be considered on the 1st Provision.

OFFICERS WHO HAVE SERVED IN AGRA AND BENGAL.

(28) In cases where officers have served both in the N. W. Provinces and in Bengal proper they must get certificates of no demands from the Accountant General, the Mysore Accountant at Calcutta, and from the Civil Auditor at Calcutta, also from the Assistant Accountant at Agra, and the Civil Auditor there. Where there are no outstanding business the applicant for furlough can immediately take his departure. When there are, he must either wait for their adjustment before, or tender security for their due adjustment after his departure. In one case an officer got certificates of no demands from all the offices of Agra and Bengal, except that of the Civil Auditor of the N. W. Provinces, in whose account there was an amount in his favor for a contingent bill amounting to about 20 Rupees, and which would be a satisfactory adjustment on the 15th of the month, on the 15th of which the Officer was about to sail. The Government under the circumstances of the case refrained from detaining him from proceeding to Europe by adhering to the usual practice of obliging a servant from his agents and gave the usual papers for his departure for furlough. In another case, on the breaking up of the Bengal Provincial Council, its accounts and records were sent by the Deputy in charge of the Provincial Court under orders direct from the Madras Government and Secretary to the Government. In this instance there were sundry accounts rendered against the Council for the use of the Council. For six or seven years by a commission of disbursements, these accounts remained in the hands of the Council. It was by the sanction that the disbursements in relation to the Council should be sent to the Secretary of the Council, and to the Secretary of the Madras Government, and to the Secretary of the Provincial Court, having been sent to the Secretary of the Provincial Court. The Government decided that the Judge should not be allowed to leave without an account of the accounts and the audit against himself as he was entrusted with a continuing from the directed orders of the Madras Government and Secretary to the Government by issuing the orders they did, to relieve him from the duty of adjustment, &c.

prescribed in the case of civil servants returning to Europe, are to be observed in the department in which the party is officially employed.

The rules above referred to having been fulfilled, application is to be made to the Secretary to the Government in the General Department for the certificate (50) (30) of permission to proceed on furlough prescribed in the first part of the 32nd paragraph of the printed despatch from the honorable the Court of Directors, dated the 8th of December 1821, and for the usual (31) license to be received on board the ship in which the applicant may intend to proceed, specifying the name of the ship and the time fixed for her departure from Bengal. Civil servants proceeding on certificate of ill health will also furnish themselves with the (32) certificate from the managers of the civil fund, required by the despatch above quoted, and will transmit a duplicate of such certificate to the secretary to the Government in the general department.

Civil servants intending to retire from the service or to leave the country upon furlough, shall give notice thereof to the accountant of the department to which they belong at least three months before the date on which they propose to leave the country in order to allow that officer to ascertain and bring to adjustment, as far as possible, any items of account standing to their debit in the public books.

It further appeared after special enquiries that of the sum of 5,000 Rs standing at the Judge's personal responsibility, 4,000 Rs were composed of items that were mere matters of account and only required to be entered into the books of the Accountant's office to be duly adjusted. The remaining 1,000 Rs. were composed of items, which could be easily credited to Government, and for this a limited guarantee of a respectable house holder to the amount was tendered to and accepted by Government, and the Judge, whose case we have had under review, was allowed to embark for Europe.

(50) PART OF PARAGRAPH 39, REFERRED TO.

We desire that in every case of a civil servant upon your Establishment being permitted to come to Europe under the Regulations now communicated to you, he be furnished with a certificate from the proper officer, specifying the grant of the permission, and whether granted upon sick certificate or for private affairs, also specifying as nearly as possible the date of embarkation for Europe.

PROCESS WITH FURLOUGH CERTIFICATE.

(39) The furlough certificate should be delivered to the Auditor of India accounts at the East India House.

On civil servants returning also from England after having taken furlough they are required to sign a security bond in two duplicates, and to obtain a certificate at the East India House, paying at the same time the sum of £3 for said certificate. Should a civil servant forget or fail to do the above before he quits England, the papers are sent out by the Home authorities to the Bengal Government, and the civil servant is desired to attend before some officer at, or near to, the station of the Civil Servant in question to execute the bond. It is then returned to the Court of Directors, with the names and addresses of the parties in England who may be nominated the sureties to the bond.

On a Civil Servant returning to India from furlough without having drawn the full £400 per annum for three years, he is entitled on production to the Civil Auditor of the East India House Certificate of what sums have been paid on account of furlough allowance, such arrears as that document may prove to be due.

ARRIVAL FROM FURLOUGH.

A Civil Servant returning overland may report his arrival at Bombay from thence to the General Department, which department will inform the use in which he has last served of the circumstances in order that arrangements may be regulated accordingly. But he will not be considered arrived within his own presidency or gazetted in any way until he shall have reached and reported himself from Poona, if coming by that route, from Sambalpur if coming by that, and from Bikaner or the first station he may reach of the Saur and Narbada Territories if coming that route.

Officers formerly attached and again about to belong to the N.W. Provinces should report themselves both to the Agra and Bengal Secretaries to Government in the General Department.

LICENSE AND REPORT OF DEPARTURE REQUIRED.

(21) The same license is required by civil employers from their own governments when about to embark from Bombay, to be received on board the ship or steamer within three days, in which they may intend to embark.

If these officers do not proceed from the port of Calcutta, they should report their departure from the last place within the limits of the Bengal and Agra Presidencies. Where they proceed from Calcutta, they must report from the Pilot's leaving the ship.

(22) Besides this certificate, the civil servant returning to Europe should receive, and bear in mind the contents of the following:

To

SUBSCRIBER, BENGOAL CIVIL FUND.

Sir,—Understanding that you are about to proceed to England and have the honor to call your particular attention to the rules noted in the margin.

If it is not your intention to resign the service upon leaving this country, you will observe that you are required to continue your contributions to the Fund out of any furlough allowance to which you may be entitled; and that in case of your being entitled to no such allowance, you must continue to contribute as if you were. If you are desirous that any family you may have at your death should have an interest in the civil fund.

These rules of the above regulations, it will be necessary for you to take care to have the monthly contributions due by you paid regularly in India. You may, in consequence of the rules from you during the three years for which furlough allowance is receivable.

MODIFIED FURLOUGH RESOLUTION* OF 1839.

The subjoined we quote at length for the information of those who may be desirous of calculating their chances of furloughs, by looking back for the lapses that may fall in 1841, and 1842, by expiries of 1831.

(33) Resolved on the 8th November, 1839, that the following rules be established for the grant of furloughs to members of the civil service in part or

or any part of that amount, if you prefer such an arrangement to making provision for monthly payments through an agent.

When furlough allowance is £250 per Annum, or

Rs Rs 5,000 or

The ordinary deduction therefrom is...

The extraordinary ditto of 24 per Cent is...

Contribution per Annum...

Ditto per member...

When furlough allowance is £250 per Annum is

Rs Rs 5,000 or

The ordinary deduction therefrom is...

The extraordinary ditto...

Contribution per Annum...

Ditto per member...

which you are required to make provision.

The money must be paid to the sub-treasurer, as treasurer of his fund; but you are requested, before sailing, inform me of the arrangement you may make.

If it is your intention to resign the service, on or before sailing, and if the sum of your subscriptions to this fund, with interest, does not amount to Rs. 25,000 you will observe that it will be necessary for you now to pay to the treasurer of the fund, the amount by which the sum of your subscriptions with interest, falls short of the sum of Rs. 25,000, if you wish that any family you may have at your death shall be entitled to benefit under the rules of the civil fund.

I have the honor to be,

Sir,

Your most Obedient Servant,

Honorary Secretary,

JUNIOR FURLOUGHS.

* The interpretation put upon the Resolution relating to the claim of servants who had been compelled by ill health to quit Europe before completing 10 years service in India, in a furlough, after they should have served that period, had been considered doubtful. It has lately been ruled by the Home Government that in the event of such parties preferring an application for leave of absence on private affairs after completing the prescribed term of service, it will be within the discretion of the local Government to comply therewith, always having reference however to the wants of the public service. But it is only in cases in which parties may be compelled by ill health after 10 years service to go to England a second time, that they are entitled to any pecuniary allowance for such second absence, and then only to the difference between £250 per annum for three years, and the amount drawn during their first absence.

LIMITATION OF PRIVATE AFFAIRS LEAVE.

(34) The Home authorities with reference to that part of this resolution which allowed of leave to go home on private affairs leave in anticipation, have ordered the strict observance of the principle laid down in the subjoined.

Extract Dispatch to Fort St. George in the Public Department, dated 26th April, 1838.

1. In your dispatch to this department dated the 4th September 1836, paras. 6 and 7 you have brought to our notice two cases in which you raised in regard to the regulations formed by us for granting absence allowance to Civil Servants when in Europe.

2. The spirit of these questions is.—Whether it is competent to a Civil Servant who may have completed a residence of 10 years to proceed to England and there await his turn to the consideration of the Honorable Court, having previously declined to Government his desire to avail him. If they liberality of the Honorable Court upon the first occasion on which it should be open to him?

3. The question we answer in the negative. In framing the Regulations it was our object that whilst each Servant might be enabled once in the course of his service to leave the benefit of the Absence Allowance the greater probability of returning to England with that view should be limited, so that which would be devoted to Civil Servants were allowed to come home and wait their turn in England.

Extract Dispatch to Fort St. George in the Public Department, dated 15th December 1839.

4. We allude to the determination communicated to you in our dispatch dated 15th April 1838, para. 5, that no servant shall hereafter receive the Absence Allowance who shall not have been submitted by the local Government to the benefit of the Regulations previously to leaving India, excepting only such Servants who may have been exempted by ill health to quit India on a temporary leave, within the limit of two consecutive years, or to the limit of Good Hope and may have been subsequently commuted by the same Government to Europe. In such cases where the Servant has obtained leave that he wishes to finish the benefit with all claims he is eligible wherever the number of Absences limited by the Regulations is complete.

dification of previous rules passed on the 6th October, 1825, and 18th September, 1828, and that the same be applied to the furloughs of the present year.

1. Civil servants desiring furlough must *Rules for grant of furloughs,* as heretofore submit their applications so as to reach the office of the secretary to government in the general department at Calcutta, on or before the 1st November of each year, when the furloughs then available to complete the number 51, will be appropriated to the senior applicants who have completed 10 years of actual residence, provided they have subscribed to the civil annuity fund and have not forfeited their claim by a previous absence as juniors so as to bring their case within the orders contained in the 22d para. of the letter of the hon'ble court of directors, dated 6th December 1824.

2. The applicants on the 1st November shall further have the benefit of the furloughs that may lapse by return or expiry to the 31st March next following, but during this period applicants under medical certificates will be entitled to preference, and such applicants may as heretofore take their furlough, if any furloughs are available, at any period of the year.

Applying the above rules to the applications now before the government, the following will be the order of admission to the benefit of furlough in the present season.

The applicants entitled to furlough on the 1st November, ranged in the order of seniority, are as follows:

1. W. A. Pringle, 2. R. H. Scott, 3. H. (34) Nisbet, 4. P. MacNaghtin, 5. W. R. Young, 6. G. Udny, 7. J. A. Durin, 8. Edward Dreles, 9. A. Reid, 10. W. H. Wendeuck, 11. (35) A. Fraser, 12. H. F. James, 13. G. H. Hattie, 14. W. J. H. Money, 15. R. F. Tyler, 16. W. R. Thine, 17. N. B. Edmonstone, 18. J. Muir, 19. B. J. Colvin, 20. P. C. Trench, 21. H. H. Hereford, 22. M. S. Gilmore, 23. J. Cumine, 24. W. P. Goud, and 25. W. M. Drom

Of these Messrs. W. A. Pringle and R. H. Scott are admitted from this date.

Mr. W. R. Young, Mr. W. J. Cumine, and Mr. P. Goud being applicants under medical certificate will be entitled to take the first furloughs that may lapse from this date.

Messrs. J. H. Crawford and G. W. Fagan whose periods of ten years' residence will be completed on the 7th of November of the present year, will also be entitled to avail themselves of any furloughs that may lapse after that date, their applications having been accompanied by medical certificates.

After furloughs shall have been allotted to the above applicants under medical certificate, and to any other similar applicants whose cases may be laid before the Governments of Bengal or of the N. W. Provinces in the interval between the 1st November, and the 31st March, the furloughs that may lapse

Extract Last Orders on Resolution of 1839.

6. With respect to the Gentlemen who have been permitted to come to this Country under a promise or with the expectation of being admitted in turn to the benefit of a Furlough Allowance we wish to under the special circumstances of their case object to their receiving that benefit during their present absence. If upon the occurrence of vacancies, they shall be admitted by you upon the application left by them on quitting India, and provided that they return to the Presidency within the period of 5 years to which absence is limited by law.

No permission is to be given to officers in future to go home and wait the chance of a prospective furlough.

(32) Mr. N. B. wrote to Government saying that he required to be reserved for him, under medical certificate the first furlough that might fall in (and that he should be at liberty to defer his departure from India until after the 15th of April 1840. He was informed in reply that the Government could not give effect to his application under medical certificate until the time when he should state it to be his desire to embark for England on furlough. But he was informed that, if in the interval between the date of his application and the 15th of April, a furlough came to him by right of seniority, it would of course be appropriated to and reserved for him.

(33) In the course of November 1839, this civil servant happened to be informed of an application for furlough that might be made before the 1st of November and 31st of March. On this Government determined to publish monthly, during the interval referred to, a disposition list, showing applicants for and grants of furlough, under the following heads, viz.:

By turn	To A & B on Medical Certificate.
By death	To C & D ditto
By expiry	
Will lapse on return or expiry, and available accordingly.		Applicants according to seniority under Medical Certificate, and general seniority in the order of their claims on, —

until the date last mentioned, shall be allotted as they fall in, to the above applicants in the order of the rank in the above list.

For their assurance as to the time when they may reasonably expect to obtain furlough, the following list of the dates when the furloughs will respectively expire, if the incumbents do not previously return, is published for general information.

1. H. R. Brownlow, .. 15th Dec. 1833	8. R. W. Maxwell .. 21st Jan. 1837.
2. A. Lang, .. 25th ditto	9. W. A. Alexander, 27th ditto
3. R. Neave, .. 25th ditto	10. S. C. Jackson, .. 3rd Feb. 1837.
4. C. Phillips, .. 19th Jan. 1837.	11. T. O. Vibart, ... 18th ditto
5. M. Caldwell, .. 18th ditto	12. H. Fraser, senior, 23d ditto
6. H. Pridcock, .. 18th ditto	13. H. Lushington, .. 28th March
7. J. P. Gubbins, ... 18th ditto	14. R. J. Loughnan, 28th ditto

The 36th president in council, considering that under the above rules a full allotment of furloughs will be made to the members of the Bengal civil service, and that the exigencies of the public service will not admit, without inconvenience, of a larger number of servants being absent than is provided for by the rules established, deems it expedient to require that leave to proceed to Europe, on account of private affairs, shall be sparingly granted to servants not entitled to the privilege of furlough, (37) and that applications for such leave be not complied with, except under special circumstances to be determined in the satisfaction of the heads of the respective governments of Bengal and the N. W. Provinces.

ASSAY MASTERS' FURLOUGH.

Whenever Assay Masters or deputy Assay Masters are compelled by ill-health duly certified to come to Europe they shall be permitted to receive the furlough allowance of Surgeon and assistant Surgeon respectively.

(36) Messrs. Money, Edmonstone, Cullen and Trench, memorialised the Court of Directors, praying that as the confident expectation under which they left India (having granted furloughs) in the summer 1831 had not been realised, and as there was a great probability of some of them being again disappointed in the ensuing season furloughs might be advanced to them in excess of the usual number for the season in which they left India, viz 1831-2, the same to be deducted from the authorized number of furloughs in the year or years in which a furlough might fall to any of the memorialists. By this arrangement the memorialists observed that the claims of other parties would not be interfered with, their own service would be available at a much earlier period than they otherwise could, as the proposed plan would have the effect of supplying their three years of furlough (two at the end of 1831, when they would return to their duty in Bengal, and not any additional leave) would be thrown upon India. To meet however the possible case of the furlough allowance being advanced to an individual who, when his time came, might not be alive to claim it, the memorialists suggested that to guard against such contingencies, a warrant might be required for the repayment of the amount received.

In consideration of the peculiar circumstances in which the memorialists were placed, the Court of Directors determined as a special case, to comply with their prayer, and to treat them as on furlough from the date of their quitting India. The Court offered the same boon to the other gentlemen who left India under similar circumstances, but it was made a condition with each of them that, if the granted amount of the indulgence, should return to India at the expiration of his three years absence.

This is not to be granted as a precedent; and the Court positively ruled that permission to gentlemen to return to Europe in anticipation of their procuring furloughs, should be never in future granted, it being their own determination not to permit any servant hereafter to receive the furlough allowance, who should not have been admitted by the local government to the benefit of the regulations previously to leaving India, excepting only such servants, as, having proceeded on account of ill health to some place within the limits of the Company's charter in the East, Cape of Good Hope, might be compelled by the same cause to go from thence to Europe.

QUERY.

(37) Suppose a Civilian who has returned from his regular furlough to Europe after 18 years' actual residence in India, is obliged to proceed on a medical certificate, either to the Cape of Hope within a few months after his return, in such a case is he to proceed merely upon the authorities of the allowance granted to Civilian, or is he entitled to the allowance of his appointment (should he have one) subject merely to the usual deductions? The query is first as to the regular furlough to Europe to be considered the same as sick leave? for, if so, a Civilian need serve 3 years before he can go on sick certificate, although a Military man may have leave as often as necessary.

A NEW CASE.

A Civilian who, after having stayed two years in India, and then three in England on furlough and then having returned to India, gets a subsequent appointment, and then wishes to go on sick certificate, may do so, and will draw the salary of such subsequent office, less the regulated deductions for leave: if he only holds an acting appointment he will lose his acting allowance, and only have the bare subsistence of his rank; and if he hold no appointment, and acting or acting he will also only have bare subsistence of his rank.

I wed to resume office in India or not, a point which the court reserve for their own sole decision.

FURLOUNDS PREVIOUS TO THE COMPLETION OF TEN YEARS SERVICE.

Are granted under the authority of Para. 32—of the court's despatch, of 8th December 1824, viz. In cases of civil servants compelled by illness, certified upon oath, to come to Europe previous to the completion of an actual residence in the civil service of ten years, such covenanted servants shall each be presented with the sum of 2,000 sicca Rupees as passage money, and shall be entitled, for a period not exceeding three years, to an allowance, from the company's cash, of £250 per annum, but servants having received this indulgence shall not, in the event of their again coming to Europe after having completed a residence of ten years or upwards, be entitled to any allowance under the first Regulation, except their return be again occasioned by illness, to be in like manner certified upon oath, and then only to the difference between what they have before drawn in the shape of passage money, and that of £500 per annum for three years (38).

SALARIES.

The following extract from a resolution by the hon'ble the president in council under date 20th March, 1830, communicated to the Bengal government is published for general information.

Extract from the proceedings of the hon'ble the president of the council of India in council in the financial department, dated the 20th March 1830.

RESOLUTION—Resolved, that the 16th November 1830, the date when the hon'ble court's despatch dated 4th May 1830, was laid before the council of India for orders be the date which is to regulate the claim of incumbents to retain the allowances held by them on that date.

2nd. Resolved, that the date of the receipt of the present despatch in its application to the officers of the Bengal division of the presidency be the date when the letter from the secretary to the right hon'ble the governor general forwarding the despatch from his lordship's camp was laid before the council, viz 26th February, 1829.

3rd. With reference to the above dates Mr C. Tucker extra temporary Judge of the sudler dewanny and ulzamat adawlut, under date 10th December 1830 (made permanent 1st September 1838,) and whose salary since the former date has been fixed at 45,000 moolah, from the 20th ultimo, be reduced to 42,000.

4th. In like manner the salary of Mr. Hawkins, register, which on the 16th January 1838 was fixed at 32,000 moolah, from the same date, be reduced to 30,000.

5th. Of the civil and sessions Judges, the officers drawing salaries in excess of 30,000 rupees, who will fall under the orders for reduction contained in this despatch, are—

Messrs. R. P. Nisbet,

A. Dick,

J. Templer,

W. Dent,

H. Oldfield,

(38) In cases of extreme mental imbecility a friend may submit the application in behalf of the invalid, may be permitted to receive the usual passage money, and sign the salary bills. Where there are any outstanding claims against the officer about thus to go on furlough, the security of his Agent or any respectable householder is usually accepted for the future adjustment of the claim of furloughment, and in one case where it was of vital importance that the invalid should embark in the first ship, and where there was not time to ask for and obtain an acquittance from the offices of Account and Audit in the N. W. Provinces where the invalid had once served as a Junior, but had not been in receipt of a charge of a treasury, an application was made to Government to dispense with the North Western Provinces certificate. In consideration of the circumstances of the case, especially as there was every ground for supposing that there were not any claims standing against the invalid of so large an amount as would not be covered by the Furlough Allowance which it would be always in the power of the Court of Directors to make for the Government demands, this was granted.

Mr A. B. in March 1836 went to England before the completion of ten years, on Medical certificate. Having stayed three years in England, he wished to proceed to the Cape for two years this was allowed by the Home authorities—with the proviso that he was draw nothing from the Company's treasury for the said two years, and that if he did not return to India within that period—i. e. the completion of 5 years from the date of his having quitted it, he should lose

all of whom draw 32,000 upon augmentations made since the 16th November 1836. The other Officers named in the list as drawing more than 30,000 are old incumbents, viz Messrs. Craicraft, Lee Warner, and J. D'O'ly; and those who have received the higher rate of 30,000 before the 16th November 1836, viz Messrs. H. Barlow and H. Moore.

6th. Of the civil and session judges (in Number 28) the following draw allowances less than 30,000: Messrs. Smelt, Russell, Biscoe, Gouldsbury, Gough, Cathcart, Guiding, Deeds and Dunbar. The salary of all these officers being 28,000 they are each respectively entitled to an increase of 2,000 per annum, provided that a deduction equivalent to furnish such an addition be immediately available, and if the deduction afford only a partial increase, the amount is to be equitably apportioned among officers of the same class.

*Court's Orders para. 53. The present amount available for civil and session judges is 120,000, but his honor in council regards the immediate saving made in the allowances of officers of the superior court, as likewise available for the augmentation of civil and session judges' salaries. Thus the amount in hand applicable for augmentation from the 20th February last is 150,000.

7th. Since that date Mr. Craicraft's resignation has been received; the Gentleman's salary was 41,800 being that of a 2d judge of circuit under the old system, considering of this amount the excess above 30,000 as personal, his honor in council deems 6,000 to be available for augmentation of the inferior grade of salaried civil session judge. Thus the total amount at present available is 24,000, but in addition to the nine gentlemen named as filling the office of civil and session judge, a tenth, Mr. Ravenshaw, draws the same allowances of 28,000 as an additional civil and Thuzur session judge, and the judicial duties to be performed in the trial of these officers, are at least of equal responsibility and grade with those of ordinary sessions; his honor in council is therefore disposed to admit the claim of this gentleman to be placed on the same footing in point of salary.

8th. Thus there are ten officers entitled to receive in the whole 20,000 rupees from the 20th February, but from that date till the departure of Mr. Craicraft, the amount available being only 15,000, they will each respectively receive only three-fourths of the augmentation allotted to them until the date when Mr. Craicraft's salary falls in, and from that date the entire increase.—The additional judges performing only civil duties, will continue to draw, as before ordered, only 20,000.

9th. In the statement laid before the president in council the next officers named are separate magistrates. Of these the chief magistrate of Calcutta, and magistrate of 24 pergunnahs are special officers, the allowances of which have been sanctioned by the hon'ble court. The remainder, twelve in number, have been appointed under an arrangement not before the court at the time of issuing their orders. The appointments having been substituted for those of joint magistrates and deputy collector.

10th. The despatch of the hon'ble court contains no orders specifically referring to these officers, but his honor in council is of opinion that the principle of the orders will apply, and therefore that the office of magistrate must be established with an equal salary, the duties performed and the powers exercised being all of the same description.

11th. Of the twelve magistrates appointed in Bengal three are drawing 18,000 Rs per annum and the remainder 12,000. The right honorable the governor general has proposed to fix the equal salary of 18,000 per annum for this class of officers, in which case Messrs. Ouslow, Ollmore, and Elliot would lose 3,000 per annum, and the remaining nine would obtain a corresponding increase. This would involve a net charge of 18,000 per annum, to meet which there is no deduction available from the salaries of officers of the same class, and as these officers were not embraced in the previous orders of the honorable court, and there has been no special salary assigned to this class of officers which was intentionally distributed unequally upon the principle of keeping the total the same, it cannot be assumed that there are vacancies of the higher grade.

12th. The President in council concurring in the expediency of fixing the salaries of the magistrates on the uniform scale proposed, to wit, 15,000 per annum, feels that he would not be warranted in providing the means by so large a net charge upon the resources of the country; since therefore the despatch in question contains no specific orders in regard to this class, resolved, that the case of the magistrates be submitted to the honorable court with a recommendation that they be uniformly on the footing of 15,000 per annum.

REVENUE.

13th. In the Sudder Board of revenue the salary of Mr. R. D. Mangles, temporary member, will require to be reduced from 45,000 to 42,000 but as, this gentleman has taken his departure in the 'Repulse' the case is only noted, for the saving which becomes available in consequence for other augmentations.

14th. Of the commissioners, Mr. Dampier only draws more than the amount fixed by the hon'ble court, his salary was fixed at 30,000, viz. 30,000 + 3,100 for traveling charges on the 26th January 1830. The orders for reduction do not therefore apply to this case.

15th. The remaining six commissioners of revenue draw uniformly, 38,000 i. e. 35,000 + 3,000 travelling charges, which is the rate now finally established by the present despatch of the hon'ble court.

* These officers draw the old salary of 18,810 besides commission, which more than makes up the deficiency. Mr. Barwell draws the special salary heretofore drawn by him as collector of Dacca, with the addition of a salt charge. The aggregate allowances of all these gentlemen is of course in excess of the present highest scale of salary, viz. 25,000.

There are thirteen gentlemen filling the office of collector only, of these, three, A. C. Barwell, J. Wilkinson and Wm. H. Bell, are old incumbents, not affected by the present orders.* Of the remainder of the officers of this class two (hon'ble J. C. Erskine, and H. Dick) draw 25,000 under appointments made subsequent to 16th November, 1830 each of these gentlemen will, therefore, under the present orders, lose 2,000 per annum, (1,000) to reduce their salaries to the scale of 23,000 fixed by the hon'ble court for this class. There are eight officers:—

A. Ogilvie,
N. Smith,
R. Stirling,
J. Lauder,
R. Forbes,
F. Skipwith,
W. Dixon,
H. C. Hamilton,

drawing only 21,000 per annum, and to each of whom therefore an increase of 2,000 per annum would have to be awarded were there funds available under the order to apportion the amount available from the same class which is in this case 4,000 per annum; each of the above eight gentlemen would receive from the 20th ultimo 500 per annum, and if the gain from reduction of Mr. Mangles be thrown into the account they will each receive in addition one-eighth of 3,000 per annum from the 14th March, the date of Mr. Mangles' departure, to wit, 375 per annum.

16th. According to the letter of the hon'ble court's despatch, there is no other fund at present available for addition to the allowances of the collectors drawing only 21,000, but as each of the three old incumbents, must be considered as collector of the 1st class, there will be a further 3,000 Rs. to be distributed upon each vacancy, and when the whole of these offices have lapsed the total salary of each of the collectors now drawing 21,000 will be 600 + 375 + 750 = 1,025 + 21,000 = 22,025. Messrs. Erskine and Dick will, however, draw 23,000, there would still therefore be a grade amongst these officers—for their successors will still draw 23,000, i. e. superior allowances to their collectors.

17th. There is however an important point still to be noticed, which is this, that in the resolution of the 21st May 1837, upon the previous despatch of the hon'ble court, it was laid down as a rule that the total government payment to the class being taken at the amount fixed by the hon'ble court the distribu-

tion, instead of being equitable should be by grades; one-half drawing an amount in excess of the average, and the other half in the same proportion less. But if this principle had been followed out as intended, the amount available for increases of the underpaid officers would, of course, have exactly equalled the demand, and it appears that the only reason why it is not the case, is that promotion to the higher grade has for sometime been suspended, and on that account there is, reckoning three incumbents of the former system as upper grade officers, a vacancy, of one of this grade to complete the number six, or one and half; if the exact half of 13 be taken, assuming 3,000 rupees per annum to be available for the augmentations; on this account a sum of 375 will be added immediately to the allowances of the underpaid collectors, which is the complement of the exact sum, of 2,625 for each. The effect of the court's present orders will therefore be that instead of drawing 13,000, immediately, 375 per annum of that amount will be payable from the date of Mr. Maxwell's departure, and 750 in three parts, as Messrs. Barwell, Bell and Wilkinson vacate.

JUDICIAL—REVENUE.

23d. The next officers on the list are magistrates-collectors—in these the hon'ble court has allotted the uniform salary of 26,000 per annum, with exception to the three employed in Cuttack, who being also salt agents, are allowed to draw 24,000. There are 14 officers of this class, of whom one only, Mr. Rakes, draws 28,000 upon the ground of having small charge of customs—all the remainder, the Cuttack officers excepted, who draw also 24,000 as allowed by the court in consideration of the districts being unsettled, and of there being a salt charge annexed to each receive 24,000 per annum. There are thus ten officers to be increased 2,000 rupees each, and as the salary authorized by the court for Chittagong in the previous despatch was 23,000, the government having urged its being raised to 32,000 on special grounds personal to Mr. Harvey, which the present despatch recognizes, there are none who will suffer corresponding deduction. According to the strict principle of the hon'ble court's despatch, there is no fund from which to provide for these officers, the increases allotted to them, and as expediency of dividing the magistrate's office from that of collector's, appears now to be very generally admitted in Bengal, it may not be considered of so much importance to seek prospectively for the means of raising the salaries of the magistrate-collectors in the manner proposed by the court.

24th. It is observed however, that the cause of there being no collector-magistrates on the higher salary of 26,000 is the same, as remarked in the case of the collectors only, viz. the suspension of promotions to the higher grade. The entire half therefore of the number of these officers may, on the same principle, be deemed entitled to the augmentation though they have not received it, in which case the fund, though in abeyance, exists for raising the whole to 26,000 from the 20th February last.

25th. In the business of administration there are evidently three distinct duties to be performed. The collection of revenue, the administration of civil justice, and the preservation of the police and peace of the country.

26th. The natural provision for the performance of these duties is through separate officers for each, and if heretofore the police and peace have been united first with the administration of civil justice, and subsequently with the collection of revenue, the doubling-up of distinct duties has been a necessary imperfection arising from the desire to diminish the number of public officers as well for the sake of economy as from the want of servants in sufficient number to provide separate officers for all three duties.

27th. The latter want is not at present felt on account of the extraordinary supply of civil servants furnished by the hon'ble court in the years 1826, 1827, and 1828.

28th. Of the fifty servants nominated in each of these years, forty have now passed their tenth year, which is a period of service at which full compensation for the most responsible duties is necessarily reached. It is this condition of the service which enables the government and seems to require of it to

provide separate officers for each of the three classes of ministerial duties, which have of necessity to be performed in every district.

20 h. The only class of officers remaining to be noticed is that of independent magistrates and collectors, who have always been appointed at out stations. Of these there are at present nine, of whom five receive 18,000 per annum, and four 12,000. In order to follow out the principle laid down by the hon'ble court it be deemed necessary to equalize these allowances and consequently it should be determined to place them all on the scale of 15,000, there will be an excess of 3,000 beyond the amount required to raise the smaller salaries which may be added to the allowances of the magistrate-collectors, making a further addition to them of 500 rupees each per annum; but his honor, in council is inclined to respect the rights of incumbents of the class under review, and would not therefore order a present reduction, more especially as they are not included amongst the classes revised by the hon'ble court, so that the salary assigned is not in contravention of any orders of the hon'ble court. Moreover in several instances the separate joint office at the out station had existed at the same salary for a long time, and though of necessity known to the hon'ble court, they have not been ordered to be reduced—his honor in council therefore, instead of equalizing the allowances of these out station officers, prefers establishing 18,000 rupees as the ordinary salary of them, and seeking to reduce their number by a new distribution of zillahs so as to abolish the lower grade on 1,000 per mensem.

20th. There is an inferior class of officers not entered in the list called joint magistrates and deputy collectors of the 21 grade on the salary of head assistant under the old system, viz. 8,400 per annum.

21st. These officers were until lately divided into two classes, the higher of which received 1,000 per mensem. These have now however been entirely absorbed. The abolition of the gradation system will therefore have no application to the remaining single grade of these officers, which, as an useful aid in troublesome districts may require to be maintained.

22d. It only remains to notice the individual cases:—these are the case of M. W. Young, secretary to the board of customs, salt and opium, to whom the hon'ble court confirm his previous allowances of 30,000 but direct the salary of the secretary to board of customs, salt and opium, to be reduced to 19,25,000 on a vacancy. This reduction will of course take effect.

23d. The cases of Messrs. Harvey and Mills require no orders, as both these officers are now commissioners.—The case of the salt agents of Hidgellee and Tumlook is again referred to by the hon'ble court. The salaries of these officers were, in the previous despatch, ordered to be reduced from 50,000 to 42,000 Mr. Barlow, the salt agent of Hidgellee, as an incumbent, is entitled to continue upon his present allowances of 59,000 but Mr. Martin appointed in August 1855 upon a salary of 51,000.

24th. It is not clear to the president in council whether this latter salary shall be raised.

25th. Having thus disposed of the questions arising out of this despatch, so far as they apply to Bengal,—ordered, that copy of the above resolution be sent to the right hon'ble the governor general for his lordship's information.

CONSTRUCTION OF ACT REGARDING LIMIT SALARIES.

Extract from a public general letter from the hon'ble the court of directors, dated the 12th June 1816.

Para 20. We perceive by the abstract of the act of the 5th of his present majesty, chapter 155, annexed to your list of civil servants dated 31st May 1814, that accordingly to your construction of that act, a civil servant may now upon his arrival in India receive £1,500 a year, but this is most assuredly a mistake, the act above mentioned has shortened the period two years, which was required previously to the passing of that act for a servant to have resided in India to enable him to receive more than 1,500, 3,000 or 4,000 pounds a year; but it has not shortened the period which it was required pre-

viously shew to a servant to have resided as above mentioned to enable him to receive more than £348 a year, consequently the remainder is the same as it was before the act of the 3rd was passed, namely, three years allowing with respect to the servant a total in at Hertford College, the time not exceeding two years passed in that institution after they were seventeen, to be considered as time passed in India, and this will be your guide in future.

NO ONE OFFICE SALARY TO BE PAID TO TWO OFFICERS AT THE SAME TIME.

The court of directors have laid it down as a positive rule that they 'are not on any account consent to the salary of an office being issued to two persons for the same period of time.'

ORDER FOR PAYMENT OF SALARIES.

No salaries can be paid by the sub-treasurer, at the presidency till after the publication in the official gazette of authority for their being paid on a specified date.

NO SALARIES TO BE DRAWN IN ANTICIPATION OF AUDIT.

No civil accounts or civil employes (except under very peculiar circumstances, such for instance as those in which an envoy and his suite in central Asia are placed, can be excused for drawing their salaries or those of others in their abstract, in anticipation of the audit.

RETENUEMENTS ON AUDITED BILLS.

On a question of whether the Government in the case of its having a claim against the drawer of an audited salary bill would recognize the bona fide transfer by endorsement to a third party.—it was noticed that it was the 'practice of the government to order retencments to be made through the civil auditors respectively upon the bills that might be subsequently brought for audit, and that government could scarcely imagine the case in which it would interfere between the audit and payment of a bill passed to an officer to whom the sum passed was absolutely due at the time of audit.

SALARIES UNDER 10 YEARS SERVICE.

Mr. A. B. Collector and magistrate at Rajahmundry applied for full salary of his appointment for the period when in consequence of his standing being less than 10 years he received a lower allowance than that of the office. This application was not complied with.

SALARIES OF MEMBERS OF COUNCIL NOT LIABLE DEDUCTION.

On an application from Bombay as to the allowances of Mr. A. B. second member of council at the Presidency who was absent at the Noakherry Hills the reference was answered by an intimation that the rules deductions in cases of absence could not apply to salaries fixed by Act of Parliament; but that the forfeiture of salary during absence, unless the office should rejoin would apply to members of Government.

SALARIES OF SPECIAL RESUMPTION OFFICERS.

The rule for the promotion of special Deputy Collectors, as laid down by the supreme Government, this—that no resumption officer shall be raised to a higher grade of salary, in consequence of the promotion of a junior in another line of the service, unless the Deputy Governor of Bengal determines that his merits are such, that he would have been promoted instead of that junior, but for his employment in the resumption line.

POWERS TO RECEIVE SALARY.

Messrs. A. B. and Co. applied to Government to receive under full power from Mr. E. F. a Civil servant, certain arrears of salary due to him. The Government sanctioned the Sub-Treasurer paying the arrears in question to Messrs. A. B. and Co. on duly audited salary bills. The application to Government was necessary, for without its sanction in such case the Officers of Pay and audit cannot pay or audit such bills. This is a circumstance not sufficiently adverted to by agents generally.

TAXPAYER COMMISSIONERS.

On the Tenjore commission being placed in abeyance by orders of July 1833, the salaries of the Commissioners were placed upon the same footing as those of Commercial Officers, whose situation was abolished consequently upon the withdrawal of the Company from their E. I. Trade; this gave them a

of their previous full salaries, whilst out of employ, and the remitting of upon their nomination to any other office of inferior salary.

CAREFREE COMMISSIONERS.

Mr. A. B. holding the above appointment submitted in expectation of being able finally to close the commission on the 1st of September 1839, instead of the 30th of April 1840, the latter being the date that had been fixed for its extinction by orders of August 1st 1838, his title to the full allowance of 8,000 Rs. per month for 20 months, to which the appointment had been raised,—and ~~stated~~ that even if he should leave India before April 30th, 1840, an equivalent should be paid over to him; and laid stress also upon the fact of his not having taken the usual month's leave or his Furlough, so giving him a claim to draw additional salary. It was ruled that all such claims and pleas were inadmissible, that the month's leave was an indulgence, not a right; and that the zealous servant who worked assiduously and brought his duties to a close sooner than anticipated, had his reward in a reputation for zeal and superior ability, but could not be allowed the salary of the additional time, that a less diligent person would have taken to do the same work. Further the continuance of a salary for a period after a servant had left India for Europe is prohibited by act of Parliament.

SPECIAL COMMISSIONS ON CIVIL SERVANTS.

In some cases receive a Deputation allowance 6,500 Rs. a month. In some a substantive salary, and in some instances no deputation allowance at all—a Government prosecutor has in one or two instances receive a deputation allowance of 300 Rs.

LAW COMMISSIONERS.

The Law commissioners having claimed under 3 and 4 Wm. IV. Chap. 80, Sec. 85, a salary 60,000 Rs. per annum instead of 50,000 as at present fixed, were informed that the sum of 50,000 Rs. having been settled, by a rule passed several years before the appointment of the Law commissioners, as the highest for any person not a Member of Council, they must be graded as coming within its operation.

A GENERAL RULE FOR THE PAYMENT OF THE ALLOWANCES OF CIVIL SERVANTS WHEN EMPLOYED TEMPORARILY IN OTHER STATIONS OF THE SAME PRESIDENCY, OR DEPUTED TO ANOTHER PRESIDENCY.

Whenever a servant attached to one presidency shall obtain temporary employment under another presidency, and shall desire to draw the allowances of his substantive office at the place or in the presidency to which he has been deputed, he shall apply to the Government of his presidency for an order to the Civil Auditor to grant him a certificate of the amount salary less deductions, to which he is entitled, and the Civil Auditor of the Presidency in which he is doing duty shall, on the strength of that certificate pass to him a monthly sum on account, as the Civil pay of the other presidency; the amount so passed to be made payable at the treasury of the place where the officer is employed upon duplicate or triplicate receipts, and to be adjusted in account by the Account or Accountant General of the presidency, as a remittance to the debit of the presidency on account of which it is paid. With respect to divisions of the same presidency, as the Collectors of one division are in the habit of granting bills on those of the other, which are adjusted through the two offices of account, the Governor General in Council, adopting the suggestion of the Accountant General, determines that when an officer of the N. W. Provinces, may be deputed to officiate within those of the Government of Bengal, or vice versa, the salary bill of his substantive office being transmitted for audit to the Auditor of the proper division, shall by him be forwarded to the Collector of the district where it is ordinarily payable, and that office shall, if it be duly receipted, issue and transmit to the officer a bill for the amount as per audit, payable to the individual at the Treasury of the place where he may be employed on duty. Such bills to be granted at par without any charge of exchange.

This complex process is sometimes superseded by taking the certificate of the Officer himself (upon honor) and by passing a bill with the charge of one per cent. if coming within the other rates, and that of 9th June 1831.

The last named runs thus: 'The Hon'ble the Vice President in council is

pleased to direct that Collectors or other Officers in charge of public Treasuries shall, on the application of empanelled Civil Officers of Government on leave of absence within the limits of the Presidency authorized to draw their pay from any such public treasury, grant Remittance bills for the amount of the allowances of such absent officers upon the Revenue Treasuries nearest the place of which they may reside on leave, the bill so granted being however restricted to the net amount of pay due, i. e. minus the several deductions which may be made by the Civil Auditor in favor of Government or on account of funds, &c. which are to be credited in the accounts in which the allowances may be chargeable to Government, viz. those of the divisions or Zillahs to which the Officers on leave stand appointed.

The bills granted under this rule to Officers who may be on leave on account of private affairs will be subjected to a premium of one per cent. Bills granted to Officers who may be absent on medical certificate will be exempted from such premium.

BANK RULES.

The appointment of writers appears to have been originally established by an Act passed in the 24th year of his late Majesty, Geo. III. Cap. 25, Sec. 43 prescribing admissions between the ages of 15 and 22 years.

The Act 47th of the Geo. III. Cap. 88, prescribed the passing of two years or four terms in the College established in England for the education of such persons as were intended for the Civil service in India, "and so much of the time spent therein after the age of 17 years shall be reckoned as time actually spent in India." This is to qualify them to draw certain salaries under the limitations assigned in previous Acts.

General Department, 3d July, 1795.

Original rank was computed under an order of the Hon'ble the Court of Directors dated 3d July, 1795, assigning to writers appointed in any season who at the time of appointment were residing in India, the commencement of their periods of actual service in India, from the time of their arrival at the Presidency to which they were nominated, of the First Writer appointed in Europe of the same season. And to Writers appointed in Europe their periods of actual service in India as commencing from the time of their arrival at the Presidency at which they were to serve.

It may be remarked however that in process of time the former of these Rules appears to have superseded the latter, and to have been observed as the general rule of dating Original Rank.

It is also to be remarked that the periods of seniority were in practice computed from such duties of original rank reduced by one year below the terms specified in the Act as follows, viz.

For a Senior Merchant, 11 years or on entering the 12th year from the date of original rank.

Junior Merchant, 8 years or on entering the 9th year.

Factor, 5 years or on entering the 6th year, and income taxable by law, was likewise regulated or rated by the same periods: although strictly the completion of 8 years, 9 years, and 12 years, was denoted by the Acts.

In July, 1827, it appears the Hon'ble Court entered into a further definition in reference to certain questions proposed by the Madras Government; and in those words: "Previously to the enactment of 53d Geo. III. Cap. 155, it was our practice to forward to your Lists of the relative rank of writers appointed from time to time to your Establishment: under the authority of that enactment, regulations were framed for the Government of the College of Haileybury, one of which provided that the relative Rank of Writers should be fixed by the College Council, and specified in the College certificate subject however to loss of Rank, in the event of the Writer failing to proceed to India within a specified time. The term of service as Writer, Factor, Junior and Senior Merchants, has reference to the periods of service specified in Paragraph 17 to 19 of the Appendix No. 86, to the second report from the Select Committee of the House of Commons on the company's affairs in 1810, viz.

A. B.
8 years.
4 years.

'After five years Writers become Factors, after three years Junior Merchants, and after three years further Senior Merchants, the first of which periods includes time spent at our College at Haileybury.

Upon another resolution in consequence of a reference from this presidency, the Hon'ble Court's decision was given as follows thro' an order of Government, dated 15th November 1831. 'That in computing the term of service requisite to qualify civil servants when out of employ to draw the substance Senior Merchants, Junior Merchant, and Factor, the same principle shall be observed as Parliament has prescribed in fixing the qualifications for holding Offices of certain emoluments, viz. Actual residence in India in the company's service allowing however, time passed in the Haileybury College as provided for in the Act 47, c. Geo. III. cap. 68.'

PRECEDENCE IN OFFICE.

The last Act on this subject makes it lawful for the Government of India to appoint any meritorious civil servant under the rank of member of council to courts, Boards, and other official establishment in which several servants hold office collectively, and ordains 'that such servant shall take precedence at court in such courts, boards, &c. according to the seniority of his appointment as a member thereof although he may hereby not take precedence therein according to the seniority of his appointment in the service.' (30)

HAILEYBURY BANK.

The Act passed in the 10th year of Geo. IV. cap. 14 extended the privileges granted by the Act 47th of Geo. III. cap. 68 in favor of young men who may have spent a less time than two years in the college establishment in England, and enacted 'that all such time not exceeding two years bona fide spent in that college after the age of 17 years, on proceeding to India, shall be accounted as time spent in India, in regard to offices, places, and employments, which such persons are entitled to be appointed to hold, the salaries parquisites, and emoluments whereof shall not exceed the sum of one thousand five hundred pounds per annum.'

RANK OF CIVIL SERVANTS RETURNING TO INDIA AFTER FIVE YEARS'

ABSENCE IN EUROPE.

When and as often as many person having held any civil situation in India in the service of the said company, and having departed from India by leave of the Governor in Council, or Governor in Council, shall be restored to the said company's service after an absence of five years from the time of such departure; such person from and after such restoration shall take rank and precedence only according to the time he shall have passed in the service of the said company at the period of his departure from India, and on his return to India. If any other civil servant or servants at the settlement to which he shall belong, shall then have passed a greater or the like length of time in the service of the said company as the person so restored had passed when he left India, the person so restored shall be placed and take rank immediately below such other civil servant or servants; any matter or thing to the contrary notwithstanding.

SENIORITY.

The more recent provisions of the Act 3 and 4 Will. IV., c. 85, S. 107.

'So many of the said students in reference to those at the college at Haileybury as shall have a certificate from the said college of good conduct during the time of their residence therein, shall be subjected to an examination in the studies prosecuted in the said college and so many of the said students as shall appear duly qualified shall be placed according to merit, in a list to be prepared by the examiners, and shall be nominated supply the vacancies in the civil establishments in India and have seniority therein according to their priority in the said list.

To the above may be added an article which has appeared in the 'East India Register' of recent date. 'The Rank of students leaving the college is

RANK OF ITS MEMBER OF BOARD OF CUSTOMS, SALT AND OPIMUM

(31) The first member of the Board of Customs in this way takes precedence over his senior in the service, the second member of the Board.

determined by the certificate of the p include such Rank to take effect only in the event of the students proceeding to India which in six months after, they are ranked.

N. B. The order of Rank is now settled by the hon'ble court and the Governments of India are informed by periodic communications specifying the names of Writers, the periods passed after the age of seventeen, the date of the court's order and that of sailing for India, with a reference for Rank to the certificates held by the individuals respectively. The data however do not appear to indicate any change in the mode previously adopted of computing seniority by actual service with an allowance of time passed in colleges in England.

Temporary absence under the furlough rules, does not interfere with the computation of original rank or seniority in the service, unless such absence be prolonged beyond five years; in which case restoration becomes necessary. Hence all the period of non-appearance incidental to those rules or not exceeding five years at any one time is included in that of seniority.

Temporary absence from the presidency to which the officer belongs, with the express leave of the Government of India, limited by rule to two years is likewise included in the period of seniority, or so long as he may continue within the geographical limits of such leave. But any absence without such leave must be held prejudicial to rank as every refusal to renew the term thereof.

Withdrawal from the service by a Civil Servant joining any mercantile concern or firm has been held a relinquishment, or surrender of the original as well as the local appointment, and all rank in the service ceases thence-forward. Such surrender involves a necessity of formal Restoration by the authorities at Home. Upon such restoration the loss of Rank would follow unless it be made express 'without prejudice' to it.

Suspension or removal from the service affects rank under the provisions of Act 53d of Geo. III. sec 83, which enacted, that 'no restoration by the hon'ble court of any servant so suspended or removed by the authority of the presidencies and Governments in the East Indies, shall be valid or effectual without the approbation and consent of the Board commissioners for the affairs of India.' Upon restoration, seniority would equally in this as in the preceding case be governed by the express terms of the order granting it.

The recall of a civil servant from India by a warrant under the sign Manual being duly receivable by another warrant of the same tenor, permission, (after such revocation) granted by the Hon'ble court to re-turn to India as a senior merchant' or without prejudice to his rank, was held a virtual restoration to his general privilege.

Here it may be noted that by the Act 3rd and 4th of William IV. Cap. 85, a power has been vested in the hon'ble court to remove or displace any of the officers of Servants of the East India Company, that their will and pleasure, with a special reservation in favor of any officers appointed by Her Majesty's Government who are not to be dismissed or removed without Her Majesty's approbation.

The transfer of a civil servant from one sister Presidency to another (which

has sometimes taken place under the old rules) has given rank from the day of the first arrival of the person of his own appointment, and the same governs the case of a Military Officer who is appointed by a civil servant.

The Transfer of the civil servants of the late China and St. Helena establishments of the company has provided for by the Act 13rd and 4th of the late Reign, c. 85 Sec. 113, which enacted 'that a civil servant of the company employed in the Factory of Canton, or in the Island of St. Helena shall be capable of taking and holding any office in any Presidency or Establishment on the Indian territories which he would have been capable of taking and holding, it

he had been a civil servant of such Presidency or of such Establishment during the same time as he shall have been in the service of the said company.

The preliminary order of the hon'ble court bearing date the 27th December 1833, assigned to the China civil servants their rank on the Bengal Establishment, from the date of their respective first appointments, with certain specific allowances of time, to from their election upon the offer of transfer to the India service, the same being varied in some respects, according to the situation of the officers at the time, but not exceeding six months to all servants in China, from the date of this Government receiving the hon'ble court's despatch and the same periods, as respected servants in China, were to be considered part of the time of residence necessary to qualify them for annuities in the event of their accepting the transfer. The present position of those servants who have done so, is that of the last of the season of their own appointments. The same principle was formerly applied to certain civil servants of the then Fort Marlboro' establishment, who were transferred to that of Madras, and by an express act of Parliament were directed to be considered the youngest of their respective ranks.

SPECIAL CASES CONNECTED WITH THE RULES ON RANK.

Rank of a civilian supposed to be wrongly stated.

Mr. A. B. presented to Government that the Secretary to the C. S. A. F. had made an error in regard to his standing in the service, and urged a claim to priority of option of taking the annuity over certain other civil servants in consequence. He was told that the rules of the Annuity Fund prescribed definitely that annuities should be tendered to members of the civil service in the order of rank as fixed in the lists received from the Hon'ble Court of Directors and combined in the civil Auditor's books.

The rules of determining the method of computing the period of service is distinct from that which refers to rank, and though the period of service may have been completed under that rule before that of others standing higher in the gradation lists of rank, the latter would be entitled to take precedence, when both are alike qualified by standing and residence for the annuity.

Similar case.

Mr. A. B. brought to notice a supposed mistake in regard to the position of his name in the gradation lists of the officers of civil service published in the Directories, and submitted a certificate granted by the Board of Examiners in Europe showing his standing in the service and solicited that he might be restored to his rank. He was told that the circumstance represented by him would be brought to the notice of the Court of Directors as it was from the Honorable court that the lists of relative rank of civil servants were received, and that the Governor of Bengal did not feel that he would be warranted in making any alteration in them without a special sanction.

Similar case.

Mr. A. B. left Haileybury College in Dec 1842, and signed his covenant at the E. I. House on the 24th March 1843, and arrived at Calcutta in November of that year. In the E. I. H. register of 1842, Mr. A. B. was entered as nominated for Bengal 12th Jun. 1840 and as transferred from the Madras nominations on 30th March, 1840. The rules in force fix the period of 25 years' service to commence from the date of intimation of appointment, or from the date of covenant, which ever may be antecedent. By the Honorable Court's letter to the Government of Bengal, dated 1st April, 1844, rank was assigned to Mr. A. B. as a writer of the season 1809-1809, whereas by the Honorable court's despatch of 15th March 48 G rank was assigned to Messrs. C. D. and E. F. who retired on annuities of the season 1837-38, and who entered the college at the same time with Mr. A. B. but who in consequence of being implicated in a disturbance were sent out to India before the completion of their fourth term, as writers of 1811-12.

By Para. 3 of the H Court's letters dated 25th January 1843 intimation of the appointment of Mr. G. H. (who proceeded to India in this same ship with

Mr. A. B. and of 22 other writers was conferred to the Bengal Government and Mr. C. H. who signed the warrant subsequent to Mr. A. B. retired on an annuity of 1837-38. The period of his service being calculated from the date of the Honorable Court's letter above mentioned.

Mr. A. B. never having proceeded to England on Furlough completed his period of 22 years' residence in India in Nov. 1834. At the end of 1837 he applied for one of the annuities available in 1837-38 on the favorable terms of value and was told in reply that the date of intimation of his appointment as a writer not being traceable on the records of Government, the period of his twenty-five years' service must be held to commence from the date of his covenant, viz. 24th March 1813.

In consequence of this construction of the managers, which was subsequently upheld by the Government of Bengal, Mr. A. B. was debarred from taking an annuity before the 24th March 1838, by which the period available annuities of the season had been taken up (one of them by Mr. F. G. who completed his 22 years' actual residence on the 24th March 1838 only) and Mr. A. B. was consequently deprived of an advantage to which he conceived he was justly entitled.

Mr. A. B. urged that the circumstance of the intimation of his appointment not being traceable in the records of the Bengal Government, was a matter which was entirely beyond his own control, and further that it was obvious he must have been appointed to the H. Co's service at a period coincided with, if not antecedent to Messrs. C. D. and E. F. and those other servants to whom rank was assigned by the court of directors at a date one or two years subsequent to that assigned by the honorable court to him, Mr. A. B.

Mr. A. B. compelled by ill health and other circumstances to embark for England on furlough, and had no chance of obtaining an annuity of the season of 1833-4, the then supposed last year of the annuity on the favorable terms of quarter premium sanctioned by the honorable court, by reason of the large numbers of civil servants at the head of the list who it was understood had resolved to avail themselves of the six annuities of that season. Mr. A. B. therefore prayed that the court would ascertain from their records the actual date of his appointment to their service; and (not permitting him to suffer so early a loss as would be entailed by his being compelled to pay rs. 50,000 to secure the same advantages, which but for a contingency entirely beyond his own control, would have been his for a payment of 25,000rs.) would be pleased to assign him an annuity out of the surplus funds, or out of the one-third annuities entered to the credit of the court, on the favorable terms of quarter premium.

The home authorities found that Mr. A. B.'s appointment took place on the 29th January 1821 and that the fact ought to have been duly brought to the notice of the local government with a reasonable period of its occurrence, and in that case it should have been so, on a much earlier date than that borne by Mr. A. B.'s covenant.

Further, that Mr. A. B. ought to have been admitted to an annuity from the 29th January 1821, and should undoubtedly have been so admitted but from his being unfortunately deprived of the requisite means of proving his period of service. On that defect being remedied, the court of directors decided that Mr. A. B. might be permitted to purchase an annuity at a quarter value commencing from 1st May 1838, and he was admitted to an extra annuity.

The point relative to the possible conflicting claims of rank and service, did not appear to the honorable government to call for interpretation, because it was expressly stated in the rules of the fund that the annuities should be tendered to subscribers according to their seniority.

Further, the court of directors ruled that it was not necessary to disturb the rule by which the commencement of service is at present computed. If of the two documents, (the covenant and court's letter of notification,) upon which the decision rests, one only can be found; the question is to be decided by that one, unless in the case of Mr. A. B.'s evidence exists which supplies the loss of the document which is wanting. In such cases the servant is to be restored to the advantages of which accidental circumstances have deprived him.

Mr. C. D. was appointed auditor at the same period as Mr. A. B. viz the 20th January 1842, and under similar circumstances his length of service must therefore be reckoned from that date.

MISCELLANEOUS.

RESPONSIBILITY FOR DELAY OF AUDIT.

From a delay of audit in a case, loss was occasioned to the Government; it was ordered to be adopted as a rule of the government and distinctly explained to the officers of account and audit that the home authorities would hold each officer upon whom the duty of causing audit devolved, responsible for every loss incurred in consequence of his neglect in needlessly delaying to have recourse to the means which were available to prevent such loss.

Officers in charge of treasuries are to forward along with the half yearly reports on imbursement balances, a sufficient proof that the non adjustment of such items has been occasioned by circumstances beyond their control. Should any one item appear in two successive statements without proof being furnished that an adjustment had been applied for, it will be deemed a culpable remittance on the part of such officer; and the amount of the item will be deducted from his salary without reference to his having been the disbursing officer or not.

TRANSFER RULES.

To C. TROWER, Esquire, - Civil Auditor.

SIR,—I am directed to transmit for your information and guidance the annexed copy of a letter to the address of the secretary from the government North Western Provinces the General Department of the government of India with copy of the resolution of the president in council dated the 8th May 1850, and of the letter dated 20th ultimo from the civil auditor at Agra, on the subject of transfer of civil servants from one division of the Bengal presidency to the other, and the regulation of their allowances under the circumstances there explained.

I am, &c.

Fort William,
the 20th June 1840

(Sd.) G. A. RUSSEY,

Secy to the Govt. of Bengal.

To J. THOMAS, Esquire.

Secy. to the hon'ble the Lieut. Gov. for the North Western Provinces.

SIR,—I am directed to acknowledge the receipt of your letter, dated the 3rd of June, and its enclosure, from the civil auditor at Agra, relative to Mr. A. B. and the rule,

General Department. regarding the transfer of civil servants from one division of the Bengal presidency to the other.

2. I am directed on the subject to refer the hon'ble the Lieut. Governor to the resolution of the president in council, dated 8th May 1850, of which a copy is annexed to the present letter, from which it will appear, that the transfer having been previously arranged between the two local governments, and allowed by the government of India; it takes place at the same time with the appointment of the servant to a situation in the division in which he is moved.

3. The civil auditor reckons the period allowed to join the new station, and passes the bill for such servants salary accordingly. If the salary is of higher amount, than the salary of the situation which he has left, he draws in the time allowed for travelling, out of the salary of his new appointment, a sum equal to that of his previous situation.

4. Servants of one division are not eligible for deputation duty in another except under special circumstances.

5. In contemplation of permanent transfer the services of an officer from one division are obtained for employment in another before the vacancy at the appointment has taken place, as for instance, by the departure of the incumbent to Europe, the sanction of the government of India having been previously obtained for his being so placed at the disposal of the local govern-

ment to which he is not yet permanently attached, he will be considered therein, but for a definite time, which may be extended if necessary, until by the vacancy of the appointment for which he is intended, he can be permanently transferred, when his perfect transfer and appointment will be simultaneously gazetted.

6. Pending this announcement, he will draw the salary of his appointment in the other division, and such deputation allowance in his new division as he is entitled to by the rules of the service, and his appointment would not be filled up till the permanent transfer was made and a new appointment assigned to him.

7. There is no reason why this rule should not be observed in all cases of transfer with a view to eventual appointment in a fixed situation of another division, such for instance as the case of Mr. C. D. last year, who was permitted on sick certificate to proceed to the North Western provinces, and obtained employment there, first in an acting situation, and eventually in a fixed situation. In that case the appointment that Mr. C. D. held in the lower provinces having been filled up without reference to his exact position, it became necessary as a measure of just compensation, to permit him to draw an allowance equal to what he lost by the premature appointment of a successor to his late situation during the short period which intervened before he was appointed to another fixed situation in the North Western Provinces.

8. In the case of Mr. A. B. also on account of sick certificate, retained for employ in the lower provinces after his return from the Cape of Good Hope, the circumstances were special as provided in the rule above explained, but his appointment in Bundelcund has not been disposed of. Mr. A. B. having been recently appointed to a fixed situation in the lower provinces, will, from the date of that appointment (24 of June) cease to have any connection with the North Western provinces, or to draw any part of his salary thence.

9. The word 'retains' made use of in the order of the government of India of the 20th November last as quoted in the reference from Mr. Morland the civil auditor at Agra, meant only to denote that Mr. A. B. when the separation of the jurisdiction took place being the incumbent of an office in the N. W. P. was annexed to that division of the Bengal presidency, and was by the order of the 20th November re-annexed to the lower provinces.

10. Mr. A. B.'s salary bills as deputy collector of Bundelcund are to be audited at Agra up to the date of his recent appointment to a fixed situation in Bengal, when his transfer to Bengal and separation from Agra were completed.

11. The necessary directions will be given through the government of Bengal to the civil auditor of Calcutta to conform to the suggestion contained in the 5th paragraph of Mr. civil auditor Morland's letter to you dated the 20th May, viz. to furnish the audit office at Agra with a monthly return of all bills passed in the audit office at Calcutta for the salary of civil servants attached to the N. W. P.'s, absent at the Cape or elsewhere, or which, from any other cause, may have obtained audit below with the deductions on account of leave, subscriptions to Funds, &c.

12. With regard to para 24 of Mr. Morland's letter it would not appear that the words placed at the disposal of the government of Bengal, bear any difference from the words 'transferred to the Bengal presidency.' In public correspondence and notifications they have it is believed, always been used indiscriminately. The gazette would always, in due time, inform the auditor when a transfer was completed by permanent appointment.

13. Assistants drawing every where equal allowance if transferred from one division to another should be considered as transferred altogether and be charged to the division in which they are employed from the date of transfer.

14. If servants are allowed to exchange appointments for their own convenience they ought to forego salary between the time of quitting the old appointment and joining the new one, and be considered for that interval as servants out of employ.

GENERAL CONSULTATION, 8TH MAY, 1899.

Read a letter from the secretary to the government of Bengal, general department, No. 807, dated the 24th ultimo, forwarding the following letter on the subject of transfers of public officers from one division of the presidency to the other.

Letter from Offr. secretary to the governor general North Western provinces; dated the 7th February last.

Ditto to ditto, dated the 20th ultimo.

Ditto from ditto, dated the 5th ultimo.

Resolution. The president in council observing the difference of practice stated to prevail in the different divisions of the Bengal presidency, thinks that it will be expedient to provide by definite rule for cases of transfer of public officers from one division to the other.

His honor in council is of opinion that the servants of one division ought not to be considered eligible to fill situations on deputation in the other division except under special circumstances, which being stated to the government of India, the loan of the servants for the particular duty would, of course, be sanctioned.

His honor in council is further of opinion that the same rule ought to be established for all classes of servants, and that if the transfer of a servant be asked with a view to his being appointed to any particular office in another division, the transfer being made and notified in the gazette, the appointment to the office vacant should be ordinarily be made to take effect from the date of transfer, from which date the civil auditor and officers of account will reckon the period allowed to join the new station and pass the bills accordingly.

If an officer of one division be asked for, to fill a situation temporarily, preparatory to permanent appointment to be made when the incumbent shall after the usual period have embarked for Europe, or retired from the service, the circumstances being stated, the case may be brought under the first rule, and in lieu of a final transfer the officer will in such case be gazetted as authorized to proceed on duty for a definite time to the other division, preparatory to obtaining permanent employment there. At the end of the period mentioned, the salary of office in the division from which the officer has proceeded will cease, unless an extension be similarly granted under orders from the government of India. A fresh order of final transfer will be necessary either at the close of the period or from any earlier date at which effect can be given to the appointment, which the officer is intended to fill in the new division.

Secy. to the Govt. of India.

To J. THOMASON, Esq.

Officiating Secretary to the Govt. North Western Provinces.

SIR,—I am under the necessity of troubling you with a reference relating to the existing doubts as to the intentions of government, *retransferring* Mr. A. B. to the Bengal presidency under the orders of the 18th November 1890.

3. The practice hitherto observed in the office has been to receive the orders of removal of civil servants from these provinces to the Bengal presidency in the following lights.

1st. When the orders state 'placed at the disposal of the governor of Bengal the removal is considered temporary.

2nd. If the orders expressly state 'transferred to the Bengal presidency,' it is looked upon as a permanent removal.

3rd. Mr. A. B.'s case would in my opinion appear to be a special one. He is said to be 'retransferred' to the Bengal presidency, never having to my knowledge been employed before in that division, and now he merely holds an official appointment there, and has submitted to me bills for Audit for his salary as deputy collector of Government customs at Bandreew up to the end of the past month, from which it is evident that he still considers himself attached to these Provinces.

4th. Under the above circumstances I have the honor to solicit that I may be favored with specific instructions how to act in the present instance, and in all future cases. I may perhaps be allowed to suggest that the word 'temporary' employments, or placed temporarily at the disposal of be used when the individual does not vacate his permanent appointment in the division in which he may have been previously employed.

5th. Under the impression that a reference to the government of India will be deemed expedient in the above matter, I have the honor to solicit that his honor the lieutenant governor will at the same time request instructions to be issued to the civil auditor at Calcutta, to furnish this office with a monthly return of all bills passed in his office for the salary of civil servants attached to the North Western provinces, absent at the Cape or elsewhere, or which from any other cause may have obtained audit below, with the deductions on account of leave, subscriptions to Funds, &c. This information is essentially necessary to allow of the Registers in my office being kept up complete for the whole period during absence at the Cape, whereas at present I am quite ignorant of what is passed or retrenched from the salary of such officers, as have their bills audited in Bengal.

I have, &c.

MISCELLANEOUS CONNECTED WITH LEAVE, &c. REJOINING, &c.

An officer leaving the limits of his jurisdiction, whether with or without the orders of government, shall be bound to report the circumstances to the Civil Auditor.

Any officer who may be removed from one station to another, shall in like manner report to the civil auditor the dates on which he may make over and receive charge; and the civil auditor is restricted from passing the bill of any officer appointed to a new office for the allowances belonging to such office (without the special orders of government) until he shall have received report of his having taken charge thereof.

Leave of absence, when solicited for the purpose of visiting any place on the continent of India, shall not be granted for a longer period than 6 months, but which will of course be extended at the discretion of government on due and sufficient cause being shown.

sion to quit the presidency, on which occasion the vessel in which he embarks must be duly reported.

Any officer returning to the presidency after having made a sea voyage, for the recovery of his health or otherwise, shall unless the contrary is specially sanctioned by government, be required to rejoin his station within the time that may be prescribed for travelling to the station to which he stands appointed.

at the Presidency as may be possible under the relief afforded by the removal of these branches of the existing business. RESOLUTIONS RELATING TO CHINA SERVANTS.

OUR GOVERNOR GENERAL OF INDIA IN COUNCIL.

PARA. 1. In reference to our Despatch dated the 27th of December, 1833, No. 75, regarding the China Servants who may accept the offer of Transfer to the civil Establishment of India, we think it right to state that it is not our intention to require from these Servants as the condition of their remaining in the civil service, that they should pass the Examination in Native Languages which is required from Writers.

2. We have no doubt that the Gentlemen to whom we refer will use their exertions, and in many cases those especially of the Juniors, successfully, to qualify themselves to hold any Office under your Government, but there are some Offices of importance in which a knowledge of the Languages is not indispensable.
London, 21st May, 1834.

Resolved, that, having taken into consideration the situation in which the Members of the China Factory will be placed by the discontinuance of the company's Trade, the following arrangement be adopted, subject to the confirmation of the Board of Commissioners for the Affairs of India, viz.

That in virtue of the authority given by Section 113th of the Act of the 3d and 4th William IV. chapter 85, an offer of Transfer to the civil Establishment of India be made to each of the civil servants on the China Establishment, that such of those servants as shall accept that offer shall be entitled to annuities from the company of the amount allowed by the civil service Annuity Fund, viz. £1,000, provided that the aggregate residence abroad in the service as Members of the China Factory, and as Indian servants, shall not in any case be less than twenty-two years, and that in consideration of the present and prospective loss sustained by the China servants through the change of the scene of their service, the amount of Fine and Subscription which if they were Members of the civil servant's Annuity Fund, they would be called upon to pay on becoming annuitants be not required of them.

DEPARTURE FROM INDIA OF THE GOVERNOR-GENERAL, GOVERNOR, COUNCILLOR OR COMMANDER IN CHIEF, WITH INTENT TO RETURN TO EUROPE DEEMED A RESIGNATION, &c.

XXXVII. And be it further enacted, that the departure from India of any governor general, governor, councillor, or commander in chief, with intent to return to Europe, shall be deemed in law a Resignation and avoidance of his office or employment; and that the arrival in any part of Europe of any such governor general, governor, councillor or commander in chief, shall be a sufficient indication of such intent; and that no act or declaration of any

governor general, governor, councillor, or commander in chief, during his continuance in the presidency wherein he was governor general, governor, councillor, or commander in chief, except by some deed or instrument in writing under his hand and seal, delivered to the secretary in the public department of the same presidency, in order to its being recorded, shall be deemed or held as a resignation, or surrender of his said office; and that the salary and other allowances of any such governor general, or other officer respectively, shall cease from the day of such his departure, resignation or surrender, and that if any such governor general, or any other officer whatever, in the service of the said company, shall quit or leave the presidency or settlements to which he shall belong, other than in the known actual service of the said company, the salary and allowances appertaining to his office shall not be paid or payable during his absence to any agent or other person for his use, and in the event of his not returning back to his station at such presidency or settlement, or of his coming to Europe, his salary and allowances shall be deemed to have ceased from the day of his quitting such presidency or settlement, any law or usage to the contrary notwithstanding.

FILLING UP VACANCIES IN THE CIVIL LINE.

LVII. And be it further enacted, that all vacancies happening in any of the offices, places or employments in the civil line of the company's service in India, (being under the degree of councillor,) shall be from time to time filled up and supplied from amongst the civil servants of the said company, belonging to the presidency wherein such vacancies shall respectively happen, subject only to the restrictions in this act contained, and not otherwise (that is to say,) that in the filling up and supplying such vacancies, no officer, place, or employment, the salary, perquisites, and employments whereof shall exceed one thousand five hundred pounds per annum, shall be conferred upon or granted to any of the said servants who shall have not been actually resident in India as a dovetailed servant of the said company for the space of three years at the least in the whole, antecedent to such vacancy, and if the salary, perquisites and emoluments of any office, place, or employment, shall exceed three thousand pounds per annum, the same shall not be granted to or conferred upon any of the said servants who shall not have been actually resident in India in the said service for the space of nine years at the least in the whole, antecedent to such vacancy; and if the salary, perquisites, and emoluments of any office, place, or employment, shall exceed four thousand pounds per annum, the same shall not be granted to or conferred upon any of the said servants, who shall not have been actually resident in India in the company's service for the space of twelve years at the least in the whole, antecedent to such vacancy; and that all appointments, advancements and promotions which shall be made for supplying any such vacancies, other than as aforesaid, shall be null and void.

INDENTS FOR CIVIL SERVANTS.

The government of India are obliged before the 30th April of each year to send in India of the probable number of the civilians that will be required in the third year from that in which they intend prepared—in all the presidency. To do this properly the secretary prepares a note and statements exhibiting 1, a detailed list of the civil servant of the presidencies, 2 an abstract statement of offices, 3 the results compared with former years, 4, the proportion of juniors to seniors, 5, the proportion of substantial appointments to acting, 6 a prospective review of circumstances that might affect the demand for juniors. The indents for the last few years have generally been—For Bengal and Agra 25, for Madras 12, and for Bombay 8.

PRIVATE TRADING.

Members of the Civil and Military services may become shareholders in the Universal Assurance Company, but it is not allowed that occupations of a private institution should interfere with the claims of the public service to the undivided attention of the company's servants, and they are 'positively interdicted' from taking any part in the management of U. A. Co's, or any other similar company.

EXCEPTIONS.

The above interdiction does not apply to the Asiatic, the Agricultural, or other such Societies, which cannot be in any way looked upon as trading establishments.

SALE OF PROPERTY TO NATIVES.

19th September, 1857.

Civil Servants are allowed to sell private property to natives reporting the actual cost of the property to be sold to them, the name of the purchaser, his situation, and the price of the purchase money.

SALE OF PROPERTY TO NATIVE PRINCES.

31st October, 1851.

RESOLUTION.

Circumstances having recently come to the knowledge of Government which suggest the expediency of preventing sales of valuable property, from being made by the civil and Military Officers of the honorable company's service to foreign princes and chiefs, or to natives of rank or opulence residing under the protection of the British Government, without due intimation to Government through the principal local authorities, of the proposed sale and transfer of such property and the consideration to be received for it, His Excellency the Governor General in Council is pleased to prohibit in future all sales, purchases, and transfers, between the Civil and Military servants of Government on the one hand, and natives of the description above noticed on the other, of grounds, houses, boats, equipages, horses, elephants, plate, furniture, and generally every description of private property exceeding the value of five thousand (5,000) Rupees, without the sanction of Government being previously obtained, under such penalties as the circumstances of each particular case of disobedience to these orders may demand.

The Governor General in Council takes this opportunity of advertising to the Resolution passed in the Political Department under date the 17th September 1851; and published in General Orders of the 18th of the same month, cautioning all Civil and Military Officers of Government against carrying on any communications with native princes and chiefs, or their vassals, except through the channel of the Political Authorities.

CHARGES OF CORRUPTION.

Charges of corruption against civil servants are usually investigated in the presence of the accuser and accused, by Special Commissioners under the subjoined Regulation VIII. of 1817, and a copy of the resolution ordering the investigation has been generally furnished to the accused.

Whereas by Section 7. Regulation XVII, 1813, the general Preamble: control over the proceedings of all commissions constituted under the provisions of section 8, of that Regulation, is vested

in the Sudder Dewanny Adawlut, the Board of Revenue, the Board of Commissioners and the Board of Trade respectively, (according as the person accused may be under one or other of those authorities;) and whereas by Sections 13 and 14 of the regulation aforesaid, it is provided that the Commissioner or Commissioners so appointed shall transmit to one or other of the said authorities, as the case may be, the whole of the proceedings held and documents received, together with a summary of the pleading and evidence, and his or their opinion on the case, and that the Sudder Dewanny Adawlut, or the Board to which the case may belong, submit the whole of the proceedings and documents received by them to the Governor General in Council, with their opinion whether any and what facts, charged against the party, appear to have been established; and whereas, on some occasions, an adherence to the above form of proceeding may be productive of serious delay, in the final determination of the case, and of consequent distress to the accused party, as well as of inconvenience to the Public Service; the following rules have been enacted, in modification of the provisions above mentioned, and of such part of Section 15 of the Regulation aforesaid, as refers to the said provisions.

The control over the proceedings of the Commission appointed under Regulation XVII. 1813 by whom to be exercised.

2nd. Whenever a Special Commission shall be appointed under the provisions of Regulation XVII. 1813, for the investigation of charges exhibited against a public officer, the Governor General in Council will determine whether the Commission, so appointed shall be placed under the control of any of the authorities above specified, in the manner prescribed in Sections 7, 13, and 14, of the Regulation aforesaid, or shall act immediately under the authority of Government; and all Commissions appointed as aforesaid, shall be guided by the instructions which they may receive in this behalf from the Governor General in Council.

The Commission, when instructed to act immediately, under the authority of Government, shall submit their proceedings directly to the Governor General in Council.

3rd. When the Commission shall be instructed to act immediately under the authority of Government, it shall submit directly to the Governor General in Council, (without the intervention of any of the authorities above specified,) the proceedings held, and documents received on the occasion, accompanied by translations of papers not in the English language, together with a summary of the pleadings and evidence, and their opinion on the merits of the case, in like manner as they are now required to submit the same to the Sudder Dewanny Adawlut; and the Board of Revenue, Board of Commissioners, and Board of Trade respectively, and the Governor General in Council, after receiving the report and proceedings submitted by the Commissioners, will proceed in the case, in the same manner as if the said proceedings and the report had been submitted by the Sudder Dewanny Adawlut, or one of the said Board: provided however that if, in any case, on consideration of the proceedings and report of the commissioners, it shall appear to the Governor General in Council, necessary, that further evidence be taken, or that a further explanation be given by the commissioners, of their sentiments on any point connected with the case investigated by them, it shall be competent to the Governor General in Council to direct the commissioners accordingly, and the commissioners shall be authorized and required to take such further evidence as far as the same may be attainable, and to furnish such further explanation as may be required.

And to apply to Government for any instructions which they may require.

4th. When a commission may be instructed as aforesaid to act under the immediate authority of Government, such commission shall apply to Government for any instructions which they may require in the execution of the duty entrusted to them, for which provision may not have been expressly made by Regulation XVII. 1813, or any other Regulation; and the Governor General in Council will pass such order on

the subject, as may appear consonant to the general principles of equity, and most conducive to the purposes of substantial justice. And in any case in which any doubt or difficulty may arise in the conduct of the investigation, for which it may appear advisable to make provision by a General Regulation, the commissioners shall be competent to prepare the draft of Regulation for the purpose, and to submit it to the Governor General in Council for his consideration and orders.

Upon questions regarding the intent and meaning of any Regulations, the Commissioners to address themselves to the Court of Sudder Dewanny Adawlut, and to be guided by their determination

The Commission in no case to consist of less than two persons, one of whom to be selected from among the Officers in the Judicial Department.

one of whom at least shall, in all practicable cases, be selected from among the Officers in the Judicial Department of the service.

5th. Provided however, that in any case wherein the Commissioners shall entertain doubts of the intent and meaning of any provisions of the Regulations which are or may be in force, they shall submit the point to the Court of Sudder Dewanny Adawlut for their consideration, and shall be guided by the determination passed by that Court.

6th. Provided further, that whenever Government shall determine that the Commission to be appointed under the provisions of the Regulation above mentioned, shall not be placed under the control of the Sudder Dewanny Adawlut, the Board of Revenue, the Board of Commissioners, or the Board of Trade, such Commission shall in no case consist of less than two persons, one of whom at least shall, in all practicable cases, be selected from among the Officers in the Judicial Department of the service.

BORROWING, LENDING.

By Regulation XXXVIII of 1793, covenanted servants of the company employed in the administration of justice, or the collection of the Revenue, are prohibited lending money to proprietors or farmers of land, dependent talookdars, under-farmers, or ryots, or their sureties.

By Revenue C. O. of June 4, 1822, it is ruled that there is nothing more to be deprecated, than that the officers charged with the civil administration of the country should be under pecuniary obligations to zemindars, or other holders, or farmers of land, in the districts under their authority; the objection applies still more directly to such loans received from the Guardians of Wards, or the managers of their estates.

In this respect the practice of borrowing money is likely to prove much more hurtful to the public service, and injurious to the good name of the officers of Government, than that of lending, against which the Rule of Regulation XXXVIII 1793, is directed.

The Revenue C. O. of May 23, 1823, requires that no public servant shall employ, or appoint, or continue in office, any relative to whom, or to whose relative or dependant, he is, either directly or indirectly, indebted, without incurring, whenever the circumstances may be made known to his superiors, the most serious responsibility.

SALES TO NATIVES.

The Court of Directors have declared they will consider every officer highly culpable in being habitually concerned in Sales of horses, cattle, &c. with zemindars who might be suitors in their Courts; in as much as they infringe an expressed Regulation, and violate a solemn engagement.

RESOLUTION REGARDING MUZZERS AND SUPPLEMENTAL ORDERS TO OFFICERS OF THE GENERAL DEPARTMENT.

Fort William, the 2d June, 1820.

The right honourable the governor general in council having resolved to abolish the custom which prevails generally throughout the provinces subject to this

presidency, of natives presenting Nuzzars in money, and trays of fruit, and other articles, on the occasion of their paying official or complementary visits to public Functionaries in the service of the honorable company, it is hereby notified for the general information of all public officers under this presidency, that the custom in question is strictly prohibited from the date of the publication of this notice, and that it is the expectation of government that all public Functionaries will adopt every measure within their power to make this prohibition generally known, and obeyed by all natives of whatever rank or degree with whom they have official or private intercourse,

In direction the abolition of the custom above referred to the governor general in council deems it due to the servants of the hon'ble company generally, to declare that the measure has not been adopted by government on the ground that it has been perverted to improper purposes by any public officer under government, but from the conviction that it subjects natives to useless, and frequently vexatious expense, and to extortion on the part of menial servants and department. His Lordship in council is indeed fully persuaded that the abolition of a practice open to such serious objections will be viewed with satisfaction by every officer in the hon'ble company's service.

In circulating this resolution to political officers it was stated that the prohibition relative to the acceptance of nuzzars and presents of fruit, &c. was intended to apply to the cases of individuals who are subjects or dependents of the British government, and consequently under their controul, and not to native princes and others to whom we have no right to issue a prohibition order, for with regard to complimentary presents of fruit from native princes, and others not subject to our authority the refusal might be offensive to their feelings, as contrary to established usage, but in as much as the practice can be discouraged without giving umbrage, the political officers were not to fail to act in the spirit of the resolution above quoted.

The resolution was circulated to all revenue and Judicial officers and to the Army with a mere intimation, that it was for their information and guidance.

BORROWING ARTICLES FROM NATIVES OR OTHER PRIVATE INDIVIDUALS, PROHIBITED.

Extracts of a General Letter from the Honorable the Court of Directors, dated the 13th Nov. and 23d December, 1833.

Para. 53. It was found that Mr. A. B. officiating commissioner of circuit had applied to a Zemindar for the gratuitous use of his budgerow which was to save him an expense of some hundred rupees. We entirely concur in the censure which you passed upon his conduct. Mr. A. B. we observe, made the following assertion: 'Borrowing boats, and elephants is a circumstance of daily occurrence, and I may with safety assert I believe that there is not an officer in the service who has not done so.' If this representation be in any degree well founded, we declare that a practice which is not creditable to persons in public authority, and in violation of the rules of our service, may be effectually put down.

On this it was ordered that the above should be circulated to the several commissioners for their information and for that of the officers subordinate to them.

THE MERIT FOSTERING ORDER AS AT PRESENT IN FORCE.

No. 2271,

Fort William, Judicial and Revenue Department, 20th December, 1836.

NOTIFICATION.

The periodical Reports on the official characters, qualifications, and conduct of all the sworn officers of government in the judicial and revenue

department, called for under the resolutions of the right honorable the Governor General in Council, dated the 26th of January, 1834, having been discontinued, under the orders of the Honorable the Court of Directors, by the resolutions of the Right Honorable the Governor General of India in Council dated the 27th of June last, and published in the *Gazette* of the 31 of July

"In obedience to the honorable Court's instructions it will be publicly notified that those reports shall henceforth be discontinued, but I am, at the same time, directed to state that his Lordship in Council is strongly impressed with the expediency of adopting all methods short of the systematic personal reports which have been interdicted by the Court for the purpose of bringing to notice the manner in which every public office is conducted, in order that Officers distinguished by merit may be brought forward and promoted, and that a stable notice may be taken of the conduct of those who are negligent and incapable."

The right honorable the Governor of Fort William in Bengal is requested, therefore, in communication with the Lieutenant Governor of the N. W. Provinces, to prescribe to controlling authorities in the several Departments of Government, an improved system of reporting the results of administration, or to issue such other instructions to his Lordship may seem best calculated to promote the object contemplated by the system now discontinued, namely, that the promotion of the service may be usefully and efficiently distributed, and its discipline and spirit upheld.

In hearing appeals from the Zillah Courts, every Judge of the court of Sadar Dewanny Adawlut shall note, in each case proceeds, any points that may strike him as affecting materially the character of the court below, and whenever, at the conclusion of an appeal, any Judge may be of opinion that the Proceed-

following, it has become necessary, under the orders of the Supreme Government, cited in the margin," to provide some method that shall not be open to the objections that have been urged against a system requiring superintending officers to prepare, at stated intervals, in analysis of the official characters of all the Officers under them; but that shall, nevertheless, be sufficiently effective for the objects which that system was organized to attain, and of which the importance has been fully admitted.

These objects are, firstly, the carrying into effect of the principle, which has been specially enjoined, of "enforcing responsibility in all superior functionaries for the incapacity or neglect, or wrongs committed by the civil servant under them, unless they are, as the cases may admit, either corrected, or reported to Government." Secondly, the bringing to the knowledge of Government all instances of eminent merit and qualifications amongst its appointed Officers of all ranks; so that the Government may be enabled, generally, to reward merit, to stimulate exertion, and to secure to the public service for vacant Offices the best qualifications available.

The following Rules, in amendment of those already prescribed for preparing reports of the results of administration, have accordingly been proposed by the Right Honorable the Governor of Bengal, in communication with the Honorable the Lieutenant Governor of the N. W. Provinces, and have been approved by the Right Honorable the Governor General of India in Council; they are now promulgated for the information and guidance of all officers in the Judicial and Revenue Department subject to the Orders of the Governor.

logs of such a court have been either remarkably well, or remarkably ill, conducted, it shall be his duty to make a note thereon for the consideration of the court, collectively, at their English sitting. The court will determine in what manner these notes may best be made available in the preparation of their annual report, for the expression of their collective opinion on the quality of the business performed by every Zillah Judge.

The court of Sudder Dewanny Adawlut is hereby required to make a Special Report on the subject of any Zillah, in which they may be of opinion that the state of civil business is such as to make it desirable for the sake of the public interests, that measures should be immediately taken to remedy the evil. In cases of less importance, it shall be the duty of the court to notice in their annual Report any serious defect which they may believe to exist in the administration of civil justice in any district under their Jurisdiction.

In addition to the number of cases decided by each Zillah Judge, the number of miscellaneous Judicial Orders passed by him, and the number of days employed in Session business, which information is now given in the annual Report of the court of Sudder Dewanny Adawlut, that Report shall in future show the number of appeals, Regular and Special, lodged against such Decisions and miscellaneous Orders, the result of all the appeal of a like nature from each Judge decided on during the course of each year, and the number of days in which each Judge sat for the transaction of civil business.

Copies, containing information with respect to the Proceedings of the several Session Judges, must be embodied in the annual Reports submitted to Government by the court of Sudder Nizamat Adawlut on the administration of Criminal Justice; and a corresponding method for laying the necessary information before that court collectively, must be adopted.

It shall be the duty of the several commissioners of circuit to report, in their Half-yearly Police Returns, their opinions on the general efficiency of the Police of each District under their Superintendence, and on the manner in which the various business in this Department has been performed by each of the Officers among whom it is distributed. It will also be the duty of each commissioner, to notice prominently in these Reports the extent to which the services of the Assistants to the Magistrates and Joint Magistrates in his Division have been employed, and the consequences of such employment, in order that the application and abilities of the several Officers in the Junior grades of the Service may be brought distinctly under the view of the Government.

It will be the duty of the Sudder Board of Revenue, immediately upon the close of every Bengal and Fuzly year, to submit to Government statement of all outstanding arrears of Revenue in every Bengal or Fuzly District, with a note of the proportion per cent. which such arrears may bear to the Jumma, in each case, and to remark, where necessary, in what degree the result is attributable to the conduct of the Collector or Deputy Collector in each District.

Until the completion of all Redemption and Settlement business, the annual Division Reports required from the Sudder Board of Revenue, showing the business that has been done in those Departments during the past years, and the plan of operations for the approaching cold season, will necessarily be continued. In these Reports, as far as those particular duties are concerned, the Sudder Board of Revenue are hereby required to represent every case in which the conduct of the Officers employed has been distinguished by zeal, and discretion, or by the contrary faults; and to call upon the commissioners and collectors under them, to furnish them with all Statements of the allotment of work to their assistants, and with all the other materials that may be necessary to enable them satisfactorily to perform the duty above required of them.

It is hereby declared that it is the duty of the Sudder Courts and Board, of the commissioners, of the Collectors and Deputy Collectors, and of the Magistrates and Joint Magistrates, to report to their immediate superior every case in which they may be of opinion that a subordinate Officer, subordinate to them is decidedly disqualified to discharge efficiently the duties entrusted to him; and it is hereby notified to all such Functionaries that it is considered an essential part of their duty to make themselves acquainted with the manner in

which their subordinate officers perform their duties; and that they themselves will be held responsible for any mischievous consequences that may result from any inefficiency, bad habits, or serious errors of conduct of those under them, that ought to have been known to them, unless they report the same for the information of their superiors.

In framing the rules which have been above prescribed, the right honorable the governor of Bengal has discharged the duty committed to him of improving, as far as possible, the established system for the control of the civil administration; for ensuring to efficiency its just reward; and protecting the public interests from the consequences of incapacity or neglect. But he cannot allow the opportunity of promulgating the rules to pass, without making known to the civil service in these provinces the high satisfaction with which since his arrival in India, he has observed the zeal, the justice, and the success with which, with rare exceptions, they have applied themselves to the performance of their various and arduous functions. To their character and public spirit more than to the operation of any formal system of supervision and control, he looks for a perseverance in the same meritorious exertions, and for a maintenance of the same careful regard, in their important and often delicate trusts, alike to public and to individual rights.

CASUALTIES.

All casualties to be reported to the departments of government concerned.
CUSTODY OF EFFECTS OF ESTATES AND PUBLIC PROPERTY.

All government servants are called upon to take charge of the effects of deceased public officers, and all public property generally when without custody.
GASSETTING MILITARY-CIVIL.

All matters affecting military officers employed civilly are always communicated from the civil to the military department and where gassetting is necessary, the same appears in the orders of both departments.

EXCHANGES.

Exchanges between servants of Bengal and Agra respectively may be sanctioned when the arrangements made for the exchange preliminarily by the parties concerned is unobjectionable in its nature, but application for transfer is not usually complied with except under special circumstances of which the government judges, taking into consideration the merits of each particular case.

LAW OFFICERS OF GOVERNMENT, HOW TO BE CONSULTED.

No district officers should consult the law officers direct, or otherwise than through the government secretariat of the department under which they serve.

ASSAY MASTER'S RETIRING PENSION.

Assay masters and deputy assay masters are permitted to retire after 20 years service including three years for the one furlough; the former upon £300 a year the pension of a superintending surgeon (but not subject like him to increase for longer service); and the latter upon £191 12, 6, the pension of a surgeon, and if compelled by ill health, duly certified, to quit India at an earlier period, the retiring allowance after ten years' service to be £200 a year for an assay master and £150 for the deputy.

RETENTION OF POLITICAL PRESENTS BY MILITARY OFFICERS.

On a claim to retain the presents received from the Lahore Durbar by the party who accompanied Ranjeet Sing's ashes to Hurliwar, it was observed that it was contrary to military usage and the established rules for officers and soldiers in the service of government to receive presents of such a nature.

KHULAT TO POLITICO-MEDICAL OFFICERS.

A Medical officer employed under orders of the political department for some weeks in attendance on the late Maharajah Ranjeet Sing, was presented on his departure from Lahore by that court with a Khelat and a cash Zafut.

The question having arisen as to whether under the general prohibition against the retention of such public officers they could be kept in this instance, the governor-general decided that both the Khelat and the amount balance of cash that had been tendered as a Zafut might be retained by the medical officer in question, not as a political present, but as a fee for medical attendance; as the chances were that had he been at his own station he would have been gaining fees to the same amount for family medical attendance.

DEPUTATION ALLOWANCE.

An assistant at the political Residency of Indore drew a bill for deputation allowance for settling disputed boundary claims of Holkar, Scindia, and the Power estates.

This bill was returned by the civil auditor on the ground that the claim was not founded on the requisite authority of government for the charge.

The bill was passed, but the government remarked that officers on deputation were entitled to extra allowance, only when such deputation had the sanction of government.

2d ASSISTANT, INDORE.

The 2d assistant to the resident at Indore having claimed his military pay and allowances in addition to the salary of his civil appointment, such claim was declared inadmissible, in consequence of the rule established under the orders of the hon'ble court prohibiting the same, and it was ruled that he could draw only the salary of 2d assistant, viz. a consolidated one of Rs. 10-15 6, $\frac{2}{3}$ th chargeable to the option; and $\frac{1}{3}$ to the political department, after deduction of military allowances.

TENTAGE ON POLITICAL DEPUTATION.

On a claim of capt. A. B. for compensation for loss in tents sustained by him when deputed with the ashes of Maharaja Runjeet Singh to Hurdwar, it was observed that as capt. A. B. enjoyed an allowance for tentage under the regulation of government, his application for re-imbursement on account of wear and tear of tents could not be admitted.

His extra carriage expenses were however passed to Captain A. B.

OFFICE RENT.

The O. P. A. at ——— having solicited the sanction of government to a charge of 80 Rs. as office rent for conducting the duties of the agency at A. B. during the unhealthy season at C. D. It was observed in reply that government allowed Captain ——— to take up his residence at a distance from the court to which he was accredited for reasons of a personal nature, viz. the great personal risk of a residence at the unhealthy station of C. D. during certain parts of the year without his being subjected to any diminution of allowance; and that the government must not be charged with extra expenses on account of office arrangement under such circumstances.

STUDENTS AT THE SENIOR DEPARTMENT OF THE ROYAL MILITARY COLLEGE.

1. A candidate for admission to the senior department of the college must be a commissioned officer in the army, and must have completed the *twenty first* year of his age; he must have *actually* served as a commissioned officer with his regiment for three years abroad, or four years at home, unless he should have been reduced to half-pay before the completion of such period, when his claim will be considered.

2. His application is to be addressed to the Governor of the college, and be supported by satisfactory testimonials as to character and conduct; as likewise as to his battle and grounded in the duties of the particular branch of service to which he belongs.

3. Testimonials must be from the officer commanding the regiment in which he is serving, or, if on half-pay from an officer of rank in the service.

4. It is recommended that every officer previously to his admission should make himself master of the elements of penmanship; has thorough acquaintance with common arithmetic, as, of course, presumed and expected.

All the students will have the free use, under such regulations as the Governor may deem necessary, of the books, maps and plans in the college library.

5. The time allowed for the course of education at the senior department is two years from the day of the admission of such officer. Unless he has been educated at the junior department, in which case the period allowed is one year and a half.

6. At the close of every half-year of residence the student is required to undergo an examination in progressive portions of the course of instruction; when, if he be found not to have made the advancement required in the six months, he will be again needed to join his regiment without waiting for the period allowed for the completion of the course.

7. Officers performing the required course of studies, are, at the close of their residence, presented with certificates of their qualifications from the commissioners of the College, according to the degree of proficiency and talent evinced at the public examinations.

8. The number of students in the senior department is at present limited to fifteen.

9. Each student pays into the funds of the college such sum annually as has been previously determined by the Board of Commissioners.

10. The annual subscription at present is thirty guineas.

11. Every officer, on becoming a student, is required to subscribe two guineas to the College Library Fund.

12. Quarters are provided for the officers of the senior department, at the College. And for the money for washes (under the authority of the college's Board) is allowed to such as have made sufficient progress in their studies to qualify them for sketching in the field.

13. Every officer studying at the senior department is required to wear his uniform with the same strictness as if on duty with his regiment.

14. In case any officer belonging to the senior department conducts himself in such manner as may appear to be at all detrimental to the institution, or holding out a bad example to the young gentlemen of the junior department, either by want of application or in other respects, a report upon his conduct will be transmitted by the Governor to the Adjutant General, with a view to his being withdrawn from the institution.

15. Regimental officers on full pay, who obtain permission to become students at the Senior Department of the Royal Military College, or to be, reported in the regimental returns in the column of "officers absent on duty" for the period during which they remain at the College.

SETTLERS IN THE COLONIES.

No. 456 GENERAL ORDERS.—*Horse Guards, 24th August, 1827.*

His Majesty being desirous of holding out further encouragements to officers on half-pay, to become settlers in New South Wales and Van Diemen's Land, has been pleased, in reference to the General Orders of the 8th June, 1826, and 19th May 1827, to command that the following additional inducements shall be promulgated to the army, for the information of those officers who may be disposed to avail themselves of the benefit of this arrangement.

All officers on half-pay, who purchased and were reduced, whatever may have been the period of their service, or officers on half-pay who did not purchase, but who, after having served twenty years, half of which on full pay, have been reduced, or have retired to half pay on account of wounds or impaired health, shall be exempted from that part of the regulation contained in the General Order of the 8th June, 1823, which requires the officer to relinquish one-third of the value of his commission to the Crown, and shall be allowed to receive the full value of such commission, in the same manner as officers on full pay, who having purchased the commissions, or having served twenty years, are desirous of selling out for the same object.

His Majesty has further been pleased to command, that this advantage shall be extended to officers of all ranks, whether in or full pay, retired full pay or half-pay, but that in the two latter classes, all sales shall be subjected to the conditions and restrictions established by the General Order of the 2d May, 1825, notwithstanding that a large portion of the officers on half-pay would be excluded thereby from sale, and in order that the government may have full security or the appropriation of the sums produced by the sale of commissions to the intended purpose, it is His Majesty's command that the agent to whom the purchase money be paid, shall be instructed to retain in his hands one-third of the amount in each case, to be paid to the officers who purpose to emigrate, and who shall have obtained permission to dispense of his own situation, or his half-pay, with that view, upon his producing to the agent a certificate, signed by the master of the vessel, that he has engaged his passage on board such vessel for the purpose of proceeding direct to the colony.

By His Majesty's command,

HENRY TORRENS, Adjutant-General.

CIRCULAR, No. 647.

War Office, 21st November, 1828.

Sir,—The King having been graciously pleased to direct that the several rules and orders under which pensions and allowances are granted, on account of wounds received in action, should be consolidated and amended, and that certain additional regulations relative thereto, shall be established, I have the honour to transmit for the information and guidance of the officers under your command, a copy of the amended regulations, and have the satisfaction to acquaint you, that His Majesty has directed, that in all cases in which officers now on the pension list shall, during periods of not less than five years, have

been in receipt of pensions for wounds received in actions, they shall in future enjoy their pensions without being subject to the inconvenience of personally appearing from time to time before the Army Medical Board.

I have, &c.

Warrant regulating the grant of pensions and allowances to officers of the land forces for wounds received in action.

GEORGE R.

Whereas we think it expedient to consolidate and amend the several rules and orders under which pensions and allowances are granted on account of wounds received in action, by officers of our land forces, and to establish certain additional regulations, relative thereto; our will and pleasure is, that, from and after the date hereof, the regulation annexed to this our warrant, shall be the sole rule on this head; and that the cases in which pensions and allowances may be recommended to us to be granted to officers, shall be limited to wounds and injuries received in action, and shall be established by the production of such certificates and reports of Medical Boards, as shall be required by our secretary at War.

Given at our court at Windsor, this 14th day of November, in the tenth year of our reign.

By His Majesty's command,

HENRY HARDINGE.

REGULATION.

1st.—If an officer shall receive a wound in action, which shall occasion the loss of an eye or a limb, or the total use of a limb, or limbs, or shall receive bodily injury fully equal to the loss of a limb, he may be eligible to receive a gratuity in money of one year's full pay of the regimental rank, or staff appointment, held by him at the time he was wounded.

2nd.—If an officer shall be wounded in action, and it shall appear upon an inspection made of him by a Board of army medical officers, assembled by order of the secretary at war, that such officer has, in consequence of his wound, lost a limb or an eye, or has totally lost the use of the limb, or that he has sustained a severe injury in action, fully equal in every respect to the loss of the limb, he may be recommended to his majesty for a pension at the rate fixed in the annexed scale for the rank held by him when he was wounded, and commencing one year after the wound was received; the continuance of which shall depend upon subsequent examinations before the Military Medical Board.

3rd.—If the officer shall have lost more than one limb or eye, he may be recommended for pension for each limb or eye so lost in action.

4th.—If the wound received by an officer in action shall be so severe, in its permanent effects, as to be nearly equal but not fully equal to the loss of a limb, such officer may be recommended for a gratuity of eighteen months' full pay of his regimental rank, or staff appointment, held by him when wounded; in which case no pension shall at any subsequent time be granted to him under this regulation.

5th.—If any wound, received in action, shall be certified to be severe and dangerous, but in its permanent effects not equal to the loss of a limb, the officer receiving such wound may, in consideration of the expence attending the cure thereof, receive a gratuity, varying according to the nature of the case, of from three to twelve months' full pay of the regimental rank, of staff appointment held by him at the time he was wounded.

6th.—If an officer shall have had a pension for a wound received in action for a term of five years, and shall have been examined twice at the least, before a Board of Army Medical Officers, he may be recommended for the permanent continuance of such pension; but if the officer, before the expiration of the term of five years, shall have so far recovered that this wound or injury is not fully equal to the loss of a limb, then he shall cease to receive such pension, and shall have a gratuity of full pay according to the degree of his injury, as laid down in article 3.

7th.—If within the period of five years after a wound has been received, an officer does not apply for the pension, or applying for it, the wound shall not have been proved to be fully and permanently equal to the loss of a limb, such officer's claim to a pension shall not at any subsequent period be entertained.

8th.—No gratuity or allowance for any wound shall be granted after the lapse of five years from the time the wound was received.

9th.—No pension for the loss of one eye, from a wound received in action, shall be granted, unless the actual loss of vision shall have occurred within five years after the wound was received, and be solely attributable to such wound.

10th.—As a general rule, the pension shall be granted according to regimental rank; but in cases in which officers with Brevet rank shall have been employed at the time they were wounded, in discharge of duties superior to those attached to their regimental commissions, the pension shall be given according to the Brevet rank.

11th.—These pensions being granted as a compensation for the permanent disability sustained by wounds received in action, may be held together with any other pay and allowance to which an officer may be entitled, without any deduction on account thereof.

HENRY HARDINGE.

PAY OF GENERAL OFFICERS WHO ARE NOT COLONELS OF REGIMENTS.

WILLIAM R.

Whereas it has been represented to us, that the general officers in our army who are not Colonels of regiments, have not been sufficiently provided for by our warrant of 23d July, 1830; our will and pleasure is, that the pay of all General Officers in our army, who, under the fourth regulation of the warrant before referred to, are entitled to receive the full pay of their last regimental Commission, shall from the 1st April last inclusive, be made up to the rate of four hundred pounds per annum.

Given at our court at St. James's this 28th day of May, 1833, in the 58th year of our reign.

By His Majesty's command,

HOWICK.

ORDER AGAINST DRAWING BAYONETS.

General Order, Horse-Guards, 18th June, 1833, No 520.

Some cases having lately occurred, in which soldiers have drawn their bayonets upon each other, and also upon other persons who happened to come in contact with them, whilst quarrelling in the streets and in public houses. The General-commanding-in-chief desires, that the soldiers of the army may be reminded, that they are armed for the protection of their King and country, and for the support and execution of the laws, when lawfully called out for these purposes; that they were their side arms as an honourable distinction of the profession to which they belong; that they are not to use them in private broils, or even for their own personal defence upon such occasions; and that it is the duty of the soldiers to avoid resorting to places in which such broils are likely to take place, more particularly when dressed as soldiers with their side arms.

The General-commanding-in-chief is determined to put an effectual stop to so dangerous and disgraceful an offence, by the punishment and degradation of every soldier who shall, hereafter, be convicted of it.

To this end LORD HILL desires, that commanding officers of regiment depôts, will bring to summary trial, for unsoldier-like and disgraceful conduct, every man who shall be reported to have drawn, or attempted to draw, his bayonet for the purpose of using it against another person in any case of dispute, affray, or interference.

His Lordship further desires, that every soldier convicted before a court-martial of having used, or attempted to use, his side arms, in any of the cases herein contemplated, may, in addition to the punishment awarded by the court, be degraded on the public parade, in front of the regiment or depot to which he belongs, by being there stripped of his bayonet, and bayonet belt, and proclaimed by the commanding officer as a man unworthy to be entrusted with the care of his bayonet, except in the ranks, under the view and command of his officer.

In all such cases, the offender shall be stripped of his side arms by the pioneers, in order to enhance his degradation. He who is thus degraded, shall not be suffered to wear his bayonet or bayonet belt, except upon duty, for one year from that date of his degradation; during which time he shall be denied every indulgence to which the good soldier is entitled, and shall march to church, in the ranks, without side arms. His name shall, moreover, be posted up in some conspicuous place in the barrack-room of the company to which he belongs, on the barrack gate, and on the doors of the guard house, and canteen.

The General Commanding-in-chief feels confident, that these measures will, with the zealous co-operation of all classes of officers and the vigilance of the Non-commissioned officers, soon rescue the army from the stigma which a few unworthy individuals would attach to it, by resorting to a base and unmanly expedient, heretofore unknown amongst British soldiers.

By command of the Right Honourable the General commanding-in-chief,

JOHN MACDONALD,

Adjutant General.

THE APPENDIX.

SECT. I.—STAFF ALLOWANCES.

Augmentation of — We further direct, that no increase be made in the existing salaries of our Staff Officers without our previous approbation; and we take this opportunity of apprising you of our fixed determination to order the retrenchment of all salaries and allowances which do not meet with our concurrence; and we desire that this, our intention, may be made known to any officer, or other person to whom you may grant any allowance dependent upon our sanction, so that the individual may be aware that he is liable to be called on to refund whatever sums he may receive, under such circumstances, in case of the allowance not being approved of by the authorities at home.—*Para. 219, letter C, of date 11th June 1815.—G. O. G. G. 25th February 1818.*

Letter dated 15th August 1835.

With reference to Court's orders to Madras of 5th August 1834 (a copy of which was forwarded to applicable to Bengal in Court's letter of 11th February 1835) regarding the allowances of General officers on the staff, while absent from their divisions on leave, submit a representation of the injurious effect of the regulation therein laid down, and urge the grounds upon which the Court are requested to reconsider the orders in question, and to grant the officers so employed an immunity from any forfeiture of allowances, while absent from their divisions on leave within the limits of the Presidency to which they belong.

Para 5. General Officers arriving from Europe.— The following paragraph of a Military Letter, dated the 23rd October 1830, from the Honorable the Court

of Directors, in the Governor in Council of Fort Saint George, being also applicable to this presidency, is published for general information.

7. We have to apprise you, that the General Officers on the Staff appointed by us, are not considered by us to be entitled to any portion of their Staff Allowances for any earlier period and then that of their arrival at the station at which they may be appointed to serve.—G. O. G. G. 1st April 1840.

Under instructions from the Honorable the Court of Directors, and in continuation of Government General Orders, 32d April 1831, No. 68, the Right Hon'ble the Governor General of India in Council is pleased to notify, that a General Officer of the Hon'ble Company's Service returning from Europe with an appointment by the Home Authorities to the General Staff of any of the Presidencies in India, from the date of his landing at the Presidency to which he is appointed, will, in like manner with General Officers of the Royal Service placed by her Majesty on the General Staff of her Majesty's Forces in India, be entitled to draw his Staff Allowance from that date, and the officer vacating the Command will draw the same to the date of publication at the headquarters of his Division of the General Order announcing the arrival of his successor.

8. The recent Orders sanctioning in certain cases, Pay and Allowances to Officers from date of arrival at Bombay, His Lordship in Council is pleased to declare, have no reference to Staff Allowances in any case.—G. O. G. G. 5th May, 1841.

Aide-de-Camp to Governor General—The staff salary of Aides-de-Camp on the personal staff of the Governor General, the Vice President, the President of the Council, the Deputy Governor of Bengal, the Lieutenant Governor of Agra, and the Commander-in-Chief, is to be considered a consolidated allowance fixed with reference to the appointment, and not alterable in any of its items, with the rank of the holder.—G. O. G. G. 26th November 1834.

Officers with their Corps on Service.—The Right Hon'ble the Governor General directs, that the following rules be observed in regard to staff officers temporarily withdrawn from their appointments for the purpose of joining their regiments on field service.

Officers on staff employ, when temporarily withdrawn from their appointments for the purpose of joining their regiments on field service, will be permitted to draw, while so employed, their full staff salary, provided that other officers are not appointed to officiate for them, and that they hold no staff situation in the army with which they are serving.

In cases when other officers may be employed to officiate during the absence of staff officers (as above) a moiety of their staff salary will be drawn by the substitutes, and the other moiety by the officiating officers.—G. O. G. G. 31st August 1838.

Official Batta, Tentage, &c.—The Right Honorable the Governor General of India in Council is pleased to recede all orders and regulations now in force, which assign to officers employed in staff or other situations, a rate of Pay, Batta, Gratuity, Tentage or House Rent, superior to the scale laid down for their regimental rank.—G. O. G. G. 2nd December 1834.

Temporary Adjutants of Local Corps.—The Right Hon'ble the Governor General of India in Council deems it expedient to notify, that Officers Commanding Irregular Corps, or holding the appointments of and in command of such corps, whether cavalry or infantry, are not considered entitled to any extra staff allowance, when temporarily performing the duties of Adjutant. On such occasions, office allowances of the situation only will be passed to them, as follows :

SECTION II.—APPLICATIONS AND RECOMMENDATIONS FOR APPOINTMENTS.

The Commander-in-Chief feels it necessary to apprise the Army at large, that there are very few cases, and those of the most urgent nature, in which he can feel himself justified in dispensing with that most salutary Rule of Discipline and good Order, which prescribes the forms and channels in and through which Applications are to be made to Head Quarters for Appointments.

It is quite impossible to hold Commanding Officers of Regiments responsible for the important Charge with which they are entrusted, if their legitimate authority and control over the members of their Corps is not duly maintained and upheld.

They alone are the Judges in the first instance of the merit and claims which entitle the Officers and Soldiers under their Command to indulgence and consideration, and it is consequently to their Judgment and Recommendations the Commander-in-Chief mainly looks for that information which may enable him justly to determine upon the Applications which are submitted for his decision.—*G. O. C. 21st January 1823.*

With reference to the concluding paragraph of General Orders, dated 21st January 1823, the Commander-in-Chief is pleased to direct, that all applications to His Lordship for appointments on the Staff, shall be transmitted to the Military Secretary, through the Commanding Officer of the Corps to which the applicant belongs, or through the heads of Departments, when the applicant happens to be employed in any Department of the Staff.

The transmitting Officer will give his opinion on the qualifications of the Officer applying for an appointment; especially stating whether he has received from him that support and assistance, which he ought, in his situation in the Corps or Department, to have afforded.

A statement of service should also accompany all applications of the above nature.—*G. O. C. 3rd July 1817.*

Under instructions from the Right Hon'ble the Commander-in-Chief, the Major General Commanding the Force directs, that all applications for Regimental Staff Appointments in the Hon'ble Company's Service, be addressed to the Adjutant General of the Army.—*G. O. C. 24th May 1834.*

On the occurrence of a vacancy in the appointment of Adjutant, or of Interpreter and Quarter Master, in any of the Regiments of the Bengal Army, the Officer Commanding the Corps will accompany his report of the vacancy by a Return containing the names of the three Officers in the Regiment whom he may consider the most worthy of his recommendation to fill the situation.

2. Opposite the name of each Officer in the Return is to be inserted a detail of his qualifications in the following particulars, namely;

1st. His acquirements as an Officer, with reference to the vacant appointment.

2nd. His knowledge of the Native languages.

3rd. His temper and general conduct as an Officer and a Gentleman.

3. The proportion in which each of the Officers recommended possesses each of the three qualifications may be conveniently represented by a scale, the maximum of which can be fixed at 20; and in order that it may be clearly understood what is here meant by a scale, the following explanation is offered for the information of those concerned;

4. For instance, the scale of qualification of Lieutenant A.

1st. Acquirements as an Officer, 20. (He being considered perfect.)

2nd. Knowledge of the language, 15. (He being less than what would be considered perfect by one-fourth.)

3rd. Temper and general conduct 20. (Being considered perfect.)

Or scale of qualification of Ensign B.

1st. Acquirements as an Officer, 17. (Not being so perfect as he might be.)

2nd. Knowledge of language, 20. (He being considered perfect.)

3rd. Temper and general conduct, 20. (He being considered perfect.)

5. The object aimed at in calling for such details is, that the Commander-in-Chief may be enabled justly to appreciate the comparative merits, in the estimation of his Commanding officer, of each Officer recommended.

6. These reports will be considered by the Commander-in-Chief as confidential reports, and Commanding officers are required to view them in the same light.—G. O. C. C. 18th September 1835.

In complying with the order of 16th September 1835, the officers commanding regiments have varied much one from another in the form of return made.

The following is to be adopted in all future cases.

Names of three officers deemed the most fit for the situation of Adjutant (or Interpreter and Quarter Master) in the ——— Regiment.

Signature of the Commanding Officer.

The Commander-in-Chief takes this occasion to call the attention of the Commanding Officers of regiments, to the views which led him to issue the order under consideration. His object was to be enabled to place in the two situations, which, in a native corps he considers to be so important, the Officers in each regiment who are really the best calculated to fill them advantageously, and at the same time the most deserving, from their application to their duties, and from their acquirements.

In making the arrangement, he put aside every idea of patronage and personal favor.

Having done so, he expects that the Commanding officers of regiments will do the same, and that no such feelings shall have away in their minds, or lead to their recommendations.

If on any occasion he discovers that such has been the case, or that any under means have been used to obtain a selection for either of these appointments, the officer guilty of the same will meet His Excellency's decided reprobation and disapprobation.

The Brigadier commanding the corps of artillery has represented, that the aforesaid order does not work so well in the artillery, as in the regiments of the line, owing to 'the frequent change of subalterns from one battalion to another,' and the unequal distribution of officers, which the exigencies of the service require.'

The order, therefore, as far as it respects the artillery, is to be modified as follows, viz. 'The officer commanding a brigade of horse or battalion of foot artillery, on a vacancy, will send in the names of three officers of the corps under his command (as at present) to the Brigadier commanding the artillery, and that officer may add the names of other officers, of the same branch, and submit the whole for his Excellency's consideration.'—G. O. C. C., 23rd May 1836.

Referring to paragraph 6 of the General Order of the 16th September 1835, it will be observed that the returns required are to be considered as confidential. His Excellency the Commander-in-Chief therefore desires that they may, in future, be sent direct from the Commanding Officer of a regiment to the Adjutant General of the Army.—G. O. C. C., 21st December 1837.

SECT. III.—BRIGADE MAJOR, PORT ADJUTANT, &c.

The following General Orders, by the Right Honourable the Governor General of India in Council dated 15th ultimo, are published for the information of the Army.—G. O. G. G. 15th July 1834

With a view of reducing the number of officers permanently withdrawn from corps, and of extending the advantages of staff employment more generally than the system which now obtains will admit, the Right Honourable the Governor General of India in Council is pleased to resolve that hereafterward the following situations shall be held only by officers whose regiments are serving at the stations or forming part of the garrisons to which the appointments appertain. Present incumbents are exempted from the operations of this rule;—

Brigade Major.

Cantonment Adjutants

Line Adjutants

Port Adjutants, when the appointment is held

by an effective Officer.

As Officers who may hereafter be nominated to any of the above appointments, must return to regimental duty on their corps marching from the station or garrison in which they are employed on the staff, the absence regulation will not be considered applicable to them.—G. O. V. P. 7th August, 1834

The Right Honourable the Governor General of India in Council is pleased to notify, for general information, that the provisions of the Government General Order, dated the 7th of August 1834, which directs, that the staff situation therein specified shall be held only by officers whose regiments are serving at the stations, or forming part of the garrisons, to which the appointments appertain, is not applicable to the situation of Port Adjutant of the fortresses of Fort William, Fort Saint George, and Bombay Castle.—G. O. G. G. 9th June 1835.

With reference to the General Order by the Right Hon'ble the Governor General of India in Council, dated the 15th July 1834, requiring that the situation of Brigade Major or Port Adjutant shall only be held by an officer whose regiment is serving at the station, or forming part of the garrison to which the appointment appertains; His Excellency the Commander-in-Chief, with a view to the preservation of the public records belonging to each station, is pleased to direct, that a register shall be kept in every Brigade and Port Adjutant's office, of the several documents which may be therein deposited. The Brigade Major or Port Adjutant relinquishing his office must transfer this book, together with all records to his successor, who will carefully compare the entries in the register with the documents made over to him, and on satisfying himself of the correctness of the former, he will give a receipt for the same, after which he will be held responsible for the public documents in the office, and bound to transfer them to his successor in the state in which he may have received them.

This register is to be retained in the Brigade or Port Adjutant's office, as the case may be.—G. O. C. G., 8th April 1836.

SECT. IV.—COMMAND BY CIVIL STAFF OFFICERS.

The Honourable the Vice President in Council is pleased to direct, that the following General Order by the Right Honourable the Governor General, be published for the information of the Army:

G. O. G. G., Simla, 4th July 1831.

A specific reference having been made to the Governor General upon the subject of the right of Military men employed in any civil branch of the Army, or under the civil Administration of Government, to take Military command by virtue of their commissions, when entitled by seniority to claim the same, it has been deemed necessary to lay down a general Rule, applicable to the provinces of the three Presidencies. The following Order has accordingly been passed, with the concurrence of His Excellency the Commander-in-Chief of His Majesty's and of the Honourable company's Forces in India.

Military men, when holding situations in any civil branch of the Army, or under the civil Administration of Government, cannot be allowed to claim, or exercise the right of command, as senior officers, by virtue of their commissions; without first resigning and relinquishing their civil employ or situations.

The distinctions and advantages of command are claimable only by those who are in the exercise of their profession, may be called upon for Military duties, and are liable to the privations and hardships of active service. By assuming civil employ, a Military man obtains present exemption from the severer duties of his profession, and generally superior emoluments, he cannot therefore be permitted to unite with the advantages of this line of service, the privilege of asserting a claim to supersede those, who, in the routine of duty and of promotion, become entitled to a Military charge or command.

The above Order is not intended to apply to officers placed with Detachments, or otherwise, in the temporary charge of districts by military authority, pending operations, although performing civil duties in consequence of such an appointment. Employment of this description may fall to any Officer in the course of his professional service, and cannot, therefore, be considered to involve any forfeiture of Military privileges.—*G. O. V. P.*, 20th July 1831.

With reference to the General Order by the Right Hon'ble the Governor General, dated Simla, 4th July 1831, the following list of public officers and Departments under the Bengal Presidency, to which the provision contained in the 2nd paragraph of that Order is declared applicable, is published under His Lordship's instructions for the information of all concerned.

SECT. V.—COMMISSARIAT DEPARTMENT.

The Honorable the Governor General in Council is pleased to lay down the following Rules for the Appointment and Promotion of officers in the Commissariat Department :

1st.—The commissaries at the Presidencies of Fort William and Agra together and of the Presidencies of Fort Saint George and Bombay severally, shall consist of.

- One Commissary General.
- One Deputy commissary General.
- Assistant commissaries General.

Deputy Assistant Commissary General.

Sub-Assistant ditto ditto.

The number of each of the three latter grades being regulated from time to time by the several governments respectively, according to the necessities of the service; and it shall be considered the imperative duty of the several commissaries general to report to government, whenever they may find, that the number of officers can be reduced consistently with the efficiency of their respective departments.

2nd. All appointments to the commissariat shall be made from the European commissioned ranks of the Honourable company's army, but no officer shall be held eligible to be appointed, who has not passed an examination in the native languages.

3rd. Every officer on his first appointment to the commissariat shall enter the department at the bottom of the junior grade. The only exception to this rule will be in the case of the commissary general who may be selected from the army at large, and be at once appointed head of the department; due attention and consideration being of course given to the service-claims, and fitness of the officers already serving, or who may have served in the department.

4th. No sub-assistant shall be promoted to the grade of deputy assistant who has not served three years in the former, and no deputy assistant to the grade of assistant commissary general who has not served four years as a deputy assistant, or seven years in the department; nor shall any assistant commissary general be promoted to deputy commissary general who has not served five years as an assistant, or twelve years in the department.

5th. If there shall be no officer in one grade of sufficient length of service in the commissariat, a qualified officer shall be promoted to the next, an officer will be appointed, when a vacancy occurs, to the lowest grade, and the promotion will be made finally when the obstacle here supposed no longer exist. But Seniority alone is not the only qualification for promotion from one grade to another, as superior claims, founded on services performed and supported by the recommendation of the commissary General, will have the preference, as laid down in General Orders by the Supreme Government, dated the 22d December 1815, 27th March 1819, and 24th April 1823; provided the individual shall have served in the Department the period necessary under these rules to qualify him for promotion.

6th. All officers of the commissariat are subject to the staff Regulations, on being promoted from one rank to another in their respective Regiments, but any officer in charge of a branch of the Department on actual field service, or with a foreign expedition, who may become ineligible by Regimental promotion may be continued in charge until such time as the commissary General can relieve him without loss of emolument to the public service.

7th. Officers leaving the Department on furlough to Europe, if re-appointed after their return, will have to enter at the bottom of the list of sub-assistants, but Officers compelled by sickness to return to Europe on medical certificate, and officers removed from the Department by promotion in their Regiments, will be held eligible to be re-appointed to any grade which their previous length of service in the Department may entitle them to hold under these rules, and the general regulations of service: provided that, on appointment they are not placed above any who were previously their seniors.

8th. Officers temporarily appointed to the commissariat by government, will receive while so employed, an allowance of 150 Rupees per mensem, but, without any claim to be confined in the office, and the same rule will apply, to temporary appointments made on emergency by commanding officers, on the application of officers of the commissariat suddenly obliged to quit their charge; or otherwise, provided such appointments be confirmed by Government.—G. O. G. 24th April 1835.

SECTION VI.—DETACHMENT STAFF.

His Excellency the commander-in-chief is pleased to direct that whenever a detachment is sent from a regiment, the strength of which renders the service

of an Adjutant requisite, the nomination is to be made by the officer commanding the regiment presiding at the departure of the party: in like manner, when a detachment composed of details from different regiments is made from the headquarters of a district or station, and for the staff duties of which an officer is allowed by existing regulations, the Brigadier, or other superior officer, detaching the party for the duty, will nominate the staff officer in his district or station orders.—*G. O. C. C. 30 h January 1838.*

Several instances having recently occurred of adjutants being nominated to perform the duties of detachment staff, when quarter masters were present and available for the situation, the commander of the forces directs attention to general orders by the governor general of the 16th December 1816, which are now republished for general information, and ordered to be strictly conformed to.—*G. O. G. G. 10th December 1816.*

The Right Honorable the Governor General in Council, advertising to the resignation of the 6th April 1814, whereby the post of adjutant and quarter Master of the native Infantry is abolished, is pleased with reference to General Orders by Government, bearing date the 15th January 1811, to direct that when a detachment consisting of the actual strength of two and less than three battalions shall be formed for service, either offensive, or defensive, the senior Interpreter and Quarter Master therewith shall perform the staff duties of such detachment with the extra allowance of about Rupees 80 per mensem; or where no officer of this description may be present, the senior adjutant with the detachment is to be appointed to that duty with a similar allowance.

This rule is also to obtain in cases where detachments may be formed consisting of the strength of one, and less than two battalions between neither an adjutant, or interpreter and Quarter Master may be present with such detachment, an officer is to be then specially appointed to act as detachment staff with the full staff allowance of an Adjutant of a battalion of native Infantry.—*G. O. C. C. 6th February 1830.*

Doubts having been expressed as to the nature of the seniority contemplated in the Government General Order of the 16th December 1816, touching the selection of an officer to perform the duty of detachment staff with a detail of two or more regiments of the line, it is directed, that seniority in army rank, and not seniority as a staff officer, is to be considered to give a claim to the situation.—*G. O., 23rd June 1840.*

SECTION VII.—PROPORTION OF OFFICERS FROM EACH REGIMENT.

The Honorable the court of Directors having determined that not more than five Officers shall be simultaneously absent on staff Employment from any one corps whether cavalry or infantry, the right honorable the vice president in Council, with the concurrence of the governor general, is pleased at the earnest recommendation of the commander-in-chief to establish on this head, a further restriction as to the grades from which the five individuals are to be taken.

The efficiency of the army in all its branches, being of the last consequence, it is deemed highly expedient towards the attainment of so important an object, that a proper number of experienced officers should be present with every regular Regiment, to contribute their aid in sustaining its discipline, and in diffusing that confidence amongst a native officers and men which conduces so essentially to the well-being of an army constituted as is that of Bengal. To secure, therefore, as far as the means at disposal will admit, the services with every corps of a portion of competent officers, the number of Regimental captains that may be absent at one time from the same corps of the line, on staff, or other permanent public employment, is restricted to two.

The measure here indicated, as calculated to conduce to the greater efficiency of the army, is designed to be wholly prospective, and by no means to affect present incumbents of the grade of captain, unless in such cases of emergency as his excellency the commander-in-chief may feel constrained to bring to the special notice of government.

To obviate all occasion for references, and for decisions on particular cases hereafter, the vice president in Council is pleased to announce as a rule to

future guidance that, when two captains are absent from a corps in public situations, and a subaltern of the same corps holding a detached staff situation, comes to be promoted to the rank of regimental captain, the officer so promoted shall be the individual to receive his appointment, under the operation of these orders.—*G. O. F. P.*, 17th August 1837.

The right honorable the governor general in council is pleased to relax the operation of the rule published in general orders of the 17th August last limiting the number of officers to five simultaneously absent from any one corps on staff employ, in favor of officers unequal for a limited period to the performance of regimental duty, from wounds received on service, and to declare all such officers eligible to be appointed to staff situations, without reference to the number absent from the corps to which they belong, but this relaxation of the rule in favor of wounded officers is not to be considered as giving any permanent increase for staff employ from the regiments to such officers, the number allowed from them being, as from all other corps, limited to five to which it will be reduced as situations lapse.—*G. O. G. G.*, 20th October 1827.

The governor in council having understood, that the phrase 'permanent public employment,' used towards the close of the 2nd paragraph of general orders of the 17th August last is liable to misconception, is pleased to explain that the term 'permanent' has reference, not to the conditions on which any public employment is held—but to whether the occupant be the real incumbent, or a *locum tenens* only—but to the nature of the employment; and was intended to exempt from the restrictions of the cited orders, such staff situations as may be found requisite on the formation of any army for service or of a body of troops for any special purpose; in which, and all similar cases, the officers to fill the brigade, detachment, or other local and temporary staff appointments, may be drawn from the corps composing the force, notwithstanding the provisions of the orders in question, regarding the number and rank of absentees.—*G. O. G. G.*, 28th December 1827.

The governor general in council is pleased to direct the publication in general orders, of the following extracts of general letters from the honorable the court of direct re, under dates the 26th November and 3d December 1838, and to declare their provisions alike applicable to the three presidencies:

General Letter, 26th November 1838.

Para 2. 'We think it necessary to declare that no officer be withdrawn from his regiment for the purpose of being appointed an extra or supernumerary Aid-de-Camp. Any officer, so withdrawn, and who does not hold an authorized staff appointment, will be directed to rejoin his corps, and in no case is any officer out of the regular and established number of Aides-de-Camp to be granted any allowance as such.

General Letter, 3rd December, 1838.

Para 17. 'You are aware of our great anxiety that the demands for the staff should be supplied equally from all the regiments in the service. Our orders limiting the number to be withdrawn from any one regiment to five, were dated on the 25th November 1838, and we are glad to perceive from your general order of the 17th August 1837, arising out of a valuable suggestion by Lord Combermere, that those orders have been made more precise in their application. We fully approve of the new regulation as published by you on that occasion; and we desire that it be strictly enforced at our several presidencies.'

18. 'The number of officers in each regiment, placed at your disposal for the staff, being more than adequate for all the demands which have ever been made for the services of officers on detached duty, we think it advisable still further to contract the limits of selection laid down in our letter of the 25th of November 1833, and we accordingly desire that no Regiment of Cavalry or Infantry shall have three officers withdrawn for detached employment, until all regiments have two;—our four, until all have three.'

20. 'Sufficient time has now elapsed since our orders of the 25th November 1833 were received and promulgated, to allow of their having been

brought into complete operation in every regiment, but if at the date of receipt of these orders, any regiment shall have more than five officers absent from it on detached employment, we desire that all in excess to that number be immediately relieved from their staff employ, and directed to rejoin their corps.'

21. 'In any future case, when four officers shall have been withdrawn from one Regiment on detached duties, and the number allowed for as being absent on furlough, (namely four) shall be complete, we desire that, if an additional officer shall require to proceed to England, on sick certificate, one of the four absentees on detached duty (the last withdrawn) be required to rejoin his corps.'

22. 'We have fixed the number at four, because by the operation of our present orders no more than this number can be withdrawn for staff employment, the number absent appearing by the last returns, to average rather less than four per Regiment.'

The honorable court having expressed their entire approval of the regulation published in the army, under date the 17th August, 1827, and desired that it be strictly enforced at their several presidencies, the general orders of the 23rd February, 1820, modifying the regulation above referred to, are accordingly cancelled.—*G. O.*, 15th May 1820.

With reference to the regulations now in force, for restricting the withdrawal of Officers from Regimental duty for staff employment. The Right Honorable the governor general in council is pleased to direct, that the following extract (Paragraph 3 of a letter, No. 47, from the honorable the court of directors, in the military department, under date the 8th May, 1833, be published in general orders, and that the rule therein laid down be made applicable to the three presidencies :

Purn. 3. 'Although we attach a very high importance to the rules established for restricting the withdrawal of officers from Regimental duty for staff employment, we shall not refuse our sanction to the exception recommended by the commander-in-chief and by the governor general, in favor of officers selected for the personal staff of the governor general, the commander-in-chief, the vice president in council, and the Aides-de-Camp of general officers on the staff, but upon the condition, (suggested by the governor general,) that 'no officer shall be informally withdrawn from his corps to the obvious detriment of its efficiency; and that an officer taken out of order from a Regiment shall not be eligible for transfer from a personal staff appointment to any permanent detached employment, unless whilst so withdrawn, the staff absentees from his corps shall be brought below the prescribed number.'—*G. O. G. O.*, 15th May 1820.

With reference to the extract of a general letter from the honorable the court of directors, dated the 3rd December 1828, published in general orders of the 15th May 1820, regulating the number of officers allowed to be absent from any one regiment on staff employ, it is hereby notified to the presidencies, under instructions from the right honorable the governor general, that the honorable court have determined, in accordance with the views of the supreme government that when it becomes necessary that officers, one or more, should be resorted to their corps, otherwise than by promotion under the provisions of general orders of the 17th August 1827, such officers shall be those withdrawn for staff duty.—*G. O. V. P.* 30th January 1833.

The attention of the government having been drawn to clauses 2 and 4, of general orders of the 17th August 1827,—the former, restricting to two the number of Regimental captains that may be absent at the same time from a corps of the line, on staff or other public permanent employ,—and the latter, providing for the return to his corps of any staff officer on promotion to the rank of captain, who would otherwise be an absentee in that grade in excess to two, the governor general of India in council, has had under consideration the consequences which have resulted from their combined operation, and being of opinion, that a strict adherence to the rules laid down in those clauses

most, occasionally, be productive of injury to the public service, and unnecessary hardship to individuals, is pleased to modify the provisions of both, to the extent herein-after specified.

When two regimental captains are absent from a corps of the line, on staff or other permanent employ, a third captain shall not be withdrawn for such employment, but a staff officer promoted to the rank of subaltern to that of regimental captain shall not, in consequence of his promotion, be required to vacate an appointment which he previously held, and to which he is eligible in his advanced rank, although two captains be already absent from his corps on staff or other permanent situations, unless the commanding officer should consider the return of such officer to his regiment essential to its due efficiency, and by application to the government obtain his sanction to that measure.

When at any time, under the operation of this order, the number of captains absent from a corps of the line shall have been increased beyond two, no other captain shall be taken from such corps for the staff, or other detached employ, till the number of its absentees in that grade be reduced to one.—*G. O. G. G.*, 2nd May 1835.

The following extract (*paras. 3 and 4*) of a Military letter from the Hon'ble the Court of Directors, No. 31, of the 11th May 1835, is published for general information :

Letter dated 15th June 1835, (No 64.) Forward copy of a general order issued modifying the 2nd and 4th clauses of the government orders of 7th August 1827, and strongly recommend the discontinuance of the regulation which compels government to select officers for staff employ from the Regiment from which fewest are absent; a restriction which is in the opinion of government both embarrassing and injurious to the public interests.

Para. 3. The general order, dated 25th of May 1835, modifying the general order of 17th August 1827, is sanctioned.

4 In compliance with your earnest recommendation, we also authorize you to abolish the other restrictive regulations relating to the withdrawal of European officers from regimental duties, with exception to the original order restricting the number of officers to be taken from any regiment or Battalion to five, and that no more than two of those withdrawn should be captains, and three subalterns.—*G. O. G. G.*, 5th October 1835.

It appearing that some doubts are entertained regarding the intention of general's orders of the 17th August and 8th December 1817, regulating the numbers of officers permitted to be absent from regiments of the line, on staff or other permanent employ, the governor general in council directs, that in cases where an officer may hold an affecting staff situation to which he is eligible both as captain and subaltern, he is not to be considered as disqualified for his appointment on promotion to a company, though two captains, one of whom, officiating in a situation which renders him liable to removal, should already be absent from his regiment; in this case, the officiating officer, and not the one newly promoted, would be required to join his corps.—*G. O. G. G.* 24th December 1838.

SECT. VIII.—QUALIFICATION AND ELIGIBILITY FOR THE GENERAL STAFF.

By Service and Rank.—Agreeably with orders recently received from the Hon'ble the Court of Directors, the following regulation is published, for general information.

No officer will henceforward be appointed to fill any situation on the general staff of the Army, who shall not have served four years, three of which in the actual performance of regimental or staff duty with a corps.

An officer may hold the situation of aide-de-camp after having served one year with his regiment, but the period passed in that situation, except when employed on field service, is not to be counted in the regimental duty as above prescribed.

General orders of the 20th August 1811 and 18th March 1820, are hereby cancelled.—*G. O. G. G.*, 31st January 1823.

The right honorable the governor general in council is pleased to direct that the provisions of general orders, under date the 3d January 1823, prescribing the period of service necessary to entitle an officer to hold any situation on the general staff of the army, be extended to every civil situation to which a military officer is eligible.—*G. O. G. G.* 12th August 1823.

In obedience to instructions, received from the honorable the court of directors, the governor general of India in council is pleased to revise and republish the rule laid down in paragraph 21 of general orders, dated the 19th August 1824, relative to appointments to the general staff.

'No officer shall be eligible to hold the situations of adjutant general, quarter master general, military auditor general, or commissary general, who has not previously attained the rank of major in the army, unless he shall have actually served twenty years in India. The deputies in those departments must have attained the rank of captain in the army, or have served twelve years in India; and the assistants, if they have not attained the rank of captain, must have served ten years in India.'

The above revised rule cancels the regulation published in general orders by the government of India, under date the 24th September, 1834.—*G. O. G.*, 30th November 1835.

No officer transferred from one regiment to another shall be eligible to a staff or civil appointment, although otherwise qualified, unless he shall have served two years in the regiment to which he may have been transferred.—*G. O. V. P.*, 24th September 1832.

Knowledge of the Native Language—The honorable the court of directors, having in a recent despatch again expressed their anxious desire, that a competent knowledge of the native languages should be generally diffused among the officers of their army, and having at the same time, deemed it necessary to prescribe that a certain degree of proficiency in one or more of those languages be in future considered an indispensable qualification for staff employ, the right honorable the governor general of India in council, with the view of giving effect to the wishes of the honorable court, without prejudice to the just claims of the many in other respects highly qualified officers now in the service, is pleased to publish the following rules for general information:—

I. No military officer who is now in the service, or who may enter it hereafter, will be deemed qualified for, if eligible to, the commissariat department, or the appointment of regimental interpreter, unless he shall have passed the examination in the native languages prescribed for candidates for the latter situation.

II. No officer who may enter the service hereafter will be deemed eligible to any staff situation, (except a temporary one during actual service in the field) or civil employ, until he shall have passed an examination in the Hindoostanee language.

III. Notwithstanding that officers now in the service, are exempted from the restrictive operation of the immediately preceding rule, it is to be distinctly understood that a competent knowledge of Hindoostanee, though not in their case an indispensable qualification for the situations open to others on the condition of passing an examination in that language, will, as hitherto, be always considered to confer a strong additional claim to nomination to the staff.—*G. O. G. G.*, 31st January 1837.

General Officers and Brigadiers—General Letter, dated 26th December 1825.

Letter from 16th Sept 1824.

Para. 5 to 12. On the death of Major General Thomas, Government was obliged, under the Regulations of 1700, to re-appoint a Major General (Marjuddell), who had already had a tour on the Staff. According to the Non-Issue of His Majesty's Decree, owing to a state of Peace, and to the general expediency of re-appointing the same Officer to the General Staff, it is earnestly submitted that the Senior Colonel should be declared eligible to the same advantages in regard to the Staff as Major Generals, when there are, in India, no Officers of the latter Rank, who have not already served their tour of Staff duty. The Colonel thus appointed will vacate the situation on the arrival of a General Officer from Europe, and the time of their service as Colonels will be ultimately considered as so much of their service on the Staff. Another vacancy having occurred by the addition of a 14th General Officer on the Staff, Colonel Stoddham, the Senior Officer of that Rank, has been appointed to do it.

5. Whatever General Officers may be required for the Company's Indian Staff, shall be taken from the Senior Colonels of their service, to whom the temporary rank of Brigadier General will be granted, until by the operation of His Majesty's General Decree, the Armies of India shall be again supplied with the required number of General Officers.—G. O. G. 6th May 1825.

His Excellency the Commander-in-Chief having brought to the knowledge of Government, the prevalence of an opinion among the Senior Field Officers of the Army, that they are by right entitled to succeed, in virtue of their seniority, to the Commands or raised by Brigadiers on the permanent establishment; the Right Honourable the Vice President in Council deems it necessary to put an end to so groundless a misconception.

His Excellency the Council accordingly pleased to direct, that it be henceforward distinctly understood, that seniority does not confer the right of succession to the rank of Brigadier, nor to any Extra Regimental Command of trust and importance.

It is expected by the Honourable the Court of Directors, that the most efficient Field Officers of their Army will be selected for employment as Brigadiers, as will be seen from the subjoined Extract of a letter from the Honourable Court, which is published for general information:

Extract General Letter, from the Honourable the Court of Directors, dated 21st December 1825.

Para. 27. This complaint, even if just, in reference to the General Officers, will not apply to the Field Officers of the Company's Army from whom our India Governments have the power of selecting the most efficient, and employing them as Brigadiers whenever their services are required.—G. O. P. 30th April 1827.

The following Extracts from a letter No. 65, from the Honourable the Court of Directors to the Governor of the Presidency of Fort William in Bengal, under date the 17th December 1824, are published in General Orders.

Para. 2. We are satisfied of the expediency of the measure proposed in these Paragraphs.

3. We accordingly authorize you, when no General Officers shall be present, except such as shall have had a tour on the Staff, or shall be unfit for such a Command, to nominate Colonels to the Staff on the Allowances of Major Generals.

4. A Colonel so nominated to the Staff will, however, be expected to vacate his appointment on the arrival of a General Officer eligible to replace him, and the time during which a Colonel shall have served on the Staff, shall be reckoned as part of the four years' Staff tour, prescribed by the Regulations, so that no Officer shall serve more than four years on the Staff except under the special circumstances provided for in the Orders of the 20th of April 1803—G. O. G. 6th May, 1826.

'We have no hesitation in expressing our opinion that our officers have no strict right to succeed to the appointments of Brigadier General on the ground of mere Seniority, these being Staff appointments, involving both confidence and responsibility. But we must express our firm reliance on the discretion and good feeling of our several Governments, that the claims of Officers to these or any other appointments arising out of length of service will never be set aside, except on public grounds.

'With respect to the question raised as to the disqualification of Colonels eligible by Seniority to Divisional Commands to hold certain Offices which they could not hold under the present Regulations as General Officers.—We are of opinion that Colonels so situated ought to have the option of either retaining their appointments, or of succeeding to Divisional Commands as Brigadier Generals; but if they prefer the retention of their offices, the Divisional Commands should not afterwards be open to them, except in special cases to be determined by Government, and reported to us for our approbation and sanction.'

'The same principle ought to be applied in the case of Senior Brigadiers waving their right to succeed to Divisional Commands. If they prefer remaining as Brigadiers, the superior appointment of Brigadier General ought not, in our opinion, to be open to them, except in special cases.

'All the Members of your Government concur in recommending that General Officers or Colonels at Home, appointed by us to Divisional Commands, should not displace Officers previously in possession of these appointments, but wait the occurrence of vacancies after their arrival at the respective Presidencies. In compliance with your recommendation, we direct that henceforth a General Officer or Colonel, appointed by us to a Divisional Command, shall not succeed to that Command until the occurrence of a vacancy; unless we shall have specially directed otherwise.—*G. O. G. G.*, 1st June 1835.

Ordinance Officers.—His Lordship in Council is further pleased to direct, that the 4th, 6th and 6th Paragraphs of the General Order of the 19th May 1818, be rescinded, and that, in lieu thereof, the following modified Regulations be considered in force from this date, and adopted accordingly in place of the Paragraphs above referred to.

Para. 4. No Commissioned Officer shall be eligible to the Ordnance Commissariat, until five complete years from his first joining the Artillery. After his first appointment, a Deputy Commissary will continue to rise to the head of the List of Commissaries, provided his zeal and conduct be satisfactory to Government, unless he be promoted, in the mean time, to the rank of Major in the Regiment of Artillery, when he shall vacate his appointment.

Para. 5.—The selection for the Principal and Deputy Principal Commissaryship of Ordnance, will be made from the actual Deputy Principal Commissary, full Commissaries, and Officers who have formerly served as such, or from the Field Officers of the Corps of Artillery at large, at the discretion of Government.

Para. 6.—The situation of Deputy Principal Commissary may be held either by a Regimental Field Officer, or Captain, if of the latter rank, he be serving in the Department; but no Officer under the degree of a Field Officer in the Army, is to be eligible to the Principal Commissaryship of Ordnance.—*G. O. G. G.*, 4th August 1831.

Quarter Master General's Department.—It will be a permanent Regulation of this department, that the candidate for appointment shall previously produce a Certificate either from the Surveyor General in India, the Chief or acting Chief Engineer, or the Superintending Engineer of the Province in which he is stationed, of his possessing a competent knowledge of the theory and practice of surveying.—*G. O. G. G.*, 12th August 1834.

Interpreters.—His Excellency the Commander-in-Chief, considering it of primary importance and advantage to the service, that the situation of Interpreter and Quarter Master to Native Corps of the Line should be held by Officers fully competent to the performance of the duties; and also with a view of encouraging a more general study of the Native Language, is pleased to enact the following rules for the attainment of these desirable objects.

Officers applying under the sanction and approbation of the commanding Officers of their corps for the situation of Interpreter, shall be required to pass an examination in the Hindoostanee Language before a committee of competent Officers, to be assembled by order of the commander-in-chief at the Head Quarters station of the Division.

The committee will forward to the Adjutant General of the Army, a detailed report of the examination, with a certificate specifying the nature of the Officer's proficiency, and will state their opinion of his competency to conduct the duties of an interpreter to a General Court Martial.

The favorable certificate and opinion of the committee will be sufficient authority in the first instance to render an Officer eligible to hold the situation, but before he can be finally confirmed in it, he will be required to undergo, with the sanction of the Governor General in Council, a further examination by the Public Examiners of the College of Fort William, and to obtain from them a favorable certificate and opinion of his qualifications. And for this purpose he will (on the occasion of his arrival within the limits of the Presidency Division, either in the course of relief or otherwise) be directed to repair to the Presidency.

But Officers within the limits of the Presidency Division, at the time of their application for the situation of Interpreter will not be required to pass any preliminary examination.

The foregoing Rules will be applicable to all Officers recommended to officiate as Interpreters; and officers now actually holding the situation of Interpreters, will be required to pass the examination above prescribed twelve months after the promulgation of this Order to the Corps.—G. O. C. C., 17th February 1825.

The Commander-in-Chief is pleased to notify to the subaltern Officers of the Army the scale of qualifications expected in the candidates for the office of Interpreter in Native corps and the tests by which such qualifications are to be ascertained; viz.

1st. A well grounded knowledge of the general principles of Grammar.

2nd. The ability to read and write with facility the modified Persian character of the Oordoo and the *Dari Naagree* of the Khurra Bolee.

3rd. A colloquial knowledge of the Oordoo and Hindoos, sufficient to enable him to explain with facility, and at the moment, say orders in those dialects, or to transcribe Reports, Letters, &c. from them into English.

The Tests by which these qualifications are to be tried—are.

1st. By well selected questions not of the niceties, but of the general leading principles of Grammar.

2dd. By viva voce conversation with the Examiners.

3rd. By written translations into Hindoostanee in both characters, of selected Orders or Rules and Regulations.

4th. By reading and translating the *Baghe-Nahar* in Hindoostanee; the *Prem Sagur* in Khurree Bolee; and the *Gollistan* or *Unwar-i-Sohally* in Persian.

It will be the duty of committees of examination to ascertain the attainments of Candidates by the foregoing rules; and their Reports are to specify the proficiency of the party examined, under each of these heads.

The Commander-in-Chief desires it to be farther understood that previous examination in the College of Fort William, if successful, will be considered as sufficient proof of qualification; but that the examinations which took place of Officers quitting the Barracks Institutions, will not exempt Candidates from the operation of the foregoing Orders.—G. O. C. C. 27th May 1825.

The Commander-in-Chief impressed with the necessity of obviating the inconvenience likely to arise to the Public Service, from the appointment of Interpreters who are not qualified for the duties of the Office, has determined not to appoint any officer permanently to that situation, who shall not have passed an examination, and have been reported qualified for it.

The recommendation of the Commanding Officers of the Regiment will be so far attended to, that the Officer recommended will be appointed to act as Interpreter and Quarter Master, until the Commander-in-Chief shall have ascertained from the report of the Committee of Examination, what Officer is best qualified for the situation.

When it shall happen, which the Commander-in-Chief trusts it seldom will, that there is no Officer in the Regiment possessed of the requisite qualifications, the Commander-in-Chief will consider it his duty to appoint an Officer from another Corps, to act as Interpreter, until the Regiment shall produce one qualified for the office.

Anxious to extend the application of the principle on which this determination has been formed, and to give it practical efficiency, the Commander-in-Chief takes this opportunity of signifying to the Army, that in his selection for situation, on the Staffs depending on his recommendation, it is his intention to give ample scope to the operation of those causes, of which an Army, constituted as this is, is so essentially in need; encouragement of merit, and remuneration of services.—*G. O. C. C.*, 28th December 1827.

Under Inspections from his Excellency the Right Honorable the Commander-in-Chief, qualified officers from the infantry branch of the service will be appointed to do duty as Interpreters and Quarter Masters with Cavalry Corps, whenever Cavalry Officers who have passed the prescribed examination may not be available.

As Infantry Officers so nominated, will not be required to attend mounted and other duties peculiar to the Cavalry branch of the service, they are not to draw any other Allowances than those strictly belonging to the appointment, either in cantonment or when marching.—*G. O. C. F.* 14th July 1834.

SECT. IX.—QUEEN'S LOCAL MAJOR GENERALS

The following paragraphs of a military letter from the Honorable the Court of Directors, to the address of the Governor General of India in Council, No. 9 of 1837, dated the 19th of December last, are published in General Orders for the information of the Army.

Para 7. We have an objection to the promotion to the local rank of Major General of the Colonels of Her Majesty's army serving in India, who were senior as such to Colonels of our army promoted to the rank of Major General by the brevet of the 10th January 1837.

8. Under the special circumstances in which local Major General are placed, we consent to their being considered as eligible to continue to reside in India, and to hold those brigade commands which they would have held had their promotion not taken place, provided always that no interference be permitted with the commands on the general staff allotted to the Major Generals or Brigadier Generals, and Brigadiers of the Queen's and the Company's forces respectively.—*G. O. G. G.*, 9th March 1838.

The following military Letter, from the Honorable the Court of Directors, to the Governor General of India in Council, No. 3, dated the 11th September 1830, is published to the army.

Military Department, No. 3 of 1830. Our Governor General of India in Council—

We forward to you the copy of a Letter from Lieut. General Lord Fitzroy Somerset, dated the 15th instant, and of its enclosures, bringing to our notice, that the arrangements agreed upon and authorized for the promotion and employment of H. M.'s Lieutenant Colonels serving in India, who are senior as such to our officers promoted to be Colonels and Major Generals, have not been correctly understood. It will be apparent, on referring to our letters of

28th Jan. 1836 *paras 1 to 9*
9th Dec. 1837, *para. 8.*

the dates noted in the margin, that those officers of Her Majesty's service who have been promoted to be local Major Generals, are eligible to be appointed to brigade commands in divisions, whether their Regiments may be serving in these divisions or not, provided always that no interference be permitted with the commands on the General Staff allotted to the Major General or Brigadier Generals and Brigadiers of the Queen's and the Company's forces, respectively.

2. In our letter of the 29th January 1855 we stated that if it shall be found impracticable to make either of the arrangements then suggested for the employment of officers of Her Majesty's service, who wish to remain in a division to an officers appointed to the command of that division, it would be indispensably necessary that the officers so situated should be called upon to consider of the course they would have to take; and they must have the option of retiring from the country as they would do if promoted to be Major General on a General Brevet, and not appointed to serve on the Staff. We have now to apprise you, that local Major Generals so situated may continue to reside in India unemployed, like Major Generals in our service, receiving the pay and batta of their Regimental rank, but with the understanding that the brigade commands usually allotted to the Queen's service, shall be given to the Queen's Officers available for them at each presidency, according to seniority.

London, 11th September, 1855.— With reference to the above letter, the honor. let. e President in Council is pleased to declare:

1. That local Major Generals of Her Majesty's service are eligible under the appointment of Government, for employment as Brigadiers, where Queen's troops are stationed, provided that such appointment shall not interfere with the commands on the General Staff allotted to Company's officers.

2. That the senior local Major Generals (of the Regiments at each Presidency) are in preference to be employed.

3. That the Brigadier's term of service shall be limited, as in the case of Major General, to five years; and half the number years which any officer may have served prior to the promulgation of this order, in command of a brigade, including any temporary command of a division, shall be deducted from that term.

4. That local Major Generals of Her Majesty's service, who prefer remaining in India in expectation of succeeding by seniority to brigade commands may do so, selecting their residences within the presidency in which their Regiments are serving, and receiving the pay and full batta of their Regimental rank.

5. That local Major Generals of Her Majesty's service, must hereafter be held to be ineligible to retain the command of their respective Regiments, and must vacate their brigade commands on the departure of their Regiments from India, or from one presidency to another.

6. That local Major Generals, of Her Majesty's service who have served, five years as Brigadiers, are not, without special sanction, to remain in India in receipt of full batta although the Regiments to which they belong may still continue on the India establishment.

7. That these rules shall have effect from the date of this General order.

—G. O. P. C., 16th January 1856.
The home authorities having disapproved of clauses 3, and 5, and of the provision of clause 6, of the General Order, dated the 21st of January last, the right Honorable the Governor General of India in Council in obedience to the instructions of the Hon. the Court of Directors, promulgates, for general information, the following revised rules for the employment in India of local Major Generals of Her Majesty's service.

1. Local Major Generals of Her Majesty's service, are eligible under the appointment of Government, for employment as Brigadiers, where Queen's troops are stationed, provided that, such appointment shall not interfere with the commands on the General Staff allotted to Company's officers.

2. The senior local Major Generals of the Regiments at each presidency are in preference to be so employed.

3. The period for which local Major Generals may retain brigade commands is not restricted to any number of years, but they must vacate such commands on the departure of their Regiments from India, or from one presidency to another.

4. Local Major Generals of Her Majesty's service, who prefer remaining in India, in expectation of succeeding by seniority to brigade commands, may

do so, selecting their residences within the presidency in which their Regiment are serving, and receiving the pay and full batta of their Regimental rank.

5. Local Major Generals of Her Majesty's service, are permitted to remain in India unemployed; they are not precluded from retaining the command of their respective Regiments, which they may, at their option, continue to exercise, provided there shall be no interference with the brigade or other commands allotted to company's officers—G. O. G. 20th July 1840.

The following extract of a Military Letter, No. 10, dated 4th November 1840 from the Honorable the Court of Directors, to the Governor General of India in Council, is published for General information:

Reply to a letter, dated 13th August 1840, No. 87—Transmit a G. O. 29th July 1840, relative to the position of local Major Generals of Her Majesty's service in India; also the minutes which have been recorded on the subject, to which the Court's attention is earnestly solicited.

appointed to commands as Major General, or Brigadier General and Brigadiers.

In conformity with the principle above referred to, local Major Generals absent from their Regiments, are not entitled to resume regimental command or employ, unless such resumption shall be permitted as compatible with your arrangement for the brigade and divisional commands of the force to which the Regiment is attached.—G. O. G. 6th January 1841.

SECT. X.—VACATION OF APPOINTMENTS.

It being desirable to fix, by one general rule, the limits under which Officers holding staff Appointment, or other Public employments, under this Presidency may retain them or otherwise, on promotion to superior Rank, and to provide, generally, for all doubts or contingencies, so far as they can be foreseen, by establishing one equal and uniform principle, the following limitations are to have prospective effect from this date:—

O. G. 23rd May 1823

In cases where Officers enter a Military command with a Political situation, one of which would be vacated on the attainment of superior rank under the operation of the General Orders, 23rd May last, but which the Public service may require should remain unaltered, the disqualification for either, is then only to take place on reaching the Grade assigned, as a limit for the Political situation.—G. O. G. 14th July 1823.

The situation of Lieutenant colonels commandant, both in extent of command and pecuniary H-cripts, having undergone a material change by the Orders of the Hon'ble the court of Directors, this day published to the Army, and placed on an entire new footing from that which was contemplated by Government, when it was directed that certain staff Appointments should be created on the attainment of that Grade; the Right Hon'ble the Governor General in Council considers it equitable to revise the Classes of General Orders 23rd May 1823, above alluded to and to resolve that it shall not come into operation with Lieutenant Colonels Commandant, until they shall be entitled to the Off-Buckoning Dividend of their respective Corps.—G. O. G. 6th May 1824.

'On the last report by the Governor General, the possibility of their being in India supernumerary Major Generals in the Company's service, was brought in question with him, and the other members of your Government, that no reasons being why, Major Generals should, in that event, vacate any Office or staff appointment of which they may be in possession until it actually comes to their turn to accept or decline Divisional commands, when the same rule will apply to them as we have now directed to be applied to Colonels holding staff appointments.'—G. O. G. 1st June 1825.

The Honorable the Vice President in council is pleased to direct, that the following Extract, (*Para. 1*) from a Military Letter from the Honorable the court of Directors, No. 79 of 1830, dated 23th July be published in General Orders.

Para. 1. 'In compliance with your Recommendation, and for the reasons which you have urged in support of it, we authorize you to extend the term of service of General Officers on the staff of your Presidency, from four to five years; and we permit Major General Pine to have the benefit of this Regulation.'—*G. O. V. P. 22nd November 1830.*

The following paragraphs of a Military letter, No. 20, from the Honorable the court of Directors, to the Government of Bengal, dated the 5th April, 1837 are published for the information of the army;—

Para 1. Having had under our consideration the regulations affecting the appointment of officers to established brigade commands, we have resolved that such Brigadiers of the 1st and 2nd classes as are regimental colonels, and who have succeeded to the benefits of the Off reckoning Fund, shall be required to vacate their respective commands after having held the appointment of Brigadier for five years; this regulation however to be subject to the same modification as the appointment of general officers to the staff; viz. that if, on any particular occasion, you should be of opinion, that the continued service of any Brigadier is indispensable to the public interests, you may continue him in the command until our decision on his case shall be made known to you. Upon every such occasion you will furnish us with the requisite information with the least practicable delay.

2. This regulation is not to be applied retrospectively to the period which Brigadiers may have served as such, prior to its announcement in General Orders; but we are of opinion, that for every two years which they may then have served as Brigadiers, they should be considered as having served one year towards the completion of their tour under the new regulation.'—*G. O. G. 31st July 1837.*

RECENT DECISIONS BY GOVERNMENT,

ON IMPORTANT POINTS OF THE

PAY REGULATIONS,

ALLOWANCES.

When serving in other Presidencies.—On occasion of the employment of a party from the Surveyor General's Department, within the limits of the Madras Presidency, the following arrangements were sanctioned. 1. The officer in charge drew the pay of himself, and all the public establishment from that presidency. 2. After passing the Narbudda, Sub-assistants of the 1st class received pay as those of the second class; and those of the second as those of the 1st class. 3. The officer authorized to hire persons, if practicable, for the carriage of the certain instruments, for which duty no regular establishment is maintained. 4. An advance of Rs. 5,000 granted to the officer in charge of the party.

Compensation.—A Captain of Madras Horse Artillery having been appointed Member of a Board of Artillery Officers in Calcutta, received full Regimental allowances as compensation for all the allowances including command allowances; he lost also house rent at the Presidency rate during his absence on the above duty.

On leave.—An officer proceeded on leave between Masters; he did not return at the end of the month, but availed himself of general leave obtained by him. His total leave did not exceed six months; his regimental pay and allowances were paid to him.

AUGMENTATION.

In Native Infantry.—On occasion of one company being added to each regiment of infantry, the commencement of the superior new companies, was restricted to the date on which the subsidiary orders on the subject were announced to the army.

BATTAL.

Forced Marches.—Though troops march from one place to another in fewer than the prescribed number of marches, extra batta is admissible only for the number of days they are actually on their march.

Artillery Drafts.—A captain of artillery, serving at Dum-Dum, was removed to a company on full batta. On being struck off his late company, he was ordered to take charge of drafts, and he was detained for some time with them at Dum-Dum. Full batta was passed to him from the date of being struck off his late company, because had he not been detained on the above special duty, he would have drawn full batta from that date.

Unexpected Detention.—A regiment was ordered to hold itself in readiness for a specified duty from a certain date; but its destination was afterwards altered, and it did not actually march till long after the date named, but as carriage was entertained from the date first ordered, extra batta was sanctioned for the corps from that date.

BOATS AND BOAT ALLOWANCES.

On the Indus.—Periods of boat allowance established.

From Peruz pore to Sukkur, 2 months.

" Sukkur to Bhawalpore, or its immediate vicinity 1 month.

On being first Posted.—An artillery officer, after eight years service at Dum-Dum, was ordered to receive charge of the artillery at Bassein. Boat allowance was granted to him as being for the first time posted, and as he had never been in receipt of full regimental allowances.

When on Steamers.—A detachment was despatched into Assam on board a steamer. The officers claimed boat allowance for the conveyance of their camp equipage, baggage, &c., for which there was not room in the steamer. As they were in receipt of tentage, and had a passage in the steamer, the claim was disallowed.

On joining from Sick leave.—An ensign doing duty at Barrackpore, proceeded on sick certificate to Van Diemen's Land, and was absent nearly two years. On his return he claimed boat allowance to join his corps, but as he had, before proceeding to join, received full allowances for more than eight months, his claim was declared inadmissible.

When Movement is Countermanded.—A native infantry regiment was ordered by water from Barrackpore to Binsapore. On reaching Binsapore it received an order to return to Barrackpore. Boat allowance for the officer was sanctioned from the presidency to Binsapore and back again.

To join a staff Appointment.—An officer belonging to a corps at Chittagong, was appointed major of brigade to the troops on the Eastern Frontier during the rains. He claimed boat allowance, but it was refused.

Skeleton Companies.—Certain skeleton companies being ordered by water from the Eastern frontier to join a recruit battalion at Jaunpore, boat allowance was sanctioned for the officers attached.

To join Head-Quarters.—After boat allowance had been sanctioned for a staff officer proceeding to join head quarters at the presidency, he received orders to proceed by dawk at the public expense. His boat allowance being retrenched, he appealed to be permitted to draw the whole or the actual expense incurred in transporting his baggage by water; his claim declared to be inadmissible, as he was in receipt of tentage.

COMMAND ALLOWANCE.

Pioneers.—Fifty rupees a month granted to the officer in charge of the pioneers entertained for service with the Bengal division of the army of the Indus.

Adjutant.—An adjutant of a regiment of the line having no personal command of a company, and merely falling into such command occasionally, is not allowed compensation for the loss of command allowance when absent on special or court martial duty.

Compensation.—A major general commanding a brigade, proceeding on service was placed in charge of a division, and the senior field officer of the force (not belonging to that brigade) without a line command, was placed in command of the brigade. On the major general's resuming command of his brigade, the officer temporarily in command claimed compensation for loss of allowance whilst proceeding to join his corps; his claim was disallowed.

Of Detachment of Local Infantry.—An officer of the line permitted to command four companies of the Sylhet light infantry at the frontier post of Luckipore.

Of Local Corps.—A major whilst in command of a corps of local cavalry was promoted to a regimental lieutenant colonelcy; but in consequence of the absence of the 2nd in command with a detachment and the sickness of the adjutant, there was no one present to receive charge of the corps, and the lieutenant colonel was by station orders, retained in command for some days. For these days the 2nd in command who had been appointed to the permanent command also claimed the consolidated allowance of Rs. 1,000, but under the special circumstances his claim was rejected.

Compensation.—The same rules for drawing compensation for loss of permanent command allowance are applicable to cases of loss of temporary commands.

An officer appointed to act as interpreter to a detachment of her majesty's troops proceeding by water, received boat allowance. He also claimed compensation for loss of company command allowance, which was granted on the ground that boat allowance was granted for a specific expenditure.

DAWK TRAVELLING.

On first appointment.—When young officers proceeding to join their own corps for the first time are ordered to do so by dawk, they are permitted to draw the difference between the boat allowance which they would under ordinary circumstances have received, and the actual amount of expence incurred by the State for their dawks.

When ordered on Service.—A Deputy Assistant Quarter Master General ordered to proceed by dawk to join a force assembling for field service at Nasserabad was allowed to draw the actual expenses of travelling by Dawk.

HOUSE RENT.

Deputy Judge Advocate General at the Presidency.—The Deputy Judge Advocate General of the Presidency division, being in charge of the Judge Advocate General's office, claimed the difference between his tentage, and the presidency rate of the house rent. Claim disallowed as a staff officer of the division, and also as in charge of the above office, for which he receives a special remuneration.

Aide-de-Camp to Deputy Governor.—An assistant Secretary to Military Board being as such in receipt of house rent was appointed Aide-De-Camp to the Deputy Governor of Bengal. He claimed the full salary, Rs. 331, of the latter appointment; but as Rs. 90 for house rent are consolidated in that amount, he was only allowed to draw the reduced salary of Rs. 241.

LEAVE.

On Return from Furlough—If an officer on returning from furlough shall obtain leave of absence in general orders, he shall not forfeit his allowances if he join his corps within the time allowed by the best regulations, exclusive of such leave, and provided that leave periods do not exceed the term of six months in addition to one month, during which he is allowed to remain at the presidency, being a total absence of seven months after arrival. This indulgence does not extend to officers returning from absence beyond sea.

To join Staff Appointment—An officer whilst on leave was nominated to an appointment which he did not join before the expiration of six months from his proceeding on leave and his allowances were retrenched. He claimed remission of the retrenchment, on the plea that from the date of his appointment, his leave on private affairs was commuted to leave to enable him to join his appointment. His claim was disallowed.

To sea from Arracan—Officers employed in the province of Arracan, permitted passage as on service on board the ship assigned to that province, whenever they may embark for a sea voyage under leave granted in station orders.

MARCHES AND RELIEFS.

By water at own expense—In making application for corps to proceed by water at their own expense to effect a relief, &c. commanding officers must state that the native officers and men have consented to defray their own expenses.

STAFF.

Government Secretaries—Under no circumstance is a reduction of any description to be made from the allowance drawn at the presidency by officers of the department of the military secretary to government whilst with the governor general in the upper provinces, on the principle that secretaries of other departments suffer no reduction of salary.

Commandant of Alibabad—During the absence of the commandant of Alibabad on leave, the staff allowances paid to the officer commanding the garrison was deducted from the commandant's staff allowance.

General Officers.—The staff allowance of a general officer appointed to the staff commences from date of appointment. The extra salary of an officer commanding a division between the date of the appointment of a general officer and of his joining becomes a double charge to the state.

Deputy adjutant general—The deputy adjutant general of the army, placed on the same footing in regard to allowances as the deputy quartermaster general and deputy military auditor general.

Special duty—A major general acting on the staff being withdrawn from his division for a special duty, was allowed to draw his full allowances as

When temporarily with regiment.—A captain of cavalry, 21 in command of a local cavalry corps, joined his regiment on service for a brief period. The consolidated staff allowance of his appointment sanctioned during that period only in case he did not receive regimental pay and allowances and the emoluments of a troop at the same time.

He was declared precluded from drawing any military allowances as holding a substantive civil appointment, while on leave from his permanent situation.

Brigade Major of Irregular Cavalry.—An infantry lieutenant 2nd in command of a corps of local cavalry, was appointed brigade major to a brigade of local cavalry; during employment as such, he received Rs. 400, and cavalry brigade major's allowances amounting to Rs. 264, inclusive of one horse. His claim to cavalry pay and horse allowance declared inadmissible.

When with Native Prince on Pilg images.—Three officers appointed to accompany three Rajas on pilgrimages on a salary of Rs. 300 per mensem each, in addition to their military pay and allowances.

From what period Receivable.—The rule directing that an officer succeeding to an appointment shall receive the salary only from the day succeeding that on which he receives charge, is applicable to the case of the commander-in-chief, and his military secretary.

Any pilot so seeking a gratuity, or neglecting his duty with a view to exact one, or in consequence of not obtaining it, is liable to experience the severe displeasure of Government.

4. You are requested, on the pilot boarding your vessel, to fill up the accompanying two forms; the one to my address and the other to that of the Master Attendant, in order to their being delivered to the dak-boat on the vessel's arrival at Kedgee. *

5. Government having been pleased, at the recommendation of the Marine Board, to remove the interdiction hitherto preventing vessels being under way in the river under any circumstances during the night, I am directed, with a view to prevent, as far as possible, any accident from arising from the permission now given for the furtherance of the interests of vessels passing up and down the river, to desire, that you will be particular in attending to the following directions which the pilot is ordered strictly to require your attention to, while your vessel is between Calcutta and Saugor.

Vessels at anchor, and after dark till day-light, to shew a light at the starboard foreyard arm.

Vessels under way with a steamer, and, in like manner, to shew a light on each foreyard arm; the steamer showing one, where most convenient.

Vessels under way without a steamer, and to show a light at the fore top-gallant-mast-head.

6. Immediately on your arrival in Calcutta, you are to report yourself personally at the Master Attendant's office, and at your earliest convenience to communicate to him in writing the same, and residence of the parties to whom the bills for pilotage, &c. are to be presented for payment. You are further requested, prior to quitting your vessel, on arrival at Calcutta, to give or cause your chief officer to give, the pilot a certificate of your actual registered tonnage, and of the draft of water at which your vessel has been piloted, as also, that she has or has not been accompanied by a row-boat, in order that the bills for pilotage and port dues may be correctly made out.

7. Should your ship or vessel be coming up to Calcutta, you are to land your gun-powder at the magazine at Moyapore, previous to passing that place, on no account retaining on board more than one hundred pounds weight; any quantity beyond that weight being liable to seizure if found on board.

8. It is hereby further notified to you, that you are strictly prohibited from throwing overboard, into any part of the river, ballast of any description whatever, under a penalty of *co.'s rs. 500*.

9. Under the act No. XIV. of 1830, passed by the right hon'ble the governor-general of India in council in the legislative department, under date 30th May, 1836, you are required, immediately on the receipt of this letter, to insert under their proper heads in the accompanying printed form of manifest, all the particulars which are specified therein, relative to the goods, wares, and merchandise laden on board the vessel, and, after filling up the document, to return it, duly attested under your signature, to the pilot in charge of your vessel, to enable that officer to transmit the same to my address, by the first dak that may be despatched from Kedgee, after the entrance of the vessel into the river.

10. The pilot, I am instructed to add, is prohibited, by the orders of the right honorable the governor of Bengal, under the powers conferred by the 6th section of the aforesaid act, from drinking the vessel higher up the river than Kedgee, until, the manifest of her cargo shall have been furnished to him.

11. I am further directed to inform you, that under the 5th section of the said act, if the above manifest shall not contain a full and true specification of all the goods imported on the vessel under your command, you will be liable to a fine of one thousand rupees (*rs. 1,000*) and any goods or packages that may be found on board in excess of the manifest so delivered to the pilot, or differing in quality or kind, or in marks and numbers, from the specification contained therein, will be liable to be seized and confiscated, or to be charged with such increased duties as may be determined by the Board of Customs and Opium. In the event of there being a deficiency in the packages or goods entered in the manifest, you are liable, under the said act, to a penalty not exceeding five hundred rupees (*Rs. 500*), for every missing or deficient

packages of unknown value and for twice the amount of duty chargeable on goods deficient and unaccounted for, if capable of being stored therewith.

12. In the event of your vessels remaining outside or below Redgore, you are required by the said Act to deliver the manifest, so duly filled up and attested, to the pilot, immediately on the vessel being brought to anchor; and if you should neglect to deliver the said manifest for the space of twenty-four hours after the vessel shall have anchored, you will be liable to a fine of one thousand rupees (Rs. 1,000).

13. I am directed, with reference to the 15th Section of Act No. XVII. of 1837, to desire that you will deliver every letter and packet on board your vessel not specially entrusted for separate delivery, to the dak post, who may first board your vessel; and I am to add that by the next Sections of the above Act, you are liable to a penalty, not exceeding rupees 1,000, for any wilful neglect in this particular, which penalty, will assuredly be levied, instances having occurred of Commanders wilfully detaining their packets.

14. You are to observe, that the Collector of Government Customs will, upon application being made to him, grant receipts for all goods which may be landed from your ship or vessel, lodged in the Custom House, and he will be responsible for delivering from the Custom House all goods for which receipts shall have been granted; but should you, your officers, or passengers, omit to take such receipts upon your goods being landed and lodged as above-mentioned you or they will be entitled to indemnification, for any of them that may be lost in passing through the Custom House.

I am, Sir,

Your most obedient Servant,

CHAS. B. GREENLAW,

Secretary.

REGULATIONS.

FOR THE GUIDANCE OF COMMANDERS AND OTHERS, BELONGING TO
SHIPS AND VESSELS RESORTING TO THE PORT OF CALCUTTA.

*Under orders of government in the General Department,
dated 5th August 1836.*

1st. As the Harbour master is held responsible for the movements of all ships and vessels, to and from the stream, requiring his assistance, the officers of his department are not to be interfered with in the execution of such important duty. After a ship or vessel is moored in a clear and safe berth in the stream, she is not to be shifted, unless for the purpose of hauling into dock, or to the honourable company's moorings, and except in cases of emergency.

2nd. All applications to take in or out, off from the moorings, or for other assistance from the Harbour master's department, are to be made in writing to the master attendant, who will direct the harbour master accordingly. Applications will be complied with according to priority of date.

3d. On ships or vessels arriving of Calcutta, they are to have their jibs and driver boom rigged-in as soon as practicable, and remain so till the pilot, takes charge.

4th. Ships and vessels lying in the stream, or at the honourable company's moorings, shall have at least one anchor at the bow with a cable bent, and ready, ready for letting go at all times.

5th. No ship or vessel shall make any hammer or rope fast to any of the honourable company's mooring beams, except for the purpose of warping into a berth, under the direction of the harbour master, or his assistant; and especially

no warps are to be out during the night, on account of the risk of boats being thereby upset, and the almost certainty of the consequent loss of lives.

6th. Serious accidents having taken place in transporting vessels, from the circumstance of one ship letting go another's warp, while in the act of moving, commanding officers are to permit warps to be made fast, and to keep them so until requested to let them go. All vessels in the port of Calcutta are enjoined to assist each other, while in the act of warping.

7th. The Harbour Master's assistants are directed to take care, in hauling ships or vessels into dock, that the waist anchors are got up out of the chains, and to see that no projections whatever, beyond the ship's sides, (which can be removed) be suffered to remain.

8th. All ships or vessels moored in the stream, are to keep a clear hawser, to prevent accidents occurring.

9th. Commanding officers of vessels are strictly prohibited from boiling pitch, dammer, or resin on board, to prevent accidents by fire. They are also prohibited from throwing overboard ballast or rubbish of any kind, detrimental to the bed of the river.

10th. Commanding officers of ships or vessels laying under coars, or at any of the Hon'ble Company's moorings, are to slack down their cables, to enable vessels to pass over them, when required by the officers of the Harbour Master's department to do so.

11th. Ships or vessels meeting with any accident, or causing damage to others while in charge of an officer under the authority of the Master Attendant have no claim on Government for such damage; but the parties concerned are to represent the case to the Master Attendant who will take such cognizance of the same as the merits of the case may appear to require.

12th. In order to avoid misconception as to the responsibility of Government for the safety of ships and vessels making use of the Honorable Company's chain moorings, the Governor-General in Council has been pleased to direct, that it be explicitly notified to the public that Government does not guarantee the safety of any ship or vessel which may use those moorings.

13th. Government have been further pleased to prohibit commanders of all ships and vessels from moving them in any part of the river, unless they have a pilot or an officer from the Harbour Master's department on board, under penalty (independently of such consequences as the owners or commanders may be subject to be by law, on the part of individuals,) or two hundred sicca rupees, for every breach of this prohibition.

14th.—Finally, you are hereby informed, that no pilot will be allowed to take charge of your ship, outwards, until a certificate from the Marine Pay Master shall have been presented at the Master Attendant's Office, stating that all port charges due on her account have been paid.

Notice is hereby given that vessels engaging the Honorable Company's moorings, are liable to be removed from one mooring to another at the discretion of the Master Attendant whenever he may consider such a measure necessary, either for the general convenience of the port or the particular safety of any other vessel. Of course on such occasion no charge will be made against the vessel removed.

(Signed)

T. T. HARRINGTON, Master Attendant.

ORDER OF HIS EXCELLENCY THE MOST NOBLE THE GOVERNOR-GENERAL
IN COUNCIL.

Fort William, July 16, 1861.

Whereas it hath hitherto been the practice for ships importing at Calcutta, to retain their gunpowder on board while lying in the port; and whereas, the explosion of a large quantity of gunpowder on board of ship, lying off

the town, might be attended with the most destructive consequences to the town, to the inhabitants thereof, and to the shipping in the port; and whereas, instances have occurred of shot being fired into the town of Calcutta, and into the country adjacent, by ships sailing Fort William, or firing guns on other occasions, his Excellency the most noble the governor-general in council, with a view of obviating the serious consequences which might ensue from a continuance of these irregular and dangerous practices, has been pleased to establish the following rules.

1. The commanders of all vessels bound to the port of Calcutta, and proceeding up to the town of Calcutta, or to any other part of the river above Mayapore or required on or before, their arrival off Mayapore, to land at the magazine, which has been erected at that place, all the gunpowder which they may have on board, (whether contained in barrels, or made up into ammunition) exceeding the quantity of four hundred pounds, which quantity every vessel is permitted to retain on board, for the purpose of firing salutes or signals in cases of distress. Officers appointed by government, will take charge of the gunpowder immediately on its being conveyed to the shore at Mayapore, and will deposit it in the magazine. Commanders of vessels are required to mark the muzzles of their respective vessels on the barrels and packages of gunpowder, previously to their being landed. A receipt for the gunpowder will be granted by the officer in charge of the magazine.

2. In order that vessels may be detained as short a time as possible for the delivery of their gunpowder, commanders of vessels are required, on coming in sight of Mayapore, to hoist a flag at the fore-top mast-head, whereupon the officer in charge of the magazine, will immediately order persons to be in readiness at the river side to receive the gunpowder.

3. Gunpowder shall not be landed or received into the magazine between sunset and sunrise.

4. The commanders of vessels outward bound, which may require gunpowder for their outward voyage, shall not take gunpowder on board in any part of the river above Mayapore, with the exception of quantity not exceeding one hundred pounds, for the purposes before mentioned. Should any gunpowder have been landed from any vessel when inward bound, and deposited in the magazine the commander will, upon the application of the commander of the vessel to the officer in charge of the magazine, (such application being accompanied by the receipt granted on the deposit of the gunpowder in the magazine) be conveyed to the river side, and delivered to such person as may be sent to take charge of it.

5. In future, vessels entering the port of Calcutta, shall not at any time, while lying in any part of the river between Mayapore and Calcutta, have on board without the express sanction of government, any quantity of gunpowder exceeding one hundred pounds for the purposes before mentioned; the collector of the government customs is hereby empowered and directed, should he have reason to believe that a quantity of gunpowder exceeding one hundred pounds has been received on board of any vessel, to cause the vessel to be searched, and should any greater quantity be found on board, to seize the same. The collector is also empowered and directed to seize any unauthorized quantity of gunpowder which may be attempted to be shipped on any vessel, in opposition to the rules herein prescribed; all such gunpowder so seized, shall be liable to confiscation; the collector shall immediately send all the gunpowder so seized to the magazine in Fort William, and shall report the circumstances of the case to the board of trade; the collector shall not grant a port clearance for any such vessel from which gunpowder shall have been so seized, without the express authority of the governor-general in council.

6. One-half of the estimated value of all gunpowder which may be confiscated under this regulation, shall be granted in equal proportions to the collector of the customs and his deputy; the remainder moiety shall be granted in equal proportions to the informer, and to the officers assisting in making the seizure.

7. The commanders of vessels lying at diamond harbour, or in any other part of the river below Moyapore, will be permitted to deposit their gunpowder in the magazine at Moyapore.

8. Pursuant to the orders contained in the 5th article of these regulations, the commanders of all vessels now lying in the port of Calcutta, having on board a quantity of gunpowder exceeding one hundred pounds, are required to send the quantity of gunpowder exceeding one hundred pounds, which they may have on board of their respective ships, or any place on shore, to the magazine at Moyapore. If the commander of any vessel shall not conform to this requisition, he shall be liable to the penalties stated in the 5th article.

9. The commander of all vessels lying off the town of Calcutta, or any part of the river between the town and Kedgerie, are prohibited from firing guns (excepting for the purpose of saluting Fort William, or for signals in case of the vessels being in distress) for any purpose whatever, without having previously obtained the permission of his majesty's justices of the peace for the town of Calcutta. When guns shall be fired from any ship for the purpose of saluting Fort William, or for signals in case of the ship being in distress, and also in cases in which guns may be fired with the permission of the justices of the peace, the commander of the ship is enjoined to be particularly careful that the guns be not shotted.

Published by command of his excellency the most noble the governor-general in council,

G. H. BARLOW, Chief Secy. to the Govt.

P. S. Under orders from the Marine Board, dated 6th instant, commanders are informed, that such gunpowder as they may have for sale is not to be landed at Moyapore, but to be brought up and lodged at the Howrah magazine.

Master Attendant's Office, July 8, 1817.

PILOTAGE AND PORT DUES.

Notice is hereby given, that in consequence of the recent change in the currency, the Marine Board have obtained the sanction of the right honorable the governor of Bengal to the following modified rates of charge leviable on account of pilotage and port dues, which are to come into operation on the 1st proximo.

By order of the Marine Board,

C. B. GREENLAW, Secretary.

Fort William, May 25, 1830.

Notices touching port charges at Calcutta, for the information and guidance of Owners and Commanders of vessels.

The Marine Board having lately, under the orders of government, been engaged in revising the general regulations of the Marine Department, bearing on the shipping frequenting the port, request the particular attention of owners, agents, and commanders of vessels, to the following arrangements in connection with the charges on account of pilotage, &c., framed with a view to the mutual convenience of the Marine Department and the shipping interests.

First.—Commanders are requested, prior to quitting their vessels on arrival off Calcutta, to fill up and certify, or cause to be filled up and certified, a form of certificate shewing the actual registered tonnage; the draft of water and whether the vessels has or has not been tugged by steamer any part of the way, or has not had the use of a row-boat, which form will be furnished to the pilot, in order to the bill's of the vessels being correctly made out.

Second.—Commanders are further requested, as early after their arrival as possible to signify, in writing, to the Master Attendant, the name and residence of the reference for the payment of his vessel's bills.

Third.—On the receipt by the Master Attendant of the above certificate and written reference for payment, a single bill will be prepared, including inward pilotage, light-house duty, Mayapore magazine duty, and row boat hire, (if any) which, together with a certificate, will be forwarded to the Marine Pay Master for collection within fifteen days of the arrival of the vessel and having on it the name and residuary of the party referred to for payment, which commands are requested to furnish to the Master Attendant in writing as early after their arrival as practicable, that that officer may more readily be enabled to present it. By this arrangement all the charges connected with the vessel up to her arrival off Calcutta, will be embodied in one bill, instead of, as hitherto, being made in separate bills.

Fourth.—In the event of vessels docking, or being transported at the desire of the commander, it is requested that a certificate may be given by the commanding officer of the operation having been performed, in order to its accompanying the bill when presented for payment to the receiver.

Fifth.—The practice of charging for hauling to the chain moorings, for their monthly hire, and for hauling from the moorings in separate bills, is discontinued, and henceforth one bill will be prepared, including the charges for hauling to the moorings, that for occupying them, and that for hauling from them; and commanders are requested to give, or cause their commanding officers to give, to the master attendant or the harbour master, certificate of the date of hauling to and from the moorings, which certificate, as before, will accompany the bill when presented for payment. The hire of the moorings will be charged for the day on which the vessel is hauled thereon, without reference to the period of the day; and, in like manner, no charge will be made for the day on which she hauls from her moorings, however late in the day she may quit them. The charges connected with the chain moorings will thus be embodied in one bill and be discharged in one payment, instead of three or more, according to the number of months the vessel occupied the moorings.

Sixth.—The system of charging outward pilotage on an estimated draft of water with an addition of ten per cent. subject to adjustment after the vessel has sailed, and of charging a certain number of days for a row-boat subject to a like adjustment, is abolished; and, in future, the outward pilotage and charge for row-boat hire on outward-bound vessels, will be made as follows:

When the vessel is finally laden, the commander is to give notice thereof to the master attendant, when the draft of water is to be ascertained and certified by the commander or commanding officer on the part of the vessel, and by the harbour master on the part of government,—subject, in case of dispute, to the decision of the master attendant. On receipt of the certificate, the master attendant will cause a bill to be made out for the regular amount of pilotage, for the row-boat hire according to an average rate with reference to the size of the vessels and the season of the year, fixed by a marine committee which lately sat at the Bankshall, the majority of which was composed of members of houses of agency and commanders of ships. The bill and certificate will be presented in due course for payment.

Seventh.—As however, it frequently happens, that vessels are taking in cargo or filling their water up to the last day of their departure, or that from other causes the bills for the chain moorings and outward pilotage cannot be made out till the eve of departure; owners, agents and commanders are in such cases particularly requested, with a view to despatch to cause an individual to attend at the Bankshall and expedite the transmission of the bill and certificate to the board for registry, and to the pay office for collection; at each of which offices they may in such cases depend upon the most ready and special attention.

Eighth.—In the event of a vessel being tugged any part of the way down by steam, or not having the use of a row-boat, commanders are to obtain from the pilot, at his degree a certificate to that effect, which they should forward by dak to their agents. On receipt thereof agents are requested to make out a bill against the boat hire company for the $\frac{1}{2}$ deduction from the pilotage allowed, if

tugged by stream, or for the row-boat hire paid, as the case may be, and to forward it, together with the certificate, to the marine board for audit and payment.

Ninth.—In cases where a vessel leaves Calcutta, avowedly intended to fill up cargo at some place below, the pilotage will be charged at the draft at which she leaves Calcutta in like manner, though at the reduced amount as if she had proceeded to sea; and with respect to the subsequent pilotage charge from the place at which the vessel takes in the additional cargo to sea, owners or agents of vessels will be required to furnish a special guarantee to pay the amount chargeable according to a certificate of the draft of water to be signed by the commander or commanding officer and pilot.

Tenth.—Six sets of moorings at Diu and harbour having been fitted specially to enable vessels arriving in distress from loss of anchor and cables to be readily moored, the charge will be co.'s Rs. 50 for mooring and unmooring, and the daily hire the same as for the moorings at Calcutta. The moorings will of course be available to vessels not in distress from loss of anchors and cables, but the harbour master will be instructed at all times to keep two sets vacant during the S. W. Monsoon to meet casualties.

Eleventh.—Annexed is a statement of the several port and pilotage charges, and the marine board trust, that with these and the certificates of the commanders or commanding officers before them, owners and agents of vessels will, at all times, be enabled readily to ascertain the correctness of the bills and to discharge them to on presentation.

Fort William, General Department, the 31st January, 1823.

The right hon'ble the governor-general in council, is pleased to direct, that the following rules and regulations, relative to Asiatic and other Asiatic steamers, be published for general information.

RULES AND REGULATIONS—Made, ordained, and published, by the right honorable the governor-general of Fort William in Bengal, in council, in pursuance of an act of Parliament of the 4th October, the 4th, c 80, passed on the 31st day of January in the year of Our Lord 1823, to be observed by master officers and owners of ships and vessels trading under the authority of the said act, the crews of which ships and vessels shall be wholly or in part employed

of Asiatic sailors, lascars or natives of any territories, countries, islands, or places, within the limits of the charter of the United Company of Merchants of England trading to the East Indies.

Be it ordained by the Right Honorable William Pitt Earl Amherst, Governor-General of Fort William in Bengal, in Council, by virtue of the powers in him vested by the said act, that from and after the publication hereof, in the manner herein-after directed, the following rules and regulations shall be observed by masters, officers, and owners of ships and vessels trading under the authority of the said act, the crews of which ships and vessels shall be wholly or in part composed of Asiatic sailors, lascars or natives of any of the territories, countries, islands, or places within the limits of the charter of the said United Company, whilst such Asiatic sailors, lascars, or natives shall be on board such ships or vessels, and whilst absent from the countries or places to which they shall respectively belong, and until they shall be carried back to the places to which they belong, or from whence they have been taken.

1. Every such ship or vessel, which shall clear out from any port or place in any territory, country, or island, under the government of the said United Company, or belonging to His Majesty within the limits aforesaid, upon any voyage to the United Kingdom of Great Britain or Ireland, or to any port or place beyond the limits of the charter of the said United Company, and every such ship or vessel which shall arrive at any port or place in the said United Kingdom, and every such ship or vessel which having cleared out from any port or place, in any territory, country, or island as aforesaid, shall arrive at any port or place without the limits of the charter of the said United Company, shall be provided with an expert surgeon, of ability and knowledge; and in such case before any such ship or vessel shall clear out from any port or place under the government of the said United Company, or belonging to His Majesty, within the limits aforesaid, such surgeon shall be previously examined by the Medical Board, or by such medical person or persons, as shall be appointed for that purpose by the Government, or principal officer of the port or place from whence such ship or vessel shall clear out; and no surgeon shall be deemed a fit surgeon, unless he shall be testified by such Medical Board, or by such other medical person or persons, to be duly qualified, and such surgeon shall be retained and entertained on board such ship or vessel, during the whole voyage (unavoidable casualties excepted) by and at the expense of the owner or owners of such ship or vessel, and shall administer such medical and surgical aid as shall be requisite to the Asiatic sailors, lascars, and natives on board of such ship or vessel during the voyage on which such ship or vessel shall proceed or be bound; and every such ship or vessel shall also be furnished, at the like expense, with a proper quantity and assortment of medicines fit for the said Asiatic sailors, lascars, and natives; and it shall and may be lawful for the Government, or principal officer of the port or place where such ship or vessel may be, under the Government of the said United Company, or belonging to His Majesty, within the limits aforesaid, and before such ship or vessel shall clear out, to appoint any medical person or persons to examine the quantity, quality, and assortment of such medicines; and such ship or vessel shall not be permitted to clear out from such port or place as aforesaid; until the Government, or principal officer thereof, shall be duly satisfied, that a sufficient quantity and proper assortment of such medicines shall have been furnished; provided always, that if such owner or owners, master or other commanding officer of any such ship or vessel, which may be intended to be cleared out from any port or place under the Government of the said United Company, or belonging to His Majesty, within the limits aforesaid, after using due diligence and reasonable and proper means in that behalf, shall not be able to procure or retain an expert surgeon, duly qualified as aforesaid, and such owner or owners, master or other commanding officer, shall represent the same in writing to the Government, or principal officer of the port or place where such ship or vessel may be, together with a true statement of the means that have been adopted or employed to procure a fit surgeon as aforesaid, then it shall and may be lawful for the Government or principal officer of the port or place where such ship or vessel may be on being duly satisfied that a fit surgeon cannot be procured, to autho-

Notice touching the Pilot Station for the River Hooghly, during the S. W. Monsoon of the year 1843.

Notice is hereby given that the same causes existing which during last S. W. Monsoon rendered necessary the removal of the pilot station from off Point Palmyras to a position 6 or 8 miles S. W. of the outer floating light, and in from 10 to 20 fathoms water, the latter station will be continued during the next S. W. Monsoon, viz from 15th March to the 15th September.

During the last S. W. Monsoon, no difficulty would appear to have been experienced by vessels passing from False Point Light House to the new station, nor can any be felt if common attention be paid to the lead and to the following directions prepared by captain Lloyd, late off. Marine surveyor general, after a careful survey of the ground between the two points.

False Point Light House is in latitude $20^{\circ} 19' N.$ and longitude $86^{\circ} 47' E.$ and that of the South channel buoy in latitude $20^{\circ} 30' N.$ and longitude $86^{\circ} 4' E.$ and bears from the former N. 61 E. true or N. E. by E. $\frac{1}{2}$ E. by compass, distant 83 miles, and in 12 fathoms.

A Bank of soundings extends from off Point Palmyras in a direction towards the tail of the Western Sea Reef, and the nature of the bottom as distinguished from that of the Hooghly deposits which is sand and mud, with shingle-specks is a granular substance, composed of sand, shells and small pebbles discharged from the "Kunka" and other rivers near Point Palmyras, the lighter material of which being carried further out is deposited and forms what is called the pilot's ridge, which in crossing to the N. W. shows a little less water than on either side. In coming from Sea-ward you shoal rather suddenly from 23 to 25 fathoms upon its Eastern Edge. It is composed of shelly sand or minute gravel of a reddish or rusty brown colour.

"The best guide therefore to enable a vessel to direct her course from False Point to the vessels at the new station will be a run down the Edge of

the pilots ridge, which can readily be done by making the light house and bringing it to bear about W. S. W. or S. W. by W. distant by computation from 10 to 15 miles; then steering to the E. S. E. and having gradually increased the depth of water to 23 fathoms, upon the eastern edge of the ridge, regulate the course to keep between it and 27 fathoms, when by attention to the lead and nature of the soundings, course and distance, run from the light house, it is almost impossible to miss the pilot vessels (if the above limits are kept within) either by getting too far to wind-ward or falling to sea-ward for the soundings, increase so rapidly to sea-ward, from the proposed new station, that 24 fathoms will not be more than 3 or 4 miles to the southward of it, and 23 fathoms the same distance to the westward of it.*

* The soundings to sea-ward of the ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken shells mixed with it.

Vessels approaching the station during the day are required to show the usual signal for a pilot, and by night to give as early and as much warning as possible by firing guns, burning blue lights, and by exhibiting two lights in a vertical position, which has not been seen; but commanders are recommended to avoid as much as possible making the station during the night.

To mark the station one of the pilot vessels will show during the day a large St. George's Jack (white with red cross) at the main top gallant mast head, and a good mast head light during the night, and will burn a blue light and a maroon alternately every half hour, and fire a gun at 8 P. M. at midnight, and at 4 A. M. vessels approaching the station and while there as well as those

* The Light Vessels are directed when another vessel is approaching during the night, to show a light at the top and to mark the way they are making.

approaching the light and buoy station, vessels are warned to be careful in avoiding collision by night or by day, and in communicating with either of the above vessels either at anchor or have too, when it is necessary to cross her to pass under the stern. Several instances of serious damage having occurred during the N. W. Monsoon, whereby the outer floating light was more than once compelled to leave her station for repairs to the great inconvenience and risk of vessels entering and quitting the port.

A vessel will be stationed off False Point Light House, keeping it according to circumstances W. by N. to N. W. by N. in from 10 to 15 fathoms water, one will exhibit during the day when vessels are in sight, a large Danish Jack at the main top gallant mast head. (Red with a white cross,) and during the night a good mast head light in the same place and will burn a blue light every half hour.

This vessel will have no pilot on board, and is only intended generally to furnish information touching the course to the new station; but particularly to do so to vessels which may be in ignorance of the position of the new station.

ESTABLISHMENT OF A LIGHT HOUSE AT PONDICHERY.

From the 1st of July, 1833, a fixed light of the 31 magnitude, will be exhibited during the whole night, on the summit of a tower recently constructed at Pondichery.

This light, placed at 80 feet above the level of the sea, will be seen in clear weather, from a ship's poop, from a distance of sixteen to seventeen nautical miles.

During the N. E. Monsoon, that is to say, from the month of October to March, vessels arriving during the night, in the roads of Pondichery should anchor in ten or twelve fathoms water, the light bearing by compass from W. by N. to W. N. W. This anchorage will be the most convenient for communication with the shore and for weighing in case of bad weather.

During the S. W. Monsoon, the wind prevailing from S. E. on the coast, from the end of March to October, bad weather is not to be apprehended; vessels can then anchor at night in six or seven fathoms with the light bearing by compass from W. to W. by N.

Thus placed, the vessels will be during such season, in the most favorable position for communication with the shore.

COMMANDERS TO FIND GUARANTEE FOR THE PAYMENT OF GOVERNMENT CHARGES.

Fort William, the 7th February, 1827.

Notice is hereby given that whereas, in several late instances, the Marine Board, have been unable to recover just claims for sundry port charges, incurred after ships have left Calcutta, such as for detention of row-boats and additional pilotage charges, arising from the original draft of water given, being considerably under the actually,—it has been deemed expedient,—that the commanders of all vessels, from and after the 20th instant, shall previously to their being provided with a pilot, furnish the master attendant with a guarantee of some respectable house, for the payment of all such charges. Copies of the form of application for a pilot, and of the guarantee, will be furnished at the bankshall.

By order of the Marine Board,

J. TROTTER, Secretary.

1.—Parties having any claims on the marine department, are requested, on and after the 1st proximo, to forward the same, for examination and registry, direct to the marine board, whence, if found correct, they will be transmitted, without loss of time, to the marine pay master, passed for payment.

2.—To prevent, as much as possible, the multiplication of unnecessary correspondence, it is requested, that bills may be, in general, transmitted under a blank cover, superscribed with reference to the contents of the former; and that on the face of the bill itself a reference may be made to the authority on which the claim is preferred, and the vouchers, if any, annexed to the bill. In cases where the claim has arisen out of correspondence with the Board, a reference by number and date, to the Board's letter, sanctioning the charge, will be sufficient.

3.—Of course when a bill is presented on account of transactions, which have not been previously before the Board, it will still be necessary to accompany the bill with vouchers, and an explanatory letter.

4.—Any bill, which may be found inadmissible, or to require correction, or further voucher, will be returned to the party as early as possible; and should it not be so returned within the week, the drawer will know that it has been passed to the marine pay master, and may accordingly apply for the payment.

ACCOMMODATION ON BOARD THE PILOT VESSELS.

The following rules, relative to the accommodation of individuals, proceeding to the sand heads or down the river, on board any of the honorable company's pilot vessels, have been sanctioned by government, and are now published for general information.

1. Officers, civil and military, when ordered to proceed down the river, on public service on board a pilot vessel, are to notify the same to the master attendant, or, in his absence, to his deputy, who is to select the vessel, with reference to the exigencies of the service on which such officer shall embark. In cases where persons, whether public officers or private individuals, are desirous of proceeding on board a pilot vessel for the benefit of their health, application is to be made as above, accompanied by a medical certificate, evidencing the necessity of the party proceeding to sea; when permission will be granted by the master attendant or his deputy, to repair on board such vessel as may be available. Individuals again, both in the service and out of it, who have occasion to go on board a pilot vessel, for purposes unconnected with their duty or health, or to make application to the marine board, stating the purposes for which they desire the indulgence, and the time for which they are likely to be on board. The pilot are on no account whatever to receive on board as passengers any individuals unless sanctioned as above.

2. Individuals proceeding on board of pilot vessels, under either of the above circumstances, are entitled to occupy one-half the after accommodation, and in the event of a greater number of persons being on board, under the authority, than can be accommodated in the cabin allotted to, the juniors of the public servants, and those last permitted to go on board, if private individuals, to have such accommodation as the dining cabin affords. It is to be optional with the pilot in charge to allow the occupation of his half of the after accommodation to such individuals; but he is on no account to demand a greater sum than eight sicca rupees per diem for the first fortnight, and six for every day after. But it is to be understood, that individuals proceeding on board, on public service, shall have the right of also occupying the remaining half of the after accommodation, on a remuneration being made to the pilot, in charge of the vessel, at the rates above specified. The payment in both the above cases, is to be exclusive of the amount to be given for table money, as hereinafter stated.

3. It is to be distinctly understood, that no individuals proceeding on board a pilot vessel, are to be considered as possessing the slightest degree of authority on board; but that the regulations now in force, relative to passengers on such occasions, are to be strictly maintained. The rule is, of course, not applicable in cases wherein, by the special order of the government, the pilot in charge is required to place himself under the directions of any particular individual.

4. Pilots in charge of vessels, are to provide suitable table for their passengers, and are on no account to demand a larger amount for table money, than the sums specified in the margin,* and any pilot making a larger demand, either directly or indirectly, will be subject to such loss of rank, as the marine board, under the circumstances of the case, shall determine.

* A gentleman 8 rs. per diem for the first fortnight—6 rs. for every day after.
A lady 6 rs. per diem for the first fortnight—5 rs. for every day after.
A child 4 rs. per diem for the first fortnight—3 rs. for every day after.

5. The above rules are to have effect from the 1st proximo.

Marine Board, 20th April, 1820.

By order of the Marine Board,
J. TROTTER, Secretary.

RULES FOR CLEARING THE RIVER HOOGHLY OF WRECKS AND OTHER OBSTRUCTIONS.

1. In order to provide for clearing the bed of the river of all anchors that have been lost in its channels and anchoring stations, and for the recovery of

removal of every description of wreck deposited therein, it shall be the duty of the Master Attendant, to employ in the most efficient manner practicable, under the official superintendence of the Marine Board, the means placed by government at the disposal of that officer, for the purpose aforesaid.

3. All recovered anchors, grapnels, and wrecks of every description, shall be landed as soon as may be practicable, in the same state in which they are recovered. Articles belonging to the hon'ble company, are to be deposited in Bankshall premises, and immediately, after their being so deposited, a full and accurate description shall be taken of the articles for registry, specifying whether the articles are of a perishable nature or not; place where, and date when found; and such other information as may be at all calculated to enable owners to identify their property. A distinguishing Mark is to be placed on the anchor or other thing so recovered, with white paint, when the article will admit of it, the mark expressing the year in which it was recovered, and its number in the register of that year; when the article will not admit of being marked with paint, it is to be in some other manner sufficiently identified, so as to connect it with its particular item in the registry.

3. The above information is to be regularly entered into books of registry to be kept for that purpose at the Master Attendant's Office, which books shall be always open for public inspection, during the hours of business; a copy of this registry, shall be sent weekly, under the signature of the Master Attendant, to the Marine Board, who will cause a list of the recovered articles, with all the necessary information, to be hung up in the Exchange House, for the information of the public.

4. In the event of the right of property being proved to the satisfaction of the Master Attendant, or in case of dispute, to the satisfaction of the Marine Board, such property shall be valued by Messrs. Mackenzie, Lyall and Co., or the proprietors of the Exchange, subject to arbitration; if the value fixed by them should be objected to either by the Master Attendant on the part of government or by the owner. When the valuation shall have been fixed, the Master Attendant shall make out a bill for salvage, rated according to the place of recovery; viz. $\frac{1}{3}$ of the value of articles recovered above Puffin 40 per cent. on articles recovered between Puffin and Culpep; 50 per cent. on articles recovered between Culpep and August; and 65 per cent. on articles recovered below August, with interest on the amount of salvage, calculated from the date of recovery at the rate of six per cent. annum, the salvage to be calculated on the value fixed by Messrs. Mackenzie, Lyall and Co. as above directed. The bill is to be sent to the Marine Board for registry; it is then to be passed to the Marine Pacemaker for collection, on the production of whose receipt to the Master Attendant, that officer will deliver up the anchor or wreck identified.

5. All perishable property shall, if unclaimed, be sold by public auction, by Messrs. Mackenzie, Lyall and Co. three months after its recovery; unless they, in conjunction with the Master Attendant, consider it for the interest of the owners that it should be sooner disposed of. In like manner, all non-perishable property shall be sold at quarterly public sale twelve months after recovery. On receipt of the net proceeds of sale, as directed in article 4th, shall be deducted the costs, in the credit of the "wreck and anchor concern" and the balance be deposited in the general treasury for payment without interest, to parties at any time subsequently establishing their right thereto.

6. In cases where ships may have perished from their anchors, or other property have been lost or wrecked, and information of the same is immediately communicated by the owners or commanders, to the Master Attendant, the requisite assistance is to be afforded with all delay, and the anchors, &c. when recovered, are to be delivered to the owners, on security given for payment, at the rate of three rupers percent. for anchors, or similar property; any other description of property so recovered, is to be delivered, on payment of one-half the amount of salvage, referred to in 4th paragraph, according to the place from whence the property is recovered. The valuation thereof to be made by Messrs. Mackenzie, Lyall and Co., subject as before, to arbitration. If the owners or commanders possess suitable means for recovering their own

anchors or other lost or wrecked property, within 48 hours after they have been hoisted from, or lost, and decline receiving assistance, the interference of the Master Attendant is then forbidden; but, should they fail to remove the obstructions within that period, (unless it shall be extended under the sanction of the Marine Board,) the Master Attendant is authorized to effect the object himself; and all such anchors or property, when recovered, shall be subject to the prescribed charge of salvage in the article 4.

7. Should any anchors or other property, not their own, be recovered by owners or commanders of ships, when weighing or recovering their own anchors, they shall be delivered to the Master Attendant in the state in which they may have been found, with every thing attached to them, to them and be registered in the same way, as if they had been recovered in the first instance by the Master Attendant. In this case however, the parties on recovering wrecked property, shall be entitled to one-half the amount of salvage.

8. The above rules are not to be construed to extend to the case of any ships or vessel being wrecked in any part of the river. In such case the Master Attendant shall, on the requisition of the parties concerned, afford every practicable assistance for recovering the said ship or vessel, her stores or cargo; and such a claim, or compensation in the nature of salvage, shall be preferred by the Marine Board, as to them, under all circumstances of the case, shall appear reasonable; should, however, the parties concerned decline the assistance of the Master Attendant, their operations shall not be interfered with, unless by their negligence the navigation of the river should become liable to continued obstruction from the accident. In this case, as before, the Master Attendant is to adopt all the necessary measures to remove it.

By Order of the Marine Board,

CHAS. B. GREENLAW, Secretary.

FORN WILLIAM,
* Marine Board,
7th Nov. 1839.

To CAPTAIN W. HORN, Master Attendant.

Sir,—I am directed by the Marine Board to forward for your information, and for communication to the members of the Pilot service, the accompanying rules as per margin, which have received the sanction of Government under 17th ultimo.

1.—Pension rules for members of the Pilot service, their widows and orphans.

2.—Rules for regulating cases of absence to members of the Pilot service.

3d.—It does not appear to the Board to be necessary to make any remarks on the above documents, beyond requesting you to apprise the members of the Pilot service, that the withholding the reduced pay of individuals absent on medical certificates to the Cape or elsewhere, until their return, arises out of an act of Parliament, prohibiting payment of salaries to absentees on such occasions during the period of their absence.

51.—Referring to the 5th pension rule, you will perceive, that it is necessary for the married members of the service to forward certificates of their marriage, and of the birth and baptism of their children, and for those who are now unmarried, to do the same on their marriage and the birth of the children, in each case within one month of the event occurring. Notice of the death of wives and children are likewise required to be forwarded within the same period.

4th.—With reference to the 6th pension rule, the Board do not propose to make any alteration in the existing practice, viz. the production of a certificate of existence signed by a member of the pilot service not below the rank of mate, and if those certificates are only forwarded on the 1st of every alternate month, they will suffice, and in the case of widows and female orphans above the age of fifteen, if they are forwarded on the 1st of January, May, July and September, they will suffice, with the half yearly declaration of their not being married, which are required to be forwarded in May and November. The Board have been particularly anxious to make the arrangements in this particular as little burden some and pleasant to the parties as their duty to Government would admit.

5th.—In conclusion, I am directed, with reference to my letter to your address, under date 2d April last, No. 357, and its enclosure, to inform you, that the prospective reduction of pay from the sixth to the second rapier, is not under the orders of Government, to affect the existing incumbents of the pilot service on their promotion to higher rank, or in respect to their pensions, or the pension of their families, or the allowance of pensions which female orphans now on the fund under 10 years of age will be entitled to after that age until they marry; but is to affect those only who hereafter enter the service and the families of such members. Such new members of the service will receive all their pay and allowances of every description in second rapier, their subscriptions to the pension fund and be made in the same number of second rapier as the present incumbents of the service pay in sixras, and their pensions and those of the widows and orphans, will be paid in the same currency.

I have, &c.

The declarations are to be countersigned by the Executor to the Estate of the deceased member of the pilot service, or pensioner, or by the guardian of an orphan, and by a member of the pilot service, certifying to the truth of the declaration to the best of their knowledge and belief. Forms of the declaration will be furnished on application at the Office of the Secretary to the Board.

8th.—The several amounts of contribution and pension referred to in the above rules, will continue to be made in *Rs. Rs.* in the case of all present pensioners, and of all existing members of the Pilot service, and of their widows and orphans. Individuals joining the pilot service, after the 1st of July 1835 will be paid their allowances of all descriptions will be levied in the same rupee, and pensions to themselves and orphans, will in like manner be paid in *sonat rupees*.

PASSAGES ON SEA-GOING GOVERNMENT STEAMERS.

(See General Order of 14th Nov. 1833, for China Service Passages.)

There are no precise rules for passages in the Government Sea Steamers, not on service. Passengers make their own arrangements with the commander; but sanction of the Board and Government is required for the commander to receive a passenger and the following is the form of communication usually made.

To Commander H. C. Steam Vessel.

Sir,—You are permitted to receive on Board the H. C. Steamer, under your command, and accommodate with a passage, Mr. , he making his own arrangements, and the Government being at no expense thereby.

INLAND STEAM NOTICE.

In the arrangements made for the conduct of all matters connected with the Steam Boats plying to the Western Provinces, the convenience of the public has been a principal consideration. The charge for freight on goods has been gradually reduced to the lowest rate compatible with security against loss;

and where the boats loaded entirely and exclusively with goods, paying the fixed rates of tonnage, the receipts on all accounts would do little more than cover the expense of the establishment. A less expensive mode of navigating the boats may and is likely to be discovered. Fuel which now constitutes the heaviest item of outlay, will perhaps become procurable at a lower rate; and when it is so, the public will be so fit by a proportionate reduction of the charges; for the object of the establishment of these boats, when proposed by Lord William Bentinck, was a prospective advantage to result from a greater facility of commerce and intercommunication between the extremes of the Empire.

The gentlemen who have gratuitously undertaken the Agency of the boats at the different stations, are each of them furnished by dawk on the day after the Steam Boat leaves Calcutta, with a way bill or list of all packages and goods consigned to the station where they reside,—which will enable any individual expecting a parcel to ascertain if it be on its way, and to make arrangements for obtaining it on the arrival of the boat; but as much inconvenience has been found to arise from servants and persons crowding the deck of the boat on her arrival, to enquire for parcels, the residents at the different stations are invited to authorize the Agent to receive their packages and land them from the boat; they will find a saving of time in the arrangement, as the Commanders of the boats have instructions to deliver in the first instance goods addressed to the Agent, on account of their being in general the channels through which parcels are sent to be forwarded by dawk or dawk Bharry; in the delivery of which a few minutes may sometimes be of importance. The charge at which the Agent have consented to land and to receive all parcels, is one, will be, after the above explanation, will, it is presumed, be no longer objected to; the Agents give their time and their services gratuitously to the public, and should the landing charges, as in some instances is understood to have been the case, be refused, it will become necessary to raise the charges for freight in a much greater proportion, to the detriment of the public interest, and without any advantage to the establishment.

Such goods as shippers may please to consign to the Steam Boat agents, will be landed by them and placed in safety free of charge; but if the agents be required to deliver or forward goods to their destination, they will make such charges as may be agreed upon between themselves and the parties concerned. It will be optional with shippers of goods to consign to the care of the boat agents; but goods shipped, will only be delivered to the parties to whom they are consigned or addressed, and in default of application being made for them during the stay of the boat at and station, the goods will be carried on, and additional freight will be charged for the distance they may be conveyed.

Goods will not be received into the boat office unless they be addressed to a resident at the place at which they are to be delivered from the boats. The directions must be marked on something not liable to be destroyed by vermin, and from which it may not easily be obliterated. A direction written on a card, or marked with ink on a tin box, would be liable to the above objection.

The boat office will not be responsible for any damage or loss that may be occasioned by accident to the vessel, or otherwise use whatsoever.

All goods sent to the boat office must be accompanied by a note of the following form. —

Bills of lading in duplicate will be granted to shippers of specie or bullion, which will only be delivered to the party presenting one of the bills; and in default of application being made for delivery during the stay of the boat at any station, the goods will be carried on, and freight charged for the distance they may be conveyed.

As it will occur sometimes, and more especially during the rainy season that the steam boats come down the river quicker than dawk, which will prevent the bills of lading for treasure, being received in time, if forwarded by dawk after shipment, the following plan may be adopted for ensuring delivery to a duly authorized person; intending to ship treasure, may some days previous to the arrival of the boat, enclose an order per post to his correspondent to receive the consignment, the said order being written on half a piece of paper, the corresponding half of which is to the commander of the boat, with an order written on it, and signed by the shipper, authorizing the delivery of the goods to the person who shall produce the order written and signed on the corresponding half piece which has been sent forward.

*Port William,
Marine Board Office,
The 31st July 1837* }

Latterly the demand for freight on the iron steamers, from Calcutta to the Upper provinces, has much increased. When this is the case, in excess of the tonnage available, the tonnage is put up to public competition at the comptroller's office. In March 1839 two thousand cubic feet of tonnage was put up, and the price rose rapidly at the commencement of the auk: one lot being disposed of at the rate of three rupees ten annas the foot; the general price ranged from three rupees six annas, to two rupees seven annas. The demand for tonnage, however, fluctuates. In the month following the above, the requisitions for freight, did not exceed the tonnage available; consequently no public competition took place, and the freight was of course charged for, as prescribed in the foregoing notification.

In June 1839, the demand for freight in the *Matabangah* accommodation boat, being considerably above the means of supply, the tonnage was put up to auction. At the first few lots, the price rose as high as three rupees and six annas, from which it gradually fell to two rupees twelve annas, where it stood till the last ten lots were put up; when it rose again to two rupees fourteen and fifteen annas at which the remaining lots went off.

The freight at auction, on the 31 August, 1839, was bid for so high, as to very soon four to five rupees per foot, a circumstance quite unprecedented in the annals of up country steamers. This led to the bunding in 1841 of cargo boats; the rates of which are subjoined.

Carrriages, baggage, palankeens and packages, of all dimensions will be received and freight charged, for whatever distance, at the rate of one anna per lb., excepting on light goods, which weigh less than 24 lbs. per cubic foot, when the former charge of 1 R. 8 anna per cubic foot will be made, and no package, however small, will be received at a less charge than one rupee eight annas.

Hooking charges will be made in the same rates as formerly.

RESPONSIBILITY FOR TREASURE ON RIVER STEAMERS.

The commander of the vessel, and the officer in command of the escort, give a joint receipt, and are held jointly responsible.

CURRENCY OF PAY OF STEAM DEPARTMENT.

Though the salaries of steam engineers and engine drivers engaged in England, under covenant, are convertible into the new paper, at its intrinsic value, this principle is not extended to those who accepted consolidated allowances.

COMMISSION

No commission is granted to the commanders of the inland steamers for freight of treasure.

On this subject, we may add that government are pledged to withhold from any vexatious competition as such as private enterprise may undertake the inland steam navigation. At the same time the government must at any rate, at the commencement of such private enterprise, retain their own boats, so that they may be independent of any private company, on account of transport of troops and treasure, in cases of emergency.

GUIDE FOR PARTIES PROCEEDING BY THE HONORABLE COMPANY'S INLAND FLATS AND STEAMERS.

1. How to ensure a passage. A month, or six weeks before the intended time of your departure, intimate by letter to the Controller of Government Steamers at the Marine Board, the time you wish to leave Calcutta, (stating for what station,) with particulars as to number of ladies, gentlemen, children and servants, if Hindoos, or Musselman, or Christians, and what class and number of cabins are required.

2. Advisable to secure a cabin in time. On receipt of answer, it is requisite to secure the passage immediately by letter, as the accommodation of the flats are often engaged two and three months before hand. When passage is engaged, send for your bill, and either pay, or give a check for full amount of passage, dieting, &c. &c.

3. When Accommodation Boat is full, how to get a passage in the officers' Cabins of Flat or Steamer. If no cabins should be procurable in the Accommodation Boat, get a letter from the Controller to the commander of the flat or steamer, granting them permission to accommodate you if they can; unless this is done, it is useless applying to any of the officers for their private cabins, as they are liable to a heavy fine for transgression, and dismissal from the service for taking any passengers.

4. Rates for officers of Flat or Steamer.

5. Number of Accommodation Boats. There are four Accommodation Boats, each having 12 class cabins, mounting 12 feet by 8-6, at Co's Rs. 200 each to Allahabad; four 2d class cabins, 9 feet by 8-6, at Co's Rs. 250 each, and six 3d class cabins, 8-9 by 8-6, at Co's Rs. 260 each—each cabin being fitted with patent water closets, but no furniture.

6. Return hire of cabins. The return hire of each cabin is less, being for 1st class cabin 200; 2d class cabin 160 10 8, and 3d class cabin 133 5 4.

7. Hire of cabins to any station on this side of Dinapore. Parties engaging a cabin for any of these stations in Calcutta, will be charged for Dinapore, being $\frac{3}{4}$ of the passage, thus, 1st class cabin 200; 2d class 160 10 8, 3d class 133 5 4.

8. Hire for any distance above Dinapore. Cabins retained for any distance beyond $\frac{1}{2}$ of the passage are charged full passage to Allahabad.

9. Hire on return passage. The same rules pertain to the return passage. The hire being for a 1st class cabin 133 5 4; a 2nd class cabin 111 1 8; a 3d class cabin 88 14 2.

10. Passengers & baggage. Passengers are allowed to carry 5 cwt. as baggage in their cabins. But no packages, and any luggage put into the hold at passenger's request will be charged freightage.

11. Servants & their dieting, &c. &c. One servant is allowed to each cabin, and any extra is charged for at the rate of 50 Rs. each to Allahabad; if dieting with the crew, a charge of $\frac{1}{2}$ R. per diem is made, and for Christian servants 1 R. per diem is charged.

12. Two passengers occupying one cabin. If two passengers occupy a 1st or 2d class cabin, they may have a 2d servant at a charge of 25. Rs.

13. Hindoo servants. When a vessel proceeds via Sunderbunds, where they cannot land, they are to be provided with food and water, sufficient to last them four days, when the vessels proceed via Sunderbunds.

On return trips their provisions should be purchased at Commercially.

14. Table d' Hôte. A Table d' Hôte is kept on board the Accommodation Boat for passengers, at a charge of 3-6 Rs. each per diem for adults, exclusive of wines, &c. &c.; which, if required, may be obtained at

regulated charges, a list of which is hung up in the cuddy, as also any thing extra that may be called for between meals.

15. Children

Children not sitting at table are charged 1 R. per diem.

16. Passengers taking
1st or 2nd class cabin.

Dear Agre is some pine trees, and the old ruins of Mr. Jas. Prince's former
estate which was deserted after the May gale of 1835. A large clump of trees
about one mile E. by S. from the house, is a fresh water
tank, brackish in on the bank of the Hooghly. This
place is infested with tigers. From here sportsmen
prepare for good bull practice at a ligature, piece, deer,
and monkeys; but no firing is permitted on board the
ships, on account of the ladies. Good salt-water bathing
is now obtainable.

From the Dear Agre the passage is very intricate
up to Koolah, owing to the number of windings, stores,
The vessels have to go through without
gibbs, the commander should therefore be well acquainted with the route.
Salt water procurable within 12 miles of Koolah in
Jessor.

Koolah is 127 miles from Calcutta by the steamer,
and 118 miles by land. Passengers wishing to proceed to
Jessor in the steamers must land here, Jessor being 30
miles from Koolah. This is a coal depot, where vessels
haul to the bank; it is likewise a Post Office station;
the bank runs in 1 1/2 days; letters for steamers should
leave Calcutta two days after the vessel. At this place
fish, the fish, and condiments, green and dry, may be ob-
tained; also palm oil may be procured. This is the residence of Mr. Henry,
Indian factor. From hence a mail, leaving early, branches off for the
Burmah and Dacca routes.

From Koolah steamers proceed up the winding
bank of Ataree Banker to the beautiful and bold
Barichie, or Maddamath river, which is thickly
studded with indigo factories, and very large populous villages. On the banks
of these two rivers, as also the river, children
are found rubb. The Ganges is a difficult river to
navigate, owing to strong under current or currents.
From Koolah to Comarow, on the Ganges, is
120 miles by steamer's route, and is 24 days run.
When running up or down the Ganges, passengers
should abstain from conversing with the officers of the vessel when at their
stations.

Steamers are 6 to 7 days from Calcutta, and any letters for them must leave town on the 4th day after them. It is 124 miles from Calcutta by dawk route, and 377 by steamer's route. This is also a coal depot, and the steamers haul to the bank. Fowls, ducks, kites, goats, milk, butter, eggs, and bread are procurable here,—the Natives flocking with them, to the year, is if properly treated. Large jheels abound here with waterfowl of every description. This is the famous manufactory for ladies' buas, muffs, and tipperis of down and variegated feathers. Promenades are good here. Pubna passengers should land here.

Ten miles above Commercolly is the Ganges river, up which the steamer proceeds if for the North Western provinces, but down, if for Pubna, Dacca or Assam.

About Commercolly, on the right or southern bank of the Ganges, is the present blocked up entrance of the Muttabanga, or Broken-headed river,—very appropriately named—it empties itself into the Hooghly by the outcast's village. Above it is the blocked up entrance to the Jellinghee river, which empties itself into the head of the Hooghly river, off Nuddes, after passing Kishnagar civil station.

Sixty-six miles from Commercolly is Surdah, on the left bank of the Ganges; was formerly a coal depot, and is noted for Mr. Watson's large silk factory, formerly the Hon'ble Company's. It is 418 miles from Calcutta by steamer's route, and is 177 miles by dawk. Steamers do not wait here, but change pilots. Letters from and to Calcutta take 2 days; but they should not be sent here but to Rampore Beaulah. From hence the Burreyl river branches off to the east, through the Chullum and Bellobockery jheels into the Bara Saur river for the Junal and Dacca; but only navigable for small boats.

Twelve miles from Surdah, on the left bank of the Ganges, is the civil station of Rampore Beaulah, in the district of Rajshaye, distance 455 miles by steamer from Calcutta, and only 165 miles by land. It is the residence of a judge, a magistrate, a collector, postmaster, engineer officer and doctor, as likewise some indigo and silk manufactures. This is a coal depot for steamers where they are generally detained 2 to 4 hours. Here is a good bazar; bread, butter, fruits, meat and poultry, are cheap. There is a fine road here. Letters for steamers from Calcutta should leave the 6th day after the vessel. The dawk takes 14 days for letters; heavy dawk 21 days; the steamer's run is from 7 to 8 days. Passengers for Dajelling, Sanatani, and others, in leaving Calcutta, should make arrangements for land travelling, and to leave the steamers here, which is a far more comfortable plan than landing at Burghatla.

Bergatchie, on the left bank of the Ganges, and Mahanandee rivers at their junction, is 22 miles above Rampore Beaulah: there is a crossing ferry from Berhampore route for the new route to Doreeiling: it is about 80 miles from Berhampore. Passengers can be landed here, this being the direct route from Calcutta to the sanatorium.

Furteeport factory is one of Lord Glenelg's, and in the district of Malda, distant 24 miles from Malda. It is situated on the left bank of the Ganges, and is 50 miles from Rampore Beaulah. At 3 miles above this is the junction of the steamer's route with the Bhagruttee and Sunderband routs. Passengers for Malda should land here.

Subjunge is on a rocky point, on the right bank of the Ganges, and is by Bhagruttee 265 miles, by Sunderbunds 686 miles from Calcutta, and by land 106 miles. Letters for steamers, from June to October, should leave Calcutta on the 5th day after the steamer, and from October to June on the 8th day, dawk route being $1\frac{1}{2}$ days.

This is a very ancient city, and the ruins of an immense mass of buildings, among which is an ancient palace, a noted well, a hall of audience, a marble lined balcony and gateway, &c. &c., worth inspecting. Here are some Christian graves and monuments, and a large bazar, where milk, curds, palm fruit, palm juice, poultry, kide, rice. Hardware in a small way is procurable. The European factors and native Nabob reside on the bank, about 2 miles above the steamer's anchorage or coal depot. Vessels generally stop here 4 to 5 hours: it is a very sickly place, owing to jungle. The hills are distant about 5 miles inland. The Himalaya hills are visible at times. It is a native darogah's, and post office station.

Twenty-one miles above Rajmahal, and 3 miles below Sukreegallee hill and point is the beautiful Mootee Jhurna waterfall: it is visible on the eastern side of the hills. At Sukreegallee point is an Indigo Factor's bungalow; would be an excellent shooting box: bears, tigers, thintaroes, leopards, and hogs. Deer of all kinds abound here, and among the hills feathered game abound. Steamers pass it in 10 days in the dry season.

Twenty-three miles above Sukreegallee, on the left bank of the Ganges, is Kanti-nagar. Passengers for the civilisation of Purneah are landed and received here.

Fifty-eight miles above Rajmahal, on the left bank of the river, is the junction of the Kooole river. On the Nepaul part of the Himalayas, nearly opposite, is Patturgatta hill: with one or two temples, and is noted in native tradition for a cave (only a small hole), into which, it is said, a Rajah with an immense suit, and one lot of torch-bearers entered, and never returned: such is the story of an attending inquirer. From hence are beautiful views of isolated hills, and the tip of the Colgong range. The southern or Patturgatta pass, up to Colgong, has some very dangerous rocks, where, if a boatman is not a soul can be seen.

Colgong.	Colgong village and rocks is 68 miles above Rajmahal; 65 miles below Monghyr, and 18 miles below Bhaugulpore; is on the right bank of Ganges, and has a fine nullah and shelter for boats. It is a coal depot for steamers: the left passage should never be attempted by either steamers or boats in the rains, as the currents and eddies between the main and the rocks, almost make it certain loss for any native boat, and too dangerous for steamers. Boats in attempting it, must be careful to have very strong tracking lines low down to their prows, with plenty of trackers and two howlugs as guys to the bank, and kept close in. Ruck fish is procurable here.

Bhaugulpore.	Eighteen miles above Colgong is the civil station of Bhaugulpore, situated on the right bank of the Ganges. It is very picturesque. It is 268 miles by land, and 348 miles in the rains, and 636 miles in the dry season from Calcutta. Here is a commissioner, a judge, a magistrate, a collector, a doctor, a sub-optimum agent, a steam agent, a post master, and some indigo factors. Letters for steamers should leave Calcutta the 6th day after the steamer in the rains, and on the 9th day in the dry season. Dawk takes 2½ days, and steamers 9½; and 11 days to arrive here. Provisions of all kinds are procurable here; also a kind of light silks, called Tussera, for coats, jackets, ladies' gowns; short silks of various colours for bed covers, and native wear; also a kind of cloth called basters. There are a few hill rangers and a sepoy station, under charge of an invalid officer. There is also a monument here raised by the hill people, in memory of their lamented patron, Mr. Cleveland of the civil service whom they styled the Father of their country.

Monghyr.	One hundred and thirty-three miles above Rajmahal or 25 miles above Jangeera rock is the civil station of Monghyr—a very large mart. Its old fort by the anchorage, is situated on a rocky point extending considerably inland on the right bank, and is considered by the steam regulations to be half way. There is a Judge, a magistrate, a collector, a doctor, a post-master, and steam agent; likewise a general storehouse for all European stores and provisions, wines, &c. &c. Murats, buggies, for a evening's ride to the noted Beestakoond well distant 5 miles. Two large bazars are here, where provisions of all description, except ducks, may be obtained. This is the little Birmingham of the East. Tussera, basters, different native cloths, hardware, furniture, apparently well finished guns and pistols (but treacherous articles)—pikes, swords, gunpowder, shot, black wooden flower vases and cups, ladies' handsome light wooden, jet black necklaces, and bracelets.

Children's painted wooden toys and sticks, very hard bamboo for cues, and various kinds of birds, cameleons and monkeys.

The steamer's passage to this is generally 12 days in the rains, occasionally 10 days in July, and in dry season 13 to 14 days: the distance from Calcutta is 398 miles by Bhagutter, 686 miles by Soodarbunds, and 304 by land. Dwk runs in 2½ days. Letters for steamers should leave town on 7th day after her. In July, and on the 8th day in June, August, September and October, and on the 10th day in the dry season.

On arrival here, the collector's and magistrate's book is sent on board for entry of all passenger's names, &c. &c. steamers stop here 3 to 5 hours for coals.

Two miles S. W. by W. of Monghyr are some rocks, with a mark on them: they were formerly in the steamer's track, but are now buried in an immense sandbank.

On right bank of the Ganges, 20 miles above Monghyr, is the large village of a Soorajgurra, with a small river that runs down from the hills. Fowls and kids are procurable here, through the thannadar's assistance, for boat travellers.

On the right bank of the river, 80 miles above Monghyr, and 60 below Dinapore, is the large town and mart of Bar, being a darogah station, also a bye depot for steamer's coals. All this bank of the river for 20 miles below and above, is noted for piggery villages, and saltpetre manufactories.

Also on the right bank, 87 miles above Monghyr, or 9 miles below Patna station, or rather Bankipore, is a large native town, with a river on its upper or western end, that flows from the hills, and has a pukka bridge over it: it is a noted manufactory of table cloths, of any extent, pattern, and texture that may be ordered. Also napkins and towels of sorts.

Patna, and the civil station of Bankipore, extends about 10 miles along the right bank, 14 miles below Dinapore; is noted for opium, grain, and wax-candles and is a very large mart, 1700 boats have been counted of burthen lying here at one time. It is the residence of a nabob, and being a sudder or civil station, has a commissioner, a judge, a magistrate, a collector, their deputy and joint-officers, a doctor, an opium agent, a post-master, European assistants and missionaries.

The government establishments are at Bankipore, or the upper extreme of Patna, where there are some handsome houses, also a very large and noted granary built like a dome, with two flights of steps outside, to ascend to its top, on which is a large circular hole, to admit air into the building, and to start grain late. It has only one door, and was built for a depot, in case of famine. It is a very massive building, and noted for its very numerous, clear, and strong ether, and at present used as a guard house.

Steamers seldom stop here : sometimes not being able to get within a mile or two ; passengers can land at the lower end, and get rickshas or hackeries, (a native one horse conveyance) to take them up to Bankipore, or to the military station of Dinapore, 14 miles distant, by way of a novelty or change, where they can inspect the granary by the road side. The road is very good up to the military cantonment. Dargah farm, is north of Patna. On the left bank is the Gunduck river from the Nepal hills, with a large native town on its right bank, and on its left, or eastern bank, is the famous Hajepore bungalow, and race course. During its annual large fair which is attended by people from all parts of India, very good and cheap nags are procurable.

Dinapore.	Dinapore is a large European and native military station, where the steamers put to the bank by the cantonment flagstaff, for 5 or 6 hours, to take in coals, discharge and take in cargo, and passengers : It is considered as two-third of the passage upwards. It is on the right bank of the Ganges, distant from Calcutta, by steamer's route via Bhagurtee, 508 miles ; via Shunde bunds 700 miles ; and by land 376 miles. Post takes 3½ days. Letters for steamers should leave Calcutta on the 10th day after the vessel is in the river, and 13th in the dry season.

Mutton, beef, fowls, eggs, bread, butter, fruits of various kinds, and grapes in May and June are procurable ; as also table-cloths, towels, napkins, cotton handkerchiefs, sola hats, muslin and cotton cloth shoes, harness, Patna scented wax candles, and gram. Passengers for this place should arrange to land above it at Revelgunge, where there is a steam agent.
Residents.	Revelgunge, 27 miles by water above Dinapore, on the left bank of the river, is a very large grain and saltpetre mart, and noted for boat-building. An annual fair is held here.
Remarks.	Steamers merely touch to land passengers and a few packages to the steam agent's care. From hence up to Ghazepore, the villagers are said to be unkind, and dishonest.
Passengers for Arrah, Tirhoot.	On the left bank, 74 miles above Dinapore, is the large native village of Binnigan, a dargah station, noted for a fair annually held here, as also a grain mart.

There is a small fort here, where the battle was fought. Here are some European officers of the stud, a doctor, and hospital bungalow, also a steam agent.

Eight miles above Buxar, on the right bank of the river, is the junction of the Kurrunnasa river: the touch of its waters is considered as one of the direct mishaps that can happen to a Hindoo, as it is said to debar him from admittance into Heaven. There is a bridge built over it by a rajah. This part of the country is noted for dacoits.

One hundred and nineteen miles above Dinapore, or 31 miles above Buxar on the left bank of the river, is the Civil and Military station of Ghazepore, a very handsome place. At its lower end is the ruins of an old palace. The Native town is built on precipices. The European inhabitants, consisting of the judge, magistrates, collectors, doctor and opium agent, &c. &c. reside on a level plain, about the centre of the station, the cantonments from the upper part, and the European hospital is at the upper extreme. Between the civil and military lines is the chapel and Lord Cornwallis' tomb.

This place is noted for its opium manufactory, and Government stud establishment, where horses can be purchased; as also for its rose water, utter of roses, and other perfumed oils; bread, butter, eggs, fowls, mutton, lamb, kid, milk, and suzar, are procurable; also European articles of consumption, and millinery from the European shopkeepers. Its distance from Calcutta is, via Bhagruttie, 627 miles, via Sunderbunds 915, and by land 431 miles. The dawk runs in 4 days, and letters for steamers should leave Calcutta on the day after the steamer in the dry seasons, and on the 11th day in the rains;—the vessel's passage being from 17 to 20 days. Steamers remain here for passengers, and coal, and cargo at the steam agent's. Passengers for Goruckpore should land here.

This is the lower extreme of the North Western Provinces or Agra residency, and is a great place of trade. It is the lowest station for the Agra flat boats or boxes. Kunkerry banks commence from here upwards.

Eight miles above Ghazepore is the dangerous kunker reef of Balre that strikes across the river.

Twenty-three miles above Ghazepore is Chockpore stone ghant and temple, noted for the numerous monkeys that resort here.

Two miles below Chockpore, on the right bank of the river, is a sunken kunker rock, opposite to a palm tree, just below Sanoutie.

Thirty-four miles above Ghazepore, by Kuchares on the left bank, is a very difficult and dangerous sunken reef.

that goes up to Lucknow, said to be a very intricate and rocky river, too shallow for the smallest boats in the dry season. The Ganges river, from above Kuch-naree reef, past Saidapore up to the Goomtie, a distance of 8 miles, is a very critical passage with various bad patches of kunker rock, on which native boats and budgerows split instantaneously.

Five miles above the Goomtie, is Chandrontie, with a white temple. This in mid channel, is a very dangerous pucks platform, on kunker, with the ruins of an old temple on it, and no passable channel on its northwest, or Jinhore side, and very dangerous for downward bound boats, as the current sets directly on it.

Five miles above Chundrontie is Bulloo Ghaut and ferry on the right bank: these banks are formed of kunker rock.

Fifty miles above Ghazepore, or 8 miles above Bulloo Ghaut, on the right bank of the river, is Kyr, and its sunken kunker reef, scarcely avoidable in some dry seasons. From hence due west over the right bank, you will observe the Benares minarets, distance 9 miles.

Benares, on the left bank, is considered as the most holy city in India, and is certainly one of the most handsome when viewed from a distance on the river, there being such numerous stone ghauts and temples, some of which cost 17 lakhs of rupees. This is the residence of some of the native princes, pensioners of the Honorable East India Company; but their dwellings are divided into so many little chambers, or pigeon holes, that the internal part of the city has the appearance of a mass of mean buildings, piled up without any regard to order or appearance, and narrow, filthy lanes, instead of streets. There is a large inclosed mart, called a chook that opens at 5 P. M., where trinkets, toys, birds, cloth, coarse hardware are exposed for sale. It has a large well in it, and is also a resort for native auctions. Close to the chook is the principal alley or mart for Goolbuduns, a very fine silk, of various patterns, worn by natives, as trousers; also fine caps with tinselled crowns and very elegant gold and silver embroidery: also scarfs and turban pieces for fancy head dresses. There is likewise a traveller's chook, a native inn, and a large horse mart, where very fine horses, of the Turkey, Persian, and Cabul breeds are procurable, as high as 8, 10, and 15,000 rupees and are brought here by the fruit carriers who bring grapes and pears from these countries. Here are several miniature painters, and also vendors of miniatures on ivory, said to be likenesses of different native princes, and their queens, and nautch girls; true likenesses of native servants in costume tradesmen and beggars.

Delhi jewellery of the best gold is brought on board the steamers, by sending for the dealers. Here is also an old observatory, and two very high and slender minarets, one of which has a slight inclination; traveller's ascending them are expected to give the keeper a fee of 1 rupee. From their tops is a view

of the city, the adjacent country, and the river (so gratifying a sight should not be passed over by any traveller). Provisions are procurable; pigeons, quail, and wild ducks of sorts are to be obtained. Steamers remain at Raj Ghat to discharge and take in packages, and to receive coals. The civil and military station is about 4 miles inland, direct from Raj Ghat, where resides the commissioner, the judge, magistrates, collectors, the general, and all the military officers of the native regiments stationed here, and some European artillery. Here also resides a doctor, a postmaster, steam agent coach builder, and European shop-keepers.

Letters for steamers, or travellers, are not forwarded to the vessel or boats, but must be sent for which is very inconvenient. The city is about 2 miles long. The natives are very uncivil to strangers. Numerous fanatics are here, who drown themselves believing that the holy Ganges, and the city of the most holy, secures them eternal happiness.

Benares is from Calcutta, via Bhagpatee 606 miles, via Sunderbunds 984 miles, and by land or dawk route 428 miles. Letters take 4 days, Bhangles 7 days. Letters for steamers should leave Calcutta, the 12th day after the vessel in the rain, and on the 14th day in the dry season.

Paleuk are procurable here, but infested with vile vermin. Travellers wishing to visit the station of Barde, should write up from Ghazepore to any friend, or the steam agent, for a conveyance to be ready at Rajahat for them, on their arrival.

Ramaghar, 1½ miles above Benares, on the right bank of the river, is a native palace, the residence of the Rajah of Benares.

Sooltanpore, Pedares, is a native cavalry station, 17 miles above Benares, and on the left bank of the river. Steamers bring to here a few minutes, on their passage up or down, as required, to land and receive passengers. It has a knukery or rocky point, which is very awkward for native boats, as also for steamers, owing to narrow channel and strong currents; it is off the stables, which are called Little Calcutta.

On the right bank of the river, about 4 miles above Sooltanpore, is a very neat looking place, called Chunar, with a very neat-looking English church, that reminds one of sweet, 'sweet home.' It is an invalid military station, and has a fortification, on an isolated rocky hill, which projects into the river, forming a very nasty point to pass in the rain. Hindoo tradition tells, this fortress was built in one night by a giant, and is impregnable: it completely commands the river and is used as a place of confinement for state prisoners. There are several detached rocky hills, or stone quarries here. It is a very sickly place, owing to the heat arising from the sun, which covers liver and spleen. There is a great place for snakes. A little above the fort is a temple. Tradition states it contains a skull, which cannot be opened, unless the party opening it lose his head—four slaves having so suffered once, in an attempt on it. Very fine black and red earthen ware is procurable here, such as wine

Black butter-pots, with a casting for water, very neatly finished, and large black double urns, to contain bread and keep it moist. Here is a steam agent; but steamers seldom stop more than ten minutes.
Steam Agent's residence.	Seven miles above Chunar, on the right bank of the river, is the village of Kutnac, with rocky bottom and hard lumps of red earth in the river, a little above is a ravine, which is to be avoided by all boats.
Kutnac.	Fourteen miles above Chunar, is the crossing ferry of the Benares grand road, and of Kiwa and Bindu-dooles to Mirzapore. From hence to the latter place, is a fine road, distance $7\frac{1}{2}$ miles by land, and 16 miles by water.
Cautions to boats.*	Ten miles above the ferry, and 7 miles below Mirzapore, on the left high bank, is Bhajoun, with a white tomb, and a patch of kunker in the river, on which many boats are lost. From here the cantonments of Mirzapore are visible.
(crossing ferry of the Benares grand road.	Mirzapore, a military cantonment, is 2 miles below the city, and the civil station. Where the judge's, magistrate's and collector's offices are, is 1 mile below the city. The steamer stops at the agency ghaut, at the lower end of the city. This place is noted for a cotton mart, and cotton manufactory; as likewise shell lac, lac dye, hardware in a small way. Many boats are here, at all seasons.
A good road to Mirzapore.	The city is very confined, and dirty, subject to great sickness. There are 2 or 3 fine stone ghatts here, and some small temples and minarets. Bread, butter, eggs, mutton, lamb, kid, beef, veal and fowls are procurable here. Both a military and a civil doctor reside here.
Bhagoun.	Mirzapore is from Calcutta, via Bhaginttee, 749 miles, via Sunderbunds, 1036 miles, and by dawk route 455 miles. The dawk takes 5 days, and bhany 8 days to run. Letters for steamers should leave Calcutta on the 13th day after her in the rains, and 17 days after her in the dry season; the vessels, having plenty of cargo to discharge here, are generally detained from four to six hours.
Dangerous rocks.	Four miles above Mirzapore is Bindachan, on the right bank, noted as the place of an annual meeting of disreputable people who conspire to make row and pogras.
City of Mirzapore.	One mile above Bindachan are the dangerous granite rocks of Beeppore.
Residence.	Twenty-eight miles above Mirzapore, on the left bank of the river. Passengers generally land here, cold season, and have a walk across the neck of land, in a W. N. W. direction two miles wide to Talla, and rejoin the steamer again at there. The distance is a detour of 21 miles round the point.
Manufactory.	Two miles above Suttamaree, is Deega Kunker spit, with a deep bight.

Leichyagurree and its ravine, on the left bank of the river, is 22 miles above Deega, noted for its robbers when it was attached to the oude territories.

Sarna is a large cotton mart, on the right bank of the river, and is 6½ miles above Mirzapore, and 23 miles below Allahabad, to which place is a good road. This is the station of a European customs officer. There are several buika houses here, and two very fine tanks at the back of it, and an old mud fort. From hence, up to Allahabad, the river is very intricate and shallow. Ironwork in a small way can be done for boats here. Turkeys and guinea fowls abound.

Allahabad, is 83 miles above Mirzapore. Its fort is at the junction of the river Jumna and Ganges. It has an imposing appearance, when on the river, 7 miles below it. The Jumna waters are blue, whilst the Ganges are muddy. The steamers put to at the Jumna mosque, built by general Kyd, and ¼ mile inside the Jubbah. The native military cantonments are about 5 miles inland, and the civilians' and officers' are from 3 to 4 miles inland. The general and doctor reside in the fort, as also the steam agent. State prisoners are kept here. Here is also a large stone pillar said to have been erected by Alexander the Great, to mark his conquests, and a cave full of native stone images, wherein is shown a small entrance to a supposed subterraneous passage to Benares, but which, in fact, only extends a few feet. The city is the seat of one of the principal native courts of justice (the Sudder Dewanny.) It is also a great place of worship, and an annual fair is held outside the fort on the sands, at the point of junction. It was formerly the seat of the residency. Bread, butter, eggs, beef, mutton, lamb, kid, fowls, pigeons, turkeys, guinea fowls, quail, partridges, teal, wild ducks and geese are procurable here. European shops are here and auctions held. About 2 miles from the ghaut is the chook, or market, where all sorts of cloth European and native, are procurable. Shawlmen board the steamers, if sent for, with all sorts of Cashmere shawls, waistcoating, caps, gloves, socks, and Afghanistan woollen cloths; as also Delhi jewellers and manufacturers of cotton; carpeting of various patterns—showy on rooms, and rather durable. A little beyond the chook is the livery stables where beautiful horses are procurable, of the Persian, Cabool, and Toorkey breeds. The post-office is in the fort, where you must send for all letters. Letters for steamers should leave Calcutta on the 14th day in the rains, and on the 17th day in the dry season, after the departure of the steamer. The distance from Calcutta is, via Bhagrattee, 851 miles, via Sunderbunds 1188 and by duck route 694 miles. Steamer's regulated distance is 800 miles, steamers remain here three entire days when they depart on their return trip, after discharging and taking in their upward and downward cargoes, and passengers. Apply to agent there, or to commander, for passage downwards.

The following rules for stamping letters have been submitted to the Governor-General of India in council, and being approved, are appended for the guidance of the officers of the department.

RULES FOR USING POST OFFICE STAMPS.

All letters and packets whatever (save and except newspapers and ship and steam letters, hereafter specially provided for,) received at any Post Office in India for despatch by post, whether free or post paid, or liable to postage, as the case may be, are to be marked with the appropriate stamp, bearing the name of such office of despatch, and when slide-stamps are not provided, when the date of the month and year forms part of the stamps itself, the said date must be entered in writing across the middle of the face of the stamp. If the letter or packet received for despatch be post paid or bearing postage, the amount of postage so paid or due, must be entered in writing on the face of the stamp, after the word "paid" or "bearing," as the case may be."

2. All letters and packets whatever, received at any Post office by Post for delivery at such office, are in like manner to be stamped with the appropriate office stamp, and marked with the date of the month and year; but the amount of postage, paid or due, is not to be entered on the stamp of delivery, as the stamp of despatch regulates the levy of postage.

3. The stamp for all service, soldiers or other free letters, or packets is an oval $1\frac{1}{2}$ inch long by 1 inch wide, bearing the name of the office and the word "free," and must be stamped red.

4. The stamp for all letters or packets, on which postage has been paid, is an oblong, $1\frac{1}{2}$ inch long by 1 inch wide, bearing the name of the office and the word "paid" and must also be stamped red.

5. The stamp for all letters or packets, on which postage has not been paid in advance, is an oblong, $1\frac{1}{2}$ inch long by 1 inch wide, bearing the name of the office and the word "bearing," and must be stamped black.

6. Forward letters or packets, i. e., those which follow a party addressed from station to station, are to be stamped at each office of fresh despatch, and marked with the additional postage due on such fresh despatch.

7. When a letter exceeds in weight a single tola, its weight, double, treble, &c. must be entered in writing on the face thereof, and on bulky parcels, the exact weight must in all cases be entered in writing on the same.

8. All service, soldiers or other free letters or packets received from seaward, at any General Post Office are to be stamped with the ship letter free stamp. This stamp is circular, $1\frac{1}{2}$ inch in diameter, bearing the name of the General Post Office, the date of the month and year and the words "ship letters free," and must be stamped red.

9. All other letters or packets received from seaward at any General Post office, are to be stamped, if received by ship with the ship-letter bearing stamp, and, if by a Government steamer, with the steam letter bearing stamp. The former is a square stamp, $1\frac{1}{2}$ inch in diameter, bearing the name of the General Post Office, the date of the month and year, and the words "ship letter bearing." The latter is an octagonal stamp of similar dimensions, but with the words "steam letter bearing." Both these stamps must be stamped black.

10. At the several stations where newspapers are published in India, newspaper stamps are provided with which all newspapers received at such stations for despatch, will be appropriately stamped, whether free, paid or bearing, as the case may be, and the postage paid or due, as the case may be, marked on the same either by the stamp or in writing. At offices of delivery where newspaper stamps may not be provided, newspapers will be marked with the usual office stamp, in like manner as other packets.

11. At General Post Offices all letters or packets required to be delivered at the morning delivery, are to be marked with the A M stamp in *black* ink, and those at the afternoon delivery, with the P. M. stamp in *red* ink.

Published by order of the Right Honorable the Governor-General of India in Council,

DAWK TRAVELLING—CALCUTTA TO BOMBAY.

Memorandum on the mode of travelling post from Calcutta to Bombay, via Cuttack, Hyderabad and Ponnah, distance 1,405 miles. From Calcutta to Ganjam 364 miles. Apply to Post Master General. Dawk must be paid in advance at the rate of 8 annas a mile.

From Ganjam to Moonegallah 497 miles. Apply to Collector of Ganjam, stating all particulars in respect to extra bangy burdens, also intended detention at stations en route. Bearers must be paid by the traveller at end of each stage. Stages vary from 15 to 20 miles each. Average cost about 5 annas a mile.

From Moonegallah to Hyderabad 100 miles, apply to Resident at Hyderabad, in same form as above. Timely notice must be given, as Bearers must be sent out from that city to meet the traveller. The same rule applies to the route from Hyderabad to Sholapore, 200 miles, as bearers must be sent the whole distance from Hyderabad. This portion of the route is very expensive.

From Sholapore to Poonah 167 miles. Apply to Post Master Sholapore to Post bearers to take you to Indoorpoor 77 miles. From which place to Poonah, 80 miles, bearers must be sent out from Poonah, for which apply to the Post Master Poonah. Timely notice should be given.

From Poonah to Panwell 72 miles. Bearers will be posted by the Post Master of Poonah.

From Panwell to Bombay 20 miles. The conveyance is by water.

If more than a single set of bearers are required between Moonegallah and Poonah, good notice should be given, and I am not aware that it is practicable to post more than three planquins on that road. I believe it is with extreme difficulty that bearers can be posted for more than two.

From Calcutta to Ganjam, the cost of travelling, for a set of bearers with mus-sajee and two bungee burdars, will vary from, 8 to 9 annas per. mile. From Ganjam to Moonegallah it is about 5 or 6 annas a mile from Moonegallah to Sholapore, it averages 2½ rupees a mile, and from Sholapore to Poonah it averages 1½ rupees a mile.

From Poonah to Bombay, it is about 12 annas a mile.

Passage of Servants.

Mistakes having occurred on the part of individuals applying to Government for permission for servants to proceed on board ship, with respect to the description of such servants, the Governor-General in Council is pleased to direct, that all persons applying to Government to authorize the reception of any servant on board ship, shall distinctly specify in their application, after careful inquiry, the country to which such servant may be sent.

His Excellency in Council is also pleased to direct, that extracts from former order of the honorable the Court of Directors, relative to servants proceeding on board ship, be now re-published for general information.

Extract from a public general letter from the honorable the Court of Directors, dated the 19th August, 1807.

4th.—“We have resolved, that in future, previous to any black servant, or the wife of any non-commissioned officer or private, either in His Majesty's or the company's service, being allowed to come to England, in attendance upon passengers on board any ship whatever, a deposit of £ 100 instead of £50, as heretofore, be made in the company's treasury, at your presidency.”*

Extract from paragraph 17th of a public general letter from the honorable the Court of Directors, dated the 14th of January, 1810.

“We think it necessary here to state, that in giving these directions, it was our intention, that the deposit should be made, not only for the return of natives of India, but for that of black servants in general; and we, therefore, now direct, that the prescribed deposit shall be made, for the return of all servants who may be natives of any parts of Asia, or Africa, or other countries whatever, continents, or islands, which are situated within the limits of the company's exclusive trade.”

Extract from a public general letter from the Honorable the Court of Directors, dated the 22d July 1814.

60th.—“We however direct, that in future, upon permission being given for any female European servants to proceed to Europe, the deposit ordered by our General Letter of the 19th August, 1817, be made previous to the order for the person to be received on board being delivered, and that it be particularly expressed in the order, whether the female servant is the wife of a Non-commissioned officer or private in His Majesty's or company's service; if so, what regiment or corps the husband belongs, and whether it is the woman's intention to apply for leave to return to India.

Extract from a public general letter from the Honorable the Court of Directors, dated the 7th of January, 1820.

4.—“We have of late received various applications from the wives of soldiers in the company's service, who have come to England in attendance on passengers, during the voyage, to be granted a passage back to India, at the company's expense.

These persons have no claim whatever upon the company, and we have resolved not to accede to such applications under any circumstances. We, therefore desire, that you will make our determination, in this respect, public,

* Modified. “Under the circumstances brought to our notice in your letters in this Dept. dated 12th March last (No. 7), we authorized you to reduce the deposit made on account of Native Servant proceeding to England or to the Cape of Good Hope, from Rs. 1,000 to 500. See Cal. Gaz. 26th Jan. 1838.”

in order that females coming home in the service of individuals, may be aware, that they cannot entertain any expectation of being returned to India at the company's expense.

C. J. USHINGTON, Actg. Chief Sec. to Govt.

Fort William, General Department, May 3, 1822.

PASSENGERS' BAGGAGE.

Considerable misapprehension prevailing as to what articles are comprized in the term "baggage in use," and so entitled to free duty, it is hereby declared, that the term applies solely to wearing apparel, second-hand, or in use, cabin furniture and trifling personal property, all in use and accompanying the baggage of overland passengers, not accompanying them. It is also imported free, if it would have free, had they come in the ship with it, the proprietor.

The tide-waiter on board each vessel, after satisfying himself by inspection, that baggage as above defined, has been in use, will pass it direct from the ship.

Fresh millinery, saddlery, musical instruments, guns, pistols, carriages, wines, spirits, plate, glass, crockery, &c. not used, [although for personal use and not brought for sale] are liable to duty; all packages containing such articles as well as all closed packages, whatever contents may be stated to be, must be sent to the custom house, at the expense of the proprietor, for examination and levy of duty, unless proprietor can produce to the Tide-waiter, a custom house permit or pass, particularly specifying such packages.

Passengers whose baggage may have been forwarded to the Custom House, are requested to apply in writing to the collector of customs at the custom House, for a permit; and such applications should contain the number of packages, and the contents and value of each.

The inward baggage Rules having in practice been modified to the extent of allowing free entry to the following articles, viz.

Each Lady Passenger: One closed package of new Millinery,

Each gentleman ditto. } One closed case new Saddlery, one ditto wearing
Apparel, and accoutrements, one gun and pair of
pistols.

The Inspectors will save the collector much trouble by going on board British passenger ships at time of their arrival off town and passing all such packages.

The Inspectors may likewise take the word of any gentleman in the Queen's or Company's service for the contents of closed packages, and pass direct all such as may not appear to cont. in dutiable articles.
29th June 1839.

By order of the Board of Customs,

Custom House, the 2d Feb. 1837.

7. The several officers authorized to receive subscriptions, will, on application from the holders of acknowledgments, transmit them (free of every expense whatever) to the accountant-general in Bengal, to be exchanged for promissory notes bearing interest from the 31st March or 30th September next ensuing, after the date of subscription. 8. Proprietors of notes who may require the interest to be paid at the General Treasury of Fort St. George, shall be entitled to receive it accordingly, provided they previously notify their wish to the Accountant-General at Fort William, and press at the notes to him to have an order for the payment of interest at the said treasury, written on the face of them under the signature of the said officer, or that of the deputy accountant-general. And after such order shall, on the application of the proprietor, be inscribed on any note, the interest shall be payable only from the said treasury, unless the proprietor shall present the note with an application for the purpose of transferring the payment to Bengal, to the accountant-general at Fort St. George, who, on such application being so made, will cancel the said order by a writing inscribed as aforesaid, under signature of him-self or his deputy. 10. The promissory notes of this loan shall not be renewed or sub-divided except by the accountant-general. But the accountant-general at Fort St. George and Bombay will, on application of the proprietors of such notes, and the payment of the established fees, transmit them to the accountant-general of Bengal for the purpose of being renewed or sub-divided free of all further expense. In other respects, the practice and rule heretofore in use in regard to the renewal and sub-division of promissory notes, will be adhered to.

11. The said notes shall be advertised for payment in the inverse order in which they shall have been placed upon the general register; that is to say, the notes last brought on the register shall be first liable to be discharged; but all notes advertised at the same time for payment, shall become payable on demand, without regard to priority, at the expiration of the notice. Government shall also be at liberty to advertise other notes for payment, without waiting for the expiration of pending notices and to discharge the notes so subsequently advertised, at the expiration of the notice relating to them, notwithstanding the holders of notes comprised in prior advertisements may have been omitted by themselves, or their attorneys, duly authorized, to apply for payment.

A rule, ordinance, and regulation for the good order and civil government of the settlement, of Fort William in Bengal, and for regulating the number and fare of Teeka Palankrens and Teeka Bearers, in the town of Calcutta, made and passed by the Vice-President in council, of and for the presidency of Fort William in Bengal, the eighth day of March in the year of our Lord one thousand eight hundred and twenty-seven, and registered in the Supreme Court of Judicature, on the 27th April, 1827.

Whereas, it is considered just and expedient to regulate the number and fare of Teeka Palankren and Teeka Bearers, in the town of Calcutta, and to place them in such manner under control of the Police, as may tend to the greater convenience of the public.

I. Be it therefore ordained, by the Vice-President in council, of and for the presidency and settlement of Fort William in Bengal, and by virtue of the powers in him vested, by a certain Act of Parliament passed in the thirteenth year of the reign of His Majesty King George the III, entitled "An Act for establishing certain regulations for the better management of the affairs of the East India Company, as well in India as in Europe," and by a certain other Act of Parliament, passed in the fortieth year of his said Majesty King George III, entitled, "An Act for establishing further regulations for the government of the British territories in India, and the better administration of justice within the same," that thirty days after the due publication and registry of this rule, ordinance and regulation in the Supreme Court of Judicature at Fort William in Bengal, with the consent and approbation of the said Supreme Court, if the said court shall, in its discretion, approve of and consent to the publication and registry of the same, no person whatever shall let out or keep for hire any teeka palankren, or serve as a teeka bearer within the limits of the town of Calcutta, without having obtained a license for that purpose, signed by two of his Majesty's Justices of the Peace, acting in and for the town of Calcutta.

II. And be it further ordained, by the authority aforesaid, that it shall and may be lawful for the aforesaid justices of the Peace, to license such number of teeka palankrens and teeka bearers, as they, the said justices, shall deem sufficient for the said settlement of Fort William in Bengal, and that such licenses shall be granted for the term of one year, and shall and may be recalled by any two of the said justices, at any time within the said year, for any great misconduct, or misbehaviour of any persons to whom such license shall have been granted; and that if any persons within the said settlement of Fort William in Bengal, shall let out or keep for hire any teeka palankren, or serve as teeka bearers, without having obtained such license as is required by this rule, ordinance, and regulation, or after any license which he may have obtained, shall have expired or been recalled, such person shall, upon conviction before two or more of the said justices of the peace, forfeit for each and every such offence, a sum not exceeding thirty rupees, and in default of payment, shall be forthwith committed to the common jail or house of correction, for any period not exceeding two months, unless the fine shall be sooner paid.

III. And be it further ordained, by the authority aforesaid, that every palankren so licensed, as aforesaid, shall bear on each side thereof, in large characters in English and Bengalee figures or characters, the number of each license, and that every teeka bearer so licensed as aforesaid, shall wear engraved or written thereon, in large characters, in English and Bengalee figures or characters, and that if any person, having obtained a license as aforesaid, to let

out and keep for hire a teeka palankeen, or to serve as teeka bearer, shall neglect to have the number of his license or his palankeen or badge, as hereto before ordered and directed, every such person shall forfeit, for each and every such offence, any sum not exceeding twenty rupees, and in default of payment, shall be committed to the common jail or house of correction, for any period, not exceeding one month, unless the fine shall be sooner paid.

IV. And be it further ordained, by the authority aforesaid, that it shall and may be lawful for any four or more of the aforesaid Justices of the Peace, from time to time, as they may deem fit, to fix and settle the rates, and hire of teeka palankeens and teeka bearers within the said settlement of Fort William in Bengal, and that such rates and hire shall be published in the English and Bengalee languages twice in the Government Gazette, and affixed at the Court House, Bankshall, Police Office, and other public places, for fifteen days before such rates or hire shall be considered as fixed and settled; and that if the owner or person in charge of any teeka palankeen, shall refuse to hire and let out the same, at the rate and price so fixed by the said Justices of the Peace as aforesaid or shall receive or require any larger rate or hire, the person or persons to whom the license for such palankeen shall have been granted, shall forfeit for each and every such offence any sum not exceeding twenty rupees, and in default of payment, shall be forthwith committed to the common goal or House of Correction, for any period not exceeding one month, unless the fine shall be sooner paid; and if any teeka Bearer shall refuse to serve at the rate or hire so fixed as aforesaid, or shall receive or require any larger price or hire, every such person shall, for each and every such offence, forfeit any sum not exceeding ten rupees, and in default of payment, shall be forthwith committed to the common Jail or house of correction, for any period not exceeding fifteen days, unless the fine shall be sooner paid, provided always, that no person shall be deemed or taken to be subject to the penalties in the section enacted, unless the fixed and settled rate of hire shall have been tendered and offered to him or to some one acting on his behalf.

V. And be it further ordained, by the authority aforesaid, that if any person shall refuse to pay to the owner of any teeka palankeen, or to any teeka bearer, so licensed as aforesaid, within the said settlement of Fort William, the hire earned and due to the owner of such teeka palankeen, or to such bearer according to the rate and hire so fixed as aforesaid, or if any persons shall wilfully break, cut, deface, or injure any teeka palankeen, such person shall, upon conviction before two or more of the aforesaid Justices of the Peace, forfeit a sum not exceeding fifty rupees, and in default of payment, shall be forthwith committed to the Common Jail, for any period not exceeding fourteen days, unless the fine shall be sooner paid; and if the fine shall be paid, it shall and may be lawful for the justices before whom such person shall be convicted, to award or give to the party complaining, the whole or any part of such fine.

VI. And be it further ordained by the authority aforesaid, that if the owner of any teeka palankeen or any teeka bearer, so licensed as aforesaid, within the said settlement of Fort William, shall make use of insolent or abusive language to, or towards any person hiring, or proposing, or offering to hire such palankeen or bearer, or otherwise grossly misconduct himself, such persons shall for each and every such offence, for it a sum not exceeding ten rupees, and in default of payment, be committed to the Common Goal or House of Correction, for any period, not exceeding fourteen days.

VII. And be it further ordained, by the authority aforesaid, that it shall and may be lawful for four or more of the aforesaid Justices of the Peace, from time to time, as they may think fit, to appoint and fix certain convenient places, as stands for teeka palankeens and teeka bearers, and that notice of the same shall be twice published in the Government Gazette, in the English and Bengalee languages, and shall be affixed at the Court House, Bankshall, Police Office, and other public places for fifteen days, before such places shall be considered as fixed and settled stands; and if the owner of any teeka palankeen or any teeka bearer, so licensed as aforesaid, within the said settlement of Fort William in Bengal, shall remain and wait for hire in any part of the public

streets, roads, and passages within the said settlement, except such parts as shall be fixed and appointed by the said Justices of the Peace, as aforesaid, such persons shall, for each and every such offence, forfeit a sum not exceeding ten rupees, and in default of payment, shall be committed to the Common Jail or House of Correction for any period not exceeding fourteen days.

VIII. And be it further ordained by the authority aforesaid, that all offences committed, and all pecuniary forfeitures and penalties had, or incurred, under or against this rule, ordinance, and regulation, shall and may be heard and adjudged and determined by two or more of the aforesaid Justices of the Peace, who are hereby empowered and authorized to hear and determine the same, and to issue their summons or warrant, for bringing the party or parties complained of before them; and upon his or their appearance, or contempt and default, to hear the parties, examine witnesses, and give judgment or sentence, according as in and by this rule, ordinance, and regulation is ordained and directed; and that all such fines and forfeitures, when paid, except only such parts of them as the Justices shall have directed to be paid to the parties complaining under the authority of section VI, shall be from time to time, transmitted to the General Treasury of the United Company of merchants of England, trading to the East Indies, and be employed and disposed of according to the order and direction of His Majesty's said Justices of the Peace, at their general quarter, or other sessions.

IX. Provided always that nothing in this regulation contained, shall in any way extend to prevent any person without license, from hiring or letting to hire, any palankeen for a month or any longer period, or to prevent any person without license from hiring any bearer or set of bearers for a month, or any longer period, or to prevent any person without license from engaging and hiring himself to serve as a bearer for a month or any longer period, or from serving under such engagement and hiring.

TO THE OWNERS AND OCCUPIERS OF HOUSES.

IN THE TOWN OF CALCUTTA.

As much misconception prevails on the part of Landlords and others in regard to the remission of the House Tax, for periods during which Houses

are unoccupied, and to the rules established for hearing appeals against the Assessment, the Collector of Assessment deems it necessary to inform Landlords that no remission of House Tax, can be allowed unless notice of the vacancy of premises be given within seven days of their becoming vacant, (for which notice a receipt is granted,) nor unless similar notice be given of the re-occupancy of such premises within seven days of their becoming occupied, (for which notice a receipt is likewise given.)

The bills for House Tax, being made out from books prepared by the Assessors, and approved by the Justices at their Quarter Sessions, the Collector has no power to alter those bills in any respect, consequently, when parties are desirous of having their own names substituted for the names in which the bills are made out, or when the Assessors' valuation of premises is objected to, they should apply to the Justices at their Quarter Sessions for the alteration of names or the abatement of Assessment, as the case may be, and Landlords are particularly required to take notice that any abatement in the Assessment which may be allowed by the Justices in Sessions has effect from and after the quarter immediately succeeding that in which the abatement was allowed, and not retrospectively.

The Quarter Sessions are holden by H. M. Justices of the Peace in February, May, August and November in each year; at these Sessions the Assessors make such increase in the valuation of premises as they may deem proper, timely notice being served upon the owners or occupiers of the premises the Assessment whereof it is proposed to increase. Public notice is given in the Calcutta Exchange Gazette, of the holding of the Quarter Sessions and of the period allowed by the Justices for receiving appeals against the Assessment. Appeals should be delivered to the Clerk to the Justices, and receipts obtained from him of their having been filed in his office. The Assessors give notice to appellants of the day and hour appointed by the Justices to hear their appeals.

The House Tax, is payable quarterly, and recoverable, in cases of default, by distress of the Goods and Chattels of the owner or occupier, under the provisions of the Statute 33rd Geo. 3rd Cap. 52d Sec 158th and the Act (No 24,) passed by the Right Honorable the Governor General in Council, on the 7th December, 1840.

Calcutta, 1st June, 1842.

C. WATTS,
Collector.

Ecclesiastical Department,

Extract from the proceedings of the right honorable the governor-general in council, under date the 20th August, 1813

1.—As the most natural distribution of clerical duties seems to be that of alternate weekly attendance, the presidency chaplains are directed, each in their turn, to perform all the surplus duties at the church and burying ground during one whole week *

2.—That the fees paid on account of interment (as detailed at the conclusion of these rules) be established into a fund, to be collected as heretofore, by the clerk of the select vestry, who is required to present his accounts of this fund to the select vestry at their monthly meeting; when an equal distribution is to be made to the chaplains, as a part of the ordinary business of the meeting.

3.—With respect to the fees arising from marriages and Christenings, as in a settlement like Calcutta, the rates cannot conveniently be diffused, but must be left discretionary with individuals, they are to be according to the present practice received by the clergyman himself, and not constituted into a fund, with a view to avoid the embarrassment which might arise, by the clergymen having to return monies from time to time to the clerk, and by his having to keep accounts current between them.

* It is provided by the 88 Canon of the Church of England, that the Priest, after having had due notice (i. e. the evening preceding the day on which the funeral is to take place,) shall meet the corpse at the entrance of the Church yard, &c. &c. and by the said Canon, it is ascertained that the Priest shall do this, under the pain of suspension from his ministry for the space of three months.

4.—As occasions of interruption may occur to the regularity of this arrangement, when individuals from a regard to friendship, or the ties of consanguinity, or other cause, incline more to one chaplain than to the other, it appears but proper that these feelings should be indulged. The regular chaplain of the week is consequently on these occasions to give a way, and expect no account from his colleague, of the emoluments connected with such special calls; excepting in the case of burial. The accommodation is mutual, and in his own turn he will reap the benefit of it.

5.—As other interruptions also in the weekly arrangement may arise from the absence of one of the parties, whether such absence be caused by necessity, or choice, the officiating chaplain is to receive the emoluments; this rule, however, is to be subjected, to any private amicable adjustment that the Chaplains may for their mutual accommodation. Should, however, the absentee's place be temporarily supplied by another Chaplain, the latter is to receive his share of the surplice fees.

With respect to the rates of fees for the Ritual service, it has been thought proper to continue to charge the same sums which have heretofore been received on account of Funeral Fees, with some modifications, calculated to relieve the lower classes of the community, upon whom the fees formerly charged might be thought to press too heavily. With these views the following rule, have been established, which it is hoped, will afford relief to the public, without materially affecting the just rights of the chaplains, viz.

- 1st. That the fee for interring a body in the ground be, if brought *Rs.*
in a horse or coach..... 32
- 2d. Ditto for entering a body in a pueka grave, the dimensions of
which are not to exceed in length 9 feet, and in breadth 54, be..... 82
- 3d. Ditto, if brought on the shoulders, and coffin ornamented, and
interred to the ground..... 12
- 4th. Ditto, if ditto, and coffin unornamented..... *Nothing*
- 5th. Ditto, if brought on the shoulders, and placed in a pueka grave. 24
- 6th. A tomb-stone perpendicularly erected, not to be considered as a
monument, nor if laid on the grave, if it does not exceed two feet in width.
- 7th. A Monument, when the ground occupied is equal to the grave
or not exceeding 10 feet in length and six in breadth..... 50
- 8th. A ditto, ground doubled the grave..... 100
- 9th. A ditto, ditto, treble the grave..... 150
- 10th. The dimensions of a monument are not to exceed the above-
mentioned sizes, without the special sanction of the Select Vestry, whose
duty it should be to limit the spaces occupied in the Burying Ground.

RULES AND ORDERS.

By the proclamation of government, dated the 20th October, 1819, the court is composed of four commissioners and the jurisdiction is extended to suits of 400 rupees. By Regulation XXV. of December 18th 1830, the commissioners jurisdiction is extended over the twenty-four pergunahs. Every plaintiff who puts a defendant into jail in execution, is required to lodge with

the keeper of the jail, or his deputy, within three days after the commitment, and to pay for one month, at the rate of one anna and six pie per day, and so on for every succeeding month, during which he may be detained, and on failure of such payment, the defendant is released.

Every prisoner confined in execution, is entitled to his discharge at the expiration of one month from the date of his commitment, if the debt and costs for which he is detained do not exceed five rupees ten.

If they exceed, but do not exceed fifty, at the expiration of four months. If above fifty and not exceeding two hundred rupees, eight months, and for all sums above two hundred rupees, one year.

The property of such defendants however, is liable to seizure until the debt and costs, and the diet which have been paid them while in jail, is satisfied.

The Court sits daily, at 10 o'clock A.M. and all summonses both English and Beggallee, are returnable seven days from the date of their being entered in court.

No person shall pay into court any sum of money either as costs or in performance of a Decree or Judgment of the Court, or in compliance with any order of court or on any other account whatever without a receipt for the same under the Signature of the clerk of court. Should any such payment be made without such receipt having been had and obtained, the same shall not be deemed or considered as a payment into court, but held as if no such payment had ever been made.

Police Office.

ASSESSMENT DEPARTMENT.

A Tax of 5 per cent. per annum, on the rent, is levied quarterly by the collector of assessment on all dwelling houses or tenements in Calcutta.

The rent of houses occupied by the Proprietors is estimated at the rent similar houses of the neighbourhood are let.

No tax is levied on empty houses, the same being duly reported to the collector within seven days of being vacated.

Public religious offices are exempt from the payment of tax.

The assessment on all premises is taken on the rents already known. When rents fall, or the value decreases from any cause, parties may petition the Justices of the Peace, through the clerk of the peace, when after examination their cases will be taken into consideration. In assessing new premises, the assessor will serve on the proprietor a printed notice, specifying the rate at which the tax will be levied, should this appear to the owner excessive, he can, as in the above case, send to the clerk of the peace a petition, stating his objections, when his case will be brought forward and heard. Should no objection be made, the rate named by the assessor will be fixed. Sessions are held quarterly for hearing all objections as to rent, and any alteration made in session, whether of increase, or decrease, will take place from the commencement of the next quarter, and will not have any retrospective effect nor will the alteration break in upon a quarter.

When the property is occupied by huts, built by the tenants, besides the real amount of ground rent received by the proprietor, a valuation on the huts is also made, and the owner is assessed for both the ground rent and the value of the huts; he on his part may leave the tax, or the difference between the ground rent and the valuation, from his tenants.

On the sale or purchase of property the purchaser, should see that all balances are adjusted and proprietors should be careful to notify to the assessors that such change has taken place, the assessor on being satisfied of the correctness of such information will, during the next session, insert the name of the new proprietor in the assessment book, after which the bills will be issued in the name of the purchaser.

The tax is collected quarterly, and in case of refusal or evasion of payment, the collector may levy the same by distress of property of the occupier or proprietor. Parties often think it sufficient to intimate a fall in their rents to the collector, but this is of no avail, for the notice of occupation in which it is generally inserted, is obliged to be kept in his office, until the notice of reduction should be made to the clerk of the place, if with the view to having it rated accordingly.

And in case it shall be proved to the conviction of a general meeting of Subscribers, that a deceased Member of this fund has, during his life time, whether in immoderate anticipation of his death or otherwise, made such a disposition of any part of this property, real or personal, as but for this rule would throw the entire or partial support of his widow or offspring upon the fund, who would not have been so supported by the fund had such part of his property not been so disposed of, with the intention thereby of benefiting any part at the expense of the fund, then the widow or offspring of such a Member or both shall forfeit all right to any part of the support which would have been claimable if no such disposition had been made.

ART. XXVII.—In addition to the information required by Articles XX. and XXVI. to be furnished to the Managers, before any allowance shall be granted from the fund to a widow, a solemn declaration shall be made and subscribed according to such of the subjoined Forms as may be applicable to the circumstances of the case.

First. If the widow shall not have any offspring by the deceased, and shall not be possessed of any income except such as may be derived from personal property the declaration to be made shall be according to the form C. of the Appendix.

Second. If the widow shall have any child or children living by her late husband, or if any child of his shall afterwards be born, and neither she nor such child or children shall be possessed of any income except such as may be derivable from personal property, the declaration to be made shall be according to the form D. of the Appendix.

Third. If the widow shall possess or be entitled to any income, exclusive of such as may be derivable from personal property, there shall be substituted for either of the preceding forms the form E. of the Appendix.

ART. XXVIII.—Whatever real or personal property the widow or offspring of a Subscriber may be possessed of at the time of application for admission to the benefits of the Civil Fund, shall be regarded as an available source of income, and, as such, shall be taken into account at a just valuation, or according to the amount realizable by public sale, the income derivable from such property being calculated at a rate of interest at four per cent. per annum. But from the latter part of the above provision are to be excepted all monies vested in Bank of Bengal shares, Government notes, or other public securities, the income arising from which shall be taken at what they actually yield. The same rule of calculation shall be adopted in the case of property of any description afterwards devolving on an incumbent on the fund.

ART. XXIX.—The declaration when by the 5th clause of article XXII is required to be made half yearly by widows who may be admitted to the benefits of the fund, shall be according to the form F of the Appendix. And in case a widow shall have acquired any property whatever subsequently to the date of her admission to the benefits of the fund, a specification thereof shall be subjoined to that declaration.

ART. XXX.—The mother, guardian, or other person, who may be in charge of any child or children entitled to a provision under articles XXIII and XXIV of these rules, or any other person who may be authorized to receive the same on account of such child or children before he or they shall be enabled to receive the Annuity payable, or any part thereof, shall take and subscribe a solemn declaration according to the form G of the Appendix; and if such child or children shall have become entitled to any property yielding an income, the same shall be specified as provided in that form.

ART. XXXI.—The several declarations required to be taken by the 5th clause of article XXII and by articles XXIII and XXX, shall be made before a Justice of the Peace, or other person competent to take the same, and such declaration shall be dated and signed on or subsequent to the day on which the Annuity is claimable and shall, in the event of the widow, guardian or other person entitled to receive the same being in Europe, be delivered to and left with the agent for the fund in England; or if such widow, guardian or other person shall be in India, it shall be delivered to and left with the Managers of the fund for the time being.

ART. XXXII.—If a married or widower subscriber to the fund, continuing in the Civil Service, shall have proceeded to or remain in Europe, otherwise than on furlough allowance, he shall be permitted, in order to secure to his family the benefits of the institution in the event of his death while absent from India, to pay to the fund a monthly subscription equal to that which he would have been required to pay if on furlough allowance; provided, however, that no Subscriber shall be permitted to avail himself of the above rule for any period exceeding five years from the date of his departure from India, and that no subscription shall be received from him after the expiration of that period; provided further that should the average payments above described be discontinued for the period of one year consecutively, the same shall be held and deemed to be a resignation and abandonment of the institution, and the family of the Subscriber shall not have any claim upon the fund, even upon payment of the arrears due, unless good and sufficient cause for the omission be shewn to the satisfaction of a majority of the subscribers at large.

ART. XXXIII.—If a Subscriber to the fund, who has served twenty-two years in India, retires from the service, or if having served ten years in India he retires from ill health, and at the time of retirement, as above stated, shall have contributed by his previous payments to the fund, including interest, the sum of twenty-five thousand Company's rupees, or if, on his quitting the service, he shall pay to the Fund what may be wanting to complete his contribution to that amount, such contribution shall entitle the family of such subscriber, on his death, to the benefits of the institution, under the several provisions herein before stated, or such as may hereafter be established, in like manner as if his death had taken place during his residence and actual subscription to the fund in India. The family of

any subscriber to the fund who may die during his temporary absence from India on leave, shall be considered entitled to the benefits of the fund under the existing rules. Subscribers in India, who may cease to receive any public allowances, shall be considered as having retired from the service from the date of their allowances ceasing. In all cases not expressly provided for, it shall be at the option of the subscribers at large to admit or reject the claim of any subscriber or his family, and such decision duly passed, shall be final and conclusive.

ART. XXXIV.—In the event of any subscriber to the fund discontinuing his monthly subscription thereto for the period of one entire year, he shall be considered to have withdrawn from the fund altogether, and his family shall not, in the event of his death, have any claim upon the institution; provided however, that in all such cases it shall be the duty of the managers to cause a written communication to be made by the secretary to such subscriber, informing him that his name has been struck off the fund; and provided further that it shall be competent to a general meeting of the subscribers to re-admit such member, on his appealing to the subscribers at large, and shewing what, in their opinion, shall be good and sufficient cause for his having omitted to comply with the rules of the fund.

ART. XXXV.—If subscriber to the fund shall be suspended from the service of the hon'ble company, and shall die during the period of his suspension, his widow and children shall be entitled to the benefits of the institution, in like manner as if he had not been suspended, provided he continue to pay at the rate fixed on his actual allowances under article IV.

ART. XXXVI.—If a subscriber to the fund shall be dismissed from the service of the hon'ble company, in the event of his death, his widow and children shall have no claim to the benefits of the institution, and he shall not be allowed to retain any interest in the fund by making any payment whatever.

ART. XXXVII.—Any person admitted into the Bengal civil service with permission to take rank in that service above any person that has been a subscriber to the fund, for a longer period than one year, shall not be entitled to become a subscriber to the fund except upon the following condition: viz.

First. If the individual so circumstanced shall be unmarried, he shall not become a member of the fund, except on condition of his paying to the treasurer, within a period not exceeding six months, from his commencing to receive salary from the Bengal Government, a sum of money equal to the average amount of the aggregate subscriptions of the unmarried members, in whose year the individual wishing to subscribe may rank in the Bengal civil service, with interest thereon at the rate of five per cent. per annum.

Second. If the individual so circumstanced shall be married or be a widower having a child or children, he shall not become a member of the fund, except on condition of his paying to the treasurer, within a period of six months from his commencing to receive a salary from the Bengal Government a sum of money equal to the average amount of the aggregate subscriptions of the married members, retaining a contingent interest in the fund, in whose year the individual wishing to subscribe may rank in the Bengal civil service, with interest thereon, at the rate of five per cent. per annum.

Third. Any applicant giving to the secretary of the fund a written authority for the deduction of twenty per cent. from his future monthly allowances, until the sums due from him under the above rules, with interest at the rate of 5 per cent. per annum, be paid up, shall be considered as having fulfilled the conditions required of him; provided always, that his family shall not benefit from the fund if he quit the service before paying up the whole amount due from him.

Fourth. The managers are authorized to admit applicants in the first instance, agreeably to the foregoing rules, but in all such cases the application shall be submitted for confirmation at the next general meeting.

Fifth. All cases and questions not expressly provided for by these rules, shall be submitted by the managers for the votes of the subscribers at large, whose decisions thereon shall be final.

ABSTRACT OF BENGAL CIVIL FUND RULES, WITH NOTES,

Rules now in operation, adopted at Special General Meeting, 25th November 1837, and confirmed at General Meeting 20th January 1838.

The Bengal civil fund instituted in 1834. Subscription commencing from January 1834. All who entered the civil service from and after the 17th January 1833 being obliged to subscribe and continue so during the whole period of their service. Members being civil servants of a prior date to 17th January 1833, have the option to withdraw at pleasure (so settling all benefits) excepting such amongst them as have signed a resolution passed by the subscribers on 26th July 1817, binding themselves to subscribe to end of service.

The ordinary contributions are regulated in allowances as follows:—

If allowance be no more than company's rupees 1,000 Per annum,	
Subscription is	Co's Rs. 10
If more than 1,000 but not above	2 000 = " 20
Ditto, .. 2,000 Ditto	3 000 = " 30
Ditto, .. 3,000 Ditto	4,000 = " 40
If above 4,000	= " 50†

* By a clause to that effect in their covenant per Letter from the Hon'ble Court to the Bengal Government, dated 17th January 1823.

† These rules are exactly as they were under the old rules of the Fund, excepting that Co.'s Rs. is substituted for rupees; viz. where 10 siccas were formerly paid to Co.'s Rs. are now paid.

Every three years an adjustment of the general accounts of the fund is made and if it be found that there is an excess of charges over the annual receipts, an extraordinary subscription of a specified percentage* on allowances is levied to make up the said deficiency.

Moreover if it be found on a triennial adjustment that the annual receipts do not exceed the annual charges by the sum of 25,000 rupees, an additional percentage on all allowances of every subscription is fixed and levied to make up the required yearly excess of 25,000 rupees.

4 Under the above rules, furlough allowances are considered assessable and where a married or widower subscriber is on leave to Europe and obtains no kind of allowance he must still pay a monthly subscription at the rate which he would have to pay were he in the receipt of furlough allowance.

5. Subscribers are payable with interest at 5 per cent. per annum on arrears of subscription.

6. A Subscriber after 23 years service in India retiring from the service, or one retiring from ill health after 10 years of such service, shall on making up his contribution with interest 25,000 Rs. be entitled contingent claim on the fund for his family.

7. The family of and subscriber who may die during his temporary absence from India on leave shall be entitled to the benefits of the fund under the existing rules; i. e. provided his subscriptions under rules 4 and 33 and other conditions have been duly conformed to.

A Subscriber in India who may cease to receive any public allowance shall be considered to have retired from the service from the date of his allowances ceasing; and accordingly to be dealt with under the rule for retirees. Subscribers absent from India more than 5 years are considered retired and to be dealt with accordingly.

8. A Subscriber suspended from the service and dying during such suspension, his family will benefit if he have during suspension continued to pay at the rate fixed on his actual allowances under rule 4th.

9. A Subscriber dismissed the service shall forfeit all benefit from the fund.

10 A Subscriber discontinuing his monthly subscription for one entire year shall be considered to have withdrawn from the fund and in case of his death

* The extraordinary subscription levied for this object on the 1st January 1838 was at ½ per cent. on Monthly allowances.

† On the occasion of a Member going on furlough, a letter to the effect of appendix I is handed to him. He may pay up, before going, the whole dues for the three years' furlough subscription at once—or, for any part thereof, or he may pay Monthly through Agents in Calcutta, or by the same means quarterly, ½ yearly, yearly, &c. in advance. These payments must be presented to the Sub-Treasurer, who as Treasurer of the Fund will after obtaining the same grant a receipt. If the Member remain absent beyond 3 years, but not more than 5 years, he must take care that his subscriptions are regularly paid up for such extended period.

‡ This rule was applied in 1840 to the case of a subscriber who being appointed to Mysore, drew allowances for 3 years, exclusive of deductions on account of the Fund's dues.

§ This rule (33) is considered under Resolution of General Meeting of 18th February 1839, to apply to all cases of admission sought after 1st January, 1838, existing by the families of subscribers who may have retired before that date, as of Subscribers who may have retired since the said date. Accordingly all such retired Members of date anterior to 1st July 1838 had before retiring made good the principal sum of Rs. 5,000 (under the 33th Article of the old rules) but who had not made up their contributions with interest (at 4 per cent) to Rs. 5,000 were addressed on the 1st May 1839, and offered the option of making up the balance due at or before 30th April 1840, and thus securing to their families eventually the benefits of the Fund.

One Subscriber so circumstanced protested on the ground of having conformed to the old Rules until the date of his retirement which took place before the operation of the new rules which commenced on 1st January 1838, and which therefore he deemed not binding on him. But the Managers informed him that under Rules 11 of the old Rules (as also by Rule 33 of the new regulations) to which he appealed, he was bound by the Rules which may at any time be revised by a majority of subscribers, and the new rules being so passed at meetings of 24th November 1837, and 31st January 1838, he was amenable to any and all of them. Accordingly, he was also subjected to the interpretation which may be duly put to any one of these rules by the subscribers, as in respect to rule 33. He was further informed that not having conformed to the condition mentioned in letter, dated 1st May 1839, his rights were all forfeited, unless he chose to conform now, and petition a General Meeting for readmission under article 34.

his family shall lose all benefit* provided the secretary communicates to such subscriber that he is struck off the Fund. But he may appeal to a general meeting of subscribers who are competent to admit him if satisfied of the cause set forth for his having omitted to comply with the rules.

11. In all cases not expressly provided for the subscribers at large have power to admit or reject the claim of any subscriber or his family.

12. Applications for admission to the benefits of the fund must be made to the managers and be accompanied with the following document,—certificate of death—copy of will†—Statement of general property—and affidavit, as in form E,‡ wherein shall be specified by the widow (if there are children) the names and date of birth of each child.

If there be no income except such as may be derivable from personal property the affidavit of the widow will be according to form D § if there are children;—if without children the affidavit will be according to form C.¶

Orphans of members will be admitted under the above general rules.—the necessary affidavits being made by their relations or guardians.

13. All the information, documents, &c. above specified being completed by the applicant for admission, the managers will submit the case for the determination of the next general meeting of subscribers. After admission, the following will be the rate of allowances to be granted, viz.

TO WIDOWS.

IF IN INDIA.

With no private income, or with income which may be not more than 100 Co.'s Rs. per mensem, monthly Rs. 300.

IF IN EUROPE OR ELSEWHERE

With no private income, or with income which may be not more than 100 £ Sterling per annum, yearly £300.

If private income, exceed 100 £ Sterling but fall below 400 yearly then the allowance from the fund will be the difference between such income and 400 £ Sterling per annum.

TO CHILDREN.

All private income being required to be deducted from the maximum amount of allowances granted according to their ages, which are as follows:

IF IN INDIA.

Up to the end of the 5th year, monthly.....Co.'s Rs. 30

Ditto 9th to 11th..... 50
Ditto 12th and after..... 60

IN EUROPE OR ELSEWHERE.

Up to the end of the 5th year, yearly.....£ 30
From commencement of 6th to 8th year 60
Ditto 9th to 11th..... 80
Ditto 12th and after. 100

14. Whatever real or personal property the Widow or offspring of a subscriber may be possessed of at the time of admission shall be taken into account at a just valuation, or according to the amount realizable by public sale, and the income calculated thereon at the rate of 4 per cent. per annum; but the income on monies vested in Bank of Bengal shares, Government Notes, or other public securities, shall be taken according to what they actually yield. The same rule of calculation shall hold in the case of property of any description afterwards devolving on an incumbent on the Fund.

* The respective families of two deceased members applying in 1839 to be admitted were through the omission of the said members to conform to this Rule in their life time, declared on certified to the benefits of the Fund; though in consideration of the peculiar circumstances of the cases, the subscribers at their annual meeting of 31st January, 1846, allowed their admission on the condition of all arrears of subscription due by the deceased being first made good.

† If there be no will, then a full and authentic statement of property left by the deceased and of the legal heirs thereto must be submitted.

‡ See last sched. Rules.

§ See ditto ditto.

¶ See ditto ditto.

15. No family becoming dependant since the 1st of January 1878, shall receive an aggregate allowance exceeding 600 £ per annum in England, of 600 Co.'s Rs. per mensem in India.

16. The pensions to widows shall be discontinued on remarriage, but shall recommence if again left in a state of widowhood and without adequate provision under the rules.

The allowances for children shall cease in the case of girls on their marriage, in the case of boys on their obtaining employment or on attaining the age of 21 years, which ever may first happen.

17. Allowances from the Fund are payable half yearly in advance either in London or in India. For widow, to themselves or to their authorized agents (the acknowledgment of the widow herself being given for all sums paid on her behalf.) For children to their mother or other relation, or to their guardian.

18. Before any $\frac{1}{2}$ yearly advances can be allowed a solemn declaration* must be made in the case of a widow without children according to form F. † if with children according to additional form F.

In the case of children also according to form G. ‡

If the declaration is refused to be made by any party it is incumbent on the managers to suspend the payment of the Pension claimed reporting the case to a general meeting of subscribers.

[In these declarations must be carefully noted (if such be the case) any property acquired, and in whatever way acquired, since the date of admission on the Fund, whether it yield an income, or not.]

19. In any instance in which it may appear that a subscriber leaving property at his death and having the power to dispose of it, had made no provision for his family, the subscribers have full power to reject the application for aid in respect to such family. And in case it shall be proved that a deceased member of the fund had during his life, made such a disposition of any part of his property, real or personal, as but for rule 26 would throw the entire or partial support of his widow or offspring upon the fund, with the intention of thereby benefiting any party at the expense of the fund, then the widow or offspring of such member shall forfeit all right to any support whatever.

20. The offspring of members born out of wedlock: and any widow legally separated from her husband for misconduct on her part, or who may be known to be living in a state of adultery though not divorced or separated by law, shall not benefit by the fund.

21. The $\frac{1}{2}$ yearly general meetings of subscribers to the fund, are held in January and in July; two months previous notice being given. At these meetings applications for admission on the fund are determined, &c. and other general business is done, the managers also reporting the matters determined by them in the expired period. At the January meeting five managers are chosen in the room of those elected the preceding year,—though these or any of them may be re-elected. At the July meeting the annual accounts of the fund closed to 30th April, preceding are submitted,—and being approved or published in the Calcutta Gazette.

22. A special general meeting may be called at any time by the committee of managers or by any nine members; the object of the meeting being advertised two months previously.

23. Should the managers or any member or members be desirous of bringing forward, at a $\frac{1}{2}$ yearly meeting, any new general question or any question involving any increase or diminution of the rate of contribution now fixed, or any essential addition to, or alteration in the rules and principles of the institution now established, or any case not distinctly provided for under these rules, due notice of the purport thereof shall be given; provided, however, that on such questions and cases no resolution of a general meeting whe-

ther Half-yearly, or special, shall be conclusive, but the determination of Meeting shall be referred to the subscribers at large for final adoption or rejection, by the transmission of their votes to the managers, within two months after the date of issuing the notice, either by advertisement or by separate letters to each subscriber as may be determined by the Meeting. It shall be the special duty of the Chairman of any Meeting to require attention to this rule.

24. The resolution of a General Meeting on any question not falling within the provisions of the preceding rule shall be open to revision. After the usual notice given through the Secretary to that effect at the next General Meeting which may be held at a period of not more than four months subsequently to the General Meeting at which such resolution was passed; but the resolution of such subsequent Meeting on such question shall be final and conclusive;—provided always, that no resolution of a prior Meeting shall be reversed or altered at a subsequent Meeting, except by a majority consisting of as many votes at the least as decided the question in the first instance. All resolutions not subject to revision under this rule shall be deemed final and conclusive.

25. The presence of nine Members at any General Meeting forms a *quorum* sufficient to constitute a Meeting.

26. All questions proposed at a General Meeting, whether *½ yearly* or *special*, shall be determined by a MAJORITY OF VOTES; but the concurrent voice of at least nine members actually present shall be requisite to carry any motion whatever.

27. Upon all questions duly advertised for discussion at any General Meeting, all subscribers may deliver their sentiments and votes, either by written communication addressed to the Chairman, or by Proxy. Proxies may be of two kinds, General and Special. The former* is only allowed in case of Members who have provided to set, and last till the return or receipt of intelligence of the decision of the party give it. Such general proxy entitles the holder thereof to vote for the association on any question whatever that may arise during his absence.

A Special† proxy entitles the holder to vote on any point connected with the question for which such proxy was given that may be discussed at the meeting summoned for its determination.

But provided 1st. That no proxy either Special or General, shall be in any way valid unless the same shall have been registered in the Office of the Secretary to the Fund, and countersigned by that Officer, at least fifteen days prior to the occurrence of any meeting at which such proxy is intended to be used; and 2ndly, that no individual shall, under any circumstances, hold at one time more than twenty proxies. Should more than twenty proxies be tendered for registry in favor of any individual it shall be the duty of the Secretary to the Fund to give notice thereof to the holder and to the granters, whose proxies are last tendered for Registry, with the view to their appointing some other party to vote on their behalf. A second nomination shall be valid if received and countersigned at any time before the meeting at which it is intended to take effect.

28. The Committee of Managers, or the majority of those present at a meeting of five or more, or if less than five be present, any three Members of the Committee who may concur in opinion shall be competent to decide, in the first instance, upon all matters connected with the Fund not expressly reserved for the determination of a General Meeting; but every act of the Managers shall be liable to revision and control by the resolution of a General Meeting.

The last article of the rules of the Fund, viz XXXVII is of a general and special charter, and framed seemingly to provide for such cases as occurred on the transfer to the Bengal Civil Branch, of the civilians attached to the Canton Establishment, some of whom claimed and were specially admitted to become Subscribers to the Fund.

The rule therefore provides, under certain conditions, for the admission as subscribers to the Fund of any person who may enter the Bengal Civil Service, and having rank in that Service above any other person that has been a subscriber to the Fund for a longer period than one year.

6th. At a convenient period before the close of each year, the managers of the fund shall require according to seniority, a sufficient number of subscribers to signify their willingness or otherwise, to retire on the annuity to be granted by the Fund; and in case of the absence from India of members, such requisition shall be made to their constituted agents in Calcutta. It will, of course, be incumbent on members duly qualified to become annuitants, previous to leaving India, to empower one or more persons in Calcutta to act on their behalf, and to communicate to the managers the names of such agents.

7th. The following members shall be regarded as having virtually intimated for the time being, their unwillingness to retire on the annuity; viz. those to whom a requisition may be made as above provided, and whose part no reply may be received, on or before the first day of Nov. of the year, preceeding that in which the annuities intended to be granted, may commence; and those who may have quitted India, and failed to empower any resident in Calcutta to act for them during their absence.

8th. The number of annuities offered shall not be more than may complete nine per annum from the 1st of May 1826.

9th. The actual value of annuities tendered and excepted as above, shall be passed to a separate account on the books of the institution, under the head of appropriated funds; and to the debit of this account shall be entered all payments in satisfaction of annuities.

10th. Should any subscriber, having resided in India in the Civil Service not less than 22 years, and been a member of it the full period of 25 years, retire from the service before the option of an annuity may devolve on him, he shall be entitled to the same in his proper turn, without any payment to the fund, save what may be claimable under the following rule.

* For list of Directors, vide Directory, part IX.

11th. Any subscriber who may* accept the tender of an annuity, shall be required, to entitle him to such annuity, to pay to the institution, previous to the date at which the annuity is to commence, the difference between one-half of the actual value of the annuity on his life, and the accumulated value of his previous contribution, in case the latter quantity shall be less than the former; and these values shall be determined as below provided.

12th. Any member so choosing, may decline paying the difference defined in the foregoing rule, and shall, in such case, be entitled to an annuity diminished in proportion to the sum by which the accumulated value of his contribution is less than one-half of the actual value of an annuity or his life.

15th. The resignation of the Honorable Company's service is an essential condition to entitle an individual to an annuity from the institution; an annuitant will not be permitted by the court to return to the service, it is, therefore, provided, that should any member fail, on or before the first day of July, of the year with which the annuity accepted by him may commence, to comply with said condition, he shall be considered to have forfeited his right to an annuity from the institution for that year. It is likewise provided, that when a member accepting an annuity, shall resign the service before the first day of July, but after the first day of the year with which the said annuity is made to commence, he shall, in such case, at the close of that year, only draw the annuity from the date of his resignation, a sum proportionate to the time intervening between the first day of the year and that date, being deducted for the benefit of the institution.

16th. † The fund is open for the subscriptions of all covenanted Civil servants upon the Bengal establishment, including such as may be in England, and who have not either finally resigned the service, or protracted their absence from India beyond the prescribed term of five years; each civil servant now residing in India, shall be especially invited to join the institution, as shall those subsequently arriving, whether they be returning to the service, or newly appointed to the same, and the following shall be excluded from ever becoming members of the institution; viz those residing in India, who may fail to signify in writing, their consent to join the institution on or before the 1st of May, 1826, n. x; and those returning to, or for the first time arriving in the country, subsequent to the present date, who may commit a similar default with in six months from the date of their return, or arrival in the country, respectively; provided, however, that no person not in India, nor on his passage thither upon 1st of May 1825, shall be entitled, on subsequently returning to the country from England, to receive an annuity under the rules of this institution, except after residence in the country for a period of five years from the date of such subsequent arrival.

* The declaration of the willingness of any subscriber to accept an annuity must be stated "upon honor" in compliance with the resolution of the general meeting of the 12th November, 1825, as sanctioned by the High Court of Directors in their dispatch of the 30th May, 1827.

* Rule 26 Passed in pursuance of orders forwarded by the Hon'ble Court of Directors in their dispatch of the 5th March 1824 at the General meeting of the 23d September 1826, in substitution for the Old Rule in which the words in Italics were omitted.

Rules prepared by the Committee of Management in conformity with the instructions of a Special General Meeting of Subscribers held March 7, 1834.

Rule 33.—In modification of the 28th rule of the institution, it is hereby provided, that from and after the 30th April next ensuing, annuities will be granted to retiring members of the service, entitled to and claiming the same, payable to the date of decease, on their entering into a written engagement, binding themselves to pay, if so required by the Hon'ble the Court of Directors, a sum equal to half the value of the benefit derived under this condition. The computation of the said value will be made according to the annexed table, unless otherwise ordered by the Hon'ble Court of Directors to whose correction the calculations are subject.

For every annuity made payable to the date of decease under the above rule, a sum equal to the discount value of the additional payment stipulated as entered, in the table annexed, (or in any corrected table that may be substituted for the same, the Court of Directors shall direct such substitution,) shall be transferred in the accounts of the institution to the head of appropriated assets in order to cover the additional charge to the fund arising from such payment.

N. B. This rule, if a similar be adopted at the other presidencies, may be at once carried into effect, the calculations, &c. being subject to the correction of the Court of Directors. *Vide letter to Bombay Government 10th June 1839, toward the end.*

Rule 34.—In further modification of the 28th rule above referred to, it is hereby provided, that from and after the 30th April, 1835, annuities will, at the option of retiring servants, be given payable either as at present at the close of the year or quarterly, after each three months of the year. Provided, however, that for every annuity made payable quarterly, an additional sum, equivalent to this advantage, computed according to the table annexed, shall be transferred to the head of appropriated funds in the accounts of the institution, in order to cover the additional charge to it from this alteration in the mode of payment.

Note.—This rule will require to be passed and submitted for the approval and confirmation of the Court of Directors before it can be carried into effect. If the Hon'ble Court require retiring servants to pay for the benefit conferred by it, they will add a clause to that effect.

NOTE.—The above Rules 33 and 34 have been merged into one, viz. Rule 40 of the following set of

ADDITIONAL RULES

Passed at the Special general Meeting of Subscribers, held 11th July, 1836.

35.—On the 1st May, 1836, the managers of the Institution shall declare and publish the number of unaccepted annuities remaining up to that date, and the value thereof, which value shall be computed by assuming for the unaccepted annuities of each year since the annuity fund institution was established, a value calculated for the average age of the servants who retired in that year. Two-thirds of the aggregate amount of such valuation shall be declared to be a fund available to provide for three years from that date, annuities at a quarter value to retiring civil servants only qualified. The other third of the above valuation shall be forthwith carried to account as part of the fixed balance of the fund. In like manner on the 1st of May of every succeeding year, the managers shall declare and publish the number and value of the unaccepted annuities of the preceding year, that is to say, the number of the due annuities at half value available annually for retiring servants which have not been claimed and taken within the year, and the same shall be valued according to the average of the ages of the servants who retired in the year upon such annuities, or if there be none of these taken in any year, then upon the assumption of the age of 45 years for the value of each annuity. Two-thirds of the aggregate value of such unaccepted annuities shall be declared and published, as above, to be the fund available to provide for three years thereafter annuities at a quarter value to retiring seniors, the remaining third being added to the fixed balance of the fund, as above provided.

36.—Civil Servants duly qualified by service and residence, who may be willing to retire on annuities to be granted upon payment of an amount equal to one quarter of the value thereof, are required to make application for the same within three months from the date of the above declaration being made and published by the managers of the fund. So far as the surplus available shall permit; annuities on the terms stated shall be given to the senior servants so applying in the order of their seniority, and if the subscriptions of any servant, to whom such an annuity may be awarded, shall have exceeded in amount one quarter of the value of the annuity, the excess shall be refunded to him out of the surplus declared. If the subscriptions be not equal in amount to one-quarter of the value of the annuity, the retiring servant shall make good the deficit before obtaining the certificate entitling him thereto. If he do so before the 1st May, and shall have then retired from the service, his annuity will commence from that date. If he complete his payments and retire at any subsequent date of the same year, the value of the annuity will still be calculated as from 1st May, but the retiring servant will receive only the fractional portion of the first year, calculated from the date of such payment and retirement, and his subscriptions after the 1st August shall not be credited in his account, but shall accrue to the fund together with the unpaid portion of the annuity. If the applicants within three months, as above, do not by their annuities and by the refunds stated consume the entire declared surplus, the remainder shall be available to furnish annuities to any qualified senior servant who may apply for the same at any time within three years from the date of the declaration, and such annuities shall be given to applicants for the same in the order of application until the entire declared surplus is appropriated. For every annuity granted an equivalent sum to the value thereof, according to the tables of the fund, shall be written off from the declared surplus and credited to the appropriated funds of the institution; and if at the end of three years from the date of declaration, there shall remain any part of the declared surplus still unappropriated, such remainder shall lapse and be added to the fixed unappropriated balance of the fund.

37.—Civil Servants who may not have completed the full period of 22 years' residence in India, and 25 years of service, but who may be compelled to retire from the service by sickness, duly certified as before provided, he shall be entitled to receive, from out of the declared value of the unclaimed annuities of any given year, before the appropriation of the two-thirds, and one-third are made under the above rule as follows:—

If they have not completed 10 years of residence, a donation of	Sa. Rs.	5000
or.....	£	500
If they have completed 10 years of residence, but not more than 15,		
an annuity of.....	£	250
or.....	Sa. Rs.	2500
Per annum, on payment, including the amount of their subscriptions,		
of one-half of the value thereof according to the tables and rules of the fund.		
If they have completed 15 years, an annuity of.....	£	500
or.....	Sa. Rs.	5000
on the same terms.		

To entitle a junior to the above benefits, it will be necessary for him before leaving India to furnish to the managers of the fund a certificate from his medical attendant, countersigned by a member of the medical board in Calcutta, certifying that he is from some permanent cause or complaint, incapable of rendering further service in the climate of India, and the certificate must, in each instance of retirement, be confirmed in England by the examining physician of the Honorable Court of Directors, after the servant so retiring has resided at least one year in England.

38.—The 35 and 36 of the above Regulations are to be continued in force for three years from the 1st May 1836, unless the honorable court of directors sanction their further continuance, whereof notice will be published in the Gazette. If by the sanction of the honorable court they be established as per-

manent rules of the fund, it shall nevertheless be competent to a majority of the subscribers in India, whenever they shall be satisfied that the number of annual retirements from the service is such as to require that all the annuities of each year should be reserved to meet the applications of candidates in future years, to suspend the operation of the above rules by a resolution to that effect, duly passed at a general meeting.

39.—In modification of the third rule of the Regulation of the Fund, it is provided, that it shall be competent to any servant duly qualified by residence and service, to receive the annuity whether granted to him at half or at a quarter value, either in India or in England, subject only to the condition of previous resignation of the service, and of the acceptance of such resignation by the Government or by the Court of Directors.

40.—In modification of the rules adopted by the service on the 7th March, 1884, it is hereby provided, in conformity with the instructions of the honorable Court of Directors, that annuitants desirous to have their annuities paid to the date of decease, or to have them paid quarterly, will be entitled to these advantages upon payment, in addition to the half or quarter value of the annuity, as the case may be, of the full value stated for the same in the Table annexed to the said rules; but no annuitant shall be permitted to take the quarterly payment, alone without at the same time taking the benefit of the rule for obtaining payment to the date of decease.

REVISED RULES.

Passed at the Annual General Meeting of Subscribers on the 1st January, 1842, and approved by the Hon'ble Court of Directors under date 31st August 1842.

RULE 35.—On the 30th of April, 1842, the managers shall compute the excess of balance of the unappropriated Funds of the Institution above the balance estimated for the same period in the prospective calculation upon which the Fund was formed. One half of the amount of such excess shall be considered to be a capital available for the purposes of the Fund, namely, for the improvement of the rate at which the Annuities accruing under Rules 8 and 11 on the 1st of May, 1842, are to be granted, to the extent of the income derivable at the rate of 6 per cent., from the said half excess of balance. In like manner on the 30th of April of every succeeding year the managers shall compute the excess of actual balance over the estimated prospective balance at the same date, and shall appropriate the income arising therefrom to the improvement of the purchase rate of the nine Annuities accruing on the 1st of the following May. Provided, however, that in no instance shall any annuity be granted under this rule at a rate less than the quarter of the value thereof. And in case of the annual sum to be distributed amongst the nine yearly accruing Annuities in the manner provided in the following rule, being at any time in excess of the proportions required to make up, with the balance of the subscription accounts of the retirees thereon, the half value of each of the said nine annuities, such excess shall be reserved and be made available in the succeeding year, in addition to the income accruing from the half of the excess balance of the year, towards the reduction of the rate of premium at half value payable for the said annuities, under the provisions and limitations above specified.

And it is further provided, that in the event of any of the nine annuities of any year remaining untaken on the 1st of May of such year, the proportionate share of the annual sum distributed amongst the nine annuities of that date which shall have been set to such untaken annuity shall remain reserved for the benefit of the qualified Subscriber who may at any subsequent date claim and retire on such untaken annuity.

RULE 36.—FIRST. After the above computation shall have been, the managers shall make the distribution of the annual sum which may be found available for the improvement of the rate at which each of the nine yearly annuities may be granted, in the manner following. The aggregate sum available on the 1st of May of every year shall be divided into equal shares for ap-

portionment equally amongst the nine annuities accruing on that date according to the statement above cited. The amount of due which a retiring member will have to pay shall be such an amount as, with the balance of his subscription account and the sum apportioned to the annuity reserved for him as above provided on the 1st of May of each year, will make up the half of the value of the annuity according to his age. And it is provided, that in the event of the balance of the retiree's account alone amounting to a sum equal to the half value of his annuity, the share or sum apportioned to the annuity reserved for him shall be taken and distributed equally amongst the other annuities of the same year in further diminution of the share or half value which may be required from the retiree on these. In like manner if the balance of any retiree's account as aforesaid together with the sum or sums which may have been apportioned to the annuity reserved for him, amount to a sum in excess of the half value of his annuity, such excess shall be taken and divided amongst the other annuitants of the same year whose balances with the sums apportioned to them as above may fall short of the half value of annuity.—And it is further provided, that in the event of any overplus remaining out of the sum found available in any year under Rule 35, after due distribution amongst the nine annuities of such year as above provided to the extent of making up with the balances the half value of each of the annuities, such remaining overplus shall be held available for distribution in the next succeeding year under the general terms of this Rule.

And Rule 37 above entered will be read in its first sentence thus :

“ Civil Servants who may not have completed the full period of 25 years' residence in India and 25 years of Service, but who may be compelled to retire from the service by sickness, duly certified as below; provided, shall be entitled to remain from out of the portions of the excess balance available for the purposes of the Fund under the above rules, (now 36 and 37,) as follows, &c. &c.”

At a Special General Meeting held 28 May, 1842, the following clause was proposed to be added to Rule 15 as a part thereof, to carry out the Hon'ble Court's Letter of 1st February, 1842 and the same was carried and adopted by the subscribers at their meeting of 30th July, 1842.

“ In substitution of the Rule requiring the declaration upon honor, It is hereby further provided, that if any subscriber to whom an annuity shall have been reserved, under his application and declaration to resign the service, as above, shall subsequently withdraw or retract his application or declaration; or if he shall continue in the service beyond the time, (viz. 1st July,) limited by the foregoing Rule, he shall, unless for special reasons, be exempted by the managers, subject to an appeal to the service by the individual in question, or by any member of the Fund, forfeit the sum of Rs. 10,000 (ten thousand, to be at once deducted from his subscription account with the Fund. The sum or sums that may be so forfeited, shall be carried to the credit of the unappropriated Funds of the Institution, and be held available for the general purposes of the Fund.”

INSTITUTION OF THE FUND.

SUBSCRIBERS, THEIR LIABILITIES, RIGHTS, QUALIFICATIONS AND PRIVILEGES.

NOTE.—Besides the direct benefits of the fund, subscribers enjoy the privileges provided by the Furlough Rules, which none others can claim.

* Service is computed either from date of government or of notification of Appointment, whichever may be first. Residence reckons from date of arrival at the presidency.

ANNUITIES, NOW OFFERABLE, AND ACCEPTABLE UNDER WHAT CONDITIONS.

† Where the Principals are not in India, to their Agents if duly appointed.

‡ No special application necessary, beyond the statement of date of birth, the offer of fund, and of resignation on specified date,—from which date the Annuity will commence.

§ The application in this case should run thus:—

I have the honor to tender this my application for an Annuity of the year—(1911-12) grantable under the Rules and to state upon honor that it is my firm determination, should I obtain the same to accept it, and retire from the Company's Civil Service on or before the first day of July of the year to which the said Annuity belongs.

If from an agent the application may run thus:—

I beg as constituted agent of Mr. _____ to tender this application on his behalf for one of the Annuities of the year—(1911-12) grantable under the Rules, and to state upon honor that should the said Annuity be appropriated to Mr. _____ I will accept it on his behalf, and will duly proffer Mr. _____ resignation of the service to Government on or before the first day of July next in _____

The age, or rather the date of birth of member applying should at the same time be stated; also if it be wished that the Annuity be made payable quarterly and, up to date of decease.

The Bengal Civil Service Annuity Fund was established in 1825. Subscribers' contributions commencing from May of that year.

All Covenanted Civil Servants are bound to subscribe, and no subscriber can withdraw or cease to subscribe, excepting a Governor, who holds his appointment not by right of the service. A subscriber who may have been absent from India more than 5 years; or one who may have been dismissed from the service, forfeits all benefit from the Fund. But if a subscriber be only under suspension his interest shall be in abeyance and revive on his restoration; if he draw salary (or any public allowances) for the time of his suspension, that time shall count as actual service; but if not, the intervening period shall not be computed in the term of service, necessary to qualify him for an Annuity. To be qualified for an Annuity, requires a service* of 25 years, and actual residence in India of 22 years.

The number of Annuities of £1,000 each, grantable, are not more than may complete nine per Annum from the 1st of May 1825. This admits of the untaken Annuities of any year, being available to subscribers at any time in a subsequent year, in addition to the nine accruing Annuities of the year. Before August of each year, an offer is made to every qualified member of one of the nine Annuities, to accrue on the 1st of the succeeding May; and they are at the same time informed of the No. if any, of the Annuities of former years that remain unappropriated on the 1st of July last preceding, and which are also available for acceptance. These last may, however, be at any time taken up by payment of one and resignation.† But the nine accruing Annuities of the following year, are not grantable until the 1st of May of the year to which they belong. Accordingly on the last mentioned date, the said nine Annuities are appropriated to the applicants§ first in the order of seniority to those whose applications were received on or before the 1st of November preceding, then if any Annuities remain unappropriated,

they are distributed amongst those whose applications may have been received after the aforesaid 1st November, but before 1st May, in the same order of seniority; and lastly, if any still remain untaken by the aforesaid applicants, they are granted to Invalids who may apply under Rule 87. To confirm the title to an Annuity thus accepted and thus appropriated, a member must make good the $\frac{3}{4}$ value, (according to the valuation, Table annexed) of his Annuity previous to the date of commencement of Annuity, and also resign the Company's service. This resignation must not be deferred later than the first of July following, and in no case will the Annuity commence until the date of such resignation. An Annuitant shall receive a Certificate signed by 3 or more of the Managers, declaratory of his admission, which shall enable him to draw his Annuity of £1,000 or Cu.'s Rs 10,860-10-8, either in India or in London from the Company's Treasury.†

GENERAL AND SPECIAL MEETINGS, THEIR POWER, MANNER OF VOTING, &c.

The Annual General Meeting is held on the 1st day of January for auditing the Accounts of the past year, for the election of five Managers, and to decide on any question which may arise or be referred. A Special General Meeting may likewise be convened at any time by the Managers, or by any nine Members, provided six weeks' notice be given of the objects of such Meeting. Any question proposed at any Meeting, shall be determined by a Majority of $\frac{2}{3}$ ths of those voting on the question; but the concurrent voices of nine Members at least *actually present* is required to determine upon any question whatever: and upon all general questions affecting the rate of contributions now fixed, or any essential addition to or alteration in the original rules and principles of the Fund; all subscribers in India, may deliver their sentiments and votes in writing, addressed to the Chairman, provided no decision upon such question, shall be valid or have effect until sanctioned by the Hon'ble Court; to whom parties considering themselves aggrieved by such decision, shall have a right of appeal and the decision of the Court of Directors shall in all cases be final.

* Or any member so choosing, may receive an Annuity of an amount proportionate to that which the balance of his accumulated subscriptions bears to the value of an annuity on his life; without paying any thing further.

The fine must be paid into the hands of the Sub-treasurer, who as treasurer of the Fund will grant receipts. The fine may be paid any time before date of commencement of Annuity.

† Payable from the General Treasury or from any other Government Treasury which the Government may approve.

‡ A simple Annuity is payable at the end of the Official year on the condition of the Annuitant having survived the year. But if it be wished that the Annuity be made payable up to date of decease the premium for the same (as per annexed table) must be paid in addition to the fine above referred to. If the Annuity is also desired to be made payable quarterly the requisite premium for that privilege must likewise be paid. This latter benefit, of Quarterly payments, cannot be taken without also the former benefit; date of Decease payments may however be taken alone.

Applications from Invalid Subscribers having resided less than 12 years in India, for reduced Annuities purchasable generally on the same terms as the full Annuities, must be made before the first of May. Such an Applicant must furnish to the Managers a Certificate from his Medical Attendant in India, countersigned by a Member of the Medical Board of Calcutta, Certifying that he is from some permanent cause or complaint incapable of rendering further service in the climate of India. (This certificate will need to be countersigned in England after a year's residence there, by the examining Physician of the Hon'ble Court.) An Invalid Subscriber thus applying, will, if successful under the general rule of appropriation of Annuities be entitled, first if he have resided full 15 years in India to an annuity of £500 per annum.

Second, if he have resided less than 15, but more than 10 years in India, to an Annuity of £250.

Third, if his residence be less than 10 years he will only be entitled to a Donation from the fund of £50.

ART. 18. A subscriber so proceeding to England on sick certificate, shall be authorized to apply for the further sum of rupees 300 for his equipment, his application being accompanied by a solemn and sincere declaration of his not being possessed of the sum of rupees 2,000, or property of any description to that amount; but no allowance will in any case be made for equipment to a subscriber returning to India.

In like manner, although not immediately available, nor at her disposal, if the yearly interest of such money exceed the sum of £68-8-9, the claim to passage-money will be disallowed. Widows in Europe at the time of their husbands' death, are not entitled to passage-money on returning to India, or again visiting Europe.

ART. 26. Should the fund, however, at any period fall short of the demands upon it, so that the annual income will not defray the amount of the annuities and other claims, then it shall be in the power of the directors, after submission to the army, to make a proportionate deduction from the annuity of each annuitant, excepting always the present annuitants of the Bengal widows' fund, and from the payments to other claimants above the rank of subaltern, until the state of the fund shall afford the means of complete payment; when, if a surplus income exists, the arrears shall be made good from the amount of surplus, but not otherwise.

SECTION IV.

General Regulations.

ART. 27. The Bengal military fund is to be administered by a president and twelve directors, to be chosen annually, on or about the 15th of January, by a general meeting of all subscribers who may be present at the presidency. Subscribers who may be absent from the presidency may vote for directors by proxy, on addressing to the secretary letters containing the names of the persons for whom they wish to vote, or by transmitting such names under their signature to the general meeting by the hand of any other subscriber. The directors who shall be found duly elected shall then choose their president from among themselves. ART. 32. On occasion of any particular and important business which may necessarily require the opinion of the society at large, special meetings will be called of the subscribers at the presidency (others voting by proxy) as provided for in article 27. Or if any alleged mismanagement, or other emergent cause should occur to any twelve subscribers to require the notice of the society at large, a special meeting shall be summoned by the president on the written requisition of such twelve subscribers under the forms above prescribed.

ART. 35. The directors of the fund will hold regular monthly meetings; but no meeting of the directors consisting of a smaller number than five, shall be competent to the transaction of business; and it will rest with any director, or with the secretary, to represent the occurrence of such necessity to the president, who will convene a special meeting within ten days from the date of his receiving the application; but no special meeting shall be called with the view or re-considering resolutions which may have been already adopted by a former meeting of directors, unless at the requisition of a number of directors greater than that which attended such meeting.

ART. 36. The secretary will invariably lay before the directors, either at the regular or special meetings, all letters that may have been received by him since the last meeting. Minutes of the proceedings of all meetings will be recorded and authenticated by the signatures of the directors present. The secretary will also submit to the directors who attended, drafts of all the letters which in those meetings he may have been desired to write. Letters demanding an immediate answer, when such may be of an ordinary nature, may be replied to by the secretary, without waiting for a meeting of the directors; but every letter proposed to be dispatched by the secretary, must previously receive the special sanction of one director, signified by his initial to the drafts, which will be sent to him for consideration.

ART. 39. When any new regulation shall appear to the directors to be advisable, such regulation shall be circulated to corps for consideration, and the affirmative or negative of the majority of individual votes (to be ascertained at the expiration of four months) shall decide its adoption or rejection.

ART. 40. If any subscriber or claimant on the fund shall be desirous to appeal from the decision of the Directors to that of the subscribers at large, upon any subject which may not be specifically defined by the regulation, such appeal, provided it be approved by three Directors, shall be referred by the Directors, and decided upon in the manner prescribed in the preceding article, and the decision on such appeal, or that of the Directors in cases not appealable, shall be final in all cases whatever; any further agitation of the question by a process of law or otherwise, being deemed in itself to be an absolute forfeiture of all claim on the fund.

ART. 41. When a reference shall be made to the subscribers at large respecting either proposed regulation, or an appeal, the result of such reference shall be communicated to corps for the information of subscribers.

ART. 42. Generally all payments due from the fund are made quarterly in England, and monthly in India; but in cases when pensioners or claimants on the fund are about to embark for Europe, all arrears must be paid up to the end of the preceding month.

ART. 43. Any arrear which may be due to the fund by a subscriber or by all applicant who may have received an overpayment, shall in all cases be deducted from the first payments to be made from the fund to the person owing such arrear.

ART. 44. All income derived from the Bengal Military Fund is declared to be unalienable, and the fact of attempting the alienation of such income in any manner, or under any pretence, shall be deemed in itself a forfeiture of all future benefits from the fund.

ART. 45. If a subscriber who may be dismissed from the service, by a court martial or otherwise, shall afterwards be restored to the service, he shall be re-admissible to the fund on payment of the arrear that may have accumulated, with compound interest thereon, in the same manner as if he had suffered only temporary suspension. See Art. 14.

ART. 46. All property belonging to the military fund at any period shall be invariably vested in the honorable company's securities. The necessity for retaining any balance is now dispensed with, and the secretary's office has no cash transactions. All payments in Calcutta are, in future, to be made at the presidency pay office by order of government dated 1st July 1840. All contributions from subscribers generally must be made through the pay department or public treasuries. Private drafts are prohibited.

ART. 47. The business of the fund in Europe shall be conducted through the agency of messrs. Cockerell and Co., who will from time to time receive the necessary instructions for their guidance and to whom such applications will be preferred as cannot with equal convenience be submitted to the directors of the fund in India.

NOTE.—The secretary will continue to give notice in all practicable cases where arrears are due, but at the same time subscribers must attend to their own interests, and take care that the prescribed donations and subscriptions are regularly paid to prevent arrears, as the interests of the fund cannot be allowed to suffer from the omissions of subscribers, or from a want of acquaintance with the rules of the institution.

KING'S MILITARY FUND.

Regulations of a General Military Fund, for the benefit of widows and children of deceased officers, in his Majesty's Service in India, established in 1820. And revised in 1827.

Under the protection and countenance of the Most Noble the Marquess of Hastings, commander-in-chief in India, the above named fund was established in the year 1820, for the purpose of sending home, in comfort and respectability, the families of deceased officers in his majesty's regiments serving in India, who may have been left destitute; and of preventing the painful and degrading practice of appealing to the public for subscriptions on such occasions; and also, of providing relief in such cases as may require it, until they can be conveniently sent home.

It having since been found advisable to make some alteration in the rules and regulations then established, the following revised regulation, passed with the general consent of the officers of the army, have been approved of by his excellency the right honorable Viscount Combermere, commander-in-chief in India, who has been pleased to become patron to the institution.

1st. That the committee of general management formed at Calcutta, shall consist of the following persons for the time being, they being subscribers; viz.

The major-general commanding the presidency division.

The adjutant general of his majesty's forces in India.

The quarter master general of his majesty's forces in India.

The Inspector of Hospitals.

The Commandant of Fort William.

The assistant adjutant general of his majesty's forces in India.

The two senior officers of his majesty's regiment quartered in Fort William.

The senior subalterns of ditto.

Commandant of the depot at Chinsurah.

The military secretary to the commander-in-chief.

The major of brigade of his majesty's forces.

The paymaster of his majesty's troops, and

The paymaster of his majesty's Regiment, quartered in Fort William.

2d. That a sub-committee for inquiring into all circumstances connected with this fund, and acting under the general committee, shall be formed at Madras and Bombay, composed as follows;—such officers being subscribers.

The senior officers of his majesty's army at the presidency.

All officers of the general staff.

The two senior officers of his majesty's regiment stationed at the presidency.

The two senior subalterns of ditto.

And that the major of brigade of King's Troops may be good enough to act as honorary secretary.

8th. That in order to obviate the difficulties which would arise from the

occasional remote situations of his majesty's corps, serving under the several

presidencies, the most noble the governor general in council, was pleased to

order and direct, when the fund was established, that bills may be granted to

the paymaster of his majesty's regiments by the government of Madras and

Bombay, on the government of Bengal, at the exchange of 108 Calcutta sicca

rupees for every 110 Madras rupee, and 325 Calcutta sicca rupees, for every

350 Bombay rupee, payable at sight to the general agents in Calcutta, thereby

avoiding commutation, double agency and risks of exchange.

7th. That all grants of assistance from this fund shall be regulated and

signed by committees of subscribers, as herein declared.

8th. That in order to ascertain the circumstances of any widow or family,

who may have become destitute by the death of any regimental officer, such

widow shall memorialize, or represent, the case of herself and family, through

the commanding officer of the corps, the casualty which has occurred, in order

to its being brought to the consideration of a committee, and the commanding

officer shall, as far as his knowledge will enable him, state his opinion of any

cause so received.

9th. That whenever there may be mixed corps of his majesty's service

or more than one stationed together

at the same time, every application for

relief from this fund shall be heard

and decided on by a general commit-

tee, composed as equally as possible of

officers from such corps present, being subscribers to the fund.

GENERAL COMMITTEE.

President.—A field officer, if practicable;
1 Captain, Surgeon, or pay master, 2 Lieute-
nants, or 1 Lieutenant and 2 Quarter Master or
Assistant Surgeon.

10th. As it may often happen, that officers die while the corps they be-

long to is stationed by itself or remotely detached, it shall be in the power of

every commanding officer of a regiment so situated, to assemble a committee

of any five officers (being subscribers,) to hear and decide upon the case of any

widows and children, so become destitute, and seeking relief from this fund.

It shall also be competent for the commander-in-chief at either presidency, to

assemble a special committee, to report on the case of any lady who may be-

come a widow, whilst the regiment, to which her husband belonged, shall be

at another distant station, or on service beyond sea.

11th. That such general, special, or regimental committees as the case

shall be, having duly examined into the circumstances of the parties seeking

relief, shall report their opinion on, and recommend the amount to be granted,

whether for passage-money or maintenance strictly in conformity with the regu-

lations annexed. The opinion and recommendation of such committees shall be

forwarded to the agents of the general committee, if in Bengal, or to the hono-

rary secretary of the sub-committee, or such person as may be appointed by

the commander in chief; if at the presidency of Madras or Bombay, by the

officer commanding the corps in which the casualty may have occurred.

officers neglecting so to do, shall
at no future time be admitted as a
subscriber, unless by the sanction of
the genl. committee, always paying
up arrears from the date of his join-
ing or marriage, as the case may be;
or, if in India at the time, from the
date, of the revision of these regula-
tions, 1st August, 1827.

12th The sub-committee at Madras and Bombay will on satisfying themselves of the accuracy of the statements laid before them; draw upon the agents at Calcutta, for the amount of the sum which may be award; but in the final adjustment of the accounts of such sub-committee, the general committee will consider themselves bound to object to any sum, however trifling, which may be granted in excess of the rules laid down.

13th The sub-committee will, on drawing for any sum on the general agents, transmit the report of the station committee, as well as their own opinion and explanations of the awards as a voucher, and they will afterwards, as soon as possible, transmit the proper receipts and certificates, showing that the money has been appropriated in the manner and for the purposes for which it was awards.

14th. The object of this fund being clearly confined to sending home distressed families of deceased officers, with a view of preventing those painful appeals for assistance to the public, at once so humiliating to respectable individuals and the King's service in India, it is earnestly hoped, that all ranks of staff and regimental officers will support it.

15th. But to prevent doubts and misconceptions, which might possibly arise hereafter, it is distinctly declared, that no widow who is not in distressed circumstances, or no lady continuing to reside in this country after the death of her husband, can expect any provision for herself or children from the fund, further than is stated in the 8th clause of the schedule of awards. It is also declared, that no widow is entitled to passage-money or allowance for travelling, unless she shall actually proceed to sea or on her journey in the manner for which any allowance may have been drawn; and should she have received such allowance, she will be required to refund; that no widow, under any circumstances shall be entitled to any assistance from this fund, unless the application shall be made in the usual form, within six months after the demise of her husband.

16th. Orphan children are eligible for the benefits of this fund; but awards for them must be specially made by a general or sub-committee, and sanctioned by the commander-in-chief of the presidency, who is requested to appoint some eligible person to take care of them and provide a passage, &c. &c.

17th. That the general agents in Calcutta, shall furnish an annual account of the receipts and disbursements of this fund, agreeable in forms annexed, to the adjutant general of his majesty's forces; and that officer be applied to, circulate the same amongst the subscribers, and the several officers of government at the three presidencies.

18th. That commanding officers of his majesty's regiments, be requested to pay particular attention in causing the regular quarterly remittances to be made to the general agents, who are requested, from time to time, to apprise commanding officers whenever any corps may fail in making such remittances.

19th. That no general rule or regulations of this fund shall be altered unless recommended by the general committees, and approved by a majority of the subscribers.

20th. In taking the opinion of the regiment and staff officers of his majesty's forces in India, a very general wish has been expressed, that all widows should have their passage to England, &c. &c., defrayed. The funds will now admit of it, but should the positive standing balance of the fund amount to forty thousand rupees (40,000), the committee will again put the question for the sense of the subscribers, with a provision that such charge should again cease on the balance falling to thirty thousand rupees (30,000); and as in that event all married officers will have a claim on the fund, their subscriptions should then be augmented. An officer ceases to be a subscriber on leaving India, and all claims on the fund must, in like manner, cease from the same period; but an officer going to sea for the benefit of his health, being entitled to his company's allowances will be considered as a subscriber, during his absence.

No. 97 of 1832.—The Hon'ble the Vice President in Council is pleased to direct, that the following paragraphs 1 to 5 of a military letter from the Hon. the Court of Directors, No. 15, dated the 6th March, 1832, be published in General Orders:—

"We are very solicitous for the com- Port of our officers upon retirement, and are there- fore disposed cordially to encourage the institu- tion of funds in furtherance of that desirable object."

2. "Schemes of a nature similar to that which you have submitted, though differing from it in some points of detail, have been proposed at Madras and at Bombay, and we think it desirable that the funds which may be formed at the three presidencies, should be constituted upon a uniform principle in all respects."

3. "We regret that in the present state of the Company's affairs, it is not possible for us to aid the fund by a direct contribution, but we are willing not only to bear the increased charge of retiring pay that will be consequent upon the establishment, but also to sanction the grant of an interest, of 6 per cent- per annum on the balances of the several funds and the remittance of the annuities which they may grant through our treasury at the rate of 2s the sicca rupee."

4. "The only conditions we require are that the regulations shall be submitted to us for our approbation, that the aggregate amount of the annuities so granted in each year, shall not exceed £7,750, in the proportions of

£3,850	Bengal,
2,700	Madras, and
1,200	Bombay,

(£7,750)

which are the amounts contemplated in the several schemes, and that the number of annuities granted in each year, shall not exceed 24, in the proportion of 12 at Bengal, 8 at Madras, and 4 at Bombay. These amounts and numbers are of course fixed by us with reference to the establishments as they now exist."

5. "We shall transmit a copy of this despatch to the Government of Madras and Bombay, with instructions to them to communicate with you upon the subject."

To SURGEON H. S. MERCER,
Secy. to the Committee of Management, for establishing a Medical Retiring Fund, Mil. Dept.

SIR,—

In reply to your letter of the 13th instant, I am directed to inform you that the secretary to the Medical Board will be authorized to frank all communications upon the subject of the proposed retiring fund for the medical services.

At the same time I am desired to transmit to you the annexed copy of paragraphs, 1 and 2 of a letter from the Honorable the Court of Directors, No. 84, dated 5th September 1832, referring to the Fund in question.

I am, Sir, your most obedient servant,

Council Chamber, 9th February, 1833.

*Copy of Paragraphs of a letter from the Honorable the Court of Directors,
No. 84, dated 5th September, 1832.*

Para. 1. The Bombay Government have lately submitted to us a scheme for the institution of a Medical Retiring Fund at that presidency, and as the reply which we have made to that communication is applicable to your medical establishment, we transcribe it for your information and guidance.

"We are of opinion that the object of accelerating the retirement of medical servants by means of annuities, would be best provided for, by incorporating that service with the military in the institution of the fund, for the latter sanctioned in our despatch to the Government of Bengal, dated 6th March, 1832, copy of which accompanied our despatch to you, dated the 28th of that month; and if this arrangement can be accomplished, we shall not object, to a proportionate increase in the number of annuities remittable through our treasury."

"We are aware that at Madras annuities for medical officers are provided for distinctly from the military, in consequence of their being a separate fund, embracing for medical servants and their families, various compassionate objects similar to what are provided from military officers and their families by the military fund. But at your presidency, and in Bengal, the military fund, embraces both services, and we think the retiring fund should do the same."

2. "In the event of any arrangement being adopted, consequent upon this communication, you will understand, that the number and amount of additional annuities remittable through our treasury, are to be strictly regulated by the proportion which the number of medical officers bear to the number of officers in the army."

FORT WILLIAM, 10th DECEMBER, 1834.

No 296 of 1838.—The following paragraphs of military letter, No. 19, dated 11th July 1834, from the Hon'ble the Court of Directors to the Government of the presidency of Fort William, are published for general information :—

Letter—from dated 23d Nov No 14 of 1833 ; paragraphs 1 to 4—submits a memorial from the medical officers, praying the Court to give their support to a separate Medical Retiring Fund, and to bestow similar benefit to those granted to the Madras Medical Retiring Fund, with reference to donation, rates of interest, and exchange.

1. We are prepared to sanction the institution of a separate retiring fund for the medical officers upon your establishment, but we cannot consent to grant to it any specific donation, nor any advantages in the shape of interest or exchange beyond those mentioned in our dispatch, dated the 6th March, 1832, No. 51 of 1832.

Vide G. O. No. 97, of 18th June, 1832.

2. Neither can we allow of the remittance through our treasury of so large a number of annuities of £3,000, as will provide for six, being annually granted. The number must be limited to three, which is a full proportion relatively with that which we fixed for the military service in the event of a retired fund being instituted by the army.

GENERAL MILITARY BANK.

GENERAL ORDERS ISSUED BY THE COMMANDER-IN-CHIEF.

HEAD QUARTERS, CALCUTTA, 15th MARCH, 1821.

General Orders by His Excellency the most noble the Governor-General in Council.

PORT WILLIAM, 10th MARCH, 1821.

With a view to guard against any misapprehension that might be entertained regarding the peculiar object of the General Bengal Military Bank, established by general orders of the 23d December last, the most noble the Governor-General in Council is pleased to notify, that the Bank having been instituted for the purpose of affording officers a ready mode of remitting and accumulating portions of their allowances, it is not intended that it should receive large sums of money already possessed by individuals; such an extension of the concerns of the Bank being inconsistent with the plan and spirit of the institution.

His Lordship in Council is further pleased to announce, that the 5th clause of the regulations of the Military Bank, is equally applicable to Native as to European regiments; and that in any case where the Native Officers and men of a regiment or battalion, may form a regimental Savings' Bank, under the authority of their Commanding Officers, the same facilities of remittance, through the Paymaster of the division, are to be afforded to them, and their aggregate remittances carried to account in the same manner as those of an European regiment.

Mahadars and Jemadars are also authorized to remit any sum of money not less than ten sicca rupees, and without fractions, to the Military Bank in Calcutta, in their own name, through the officer commanding their company.

MONDAY, JANUARY 17, 1825.

At a meeting of the Directors held this day, it was agreed, that the accounts of the Bank are to be made up half-yearly, but that the accounts current are not to be forwarded until after the 31st December, in each year except under peculiar circumstances.

N. B. General Officers, Colonels, and Lieutenant Colonels, if they entered the service before the 8th April 1807, do not pay any stated monthly subscription, it being left to their own discretionary voluntary contribution. But if they discontinue subscription, or subscribe less than the rates fixed for their respective ranks, their children are excluded from all claim on the fund.

"No child or a subscriber, of whatever rank, is admissible, unless the father has continued to contribute to the fund, to the period of his decease; or, in other words, any member of the society, who, after promotion to the rank of Lieutenant-Colonel, or from any other cause, ceases to subscribe, forfeits all claim on the institution.

REGULATIONS.

For the admission of Orphans sanctioned by the Army.

I. That no child possessed of any property, shall be admitted, unless the amount shall be lodged for its use and benefit in the society's funds.

II. That no child of any subscriber, dying intestate, shall be admitted, if on inquiry there shall appear to have been (after payment of lawful debts, and an adequate provision made for the mother,) property remaining to the estate equal to making a provision for, and which might have been bequeathed to, such child.

III. In any case when an officer may die, leaving a natural born child or children, and possessed of property not sufficient to preclude the children from the benefits of the institution, and such officer shall not, he will make such reasonable provision for these children, as his circumstance may enable him, such children shall not be entitled to the benefits of the institution.

IV. That when, in the will of any subscriber, part only of his children are provided for and other either excluded by name, or otherwise not noticed in its provision, such omission arising manifestly out of the intention of the testator, such exclusion or omission shall be considered to invalidate the claims of all the children on the institution.

V. That all cases of capricious or unequal provision, which, by favouring the mother preferable to the children, or one child in preference to another, shall appear calculated to throw all or any part of subscriber's family unnecessarily on the fund, shall, in like manner as in the foregoing article, be considered to invalidate the claims of all.

VI. That any provision by will, for the widow of a subscriber, greater than three-fifths of the property to be devised, when there shall be only one child; one-half when there shall be two, and one-third when there shall be any greater number of children than two; the remainder being, in all cases considered the property of the child, or (in equal portions) of the children, shall be considered unequal, agreeably to the two foregoing articles, and invalidate the claims of the children accordingly. Provided always, that a provision for the widow, of the amount of 12,000 Co.'s Rupees (Co.'s Rupees twelve thousand,) shall not be held to

invalidate the claims of the child or children, although such sum may be more than three-fifths, one-half, or one-third of the property devised.

VII. That in all cases of children born not in wedlock, any provision for the mother exceeding Co.'s rupees 30 (Co.'s rupees thirty,) if a native, if European, Co.'s rupees 50 (Co.'s rs. fifty) per month, the principal of such sum in all cases to be secured to the child or children, shall be considered in the same light as in the above, and validate all claims upon the institution.

VIII. The subscriptions for the families of deceased subscribers, are in all cases to be regarded as available sources of relief to the funds of the society, and that view are to be considered of, and judged by, the foregoing rules in the same manner as any other disposable property; *with this only exception*, that whereas such subscriptions are for a joint benefit, and lodged in the hands of trustees, it shall not be indispensable that the orphans' portions, estimated as above, be paid as capital sums into the Society's fund; but it shall be sufficient that the interest upon them be, from time to time, duly paid by the said trustees into the society's treasury, so long as the orphans continue an expense to the institution, to be appropriated to their maintenance, whether in Europe or in India.

It was agreed to, upon a reference of the question to the army at large, that when the property of a widow, by *bequest or settlement of other than her husband* (as for instance, by money inherited from her own father, &c. or from the subscription of her own or her husband's friends, together with the sum left by her husband (which by Rule VI. may amount to 12,000 Co.'s rupees) shall not exceed twenty-four thousand Co.'s Rs. (24,000) no deduction shall be made from the orphan allowance to her children; but that proportionate deduction, for the relief of the fund, shall be made on account of any sum that may come to her in excess to 24,000 Rs. on the principle laid down in Rules 181 and 183 of the Orphan Regulations; and that all exceed to 12,000 rupees which the widow may be thus allowed to possess, shall, in all practicable cases, be settled after her death upon her husband's children.

IX. That should such children be allowed to remain with parents or friends, the interest on their said portions will be calculated in part payment of the regulated monthly allowance, the society regularly paying or receiving the balance; but should they be placed at Kidderpore, or under the management in England, the amount of interest on their several shares, (calculated as above) must be paid into the funds of the Society, on failure of which payment, during a period exceeding 12 months, the said orphans, shall be liable to be struck off the books of the institution.

X. That with a view to obtain the most correct information possible, as well on the foregoing as all other points effecting the interests of those children, who may be offered to their guardianship, the General Management will, and do expect, (besides the customary affidavit,) the fullest information from executors and others, as unreserved communication of testamentary and all other documents of which the nature of the specific cases may admit, and do reserve to themselves the entire right, conveyed to them by their original constitution, of rejecting orphans tendered without such information and documents; or if on reference to them, there shall appear any evidence of design unnecessarily and intentionally to burthen the fund, by throwing on it those who might and ought to have been otherwise provided for.

XII. That the marriage portion to female orphans, shall in no case exceed Company's rupees 1,500, and if the ward claiming her dowry has property to that amount, she is not entitled to any advance from the fund; but if her property falls short of that amount, she is entitled to the difference between it and 1,500 rupees.

XIII. The children of officers retired from the service, are not admissible unless the father have continued his subscriptions after the period of his removal from the army.

CONSTITUTION, &c.

WHEREAS at the Eighth Half-yearly Meeting of the New Calcutta Laudable Society, convened under the 31st rule of the Society, and held on the 16th day of January, one thousand eight hundred and thirty-nine, the said meeting having been made special under the 36th rule for the purpose of taking the votes of the Shareholders on certain propositions for the appropriation of the surplus funds and other modifications in its constitution, agreeably to the resolution passed at the general half yearly meeting held on the 26th July 1837, such propositions were adopted by a resolution passed by a majority at the said meeting, at which more than two-thirds of the Society were duly represented, according to the rules and regulations of the said Society, that is to say, one hundred and thirty-eight votes in the Society then being three hundred and sixty-two, which said propositions, so adopted, were and are as follows, that is to say:—

Preamble.

PROPOSITIONS for the APPLICATION of the SURPLUS FUNDS of the NEW CALCUTTA LAUDABLE SOCIETY at the end of the year 1839, and for other MODIFICATIONS in its CONSTITUTION, with a view to render the SOCIETY PERMANENT; enhancing greatly the ADVANTAGES of all concerned in it, combined with UNQUESTIONABLE SECURITY.

PROPOSITIONS.

First.—That prior to any division of the surplus funds there be set apart one-third the amount of extraordinary risks arising from individually holding more than 10 shares on one life, to meet such extraordinary risks.

Second.—That one per cent. on the outstanding risks, to be denominated the "premium fund," be carried forward to the current premium to meet unknown lapses.

Third.—That the remaining sum be held to be the individual property of the surviving policy-holders at midnight of the 31st December 1839, in the ratio of the amount premium respectively paid, subject to retention to individual credit to the extent of 10 per cent. on each individual's risk, for the purpose of forming a guarantee-fund, any surplus which may remain to any individual's credit after such 10 per cent. has been thus set apart as his proportion of a guarantee-fund, to be paid to him, or applied in reduction of Premium. Should the surplus or any individual at the close of the term not amount to 10 per cent. on his individual risk, his future surplus to be added thereto, until it does so amount to 10 per cent. on his individual risk.

Fourth.—That a statement of the accounts be prepared on the 31st May and 30th November, in each year, for the purpose of ascertaining the then state of the Funds, that in the event of there being a surplus over and above one per cent. on the amount of outstanding risks for the "premium fund," the excess, provided it amounts to 5 per cent. or more on the amount of premium received during the current half year, be divided as above among the surviving policy-holders at those dates respectively, in the following manner, viz., that after ten per cent. on the premium paid during the half year, shall be so divided, the remainder, be carried to the premium fund, unless it shall amount to enough to allow of an additional one per cent. on the outstanding risks for the premium fund and five per cent. on the premium paid during the half year, in which case the one per cent. shall be so carried to the premium fund and an additional five per cent. shall be divided as above; and in the event of there still being a further surplus admitting a third one per cent. being carried

to the premium fund and an additional five per cent. on the premium paid during the half year, making in all 20 per cent. on the premium paid, a further division to that extent shall be made; but no division or return premium beyond 21 per cent. shall be made unless the premium fund shall amount to five per cent. on the outstanding risks, in which case the whole amount surplus shall be divided or returned as above; the amount belonging to each individual being either carried to his credit, or applied to the reduction of his premium, according as it may, or may not be, required to maintain his portion of the guarantee fund at 10 per cent. on his individual risk.

Fifth.—That in the event of the guarantee fund being at any time trenced upon, the amount withdrawn be made good at the commencement of the succeeding half year, out of the current subscriptions, so that every surviving subscriber at the time of the repayment to the guarantee fund, shall have his full amount made up to him as it stood at the time the fund was drawn upon; and in case of lapse after the guarantee fund may have been so trenced upon, the full amount to the credit of the individual risk be paid as it stood at the commencement of the half year, notwithstanding the temporary reduction in the total amount of the guarantee fund.

Sixth.—That the whole amount standing to individual credit, be paid, in the event of lapse, at the same time as the amount secured, and that this payment be made immediately on due proof of lapse.

Seventh.—That in event of a party being desirous to cease to be a mutual insurer, by withdrawing from the Society, the amount to his credit in the guarantee fund be paid to him, subject to a fine of 25 per cent., to be carried to the premium fund, and that a proportionate payment be made in the event of a party reducing the amount of his assurance; provided that in such case no payment shall be made, unless the amount at his credit shall equal 10 per cent. on his reduced risk. Parties withdrawing at the close of the present term, also to forego 25 per cent. of their surplus.

Eighth.—That instead of shares of Rs. 6,000, assurance be taken on even hundreds, not under Company's rupees 500, nor above Company's rupees 60,000.

Ninth.—That the account be converted from Sicca into Company's rupees, it being optional with existing insurers to have in value an equivalent in Company's rupees to the nearest hundred for his present insurance in Siccas, or to hold the same number of Company's rupees as he now does Siccas.

Tenth.—That the rates of premium be those of the Oriental Life Insurance Company as below, the existing Military lives insured in the Laudable paying only Civil rates, but all Military Lives insuring subsequent to the 31st December 1839 to pay the Military rates.

Eleventh.—That such other modifications be made in the existing rules as are necessary to bring them into correspondence with the above.

Twelfth.—That the Society be called the Indian Laudable and Mutual Assurance Society.

Thirteenth.—That this paper be circulated by the Secretary to every individual policy-holder, with a request that he will either vote at a special General Meeting, to be called after six months' notice from the date of circulation, or send proxy under the 32nd rule for or against these propositions, in order that at least two-thirds of the Society may be represented.

Fourth.—That in the event of the propositions being carried, they, together with the existing rules, be placed in the hands of a professional gentleman, for the purpose of a correct set of rules being prepared for general information.

It is necessary therefore of such resolutions and propositions the following rules and regulations have been prepared in manner directed by such propositions, and are now published for general information, as those by which the transfer from the New Calcutta Laidable Society, at the end of the year one thousand, eight hundred and thirty-nine, to the Indian Laidable and Mutual Insurance Society will be effected; and by which such Indian Laidable and Mutual Insurance Society, when embodied, will be governed.

NEW ORIENTAL LIFE INSURANCE COMPANY.

Adverting to the inconvenience felt by a large class of those persons in this country for whose benefit Life Insurances are effected, from the uncertain amount of dividend, and commonly protracted terms of payment, inseparable from the nature of the Institutions for that purpose then existing, it was, in January, 1822, resolved to establish a joint stock company, to grant Policies for fixed sums on approved Lives, and, in cases of lapse to pay the sum assured within a short period after proof; and which Company continued to carry on business until March, 1834, when a new association was formed on a more extended basis, under the denomination of the NEW ORIENTAL LIFE INSURANCE COMPANY, offering at once the utmost security to the public, and superior advantages to the Insured.

Persons intending to Effect an Insurance on their lives in the

NEW ORIENTAL LIFE INSURANCE COMPANY,

will attend to the following rules.

1.—The person on whose Life the Insurance is desired to be effected must wait on his usual medical attendant, in the Queen's or Company's Service, with a request to draw up a report on the state of his health, in which every particular is to be stated, that may guide the Medical Examiner of the Insurance Company in judging of the nature of the proposed risk. Medical reports on the health of applicants are not liable to be pursued by any one but the Medical Examiner and the Committee.

2.—In case the party has not had occasion to be attended in a professional capacity by any medical man at the station where he resides, it will be advisable for him to apply to the most eminent Surgeon or Physician within reach.—The report of a gentleman of known ability must always be more satisfactory than that of a person to whose name and qualifications the Medical Examiner is a stranger.

3.—In the statement given to the medical officer, and in the affidavit, great care must be taken that no omission is made; as negligence in this respect may eventually render the Policy void, in pursuance of one of the clauses which is to that effect.

4.—The affidavit of which the form is annexed, must be taken before a Magistrate, or where there is no Magistrate, before the Commanding Officer of

the station, as soon as possible after the party has appeared before the Medical Officer for examination, whether the medical report be at the time actually drawn out or not.

5.—If a Policy be granted, the ordinary Premium required by the Insurers may be increased according to opinion formed relative to the Life on which the risk is proposed to be taken. But whether the risk be altogether declined, or a higher rate of premium than usually be required, the Committee and Medical Examiner, as well as the Agents, are prohibited from offering any explanation, or entering into any correspondence on the subject.

6.—The declaration of the Medical Reporter, and the affidavit—which are herewith annexed,—must, when duly attested, be forwarded along with the Medical Report, as speedily as possible, to the Secretary at Calcutta.

The following are the General terms on which Insurances are effected by the Company.

The Agents of the Company is authorized to receive applications for Insurances on Lives, for any age from 16 to 60, and for any amount, from One to Fifty Thousand Rupees, in even sums of Hundred Rupees: the sum insured to be payable three months' after proof of lapse.

Premiums are payable half yearly in advance.

In the event of a lapse occurring during the first six months of the period covered by the Policy, the Premium for the succeeding six months will be deducted from the amount insured, it being understood that a year's Premium shall in all cases be paid.

Insurance in the case of absentees will be computed from the date of the certificate of health, unless otherwise required. Persons insured may assign their Policies.

Where an Insurance has been effected in the seven years' class, the Insured may have a new policy for the same amount and for the like term, or for life, at the rate, and upon the terms, on which the Society may be at the time granting policies, without a fresh certificate of health, on application to that effect and surrender of the original policy at the end of six years from its date, or twelve months before the period at which it would finally expire.

Risks may be at any time reduced, but no return of premium will in any case be allowed.

Before any dividend can be made amongst the members of the New Oriental Life Insurance Company, a capital must have accumulated and be invested equal to the average amount of one and a half years' losses, reckoned on the amount of the continuing outstanding risks.

Three-fourths of the profits are divided among the shareholders according to their respective shares, and one-fourth among such policy holders as are likewise Members of the office, in the proportion of the premium paid by them during the period to which such dividend may refer.

The Secretary to the Agra Bank has been empowered, in conjunction with a Committee, to act for the office in the N. W. Provinces, and parties requiring Insurance can apply direct to him.

Copies of the deed may be had on application at the office of the agent Mr. J. H. Fergusson, where a list of the proprietors may be inspected.

Mr. Fergusson will be happy to undertake the management of the details for effecting Insurance, and for the sale and purchase of shares in this Society, free of all charge, provided he is kept in funds to meet subscriptions as they become due.

No Medical fees required.

UNIVERSAL ASSURANCE SOCIETY FOR LIVES, &c. &c. &c.

ESTABLISHED IN LONDON AND CALCUTTA, 1834,

Empowered by special act of Parliament.

CAPITAL £500,000 in 5,000 Shares of £100 each.

The Directors of this Society have caused investigation to be made with great care into the existing Institutions for Life Assurance, &c. &c., and they trust they have been fortunate in selecting from each what, as a whole, will place their Establishment on the most judicious and satisfactory footing both to the Proprietors and the Assured. They request particular attention to the rates, which being founded on the most accurate observations of the duration of human life, are as moderate as is consistent with perfect security.

The plan of this Society is to transact all its business on such terms as to leave, in all human probability, a small, but certain excess of profit on the general result of its transactions. A small portion of that profit is set apart as a compensation to the Proprietors who have advanced the Capital necessary for defraying the unavoidable expence of the Institution, and who have pledged the subscribed amount of their Capital in order to afford that responsibility which relieves the Assured from any contingency of loss to which they might be liable without the intervention of such a guarantee.

ADVANTAGES OFFERED BY THIS SOCIETY.

The profits are declared in each year, on the second Wednesday in May, on which date all Persons assured in the Society for the whole term of life, whose Policies have been in existence five complete years, are entitled to participate. The practice of an annual division, as observed by Mr. Babbage, "distributes the profits with more regularity and justice than any other," and it is cer-

pecially advantageous to persons of advanced years, who cannot hope to participate in many septennial, or decennial divisions.

One-fifth of the ascertained profits of the five preceding years is divided between the Policy-holders, and Share-holders,—three-fourths to the former, and one-fourth to the latter. The remaining four-fifths are set apart to enter, into the average of the succeeding years, and thus to provide against unforeseen contingencies.

THE FIRST DIVISION OF PROFITS WAS DECLARED ON THE 13TH MAY 1840, IN LONDON, AND ON THE 15TH AUGUST IN INDIA, AMOUNTING TO A REDUCTION OF 60 PER CENT. ON THE ANNUAL PREMIUM OF ALL POLICIES ENTITLED TO PARTICIPATION.

The following table will shew the operation of the reduction made by the Society.

Age when Policy was issued.	Date of Policy.	Sum Assured.	Original Premium.	Reduction	Annual Premium payable in 1840.
20	May, 1835.	Rs. 10,000	Rs. 420	Rs. 252	Rs. 168
30	"	" 10,000	" 480	" 288	" 192
40	"	" 10,000	" 500	" 354	" 200
50	"	" 10,000	" 710	" 444	" 266
60	"	" 10,000	" 1,030	" 618	" 412

This system of reduction in the premiums affords immediate benefit to the Assured, or enables them to secure a considerable bonus by effecting a new Policy.

Separate tables, both Civil and Military, have been adopted for the *whole of life*, at reduced rates for such persons as may prefer a lower rate of Premium to participation in the general profits.

The Society makes a natural distinction between persons exposed to the hazards of Military and Maritime occupations, and those whose occupations are of a Civil nature; but members of the Military Service holding offices purely Civil, and subject to no extra risk, will be charged the Civil rate of premium only while engaged in duties purely Civil. It will be in the discretion of the Directors in each particular case to say whether the higher or the lower rate of Premium shall be chargeable, and that discretion will be regulated by the particular circumstances of the case.

When application is made for assuring a life subject to more than ordinary hazard, an augmented Premium will be charged proportionate to the increased risk, the rate of which will be regulated by the strictest attention to justice between the Society and the Assured, according to circumstances.

Premiums are *ordinarily payable half yearly in advance*; but policy-holders are at liberty to make arrangements with the Society to pay their premiums in *one amount*, in annual or quarterly payments, or for a given number of years, viz. 5, 10, 15, or 20. Some persons may wish to avail themselves of a present season of prosperity, and adopt the latter course, in which case (although their contributions will cease with the expiration of the term they may fix upon) their share of the profits will continue to be added to their policies annually during the remainder of life.

The Parent Institution being in London, with a similar Establishment in Calcutta for granting Policies, Premiums, as well as claims are payable in either country at the option of the Policy-holder. The appointment of Sub-Committees at Madras and Bombay with power to grant Policies, affords similar facilities to persons residing at either of the sister Presidencies.

All Policies becoming claims on the Society will be discharged within three months after satisfactory proof of the death, and cause of death, of the assured shall have been furnished to the Directors either in London or Calcutta.

The Directors of the India Branch of the Society are empowered to treat for the purchase of Policies on which Premium shall have been paid for a period of not less than five years, or to advance, if required, on such Policies, by way of loan, two-thirds of the estimated value.

The accounts of this Society, after being investigated by Auditors, chosen as well by the Assured as by the Proprietors, are laid before General Meetings convened twice a year for that purpose ;—In like manner the accounts of the Parent Society are regularly transmitted to India for inspection, the India Branch enjoying reciprocal advantages with the Parent Society.

Where the applicant for Assurance makes no mention of the date from which the Assurance is desired to take effect, the Policy will be issued on the date of approval of the risk by the Directors, but no Assurance to be binding on the Society until the first premium shall have been actually paid to the Agents.

Every proposal for Assurance will be immediately attended to, and the Assurance completed generally within a few days after the application is made.

All applications for Assurance must be accompanied by a Medical Fee of Eight Rupees.

The Tables, Blank Forms, and other particulars requisite to enable persons to effect Assurances, may be had on application to the Agents.

By order of the Directors,

BAGSHAW AND CO.

1st September, 1840.

Agents and Secretaries,

Instructions to Persons desirous of effecting an Assurance on their Lives in the Universal Assurance Society.

1.—The Person on whose Life the Assurance is to be effected, must wait on his usual Medical Attendant with the accompanying letters, and transmit the same to the Directors of the Society agreeably to the Instructions given.

2.—In case of the absence of the usual Medical Attendant, and the Certifying Surgeon cannot of his own knowledge answer the queries put to him as to the general habits of the person applying for assurance, such other Certificate or Certificates may be furnished as may be presumed calculated to satisfy the Directors.

3.—The report of the Surgeon will be considered as strictly confidential; the Official Medical Adviser of the Society will alone be consulted when the advisableness of any risk admits of doubt.

4.—An Affidavit, of which the form is annexed, must be taken before a MAGISTRATE, or, where there is no Magistrate, before the PRINCIPAL CIVIL or MILITARY OFFICER OF THE STATION, or a solemn declaration according to the same form must be made before either of the DIRECTORS or the AGENTS OF THE SOCIETY IN CALCUTTA, MADRAS OR BOMBAY, as soon as possible after the party has appeared before the Surgeon for examination.

5.—Applicants being conscious of any of the diseases enumerated in the Declaration and Affidavit, may note the same, that the Directors may consider whether an additional premium will cover the additional risk.

6.—Should the Directors agree to take a risk more or less objectionable, a rate of premium higher than ordinary will be stipulated for accordingly, to which the Applicant may of course assent or not, as he may judge expedient. But whether a risk be altogether declined, or a rate of premium higher than the ordinary be proposed, the officers of the Society are prohibited from offering any explanations on the subject.

7.—These Instructions, with the declaration of the Medical Reporter, and the Affidavit or declaration hereunto annexed, must, when duly attested, be forwarded along with the report, without any necessary delay, to the Directors of the Society.

BAGSHAW AND CO.

Agents and Secretaries.

N. B.—Persons residing in or near Calcutta are also required to appear before the Medical Officer of the Society, Dr. Alexander Garden.

CONDITIONS.

1.—The payment of Premiums must be made within twenty-eight days after the day they shall become due, or the Policy will be void; but, upon proof being given, to the satisfaction of the Managing Committee or Directors, that the party whose Life has been assured continues in good health, the Policy may be revived at any period within three months, on payment of a fine of one-half per cent. on the sum assured, or at any period within six months, on the payment of such fine as the Directors may think reasonable.

2.—Assurances shall be void if the parties whose lives have been assured shall without having obtained the previous written consent of the Managing Committee or Directors for the time being, go to any of the excepted places enumerated below, or enter into, or engage in, any Military, Maritime or other hazardous service or employment whatever, other than their declared regular professional duties or services, but no additional premium will be demanded from any assurer proceeding on public duty in obedience to the orders of his superiors to any of the excepted places.

3.—If the assured shall die by duelling, by their own hands, or by the hands of justice, this Policy shall become void so far as respects such persons; but, in such cases, the Managing Committee or Directors are empowered to allow to the representatives of the person so dying, any part of the sum assured as they shall think fit; the Assurance, however, shall remain in force so far as any other person or persons shall have acquired a bona-fide interest therein, by assignment or by legal or equitable claim; the extent of such interest to be proved to the satisfaction of the Directors.

4.—Where the application for Assurance makes no mention of the date from which the Assurance is desired to take effect, the Policy will be issued the date of approval of the risk by the Directors. No assurance to be binding on the Society until and unless the first premium shall have been actually paid to the Agents.

5.—In case of lapse of life within the first six months of any year of the time covered by the Policy, the Premium for the following six months, if not already paid, will be deducted from the sum assured, it being agreed that Premium for the whole of every year shall in all cases be paid.

6.—Claimants must make proof of the decease of the person on whose life the Policy is effected, and give such other information respecting the same (particularly as to the disease or other occasion of death,) as the Directors may reasonably require.

7.—No receipts are to be taken for any Premium of Assurance or Deposit, but such as are printed and issued from the office, and signed by the Agents of the Society.

8.—The places excepted, and above referred to, are declared to be Arracan, the Soonderbuns of Bengal, Assam, and all places subject to periodical visitations of the Plague. Upon the lives of persons insured, resorting to any of the above excepted places, additional Premium will be demandable at the discretion of the Managing Committee or Directors.

The right honorable the Governor-General in Council, directs that the following rules of a Savings' Bank, established in Calcutta, under the guarantee and responsibility of Government, be published for general information :—

1. The Bank to be denominated "The Government Savings' Bank."
2. All classes, British and native, may invest their savings in the Government Savings' Bank.
3. The return of the exact sum deposited, together with the interest due thereon at the undermentioned rate, is secured to the depositor under guarantee of the Supreme Government.

4. The general direction and control of the Bank, shall be vested in a Committee of Management, consisting of covenanted civil and military officers of the Government, and other persons, to be nominated by the Governor-General in Council. The committee shall meet at such stated periods as may be necessary for the due and efficient control of the proceedings of the Bank.

5. The Government agents are charged with the immediate superintendence and execution of all details connected with the Bank. They will also be ex-officio members of the Committee of Management. The third government agent will be ex-officio Secretary to the Bank.

6. A register of deposits will be kept, and generally such other accounts as may be determined on, and approved of, by the Managing Committee.

7. Any sum not less than one rupee will be received in deposit.

8. Whenever the sum deposited by any one individual shall amount to 500 rupees, the same will be transferred from the Bank and subscribed on account of the depositor to the four per cent. Government loan, until further notice, unless an intimation of the withdrawal of a portion of it, be given by the depositor within one month after it has reached that amount.

9. Interest at 4 per cent. per annum will be allowed on deposits until further notice.

10. Interest will be calculated on a deposit, from the first day of the month succeeding that in which it shall be received; and up to the last day of the month preceding that in which it shall be withdrawn. No interest will be allowed for broken periods of a month, nor calculated on fractional parts of a rupee.

11. The Government reserves to itself the power of lowering or raising the rate of interest; such alteration not to affect deposits above 500 rupees previously invited in public securities, and due notice to be given in the Calcutta Gazette of the intention of Government, six months before the alteration shall take effect.

All deposits will be regularly entered in a book at the time they are made, and the depositor of the deposit made at the presidency, will be furnished with a small book having a duplicate of the entry. This book is to be brought to the Bank whenever any sum is deposited or withdrawn. The account thus kept will be closed on the 30th of April of every year, and the balances of interest due at that period, will be paid to the depositor, or carried to account, thenceforward to accumulate at compound yearly interest, until it shall amount to 500 rupees, when the same will be transferred from the accounts of the Bank, subscribed on account of the depositor to the Government 4 per cent. loan, as per rule 8, unless notice of withdrawal be given within one month as above, or unless the rate of interest be altered, as provided for in rule 11.

14. No sum deposited to be transferrable, excepting on the personal application of the depositor, supported by written sanction. When peculiar circumstances render a deviation from this rule necessary, the case shall be submitted to the Committee, of Management for their sanction.

15. No person will be allowed to deposit any money without making known his or her name, together with his or her profession, business, occupation calling, and residence. A duplicate of this description will be entered in each depositor's book, to be produced whenever any sum is afterwards deposited or withdrawn.

16. Depositors will be at liberty at any time to withdraw any sums, or portions of sums, deposited by them, receiving interest calculated up to the end of the month preceding that in which the withdrawal is made.

17. As a general rule, deposits, with the interest due thereon, will be re-paid to the depositors personally in all practicable cases. In the case of individuals unable to attend in person, the Secretary will exercise his discretion in regard to re-payment of deposits to responsible persons duly authorized by such absentees to receive the same.

DORJELLING GARDEN AND PLANTATION SOCIETY.

1st. A nursery for oaks, chesnuts, maples, rhododendrons, pines, and all other forest trees growing in these Mountains, to supply the Agricultural and Horticultural Society in India, and establishments and individuals in Europe, America, the Cape, and New Holland, free of expence beyond carriage and packing.

2d. A nursery for fruit trees of all kinds, particularly European, such as gooseberries, currants, cherries, apples, pears, plums, &c. &c. which cannot be raised in the plains, but which, by being first reared and planted out here, may either supply seed, which can be raised below, or the young trees themselves can be supplied to parties who wish to try the experiment of insuring them in the climate of India.

3d. A garden for the purpose of growing vegetable seed of the best quality, and to ensure this the vegetables planted will be entirely appropriated to the raising of seed, and not for the supply of vegetables for the table.

4th. A garden for flower seeds on a like principle. And should the circumstances of the case admit, we further propose, that

5th. The whole establishment shall, as much as possible, be formed on the model of a botanic garden, and be specially adapted, in the strictly botanic part to the vegetable productions of these regions, not, however, excluding those of other countries.

3d. To accomplish these things, a portion of ground will be required at the stations which it is probable may be granted free of cost, in consideration of the great public benefit such a scheme is calculated to confer; but if not, we are willing to pay such yearly quit rent as may be reasonable.

4th. As no plan can be permanent without a permanent income, we propose to raise by subscription a sum the interest of which may, (together with what we hope to obtain from the Agricultural and Horticultural Society), be sufficient to maintain the establishment; and in that case, to prevent loss, all funds will be invested in Government Securities.

5th. To effect this it will perhaps be expedient to form a Society to be called "THE DORJELLING GARDEN AND PLANTATION SOCIETY," which will act in conjunction with and as a branch of, the Agricultural and Horticultural Society; and of which, all persons subscribing to the amount of 50 rupees and up wards, within the ensuing twelve months, will have a right to be Members without being ever afterwards called upon for any further subscription.

6th. The produce of the garden, trees, plants, seeds, &c., will be distributed as those of the Agricultural and Horticultural Society are, giving the preference to Members who will receive them free of all expence except that of carriage and packing; and such as remain will open to the public at a reasonable extra charge, to be hereafter determined upon.

7th. As no profit is to be expected, the establishment will be extended according to the extension of its means.

8th. We have thus stated the object and means proposed to accomplish it, of a Society which, if properly conducted, will be of very great benefit both to this and to other countries. More particular details must be left for future consideration by the subscribers, and a Managing Committee at Dorjelling. We have only further to observe, that this climate is peculiarly adapted for raising vegetables; the carrots, potatoes, cabbages, peas, and in short all yet tried, are quite equal to those of Europe; and the importance of an abundant supply of good garden seeds, growing in the country, and consequently not liable to fail like those brought from Europe; the Cape, and other distant places, need not be dwelt upon.

While the introduction of forest trees of so noble a description as those of this region, into our own country and the temperate latitudes of Europe, America, New Holland and the Cape would, of itself, if nothing else of immediate benefit to this country were to arise from it, be an object of incalculable value. We cannot doubt, therefore of raising a sum fully adequate to the end in

view ; and as a beginning, the undersigned beg to subscribe the sum of 50 rupees each, and one of our members, Mr. Pearson, has agreed to act as Secretary and Manager.

N. B. The garden is bounded on the South and West by the Bamboos now defining Colonel Lloyd's location, on the East and North by the Road leading to the great Spring, and the House of the European Sergeants ; the boundary towards the valley will be the junction of two streamlets, which have their sources in the ground itself.

THE BENGAL HURKARU

A DAILY NEWSPAPER,

PRINTED ON AN EXTRA LARGE IMPERIAL SHEET.

WITH WHICH IS INCORPORATED

THE INDIA GAZETTE AND BENGAL CHRONICLE,

ALSO

THE BENGAL HERALD & CALCUTTA LITERARY GAZETTE.

THE BENGAL HURKARU, the senior and the largest, journal of India, was established, as a *Weekly Newspaper*, in January, 1795. It was originally printed on small folio sheets, and published every Tuesday morning, with supplements, as occasion required, during the week: subsequently, the day of its publication was changed to Saturday, and eventually it became a *daily Paper*.

The first number of the daily Hurkaru (being likewise the *first DAILY Paper* ever published in India) appeared on the 29th April, 1819, printed on a single quarto sheet, which was then judged the utmost that could be got up daily at an Indian Press. Very soon, however, a second sheet was considered necessary and means were found to publish it; and on the 1st July, 1821, a third sheet was added, and the *material* upon which it was printed changed from Bengal medium to good Europe royal paper—the first ever used for an Indian Newspaper. Quarto, and even small folio, sheets, having, however, been found, by experience, unsuited to the purposes of a *daily paper*, on the 1st February, 1824, it was printed on a royal folio sheet, and so continued until 1st January, 1834, when it assumed its present *imperial* size.

The interests and resources of several Calcutta journals have, from time to time, merged in the BENGAL HURKARU, and it received an important accession on the 1st October, 1834, when the then oldest Newspaper in India, (*The India Gazette*) with all its stock, was united to the Hurkaru Press; on the 1st January 1844 the *Bengal Herald* and *Calcutta Literary Gazette* were added as a Weekly Supplementary (7th) Sheet—thus rendering the *Bengal Hurkaru*, the largest and most comprehensive Newspaper, ever yet published in India.

The BENGAL HURKARU is *delivered* free of expense, every morning, by the peons of the establishment, throughout Calcutta and its environs, including Russiapugla, Garden Reach, Seebpore, Howrah, Sulkea, Cossipore, Dum-Dum, Barrackpore, Sâkrampore, Chandernagore, Chinsurah, and Hoogly. A second edition is despatched by Dawk every evening, bearing postage.

The weight allowed for Newspapers is $3\frac{1}{2}$ sicca weight each cover, upon which postage is levied at two rates—two annas to stations within 400 miles and three annas to stations exceeding that distance.

CALCUTTA, JANUARY 1, 1844.

SAMUEL SMITH & CO.

 The *Bengal Hurkaru* is regularly filed in London by Mr. P. L. Simmonds, Agent for the Colonial Press—Newspapers, Advertisements, &c. No. 18, Cornhill, opposite the Royal Exchange, where orders and advertisements for this journal will be received.

" SUBSCRIPTIONS AND " ORDERS "

The Publishers beg to draw attention to the distinction between *permanent Subscribers* to their periodical works, who direct their transmission until countermanded and *Subscriptions or Orders* which do not give such directions and are therefore considered by the publishers to apply only to a particular volume or to the year in which the order is received

The Publishers are aware, that when an order is sent to them to put the writer's name down for a copy of the Directory, or as " a Subscriber to the Directory " it is often expected that the work will be sent to them regularly but having frequently caused to Subscribers and suffered themselves, much inconvenience and loss by so construing doubtful orders, the Publishers have thought it right to explain and solicit attention to the distinction between *permanent Subscribers* and *Orders or Subscriptions* for the current year only

This explanation the Publishers trust will be acceptable to all their supporters but particularly so to Gentlemen in the *Mofussil* who, considering themselves *permanent Subscribers*, though the publishers have no authority for so registering them have omitted to forward any order for the work, until the whole of the copies had been sold. To prevent the frequent recurrence of this misunderstanding, the Publishers affix a List of *Permanent Subscribers* to every Edition of their Directory and they solicit Gentlemen whose names are not included in this List but who may wish to receive the work *regularly as soon as published* to favour them with directions to that effect, specifying whether they require the 2d and 3d Editions, or only the Annual one.

N. B. *Mofussil* orders cannot be attended to from Gentlemen who have not local accounts open with the Publishers, unless a reference for payment be also remitted with the order

 Orders from *non Subscribers* to be addressed to their own Book-sellers, or Agents if convenient, otherwise to the Publishers in CALCUTTA, or to their agents at the undermentioned places —
